COMAND
Supplement
Symbols
In this Operator’s Manual you will find the following symbols:

⚠️ WARNING
Warning notes make you aware of dangers which could pose a threat to your health or life, or to the health and life of others.

 fı Environmental note
Environmental notes provide you with information on environmentally aware actions or disposal.

⚠️ Notes on material damage alert you to dangers that could lead to damage to your vehicle.

ⓘ Practical tips or further information that could be helpful to you.

► This symbol indicates an instruction that must be followed.

► Several of these symbols in succession indicate an instruction with several steps.

▷ This symbol tells you where you can find more information about a topic.

ｽﾘｰｽﾞ This text indicates a message in the multimedia display.

Parts of the software in the vehicle are protected by copyright © 2005 The FreeType Project http://www.freetype.org. All rights reserved.
Welcome to the world of Mercedes-Benz

First of all, familiarize yourself with your multimedia system. Read these operating instructions, particularly the safety and warning notes, before you drive off.

This will help you to obtain the maximum pleasure from your multimedia system and avoid endangering yourself and others.

The equipment level and functions of your multimedia system may differ depending on:

- Model
- Order
- Country specification
- Availability

Mercedes-Benz therefore reserves the right to introduce changes in the following areas:

- design
- equipment
- technical features

The equipment in your vehicle may therefore differ from that shown in the descriptions and illustrations.

Consult an authorized Mercedes-Benz Center if you have further questions.

The Operator's Manual and all supplements are integral parts of the vehicle. You should always keep it in the vehicle and pass it on to the new owner if you sell the vehicle.

The technical documentation team at Daimler AG wishes you safe and pleasant motoring.

Mercedes-Benz USA, LLC
Mercedes-Benz Canada, Inc.

Operating safety

Important safety notes

⚠️ WARNING
If you operate information systems and communication equipment integrated in the vehicle while driving, you will be distracted from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident. Only operate the equipment when the traffic situation permits. If you are not sure that this is possible, park the vehicle paying attention to traffic conditions and operate the equipment when the vehicle is stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system.

The multimedia system calculates the route to the destination without taking account of the following, for example:

- traffic lights
- stop and yield signs
- merging lanes
- parking or stopping in a no parking/no stopping zone
- other road and traffic rules and regulations
- narrow bridges

The multimedia system can give incorrect navigation commands if the actual street/traffic situation does not correspond with the digital map’s data. Digital maps do not cover all areas nor all routes in an area. For example, a route may have been diverted or the direction of a one-way street may have changed.

For this reason, you must always observe road and traffic rules and regulations during your journey. Road and traffic rules and regulations always have priority over the system’s driving recommendations.

Navigation announcements are intended to direct you while driving without diverting your attention from the road and driving. Please always use this feature instead of consulting the map display for directions. Looking at the icons or map display can distract you from traffic conditions and driving, and increase the risk of an accident.

Bear in mind that at a speed of only 30 mph (approximately 50 km/h), your vehicle covers a distance of 44 feet (approximately 14 m) every second.

This equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65.

This equipment has very low levels of RF energy that is deemed to comply without maximum permissive exposure evaluation (MPE). However, it is recommended to install it at a distance of at least 8 inches (approx. 20 cm) between the radiation source and a person’s body (not including limbs such as hands, wrists, feet and legs).

⚠️ WARNING
Modifications to electronic components, their software as well as wiring can impair their function and/or the function of other networked components. In particular, systems relevant to safety could also be affected. As a result, these may no longer function as intended and/or jeopardize the operating safety of the vehicle. There is an increased risk of an accident and injury.

Never tamper with the wiring as well as electronic components or their software. You should have all work to electrical and electronic equipment carried out at a qualified specialist workshop.

Declarations of conformity

Vehicle components which receive and/or transmit radio waves

USA only: The wireless devices of this vehicle comply with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1) These devices may not cause interference, and
2) These devices must accept any interference, including interference that may cause undesired operation of the device.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
Canada only: The wireless devices of this vehicle comply with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:
1) These devices may not cause interference, and
2) These devices must accept any interference, including interference that may cause undesired operation of the device.

Correct use
You need to observe the following information when using the multimedia system:
- the safety notes in this manual
- traffic rules and regulations
- laws and safety standards pertaining to motor vehicles
Attaching metalized retrofit film to the windshield may affect radio reception. This can have a negative impact on all other antennas (e.g. emergency call antenna) in the vehicle interior.

Protection against theft: this device is equipped with technical provisions to protect it against theft. Further information on protection against theft can be obtained from an authorized Mercedes-Benz Center.

Qualified specialist workshop
Read the information on qualified specialist workshops in the vehicle Operator's Manual.

Function restrictions
For safety reasons, some functions are restricted or unavailable while the vehicle is in motion. You will notice this, for example, because either you will not be able to select certain menu items or a message will appear to this effect.

Data stored in the vehicle

Data recording
A wide range of electronic components in your vehicle contain data memories.

These data memories temporarily or permanently store technical information about:
- the vehicle's operating state
- events
- malfunctions
In general, this technical information documents the state of a component, a module, a system or the surroundings.
These include, for example:
- operating conditions of system components, e.g. fluid levels
- the vehicle's status messages and those of its individual components, e.g. number of wheel revolutions/speed, deceleration in movement, lateral acceleration, accelerator pedal position
- malfunctions and defects in important system components, e.g. lights, brakes
- vehicle reactions and operating conditions in special driving situations, e.g. air bag deployment, intervention of stability control systems
- ambient conditions, e.g. outside temperature

This data is of an exclusively technical nature and can be used to:
- assist in detecting and rectifying faults and defects
- analyze vehicle functions, e.g. after an accident
- optimize vehicle function

The data cannot be used to trace the vehicle's movements.

When your vehicle is serviced, technical information can be read from the event data memory and fault data memory.
Services include, for example:
- repair services
- service processes
- warranty events
- quality assurance

The vehicle is read out by employees of the service network (including the manufacturer) using special diagnostic testers. You can obtain more information there, if required.
After a malfunction has been rectified, the information is deleted from the malfunction memory or is continually overwritten.
When operating the vehicle, situations are conceivable in which this technical data, in connec-
tion with other information (if necessary, after consultation with an authorized expert), could be traced to a person. Examples include:

- accident reports
- damage to the vehicle
- witness statements

Further additional functions that have been contractually agreed upon with the customer allow certain vehicle data to be conveyed by the vehicle as well. The additional functions include, for example, vehicle location in case of an emergency.

### COMAND/mbrace

If the vehicle is equipped with COMAND or mbrace, additional data about the vehicle’s operation, the use of the vehicle in certain situations, and the location of the vehicle may be compiled through COMAND or the mbrace system.

For additional information please refer to the COMAND User Manual and/or the mbrace Terms and Conditions.

### Event data recorders

This vehicle is equipped with an event data recorder (EDR). The main purpose of an EDR is to record data that will assist in understanding how a vehicle’s systems performed in certain crash or near crash-like situations, such as during air bag deployment or when hitting a road obstacle. The EDR is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less.

The EDR in this vehicle is designed to record such data as:

- how various systems in your vehicle are operating
- whether or not the driver and passenger seat belts are fastened
- how far (if at all) the driver is depressing the accelerator and/or brake pedal and
- how fast the vehicle is traveling

This data can help provide a better understanding of the circumstances in which crashes and injuries occur. NOTE: EDR data is recorded by your vehicle only if a non-trivial crash situation occurs; no data is recorded by the EDR under normal driving conditions and no personal data (e.g., name, gender, age, and crash location) are recorded. However, other parties, such as law enforcement, can combine the EDR data with the type of personal identification data routinely acquired during a crash investigation.

To read data recorded by an EDR, special equipment is required, and access to the vehicle or the EDR is needed. In addition to the vehicle manufacturer, other parties that have the special equipment, such as law enforcement, can read the information by accessing the vehicle or the EDR.

EDR data may be used in civil and criminal matters as a tool in accident reconstruction, accident claims, and vehicle safety. Since the Crash Data Retrieval CDR tool that is used to extract data from the EDR is commercially available, Mercedes-Benz USA, LLC ("MBUSA") expressly disclaims any and all liability arising from the extraction of this information by unauthorized Mercedes-Benz personnel.

MBUSA will not share EDR data with others without the consent of the vehicle owners or, if the vehicle is leased, without the consent of the lessee. Exceptions to this representation include responses to subpoenas by law enforcement; by federal, state or local government; in connection with or arising out of litigation involving MBUSA or its subsidiaries and affiliates; or, as required by law.

Warning: The EDR is a component of the Supplemental Restraint System ("SRS") Module. Tampering with, altering, modifying or removing the EDR component may result in a malfunction of the SRS Module and other systems.

State laws or regulations regarding EDRs that conflict with federal regulation are pre-empted. This means that in the event of such conflict, the federal regulation governs. As of February 2013, 13 states have enacted laws relating to EDRs.

### Information on copyright

Information on licenses for free and Open Source software used in your vehicle and in the electronic components can be found on this website: http://www.mercedes-benz.com.opensource.
Your multimedia system equipment

These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions.

Read the information on qualified specialist workshops in the vehicle Operator's Manual.
Components

The multimedia system consists of:

- the display
  The display has 960 x 540 pixels
- the single DVD drive
- the controller
- the touchpad (for multimedia system with touchpad)
- ports in the center console (2 x USB, SD-card slot)
  An iPod® is connected via a USB cable.

The controller and touchpad provide two options for entering characters and selecting functions.

Functions

- **HD FM radio and HD AM radio/satellite radio**
- **Media**
  - Media support: audio CD, MP3 CD, DVD video, two connection options for Media Interface (e.g. iPod®), SD card, Bluetooth® audio, 10.8 GB Media Register on the hard drive
  - Music search using all media
- **Sound system**

You can select from two sound systems:
- Burmester® surround sound system
- Burmester high-end surround sound system for ultimate listening pleasure

**Navigation system**
- Navigation via the hard drive
- Destination entry using keyword search
- Realistic 3D map with textured city models
- Personal POIs and routes using SD memory card
- Navigation functions, e.g. Drive Information
- Dynamic route guidance with traffic reports via SIRIUS satellite radio
- **Communication**
  - Messaging functions (text messages, email)
  - Address book
  - Internet browser
  - Mercedes-Benz Apps with online search, Facebook, stock prices, news and much more
  - Mercedes-Benz Companion app
  - Mercedes-Benz Mobile Website
  - Wi-Fi interface for the connection of a smartphone to the multimedia system
- **SIRIUS Weather**
  - Weather data as an information chart (current forecast, 5-day preview, detailed information)
  - Weather data on the weather map, e.g. rain radar data, storm characteristics and the track of tropical cyclones (hurricanes, typhoons)
- **Vehicle functions**
  - Vehicle settings, e.g. belt adjustment
  - Rear view camera
  - DYNAMIC SELECT (individual drive program)
- **Climate control functions**
  Setting climate mode, for example
- **Favorites button**
  Fast access to favorites functions using the favorites button on the controller or on the touchpad

The display has an automatic temperature-controlled switch-off feature. The brightness is automatically reduced if the temperature is too high. The display may then temporarily switch off completely.

**Overview**

1. Status bar with displays
2. Cover view (if available)
3. Main display field
4. Climate control status display

The example shows media playback in SD memory card mode.

**Cleaning instructions**

⚠️ Do not touch the display. The display has a very sensitive high-gloss surface; there is a risk of scratching. If you have to clean the screen, however, use a mild cleaning agent and a soft, lint-free cloth.

The display must be switched off and have cooled down before you start cleaning. Clean the display screen, when necessary, with a commercially available microfiber cloth and cleaning agent for TFT and LCD displays. Do not apply pressure to the display surface when cleaning it, as this could cause irreversible damage to the display. Then, dry the surface with a dry microfiber cloth.

Avoid using alcoholic thinners, gasoline or abrasive cleaning agents. These could damage the display surface.
Buttons and controller

Overview

Back button
You can use the button to exit a menu or to call up the basic display of the current operating mode.

► To exit the menu: briefly press the button.
The multimedia system changes to the next higher menu level in the current operating mode.

► To call up the basic display: press the button for longer than two seconds.
The multimedia system changes to the basic display of the current operating mode.

Controller
The controller in the center console lets you:
• select menu items on the display
• enter characters
• select a destination on the map
• save entries

Favorites button
With the favorites button, you can select, add or edit favorites.

► Press the favorites button on the controller.
The favorites are displayed.

► To select a favorite: turn and press the controller.

Other functions (page 31).
**Touchpad**

Alternatively, you can use the touchpad to select and enter information (▷ page 21).

**Multifunction steering wheel**

![Multifunction steering wheel](image)

1. Multifunction display
2. Right control panel
3. Left control panel

**Left control panel**

- **Press briefly:**
  - Calls up the main menu
  - Scrolls in lists
  - Selects a menu or function
  - In the *Radio/Media* menu: opens the track or station list and selects a station, an audio track or a video scene
  - In the *Telephone* menu: switches to the phone book and selects a name or a telephone number

- **Press and hold:**
  - Scrolls quickly through all lists
  - In the *Radio/Media* menu: selects a station, audio track or video scene using rapid scrolling
  - In the *Telephone* menu: starts rapid scrolling if the phone book is open

**OK**

- In all menus: confirms the selected entry in the list
- In the *Radio/Media* menu: opens the list of available radio sources and media
- In the *Telephone* menu: switches to the phone book and starts dialing the selected number

**£**

- Switches off the Voice Control System (see the separate operating instructions)

**→**

- **Press briefly:**
  - Back
  - In the *Radio/Media* menu: deselects the track, station list or list of available radio sources and media
  - Hides display messages
  - Exits the telephone book/redial memory

- **Press and hold:**
  - Calls up the standard display in the *Trip* menu

**Right control panel**

- **Calls up the main menu**
- **Exits the telephone book/redial memory**

- **Makes or accepts a call**
- **Switches to the redial memory**

- **Adjusts the volume**

- **Mute**

- **Switches on the Voice Control System (see the separate operating instructions)**

**Touchpad**

**Touchpad overview**

- Do not use any sharp objects on the touchpad. This could damage the touchpad.
Using the touchpad, you can:
- select menu items in the display (page 22)
- enter characters (handwriting recognition) (page 24)
- control the active audio source (page 26)
- create, manage and call up favorites (page 31)
- enter destinations in the navigation system
- save entries

Further information on operating the touchpad (page 22).

### Switching the touchpad on/off
- Press **Vehicle** in the main function bar. The vehicle menu is displayed.
- To select **System Settings**: slide 1, turn and press the controller. A menu appears.
- To select **Touchpad**: turn and press the controller.
- Select **Activate Touchpad**. The touchpad is switched on ✔ or off □.

---

**Operating the touchpad**

**Selecting a menu item**

- Use one finger to touch the touch-sensitive surface.
- Swipe your finger up, down, to the left or right. The selection in the display moves in accordance with the direction of movement.

You can navigate in lists or menus in this way.

**Confirming a selection**

Do not press your finger too hard on the touchpad. This could cause malfunctions.

- Use one finger to press the touch-sensitive surface until you reach the pressure point. A menu, an option or an application is started.
Calling up quick access for audio

Use two fingers to touch the lower part of the touch-sensitive surface.

Swipe your fingers up.

Quick access is displayed.

Further information on quick access for audio (⇒ page 26).

Hiding quick access for audio

Use two fingers to touch the touch-sensitive surface.

Swipe your fingers down.

Quick access is hidden.

Operating the control for vehicle and sound settings

Touch the touch-sensitive surface with two fingers, spaced slightly apart.

Turn both fingers clockwise.

The control setting is increased.

or

Turn both fingers counter-clockwise.

The control setting is decreased.

Moving the map

Use one finger to press the touch-sensitive surface until you reach the pressure point.

The crosshair is shown.

Touch the touch-sensitive surface again with one finger.

Swipe your finger in any direction.

The map is moved is the direction of movement.
Zooming in on the map

Touch the touch-sensitive surface with two fingers, spaced slightly apart.
Glide your fingers away from each other. The map scale is magnified.

Zooming out of the map

Touch the touch-sensitive surface with two fingers, spaced far apart.
Glide your fingers towards each other. The map scale is reduced.

Handwriting recognition

Handwriting recognition overview

1. Active input line
2. Inserts a space (page 25)
3. Illustration of the touch-sensitive surface
4. Deletes characters (page 25)

You can use handwriting recognition for text, numbers or characters in any input line. If the character that you have entered can be interpreted in different ways, these options are displayed. More information on the character suggestions (page 25).

You can additionally switch the handwriting recognition read-aloud function on and off.

To exit the menu
To return to handwriting recognition
To use the phone book or text templates
To change the input line or the position of the cursor
To change the input language
To finish character entry

To display the menu: press the touchpad.
Switching the text reader function of the handwriting recognition on/off

You can switch the text reader function of the handwriting recognition on or off.

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To select System Settings: slide ворот, turn and press the controller. A menu appears.
- To select Touchpad: turn and press the controller.
- To select Read Out Handwriting Recognition: turn and press the controller. The text reader function is switched on or off.

Entering characters

Prerequisite: an input line for text, numbers or characters has been selected.

- Use one finger to draw the desired character on the touch-sensitive surface. The character recognized is entered in the input line. You can draw the next character on the touch-sensitive surface.

If the character can be interpreted in different ways, these options are displayed.

More information on the character suggestions (page 25).

Character suggestions

- To select a character suggestion: turn the controller. The selected character is entered instead of the automatically recognized character. Character entry can be continued.

Inserting a space

Prerequisite: an input line for text, numbers or characters has been selected.

- Use your finger to touch the touch-sensitive surface and swipe to the right. A space is entered into the input line.

Deleting characters

Prerequisite: an input line for text, numbers or characters has been selected.

- Use your finger to touch the touch-sensitive surface and swipe to the left. The character last entered is deleted.

Switching input lines

- Press the touchpad. A symbol is shown.
- To select [T]: glide your finger to the left or right and press.
- To select the input line: swipe up or down and press. The selected input line is active and character entry can be continued.

Moving the cursor within the input line

- Press the touchpad. A symbol is shown.
- To select [T]: glide your finger to the left or right and press.
- To move the cursor: glide to the left or right.

Changing the input language for handwriting recognition

Prerequisite: an input line for text, numbers or characters has been selected.
Press the touchpad.
A symbol is shown.
► To select [ ]: swipe your finger to the left or right and press.
The list of available input languages appears.
► To select a language: swipe up or down and press.
The input language for handwriting recognition has been changed.

Searching in lists
The phone book search is used as an example.
You determine the first letter of the contact you are looking for with the first character you enter.
► Draw the letter on the touchpad surface.
The first contact with the selected first character is highlighted in the phone book.
Further information on handwriting recognition on the touchpad (► page 24).
► Draw additional letters on the touchpad surface one after another.
► To complete the search and return to the phone book: press the touchpad.

Switching between the controller and the touchpad as input device
Prerequisite: an input line for text, numbers or characters has been selected.
► To switch from character entry using the controller to handwriting recognition on the touchpad: use one finger to press the touchpad.
Handwriting recognition on the touchpad is active.
► To switch from handwriting recognition on the touchpad to character entry using the controller: press the controller.
Character entry using the controller is active.

Quick access for audio
Changing the station/music track

Depending on the audio source that is currently activated, you can use this function to select the next station or music track.
► Call up quick access (► page 23). The current audio source is displayed.
► To select the previous or next station or music track: swipe to the left or right.
The selected station or music track is played.

Basic functions
Switching the multimedia system on/off
► Press the [ ] control knob on the center console to the right of the controller.
The multimedia system calls up the previously selected menu.
If you switch the multimedia system off, playback of the current media source will also be switched off.

Adjusting the volume
Adjusting the volume for media sources
► Turn the [ ] control knob on the center console to the right of the controller.
or
► Press the [ ] or [ ] button on the multifunction steering wheel.
The volume of the media source currently selected changes.
Adjusting the volume for traffic announcements and navigation announcements

During traffic or navigation announcements:
► Turn the control knob on the center console to the right of the controller.
or
► Press the or button on the multifunction steering wheel.

You can set the volume for navigation announcements to be different from the volume of the respective media source.

Adjusting the volume for phone calls

You can adjust the volume for hands-free mode during a telephone call.
► Turn the control knob on the center console to the right of the controller.
or
► Press the or button on the multifunction steering wheel.

Setting the volume for the Voice Control System voice output; see the separate operating instructions.

Switching the sound on or off

Media source sound
► Press the button on the multifunction steering wheel.

If the audio output is switched off, the status line will show the symbol. If you switch the media source or change the volume, the sound is automatically switched on.

Even if the sound is switched off, you will still hear navigation system announcements.

Switching navigation announcements off and on again
► To switch off navigation announcements: press the button on the multifunction steering wheel during the announcement. The Spoken driving recommendations have been deactivated. message appears.

► To switch navigation announcements on again: switch the multimedia system on and then on again (page 26).
or
► Start a new route calculation (page 54).
or
► While route guidance is active, show the menu and select (page 71).

Basic menu displays

To show the main function bar: slide the controller. To select a main function, e.g. Navi: turn and press the controller.
Navigation: the map displays the current vehicle position.
Radio: the basic menu of the last radio mode set appears.
Media: the basic display for the last media source set appears. In the example, SD card mode is set.
Telephone: the basic display of the telephone menu appears.
Vehicle functions: the basic display appears.
To show the menu: slide 4 the controller. The menu for the selected functions appears. Depending on the operation, the marking is shown in main function bar 1 or menu bar 2.

To select a menu item: turn and press the controller. Once you have selected a menu item in 1, the last menu set for the selected function appears. Menu bar 2 offers options in the current media mode.

To select a menu item: turn and press the controller. The menu for the selected functions appears. Depending on the operation, the marking is shown in main function bar 1 or menu bar 2.

To select the operating mode for a main function
You can select the available operating modes for the main functions, e.g. telephone. In the telephone menu, you can:
- switch to telephone mode
- call up the address book
- call up the Digital Operator's Manual for the telephone

To display the main function bar: slide 1 the controller.

To select Phone: turn and press the controller. The telephone menu is displayed.

To select Phone: slide 1 and press the controller. A menu appears. Phone is at the front.

To select Address Book, for example: turn and press the controller.

Character entry (telephony)

Writing a text message is used as an example. Further information on writing a text message (> page 114).

To select a character: turn and press the controller. The character selected in character bar 2 is entered into telephone number input line 1.

To delete a character: to switch to the bottom line of the character bar: slide 1 the controller.

To select [X]: turn and press the controller. The character last entered is deleted.

To switch input line: to switch to the bottom line of the character bar: slide 1 the controller.

To select 5, turn and press the controller. or Slide 1 the controller repeatedly until the character bar disappears.

To select the input line for the text of the text message: slide 1 and press the controller. The input line for the text of the text message is selected. The character bar has been adapted for entering text.
To select a character: turn and press the controller.
The character selected in character bar 4 is entered into text message input line 3.

To delete a character: to switch to the bottom line of the character bar: slide 6 the controller.

To select $\mathbb{X}$: turn and press the controller.
The character last entered is deleted.

To delete a whole entry: to switch to the bottom line of the character bar: slide 6 the controller.

To select $\mathbb{X}$: turn the controller.
Press and hold the controller until the entire entry is deleted.

To change the country setting of the character bar: to switch to the bottom line of the character bar: slide 6 the controller.

To select $\mathbb{X}$, turn and press the controller. The available languages are displayed.

Turn and press the controller.

Functions in the character bar
- $\cdots$
  Switches between digits and symbols
- $\text{ABC}$
  Switches the character bar to uppercase/lowercase letters
- $\text{C}$
  Changes the country setting for the character bar
- $\mathbb{X}$
  Deletes a character/an entry
- $\uparrow \downarrow$
  Selects the input line

- $\rightarrow$
  Cancels input
- $\leftarrow$
  Inserts a paragraph

Character entry options

You can enter characters using the controller or the touchpad. With the controller, you enter characters using a character bar. To enter using the touchpad, draw the character in the entry field. The multimedia system supports this using a handwriting recognition function.

Entering characters using the character bar

The example shows the address entry (page 53).

To enter a character: turn, slide 4 or 1, and press the controller.
Selected character 1 is entered in the upper line. The multimedia system adds the missing characters and shows the entry that best matches the current input.
The characters are available 6 or not 1, depending on the characters already entered and the data stored in the digital map.
The $\mathbb{X}$ symbol indicates that an entry exists more than once.

To delete a character: slide 4 and turn the controller, then press it after selecting $\mathbb{X}$. 
To delete an entire entry: slide \( \odot \) and turn the controller, then after selecting \( \square \) press and hold down the controller until the entire entry is deleted.

To switch to keyword search: slide \( \odot \) and turn the controller, then press it after selecting \( \heartsuit \) (page 55).

To confirm an entry: slide \( \odot \) and turn the controller, then press it after selecting \( \downarrow \).

or Slide \( \odot \) the controller repeatedly until the character bar disappears. The location selection list appears. The selected entry is highlighted.

To change the character bar language: slide \( \odot \) and turn the controller, then press it after selecting \( \downarrow \). A menu appears.

To select the language: turn and press the controller. The character set for the selected language is set.

Functions in the character bar:

- **Switches between digits and symbols**
- **Switches the character bar to uppercase/lowercase letters**
- Changes the country setting for the character bar
- Deletes a character/an entry
- Switches to keyword search (page 55)
- Selects the input line
- Moves the cursor within the input line
- Confirms an entry
- Cancels input
Entering characters using the touchpad

Alternatively, you can enter characters using the touchpad (page 21). Character entry is supported by a handwriting recognition function. An example is the address entry (page 53).

- With one finger, draw the desired character, e.g. the letter B, on the touch-sensitive surface.
  In the list (e.g. City), the first entry that starts with the letter entered is highlighted. You can draw the next character on the touch-sensitive surface.
  If the character that you have entered can be interpreted in different ways, these options are displayed.

- To select a character suggestion: turn the controller.
  The selected character is used for the list display instead of the automatically recognized character. Character entry can be continued.

- To delete a character: touch the touch-sensitive surface with your finger and glide your finger to the left.
  The character last entered is deleted.

- To complete the entry and switch to the list: press the touchpad.
To select **Reassign**: turn and press the controller. The categories and predefined favorites are displayed.
Categories are:
- Navigation
- Entertainment
- Tel
- Vehicle
- Climate Control

To select a category: turn the controller and press to confirm. The available favorites are displayed.

To select a favorite: turn and press the controller.

To add a favorite at the desired position: turn and press the controller. If there is already a favorite at this position, then this will be deleted.

**Adding your own favorites**

You can store phone numbers from the phone book, radio stations or destinations as favorites. A phone number from the phone book is used as an example.

- Call up the phone book (▷ page 99).
- Search for and highlight a contact (▷ page 100).

To add a telephone number as a favorite at the desired position: press and hold the favorites button on the controller until the favorites are displayed.

Turn and press the controller. If there is already a favorite at this position, it will be deleted and replaced by a new one.

Enter characters using the controller (▷ page 28) or the touchpad (▷ page 24).

To finish the entry: select **OK**. The favorite has been renamed.

**Moving favorites**

- Press the favorites button on the controller. The favorites are displayed.
- To select a favorite to be moved: turn the controller.
- To show the menu bar: slide ▼ the controller.
- To select Move: turn and press the controller.
- To store a favorite in the desired order: turn and press the controller. If a favorite is stored over another favorite, the favorite underneath is deleted.

**Deleting favorites**

- Press the favorites button on the controller. The favorites are displayed.
- To select a favorite to be deleted: turn the controller.
- To show the menu bar: slide ▼ the controller.
- To select Delete: turn and press the controller.
- To select Yes: turn and press the controller. The favorite is deleted.
- If you select No, the process will be canceled.

**Renaming favorites**

- Press the favorites button on the controller. The favorites are displayed.
- To select a favorite to be renamed: turn the controller.
- To show the menu bar: slide ▼ the controller.
- To select Rename: turn and press the controller.
Your multimedia system equipment

These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions.

Read the information on qualified specialist workshops in the vehicle Operator’s Manual.

Important safety notes

⚠️ WARNING

If you operate mobile communication equipment while driving, you will be distracted from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident. Only operate this equipment when the vehicle is stationary.

⚠️ WARNING

SD cards are small parts. They can be swallowed and cause choking. This poses an increased risk of injury or even fatal injury. Keep the SD card out of the reach of children. If a SD card is swallowed, seek medical attention immediately.

You must observe the legal requirements for the country in which you are currently driving when operating mobile communications equipment in the vehicle.

Display settings

Setting the brightness

The brightness detected by the display light sensor affects the setting options for this function.

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select System Settings: turn and press the controller. A menu appears.
- To select Display: turn and press the controller. A menu appears.
- Select Brightness. A control appears.
- Select the desired brightness.

Display design

The display features optimized designs for daytime and nighttime operation. You can set the design by manually selecting day or night design or opt for an automatic setting.

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select System Settings: turn and press the controller. A menu appears.
- To select Display: turn and press the controller. A menu appears.
- Select Day Mode, Night Mode or Auto. The • dot indicates the current setting.

<table>
<thead>
<tr>
<th>Design</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Day Mode</td>
<td>The display is set permanently to day design.</td>
</tr>
<tr>
<td>Night Mode</td>
<td>The display is set permanently to night design.</td>
</tr>
<tr>
<td>Automatic</td>
<td>The multimedia system evaluates the data of the light sensor and automatically switches over the display design.</td>
</tr>
</tbody>
</table>

Switching the display on/off

To switch off the display

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To select Display Off: slide the controller. The display goes out.
To switch the display on again: press the controller.

### Time settings

#### General information
The multimedia system can automatically set the time and date.
The following navigation system functions require the time, time zone and summer/standard time to be set correctly in order to work properly:
- route guidance on routes with time-dependent traffic guidance
- calculation of expected time of arrival

#### Switching automatic time on and off
The **Automatic Time Settings** function is used to activate or deactivate the automatic setting of the time and date. This function is activated when the vehicle leaves the factory.

- Press **Vehicle** in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select **Time**: turn and press the controller. A menu appears.
- To activate ☑ or deactivate □ **Automatic Time Settings**: turn and press the controller.

#### Setting the time zone
To set the time zone, the **Automatic Time Settings** function must be activated.

- Press **Vehicle** in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select **Time**: turn and press the controller. A menu appears.
- To select **Time Zone**: turn and press the controller. A list of countries appears. The • dot indicates the current setting.

- Select the country you are currently in by turning and pressing the controller. The country is accepted. A time zone list may also be displayed, depending on the country selected.
- To select the desired time zone: turn and press the controller. The time zone is accepted. A list of available options for setting summer time appears (> page 34).

#### Setting summer and standard time
Using the **Daylight Saving Time** function, you can set the automatic changeover to summer time or switch the summer time settings on and off. The changeover to summer time advances the time by one hour.

The **Daylight Saving Time** function or **Automatic** option is not available in all countries.

- Press **Vehicle** in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select **Time**: turn and press the controller. A menu appears.
- To select **Daylight Saving Time**: turn and press the controller. A list of available options for setting summer time appears.
- To select **Automatic**, **On** or **Off**: turn and press the controller.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Function</th>

</thead>
<tbody>
<tr>
<td><strong>Automatic</strong></td>
<td>The summer and standard time are automatically changed over.</td>
</tr>
<tr>
<td><strong>On</strong></td>
<td>The clock is advanced one hour ahead of standard time.</td>
</tr>
<tr>
<td><strong>Off</strong></td>
<td>The standard time for the chosen time zone is selected.</td>
</tr>
</tbody>
</table>
Manual time setting

Using the manual time settings, you can set the time forwards or backwards by up to several hours.

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select Time: turn and press the controller. A menu appears.
- To set the hour: turn the controller.
- To highlight minutes: slide the controller.
- To set minutes: turn and press the controller. The time is accepted.
- The Automatic Time Settings function is deactivated.

If Automatic Time Settings is reactivated, the previous settings for time zone and summer time changeover are restored.

Setting the time and date format

Use this function to set the time and date format for all displays in the vehicle.

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select Time: turn and press the controller. A menu appears.
- To select Format: turn and press the controller.

- To select the desired date format: turn and press the controller. The dot indicates the current setting.
- To select the desired time format: turn and press the controller. The dot indicates the current setting.

Text reader settings

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select System Settings: turn and press the controller. A menu appears.
- To select Text Reader Speed: turn and press the controller. A list appears.
- Select Fast, Medium or Slow. The dot indicates the current setting.
If the set system language is not supported by the Voice Control System, English will be selected.

The help window also shows you information on audible instructions:
- during individualization
- during subsequent operation of the Voice Control System

Press Vehicle in the main function bar. The vehicle menu is displayed.

To switch to the menu bar: slide the controller.

To select System Settings: turn and press the controller.

A menu appears.

To select Voice Control: turn and press the controller.

To activate Help Window: turn and press the controller.

More information on the Voice Control System is available in the separate operating instructions.

Individualization
Using individualization, you can fine-tune the Voice Control System to your own voice. This will help improve voice recognition; see the separate operating instructions.

Wi-Fi
Overview
Establishing a Wi-Fi connection between the multimedia system and a Wi-Fi-enabled device, such as a tablet computer or smartphone, requires the following:
- Wi-Fi must be activated on the multimedia system and on the device to be connected.
- The multimedia system must be connected to an Internet-enabled mobile phone via Bluetooth® or USB.
- The Internet access data for the mobile phone network provider must be selected or set in the multimedia system.
- An Internet connection must be established on the multimedia system.

Activating Wi-Fi
- To select Vehicle from the main function bar: turn and press the controller.
- To switch to the menu bar: slide the controller.
- Select System Settings.
- Select WiFi. The Wi-Fi menu appears.
- Select Activate.
- Press the controller. Switch the connection on or off, depending on the previous setting.

Connecting the device
General notes
The exact Wi-Fi connection procedure may vary depending on the device to be connected. Follow the instructions that are shown in the display. Further information; see the manufacturer’s operating instructions.

Connecting a device via WPS PIN
Requirement: for this type of connection, the device to be connected must support "Connect using WPS PIN".
- To select Vehicle from the main function bar: turn and press the controller.
- To switch to the menu bar: slide the controller.
- Select System Settings.
- Select WiFi. The Wi-Fi menu appears.
- Select Connect via WPS PIN.
- Select the vehicle from the device to be connected and "Connect using WPS PIN".
vehicle is displayed with the SSID MB WLAN XXXXX.
The device to be connected generates a PIN.
> Also enter this PIN into the multimedia system.

**Connecting the device by pressing a button (push button)**

Requirement: for this type of connection, the device to be connected must support "Connect via push button".
> To select **Vehicle** from the main function bar: turn and press the controller.
> To switch to the menu bar: slide \( \circ \) \( \downarrow \) the controller.
> Select **System Settings**.
> Select **WiFi**.
The Wi-Fi menu appears.
> Select **Connect via WPS PBC**.
> Select the vehicle from the device to be connected and **Connect via WPS PBC**. The vehicle is displayed with the SSID MB WLAN XXXXX.
> Select **Continue** in the multimedia system.

**Generating a new security key**

> To select **Vehicle** from the main function bar: turn and press the controller.
> To switch to the menu bar: slide \( \circ \) \( \downarrow \) the controller.
> Select **System Settings**.
> Select **WiFi**.
The Wi-Fi menu appears.
> Select **Generate Security Key**.
> Select **Regenerate**.
A new security key is generated.
> To save the security key: turn the controller and select **Save**.
The Wi-Fi menu appears. The new security key will now be displayed and verified when a Wi-Fi connection is established. The connection must be re-established with the newly created security key.

> Device connections established using the previous security key will no longer work after the security key is changed. You have to reconnect these devices (> page 36).

**Changing the name of the SSID**

> To select **Vehicle** from the main function bar: turn and press the controller.
> To switch to the menu bar: slide \( \circ \) \( \downarrow \) the controller.
> Select **System Settings**.
> Select **WiFi**.
The Wi-Fi menu appears.
> Select **Change SSID**.
A dialog for entering the SSID appears.
> Enter the new SSID.
Select OK.
Press the controller.
From now on, when establishing a connection, the vehicle will be shown with the new SSID both on the device to be connected and in the Connect Using Security Key menu.

Device connections established using the previous SSID will no longer work after the SSID is changed. You have to reconnect these devices (page 36).

Bluetooth® settings

General information about Bluetooth®

Bluetooth®-capable devices, e.g. mobile phones, need to comply with a certain profile in order to be connected to the multimedia system. Every Bluetooth® device has its own specific Bluetooth® name.

Bluetooth® technology is a standard for short-range wireless data transmissions up to approximately 10 m.

You can use Bluetooth® to connect your mobile phone to the multimedia system, for example:

- use the hands-free system
- establish an Internet connection
- listen to music using Bluetooth® Audio
- exchange vCards

Bluetooth® is a registered trademark of Bluetooth Special Interest Group (SIG) Inc.

Activating/deactivating Bluetooth®

Press Vehicle in the main function bar. The vehicle menu is displayed.
To switch to the menu bar: slide the controller.
To select System Settings: turn and press the controller.
A menu appears.
To activate or deactivate Activate Bluetooth: turn and press the controller.

Automatic volume adjustment

General information

With the Automatic Volume Adjustment function, the volumes of different audio sources are adjusted for each other, to compensate for relative differences in volume.

For example: changing from a relatively quiet to a relatively loud radio station. The volume for both stations sounds the same. Manual readjustment of the volume is not required.

The Automatic Volume Adjustment function is deactivated when the vehicle leaves the factory. Using this function, the dynamic range of the music is slightly reduced. To make the most of the audiophile sound quality, it is recommended to leave it off.

Switching the automatic volume adjustment on/off

Press Vehicle in the main function bar. The vehicle menu is displayed.
To switch to the menu bar: slide the controller.
To select System Settings: turn and press the controller.
A menu appears.
To select Automatic Volume Adjustment: turn and press the controller.
Switch the Automatic Volume Adjustment function on or off.

Setting the system language

General information

This function allows you to determine the language for the menu displays and the navigation messages. The selected language affects the characters available for entry.

The navigation announcements are not available in all languages. If a language is not available, the navigation announcements will be in English.

When you set the system language, the language of the Voice Control System will change accordingly. If it is not supported by the Voice Control System, English will be selected.
Setting the system language

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select System Settings: turn and press the controller.
- A menu appears.
- To select Language: turn and press the controller.
- The list of languages appears. The dot indicates the current setting.
- Select the desired language.
- The multimedia system loads the selected language and sets it.

Exiting the Favorites function

- Press the Favorites button again.
- or
- Press the button.

Further information on favorites (> page 31).

Importing/exporting data

General notes

When writing data onto the USB stick or the SD card, it is important not to remove the stick or the card. Otherwise, data loss may occur.

Using this function you can do the following with your personal data:

- transfer your data from one multimedia system to another multimedia system
  The transfer may be limited or not possible, depending on the vehicle’s equipment.
- make a backup copy of your personal data (export data) and load it again (import data)
- protect your data from unwanted export by activating a pin prompt (presetting: deactivated )

You can either use an SD card or a USB storage device (e.g. a USB stick) as temporary storage.

You can obtain further information on data import and export from an authorized Mercedes-Benz Center.

Activating/deactivating PIN protection

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To switch to the menu bar: slide the controller.
- To select System Settings: turn and press the controller.
- A menu appears.
- To select Data Import/Export: turn and press the controller.
- To select Activate PIN Protection. Activate or deactivate PIN protection.
  When activating PIN protection, you will be prompted to enter a PIN.
To enter the 4-digit PIN and select *ok*: turn and press the controller. You will be prompted to enter the PIN again.

Enter the PIN again and select *ok*. The PIN prompt now protects your personal data from unwanted export.

If you deactivate your PIN protection, you will first be prompted to enter your PIN. If you have forgotten your PIN, an authorized Mercedes-Benz Center can deactivate your PIN protection for you. Alternatively, you can deactivate PIN protection by resetting your personal data (page 40).

Importing/exporting data

The following data can be exported:
- address data
- system settings that you have made
- bookmarks
- radio station lists

Personal music files in the Media Register cannot be saved or transferred using this function. Mercedes-Benz is not liable for any loss of data.

Connecting a USB storage device

- Inserting an SD card (page 142)
- Connect a USB device (e.g. a USB memory stick) (page 142).

Importing or exporting data

If you import data such as address data, the existing data in the multimedia system is overwritten. You will see a message to this effect. The multimedia system is restarted after the data import.

Press Vehicle in the main function bar. The vehicle menu is displayed.

To switch to the menu bar: slide the controller.

To select System Settings: turn and press the controller.

A menu appears.

To select Data Import/Export: turn and press the controller.

Select Import Data or Export Data. If PIN protection is activated, a PIN prompt appears when you select Export Data.

Reset function

General information

You can reset the multimedia system to the factory settings. Resetting is recommended before handing over or selling the vehicle, for example. This includes the deletion of all of your personal data on the multimedia system. These include, for example:

- Station presets
- Entries in the destination memory
- Entries in the list of previous destinations in the navigation system
- Entries in the address book
- Authorized telephone

Data on the internal hard drive, e.g. music files in the Media Register, will be deleted during a reset.

In addition, an activated PIN protection, which you have used to protect your data against unwanted export, will be deactivated during a reset.

Mercedes-Benz is not liable for any loss of data.

Resetting the multimedia system

Press Vehicle in the main function bar. The vehicle menu is displayed.

To switch to the menu bar: slide the controller.

To select System Settings: turn and press the controller.

A menu appears.

To select Reset: turn and press the controller. A prompt appears asking whether you wish to reset.
Select Yes.
A prompt appears again asking whether you really wish to reset.

Select Yes.
A message appears. The multimedia system is reset to the factory settings and restarted.
Your multimedia system equipment

These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions.

Read the information on qualified specialist workshops in the vehicle Operator’s Manual.

Important safety notes

⚠️ WARNING

If you operate mobile communication equipment while driving, you will be distracted from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident.

Only operate this equipment when the vehicle is stationary.

You must observe the legal requirements for the country in which you are currently driving when operating mobile communications equipment in the vehicle.

Vehicle settings

Calling up vehicle settings

- Press Vehicle in the main function bar. The vehicle menu is displayed.
- To select Vehicle Settings: press the controller. The Vehicle Settings menu is active.
- To select the desired vehicle setting: turn and press the controller. The main area with the setting element is active.

Selecting a different vehicle setting:

- To activate the menu for selecting the vehicle setting: slide 1 the controller.

Exiting the vehicle settings:

- To select 2: slide 3 and press the controller.

Setting the easy entry and exit feature

This function makes getting in and out of your vehicle easier.

- Call up Vehicle Settings (› page 42).
- To select Easy Entry/Exit: turn and press the controller. The setting element is active.
- To change the setting: press the controller.

You can find further information on the easy entry and exit feature in the vehicle Operator’s Manual.

Activating/deactivating the acoustic locking verification signal

You can also set an audible signal to confirm that the vehicle has been locked.

- Call up Vehicle Settings (› page 42).
- To select Acoustic Lock Feedback: turn and press the controller. The function switches on or off, depending on the previous setting.

You can find further information on the locking feature in the vehicle Operator’s Manual.

Switching the seat belt adjustment on/off

The Belt Adjustment function adjusts the driver’s and front-passenger seat belt to the upper body of the occupants.

- Call up Vehicle Settings (› page 42).
- To select Belt Adjustment: turn and press the controller. The function switches on or off, depending on the previous setting.

You can find further information on seat belt adjustment in the vehicle Operator’s Manual.

Switching the automatic mirror folding function on/off

When the Automatic Mirror Folding function is activated, the outside mirrors fold in automatically as soon as you lock the vehicle from the outside. The outside mirrors fold out automatically again as soon as you unlock the vehicle.
Call up **Vehicle Settings** (page 42).
To select **Automatic Mirror Folding**: turn and press the controller.
The function switches on or off, depending on the previous setting.
You can find further information on the automatic folding mirror function in the vehicle Operator’s Manual.

**Switching locator lighting on/off**

If you switch on the **Locator Lighting** function, the exterior lighting is switched on for a short time when it is dark. The light switch must be set to [auto]; see the vehicle Operator's Manual.
The exterior lighting remains on for 40 seconds after the vehicle is unlocked. When you start the engine, the locator lighting is switched off and the automatic driving lights are activated.
Call up **Vehicle Settings** (page 42).
To select **Locator Lighting**: turn and press the controller.
Press the controller.
The function is switched on or off, depending on the previous status.
You can find further information on the locator lighting in the vehicle Operator's Manual.

**Activating/deactivating the automatic door locking mechanism**

The vehicle is locked automatically when the ignition is switched on and the vehicle is traveling faster than walking pace.
Call up **Vehicle Settings** (page 42).
To select **Automatic Locking**: turn and press the controller.
The function switches on or off, depending on the previous setting.
You can find further information on the locking feature in the vehicle Operator’s Manual.

**Setting the switch-off delay time**

**Interior lighting switch-off delay time**

The interior lighting is activated for the duration of the switch-off delay time when the SmartKey is removed from the ignition lock.
Call up **Vehicle Settings** (page 42).
To select **Interior Lighting Delayed Switch-off**: turn and press the controller.
The setting element is active.
To change the delayed switch-off time: turn and press the controller.
You can find further information on the interior lighting in the vehicle Operator's Manual.

**Exterior lighting switch-off delay time**

If you switch on the **Exterior Lighting Delayed Switch-off** function, the exterior lighting is switched on for a short time after the engine is switched off. The light switch must be set to [auto]; see the vehicle Operator's Manual.
The exterior lighting remains on for 60 seconds after the engine is switched off. If you close all the doors and the tailgate, the exterior lighting switches off after the set time.
Call up **Vehicle Settings** (page 42).
To select **Exterior Lighting Delayed Switch-off**: turn and press the controller.
The setting element is active.
To change the delayed switch-off time: turn and press the controller.

**Rear view camera**

**General notes**

The rear view camera covers the immediate surroundings behind the vehicle and assists you when parking.
The rear view camera is only an aid. It is not a replacement for your attention to your immediate surroundings. You are always responsible for safe maneuvering and parking. When maneuvering or parking, make sure that there are no persons, animals or objects in the area in which you are maneuvering.
You can find further information about the rear view camera in the vehicle Operator’s Manual.
Switching automatic mode of the rear view camera on/off
This function activates the rear view camera when reverse gear is engaged.
- Press Vehicle in the main function bar. The vehicle menu is displayed.
- Slide the controller.
- To select System Settings: turn and press the controller.
- Select Rear View Camera.
- Select Activation by R gear. The function is switched on or off, depending on the previous status.

For further information on the rear view camera; see the vehicle Operator’s Manual.

Climate control settings
Overview
You can adjust the climate control settings using the climate control bar (page 44) or the climate control menu (page 45).
You can set the most important climate control functions, such as temperature (page 44), airflow (page 45) and air distribution (page 44) using the climate control bar. The climate control bar is visible in most displays.
You can find all available climate control functions in the climate control menu. You can use the climate control bar (page 44) to switch to the climate control menu.

Settings in the climate control bar
Overview

- Adjusts temperature and air distribution and displays the current setting
- Calls up the climate control menu, displays the current cooling and climate mode setting
- Adjusts airflow and temperature and displays the current setting

Calling up the climate control bar
- Press Vehicle in the main function bar. The vehicle menu is displayed.
- Slide the controller repeatedly until the climate control bar is activated.

Setting the temperature
- Call up the climate control bar (page 44).
- To select the current temperature on the left or right: turn and press the controller. The temperature setting scale appears.
- To change the setting: turn the controller.
- To close the temperature setting scale: press the controller.

You can also use the climate control menu to set the temperature (page 45).

Setting the air distribution
- Call up the climate control bar (page 44).
- To select the current air distribution display on the left or right, e.g. : turn and press the controller. The air distribution setting scale appears.
- To change the setting: turn the controller.
- To close the temperature setting scale: press the controller.
You can also use the climate control menu (page 45) to set the air distribution.

Setting the airflow

- Call up the climate control bar (page 44).
- To select ⬇️: turn and press the controller. The airflow setting scale appears.
- To change the setting: turn the controller.
- To close the temperature setting scale: press the controller.

You can also use the climate control menu (page 45) to set the airflow.

Calling up the climate control menu

Press Vehicle in the main function bar. The vehicle menu is displayed.
- Slide 6 the controller repeatedly until the climate control bar is activated.
- To select from climate control bar 2: turn and press the controller.
  The menu for selecting climate control functions is activated.
- To select a climate function: turn and press the controller.
  The selected climate control function appears.

Settings in the climate menu

Adjusting the climate mode settings

By setting the climate mode you determine the type of airflow. The setting is active when the air conditioning system is set to AUTO, see the vehicle Operator’s Manual.

Setting the airflow

- Call up the climate control menu (page 45).
- To select Climate Mode: turn and press the controller.
- To change the setting: turn the controller.
- To exit the menu: press the button.

The current airflow setting is shown in the climate control bar: Diffuse, Medium or Focus (page 44).

Settings in the bottom bar of the climate control menu

Activating/deactivating climate control

This setting is made in the bottom bar of the climate control menu.
- Call up the climate control menu (page 45).
- Slide the controller repeatedly until the bottom bar is activated.
- To select Climate Ctrl On: turn and press the controller.
  The climate control is switched on or off depending on the settings.

If the climate control is switched off:
- the climate control setting functions are deactivated.
- the blower is switched off.
- the air recirculation flaps are closed.

Switching cooling with air dehumidification on/off

This setting is made in the bottom bar of the climate control menu.
- Call up the climate control menu (page 45).
- Slide the controller repeatedly until the bottom bar is activated.
- To select A/C: turn and press the controller.
- Switch cooling with air dehumidification on or off.

The current status of the cooling function is displayed in the climate control bar: A/C ON – activated, A/C OFF – deactivated (page 44).

Deactivating the cooling with air dehumidification function reduces fuel consumption.
Synchronizing the climate control settings

Use \( \checkmark \) \textit{Sync} (synchronization) to select the climate control setting for all zones together \( \checkmark \) or separately \( \square \). This setting is made in the bottom bar of the climate control menu.

- Call up the climate control menu (page 45).
- Slide the controller repeatedly until the bottom bar is activated.
- To select \( \checkmark \) \textit{Sync}: turn and press the controller.
- Switch the synchronization function on \( \checkmark \) or off \( \square \).

For further information on synchronizing climate control settings (see the vehicle Operator’s Manual).

DYNAMIC SELECT

General notes

You can use \textbf{DYNAMIC SELECT} to configure the following settings for the Individual drive program:

- Drive system
- Suspension
- Transmission
- Sports exhaust system
- ESP\textsuperscript{®} (Electronic Stability Program)

In addition, current vehicle and engine data can be visualized via the \textit{Vehicle Data} and \textit{Engine Data} menus.

There may be fewer settings depending on the vehicle equipment..

Configuration via the DYNAMIC SELECT controller

- Use the DYNAMIC SELECT controller to select the \textit{Individual Configuration} drive program (see the vehicle Operator’s Manual). A window appears after a short while.
- To confirm \textit{Adjust}: press the controller. The \textit{Individual Configuration} menu for setting the drive program appears.
- To select Drive, Suspension, Transmission, Exhaust System or ESP: turn and press the controller. The menu symbol, text and image show the selected setting.

Displaying vehicle data

There may be fewer displays depending on your vehicle’s equipment.

- Press \textit{Vehicle} in the main function bar. The vehicle menu is displayed.
- To select DYNAMIC SELECT: turn and press the controller. The \textit{Individual Configuration}, \textit{Vehicle Data} and \textit{Engine Data} menus appear.
- Select \textit{Vehicle Data}. Updates of the following data are displayed:
  - Road type analogous to the selected drive program
  - G-force display of longitudinal and lateral acceleration
  - Accelerator and brake pedal activity
  - Activity of the suspension struts
  - Wheel angle
  - Overrun mode animation

The G-force display is not available in all of the drive programs. Daytime or night-time view is shown depending on the automatic light sensor.

Displaying engine data

There may be fewer displays depending on your vehicle’s equipment.
Press Vehicle in the main function bar. The vehicle menu is displayed.

To select DYNAMIC SELECT: turn and press the controller. The Individual Configuration, Vehicle Data and Engine Data menus appear.

Select Engine Data. The following current data is displayed:
- Engine output
- Engine torque
- Transmission oil temperature
- Engine oil temperature

### Setting options

You can choose from the following settings for the drive:

<table>
<thead>
<tr>
<th>R</th>
<th>Race</th>
</tr>
</thead>
<tbody>
<tr>
<td>C</td>
<td>Comfort</td>
</tr>
<tr>
<td>S</td>
<td>Sport</td>
</tr>
<tr>
<td>S+</td>
<td>Sport +</td>
</tr>
</tbody>
</table>

You can make the following settings for the suspension:

<table>
<thead>
<tr>
<th>C</th>
<th>Comfort</th>
</tr>
</thead>
<tbody>
<tr>
<td>S</td>
<td>Sport</td>
</tr>
<tr>
<td>S+</td>
<td>Sport +</td>
</tr>
</tbody>
</table>

You can choose from the following settings for the transmission:

<table>
<thead>
<tr>
<th>D</th>
<th>Automatic</th>
</tr>
</thead>
<tbody>
<tr>
<td>M</td>
<td>Manual</td>
</tr>
</tbody>
</table>

You can make the following settings for the sports exhaust system:

<table>
<thead>
<tr>
<th>C</th>
<th>Comfort</th>
</tr>
</thead>
<tbody>
<tr>
<td>S+</td>
<td>Sport +</td>
</tr>
</tbody>
</table>

You can choose from the following settings for the ESP® (Electronic Stability Program):

<table>
<thead>
<tr>
<th>S</th>
<th>Sport</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Activates ESP® (Electronic Stability Program)</td>
</tr>
</tbody>
</table>
Your multimedia system equipment

These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions. Read the information on qualified specialist workshops in the vehicle Operator’s Manual.

Introduction

Important safety notes

⚠️ WARNING

If you operate information systems and communication equipment integrated in the vehicle while driving, you will be distracted from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident. Only operate the equipment when the traffic situation permits. If you are not sure that this is possible, park the vehicle paying attention to traffic conditions and operate the equipment when the vehicle is stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system.

The multimedia system calculates the route to the destination without taking the following into account, for example:

- traffic lights
- stop and yield signs
- merging lanes
- parking or stopping in a no parking/no stopping zone
- other road and traffic rules and regulations
- narrow bridges

The multimedia system may give incorrect navigation commands if the actual street/traffic situation does not correspond with the digital map’s data. For example, a route may have been diverted or the direction of a one-way street may have changed.

For this reason, you must always observe road and traffic rules and regulations during your journey. Road and traffic rules and regulations always have priority over the system’s driving recommendations.

Navigation announcements are intended to direct you while driving without diverting your attention from the road and driving. Please always use this feature instead of consulting the map display for directions. Looking at the icons or map display can distract you from traffic conditions and driving, and increase the risk of an accident.

General notes

Operational readiness of the navigation system

The navigation system must determine the position of the vehicle before first use or whenever operational status is restored. Therefore, you may have to drive for a while before precise route guidance is possible.

GPS reception

Among other things, correct functioning of the navigation system depends on GPS reception. In certain situations, GPS reception may be impaired, there may be interference or there may be no reception at all, e.g. in tunnels or parking garages.

Entry restriction

For vehicles in certain countries, there is a data entry restriction.

The restriction is active from a vehicle speed of above approximately 3 mph (5 km/h). As soon as the speed falls below approximately 2 mph (3 km/h), the restriction becomes inactive. When the restriction is active, certain entries cannot be made. Menu items are shown in gray and cannot be selected.

For example:

- entering the destination city and street
- entering a destination via the map
- entering POIs in the vicinity of a city or via a name search
- editing entries
Other entries are possible, such as entering points of interest in the vicinity of the destination or current position.

**Switching to navigation mode**

Traffic reports can be received or traffic reports are available.

- **To show the menu**: slide \( \circ \circ \) the controller.
- **To select Navi**: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears, press the controller.** The map shows the vehicle’s current position.

**Showing/hiding the menu**

Using the menu, you can make a destination entry or select the navigation settings, for example.

- **To show**: slide \( \circ \circ \) the controller when the map appears.

or

- **Swipe down the touchpad with one finger.**
- **If there has been no route calculated, **Destination** is marked.**
- **If a route has been calculated, \[ \text{Destination} \] is marked.**

**Moving the map**

Requirement: the map is in full screen mode, the menu is faded out (> page 49).

- **Press the controller.**
  - The crosshair is shown.
  - **Slide \( \circ \circ \), \( \circ \circ \circ \) or \( \circ \circ \circ \) the controller.**
  - The map moves in the corresponding direction under the crosshair.

- **Enter a destination using the map** (> page 60).
Basic settings

Selecting the route type

To switch to navigation mode: slide ① the controller.
To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller.
The map shows the vehicle's current position.
To show the menu: slide ① the controller.
To select Options: turn and press the controller.
Select Route Settings.
Select a route type.
A filled circle indicates the current selection.
- Active route guidance: the multimedia system calculates a new route.
- Inactive route guidance: the multimedia system uses the selection as the new setting.

Route guidance active: a destination has been entered and the route has been calculated.
Route guidance inactive: no destination has been entered yet and no route has been calculated yet.

Fast Route
- The multimedia system calculates a route with a short travel time.

Dynamic Traffic Route
- Based on the Fast Route route type and includes traffic reports on the route for the route guidance.

Eco Route
- The multimedia system calculates an economical route. The journey may take slightly longer compared to taking the fast route.

Short Route
- The multimedia system calculates a short distance route.

The Dynamic Traffic Route route type uses real-time traffic reports from SIRIUS satellite radio.

Further Information on real-time traffic reports (> page 74).

To calculate alternative routes: select Calculate Alternative Routes.
Switch the function on ① or off ②.
Function activated: after each route calculation, route alternatives are offered that correspond to the local conditions (> page 72).
If desired, you can have the multimedia system calculate alternative routes even during route guidance (> page 72).

Setting route options

To avoid/use route options: select Avoid Options.
A menu appears.
Select one of the options.
①: using or avoiding route options is enabled
②: using or avoiding route options is disabled
- Menu item Avoid Area (> page 82)
The multimedia system enables you to avoid areas you do not wish to drive through.
- Menu item Avoid Highways
- Menu item Avoid Ferries
- Menu item Avoid Auto Trains
• Menu item **Avoid Tunnels**
  The function is not available in all countries.
• Menu item **Avoid Unpaved Roads**
  The function is not available in all countries.
• Menu item **Use Toll Roads**
  The route calculation includes roads which require you to pay a usage fee (toll).
• Menu item **Use Carpool Lanes**
  If your vehicle meets the access conditions for carpool lanes, you can use this function.
  Navigation includes carpool lanes if the carpool lanes option is activated.

Depending on local conditions, the multimedia system may not always be able to include all route options. A route may include a ferry, for instance, even though **Avoid Ferries** is enabled. The multimedia system will notify you of this visually and through a navigation message.

**To use toll roads**: turn and press the controller.
A menu appears.

**Select an option.**
The options include using roads that require cash payment or electronic billing, or switching off the function.

**To exit a menu**: slide ➔ the controller.

### Selecting announcements

**To switch to navigation mode**: slide ➔ the controller.
**To select Navi**: turn and press the controller.
The map displays the current vehicle position or the navigation menu appears.

**If the navigation menu appears, press the controller.**
The map shows the vehicle’s current position.

**To show the menu**: slide ➔ the controller.

### To select Options:
**Turn** and press the controller.
**Select Settings.**
**Select an option.**
Switch the option on ☑ or off ☐.

<table>
<thead>
<tr>
<th>Announce Street Names</th>
<th>The multimedia system announces the names of the roads onto which the upcoming change of direction leads. The function is not available in all countries.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audio Fadeout</td>
<td>The volume of an active media source is automatically reduced during a navigation announcement.</td>
</tr>
<tr>
<td>Gas on Reserve</td>
<td>Function activated: once the reserve fuel tank level is reached, a message appears to help you start a gas station search.</td>
</tr>
<tr>
<td>Attention Assist</td>
<td>Function activated: if ATTENTION ASSIST displays a warning in the multifunction display, a message appears in the multimedia system display when you drive onto a highway. This can help you start a rest stop search.  For further information on ATTENTION ASSIST, see the vehicle Operator’s Manual.</td>
</tr>
</tbody>
</table>

### Using carpool lanes

You can include carpool lanes (HOV or car sharing lanes) in the route calculation.

If you use HOV or carpool lanes, please observe the applicable laws as well as the local and time limitation conditions.

Carpool lanes may only be used under certain conditions. They can normally be used when there are two people in the vehicle. However, there are also carpool lanes which can only be used when there are three or more people in the vehicle. If the vehicle’s emission or consumption values are below the prescribed levels, lone drivers may also use the carpool lanes in California.

Carpool lanes may be reserved for specific times (e.g. during the peak period).
Carpool lanes are indicated by a diamond symbol on specific road signs and on the road surface. The road signs may also include the designation CARPOOL. The lanes are arranged as a separate lane next to the others or are built as a physically separate lane.

Depending on the setting under **Use Carpool Lanes**, the multimedia system uses carpool lanes when calculating the route. During route guidance, visual and audible driving directions provide guidance into and out of carpool lanes.

- **To switch to navigation mode**: slide 1 the controller.
- **To select Navi**: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears**, press the controller. The map shows the vehicle's current position.
- **To show the menu**: slide 6 the controller.
- **To select Options**: turn and press the controller.
- **Select Route Settings**.
- **Select Avoid Options**.
- **Select Use Carpool Lanes**.
  Carpool lanes will either be used or avoided when calculating the route.

### Destination entry

#### Important safety notes

**WARNING**

If you operate information systems and communication equipment integrated in the vehicle while driving, you will be distracted from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident.

Only operate the equipment when the traffic situation permits. If you are not sure that this is possible, park the vehicle paying attention to traffic conditions and operate the equipment when the vehicle is stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system. Destination entry may be blocked while driving, depending on the country specifications.

### General notes

The various character entry options are described for the controller. Alternatively you can use the touchpad to enter characters and select menus (page 21).

### Using an address

#### Calling up the address entry menu

- **To switch to navigation mode**: slide 1 the controller.
- **To select Navi**: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears**, press the controller. The map shows the vehicle's current position.
- **To show the menu**: slide 6 the controller.
- **To select Destination**: turn and press the controller.
- **Select Address Entry**.

#### Address entry options

Examples of how you can enter an address:

- City/ZIP code, street, house number
- City/ZIP code, street
- City/ZIP code, center
- City/ZIP code, street, intersection
- Street, City/ZIP code, house number
- Street, City/ZIP code, intersection

The address can be entered faster by entering the street before the city if the address has an unusual street name.

While entering an address, you can also switch to other destination entry options:

- Keyword search (page 55)
- Map (page 60)
- POI (page 57)
**Entering an address**

The example shows you how to enter a city, street and house number for an address, e.g. for your home address.

- Call up the address entry menu (page 52).
- To select **Street**: turn and press the controller.
- Enter **BROADWAY**. Character entry (page 29).

- **To call up the list**: slide the controller repeatedly until the character bar disappears.
- Or
- To select **OK**, turn and press the controller.

- To select **Town**: press the controller.
- Enter the city, e.g. **New York**. Then call up the list and select an entry. Proceed in the same way as when entering a street.

- To select **No.**: press the controller.
- Enter the house number. Then call up the list and select an entry. Proceed in the same way as when entering a street.

The city in which the vehicle is currently located (current vehicle position) is at the top of the list of cities. When entering an address as the destination, the locations for which route guidance has already been carried out are more prominently available.

You can enter any of the cities, streets, ZIP codes, etc. which are stored in the digital map. State/province and city are sufficient to start navigating. You can enter either a city or a ZIP code. The street and house number complete the destination address.

**Entering additional address data**

You can enter additional address data:

- **State/province**
  - You can use **Last Used** to select the last selected state (USA) or province (Canada).
  - You can also select Mexico and The Bahamas.
- **ZIP code**
  - Entering a ZIP code will delete a previously entered city.
- **Center**
  - Entering a center will delete a previously entered street.
- **Intersection**
  - Entering an intersection will delete a previously entered house number.

- Call up the address entry menu (page 52).
- To select **State/Province, ZIP Code, Center** or **Intersection**: turn, slide and press the controller.
- Enter and select the address element.

**Saving an address**

You can store the address entered as:

- a home address in the address book
- a navigable address book contact
For further information on the address book, see (page 102)
- a personal destination on the SD card (page 78)

► Call up the address entry menu (page 52).
► To select Save: slide 6, turn and press the controller.
► As the home address: select As "My Address".
The home address is stored in the list of contacts under the entry My Address.

► As a contact: select As New Contact.
► Select Not Classified, Home or Work.
► Enter a surname and first name (page 28).
► To select OK: turn and press the controller.
The destination address is saved in the address book as a navigable contact.

Starting route calculation

The entered destination appears in the address entry menu.

► To confirm Start or Continue: press the controller.
If you select Start: the route is calculated with the current route settings (page 50).
While route calculation is in progress, an arrow will indicate the direction to your destination. Once the route has been calculated, route guidance begins. If the vehicle is traveling on a non-digitized road, the system displays the linear distance to the destination, the direction to the destination and the Road Not Mapped message.

Selection Continue: if Calculate Alternative Routes is activated, alternative routes are calculated. You can display these and select them for route guidance (page 72).

If route guidance has already been activated, a prompt will appear asking whether you wish to end the current route guidance.

► To select Yes or Set as Intermediate Destination: turn and press the controller. Yes cancels the current route guidance and starts route calculation to the new destination.

Set as Intermediate Destination adds the new destination in addition to the existing destination and opens the intermediate destinations list.

The route is calculated using the digital map data. The calculation time depends on the distance from the destination, for example. The calculated route may differ from the ideal route, e.g. due to roadworks or incomplete map data. Please also refer to the notes about the digital map (page 84).

► To call up the keyword search: select by sliding 6, turning and pressing the controller in the address entry menu.

► To view the vicinity of the destination: to select 6, turn and press the controller.
You can explore the destination area. Requirement for exploring a destination (USA): mbrace must be activated for Internet access (page 118).
Requirement for exploring a destination (Canada): a mobile phone is connected to the multimedia system via Bluetooth® (page 90) or USB (page 155).
Keyword search

Entering keywords

The keyword search is used to help find destinations using fragments of words. The keyword search is tolerant of errors.

It can be used for an address or a POI. For example, you can search for the Empire State Building in New York.

The keyword search finds geographically tolerant hits. If, for example, you are searching for a street located on the edge of a major city, the search will also cover adjacent smaller cities. The keyword search supports languages using Latin characters.

To switch to navigation mode: slide the controller.

To select Navigation: turn and press the controller.

The map displays the current vehicle position or the navigation menu appears.

If the navigation menu appears, press the controller.

The map shows the vehicle’s current position.

To show the menu: slide the controller.

To select Destination: turn and press the controller.

Select Keyword Search.

Enter the first few letters of the city and street, e.g. NEW and EMP.

While entering the information, the number of exact matches/all hits is shown.

- - - / - - - is displayed if fewer than three characters have been entered.

999+ is displayed if there are too many hits.

Select the symbol.

The search results are displayed (page 55).

Selecting search results

The search results are divided into categories, such as addresses. The number of exact/total hits is shown in brackets.

Further search results are displayed, if POI Search and/or Fuzzy Search are activated in the search options (page 56).

To select Addresses: press the controller. The search results are displayed.

Exact hits are shown at the very top of the list. Hits are listed alphabetically. The search term that you entered is highlighted in orange in the entries.

Select an entry: turn and press the controller.

The address entry menu appears, showing the destination address.

To start route calculation: select Start.

To select a POI: select POIS in the Vicinity or All POIs by turning and pressing the controller.

A list appears. The search results are displayed according to the linear distance, starting with those closest.

Select a POI.

The POI is shown.

To start route calculation: select Start.
To use online search: select **Online Search** by turning and pressing the controller. The search switches to the online functions. Online search requirement (USA): mbrace must be activated for Internet access (> page 118).

Requirement for the online map display (Canada): a mobile phone is connected to the multimedia system via Bluetooth® (> page 90) or USB (> page 155).

### Selecting search options

- **To switch to navigation mode:** slide ⑤ the controller.
- **To select Navi:** turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears, press the controller.** The map shows the vehicle's current position.
- **To show the menu:** slide ④ the controller.
- **To select Destination:** turn and press the controller.
- **Select Keyword Search.**
- **To select Search Options:** slide ⑤, turn and press the controller.
- **Select Fuzzy Search or POI Search.**

Switch the setting on ☑ or off ☐. The error-tolerant search is useful if parts of the address are incomplete or the spelling is unclear. The POI search takes into account points of interest in the search.

### Selecting a state/province

- **To switch to navigation mode:** slide ⑤ the controller.
- **To select Navi:** turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears, press the controller.** The map shows the vehicle's current position.
- **To show the menu:** slide ④ the controller.
- **To select Destination:** turn and press the controller.
- **Select Keyword Search.**

### Using online search

Requirement (USA): mbrace must be activated for Internet access (> page 118).

Requirement (Canada): a mobile phone is connected to the multimedia system via Bluetooth® (> page 90) or USB (> page 155).

- **To switch to navigation mode:** slide ⑤ the controller.
- **To select Navi:** turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears, press the controller.** The map shows the vehicle's current position.
- **To show the menu:** slide ④ the controller.
- **To select Destination:** turn and press the controller.
- **Select Keyword Search.**
- **To select Online Search:** slide ⑤, turn and press the controller. The search switches to the online functions.

### Selecting a destination from the list of last destinations

The last 50 destinations are stored automatically.

- **To switch to navigation mode:** slide ⑤ the controller.
- **To select Navi:** turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller. The map shows the vehicle's current position.

- To show the menu: slide the controller.
- To select Destination: turn and press the controller.
- Select From Previous Destinations.
- Select the destination. The address entry menu appears, showing the destination address.
- To start route calculation: select Start.

Selecting an address book contact as a destination

You can select navigable address book contacts as the destination. These are identified by the symbol. If you have already entered and saved your home address, you can select this as the destination by using My Address.

- To switch to navigation mode: slide the controller.
- To select Navi: turn and press the controller.
- The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle's current position.
- To show the menu: slide the controller.
- To select Destination: turn and press the controller.
- Select From Contacts.
- Select the destination. The address entry menu appears, showing the contact and associated destination address.
- To start route calculation: select Start.

Selecting a destination from POIs

Calling up the POI menu

- To switch to navigation mode: slide the controller.
- To select Navi: turn and press the controller.
- The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle's current position.
- To show the menu: slide the controller.
- To select Destination: turn and press the controller.
- Select From POIs.

Selecting a POI category
Select a category or one of the searches listed in the table. The symbol after an entry shows that further categories are available.

Select a sub-category.
The search for POIs starts.

If route guidance is active, first define the position for the POI search (page 58).

If no route guidance is active, the POI search covers a 240 mile (400 km) radius around the current vehicle position.

Once the search is completed, the POI list is displayed.

The search results display the following information:

- an arrow that shows the linear direction to the POI (search around vehicle position)
- the linear distance to the POI
- the name of the POI

Select a point of interest (page 59).
The complete address of the POI is shown.

### Selection | Instructions
--- | ---
**Search By Name**
The search looks for all POIs on the digital map or around one of the three previously specified positions (page 58).
- To select **Search By Name**: turn and press the controller.
- Select **All POIs** or a position for the POI search.
The search for POIs starts.

**Search By Phone Number**
All POIs with a telephone number can be selected.
- To select **Search By Phone Number**: turn and press the controller.
The search for POIs starts.

**Mercedes-Benz Service**
The search looks for authorized Mercedes-Benz Centers.
- To select **Mercedes-Benz Service**: turn and press the controller.
The search for POIs starts.

### Defining the position for the POI search
You can define where the POI search is to be carried out during active route guidance by selecting **Near Destination** or **Along the Route**.
The POI search covers a 240 mi (400 km) radius around the selected position.
### Selection

<table>
<thead>
<tr>
<th>Selection</th>
<th>Instructions</th>
</tr>
</thead>
</table>
| **Near Destination** | - Select a category or **Search By Name** (=> page 57).  
- Select **Near Destination**.  
The search for POIs starts. |
| **Along the Route** | - Select a category or **Search By Name** (=> page 57).  
- Select **Along the Route**.  
The search for POIs starts. |
| **Current Position** | - Select a category or **Search By Name** (=> page 57).  
- Select **Current Position**.  
The search for POIs starts. |

### Selecting a POI

Requirement for "Calling up a POI": a mobile phone must be connected to the multimedia system (=> page 90).

Requirements for "Viewing the vicinity of the destination" and "Loading data from the Internet" (USA): mbrace must be activated for Internet access (=> page 118).

Requirements for "Viewing the vicinity of the destination" and "Loading data from the Internet" (Canada): a mobile phone must be connected to the multimedia system via Bluetooth® (=> page 90) or USB (=> page 155).

The complete address of the POI is shown.

- **To view the vicinity of the destination**: select 1 by turning and pressing the controller.
  
  If street images are available, the street in the vicinity of the destination address is shown.

- **To call up the map**: select Map.
  
  Move the map, change the map scale (=> page 60) and select the POI.

  3D POIs can be displayed in an all-round view (=> page 59)

- **To call up a POI**: select Call.
  
  If a phone number is available, the multimedia system switches to the telephone function.

- **To load data from the Internet**: select www.
  
  If an Internet address is available, data is loaded from the Internet.

- **To store a POI**: select Save.
  
  The POI can be saved as:
  
  - home address
  - a navigable address book contact (=> page 102)
  - a personal destination on the SD card (=> page 78)

- **To start route calculation**: select Start or Continue by turning and pressing the controller.

  If Calculate Alternative Routes is activated (=> page 50), Continue is available.

### Rotating a 3D POI

Realistically modeled buildings are shown on the map in an all-round view. These 3D POIs are sights or buildings of regional importance, e.g. a main railway station.

3D POIs can be turned on the 20 m, 50 m and 100 m map scales. To aid orientation, the points of the compass are shown while turning.

- **Select a point of interest** (=> page 59).
- **To select Map**: turn and press the controller.
- **Select a 3D POI from the map using Previous or Next**.
  
  If the 3D POI is marked in gold, you can select 3D.
Entering intermediate destinations

Introduction

You can also map the route to the destination yourself by entering up to four intermediate destinations. The sequence of the intermediate destinations can be changed at any time.

The multimedia system provides a selection of predefined destinations in eight categories for this purpose, such as Gas Station. You can also use the destination entry options to enter intermediate destinations.

Creating intermediate destinations

To switch to navigation mode: slide 5 the controller.
To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller. The map shows the vehicle’s current position.
To show the menu: slide 6 the controller.
To select Destination: turn and press the controller.
Select Intermediate Destinations.
To select a POI category or Other: turn and press the controller.

Selection Step
---
Address Entry Enter a destination by address (> page 52).
Keyword Search Select a destination using a keyword search (> page 55).
From Previous Destinations Select a destination from the list of last destinations (> page 56).
To select a POI: turn the controller and press to confirm.
After selecting a POI or entering a destination, the address of the intermediate destination is displayed.
After the destination is entered via the map, the address is displayed. Start is highlighted.

To call up a map: select Map by turning and pressing the controller.
You can move the map and select the destination.

To make a call: select Call.
If the intermediate destination has a telephone number and a mobile phone is connected to the multimedia system (> page 90), the call is connected.

To load data from the Internet: select www.
If an Internet address is available, data is loaded from the Internet.

To store an intermediate destination in the destination memory: select Save (> page 77).

To accept an intermediate destination: select Start by pressing the controller.
The destination is entered in the intermediate destinations menu.
If Calculate Alternative Routes is activated (> page 50), instead of Start, menu point Continue is available.

To enter another intermediate destination: slide  the controller and highlight Add New:

Press the controller.
Proceed as described above.

Editing intermediate destinations
You can perform the following functions:
• change intermediate destinations
• switch the sequence of the intermediate destinations in the intermediate destinations menu
• delete intermediate destinations
You cannot edit POIs.
To select an intermediate destination in the intermediate destinations menu: turn and press the controller.
A menu appears.

To change an intermediate destination: select Edit in the menu.
Change the address, e.g. the city and street.
To select OK: turn and press the controller.
The intermediate destinations menu appears and displays the changed intermediate destination.

You can enter the intermediate destinations and the destination in any order. To change the order, at least one intermediate destination and the destination must be entered.

To change the order: in the menu, select Move.
Turn the controller and move the intermediate destination or destination to the desired position.
Press the controller.
To delete an intermediate destination: select Delete in the menu.

Accepting intermediate destinations for the route

To select Start Route Guidance in the intermediate destinations menu: press the controller.
The route is calculated with the entered intermediate destinations.
If an intermediate destination was passed during route guidance, a green tick mark will be entered in the intermediate destinations menu. Once the route has been recalculated, the intermediate destination is deleted from the intermediate destinations menu.

Saving as a personal route

You can save a route including intermediate destinations on the SD card.
Requirements: the SD card has the FAT data system format (e.g. FAT32).

Insert the SD memory card (page 142).
To select Save As Personal Route in the intermediate destinations menu: press the controller.
An input field appears.
Enter a file name in the input field. Press OK to confirm.
The route is saved to the SD memory card.

Searching for a gas station when the fuel level is low

Requirement: the setting Gas on Reserve must be enabled (page 51).
If the fuel tank reserve level is displayed, you will see the Reserve Fuel Would you like to start a search for surrounding gas stations? message.
To select Yes or No: turn and press the controller.
If you select Yes: the gas station search starts. When the search is complete, a list of the gas stations available along the route or in the vicinity is displayed.
If you select No: the search is canceled.
Select the gas station.
The address of the gas station is displayed.
To select Start: press the controller.
The selected gas station is entered into position 1 of the intermediate destinations menu. Route guidance begins.
If the intermediate destinations menu already contains four intermediate destinations, a prompt will be displayed, asking you whether you wish to enter the gas station into position 1. If you select Yes, the gas station is transferred into the list and intermediate destination 4 is deleted.

Entering a destination from Mercedes-Benz Apps

Requirement (USA): mbrace is activated for the Mercedes-Benz Apps (page 118).
Requirement (Canada): a mobile phone is connected to the multimedia system via Bluetooth® (page 90) or USB (page 155).
To switch to navigation mode: slide ① the controller.

To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.

If the navigation menu appears, press the controller. The map shows the vehicle’s current position.

To show the menu: slide ② the controller.

To select Destination: turn and press the controller.

Select From Mercedes-Benz Apps. The list of Mercedes-Benz Apps appears.

Using geo-coordinates

To switch to navigation mode: slide ① the controller.

To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.

If the navigation menu appears, press the controller. The map shows the vehicle’s current position.

To show the menu: slide ② the controller.

To select Destination: turn and press the controller.

Select Using Geo-Coordinates. Geo-coordinates (longitude and latitude) are entered in degrees, minutes and seconds.

To enter geo-coordinates: turn the controller. The value for degree, minute or second changes.

To move the selection within the line: slide ←→ the controller.

To move the selection between lines: slide ↑↓ the controller.

To confirm the value: press the controller.

To store geo-coordinates: select Save by turning and pressing the controller. The destination with the geo-coordinates can be saved as:
- a home address in the address book
- a navigable address book contact

For further information on the address book, see (> page 102)
- a personal destination on the SD card (> page 78)

To start route calculation: select Start Route Guidance by turning and pressing the controller.

Personal POIs and routes

General notes

The use of personal POIs for displaying traffic surveillance equipment is not permitted in every country. Please observe the country-specific regulations and always drive at a suitable speed.

Personal POIs are filed in categories:
- Not Classified
  Standard entry for personal POIs
- Mercedes-Benz Apps
  Personal POIs (destinations, routes) that you have imported via the online functions.
- Categories which you have created yourself, e.g. on your PC

Personal routes are not categorized.

Settings for personal POIs

Displaying on the map

Requirements: an SD card with personal POIs is inserted (> page 142).

The SD card has the FAT data system format (e.g. FAT32).

All personal POIs of the selected category are displayed on the map with a corresponding symbol.
If the "Alert when approaching" function is activated (page 64), the symbols are displayed up to a map scale of 2 mi.

- To switch to navigation mode: slide \( \textcircled{1} \) the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle's current position.
- To show the menu: slide \( \textcircled{2} \) the controller.
- To select Options: turn and press the controller.
- Select Personal POIs.
- Select Display on the Map.
  The menu displays the categories available on the SD card.
- To select a category: turn the controller and press to confirm.
  All personal POIs in the selected category are displayed \( \checkmark \) or not displayed \( \Box \), depending on the previous status.

### Alert when approaching

Requirements: an SD card with personal POIs is inserted (page 142). The SD card has the FAT data system format (e.g. FAT32).

If the vehicle is approaching a personal POI, this is highlighted on the map and/or an audible signal sounds.

For this purpose, both the corresponding function Approaching POI Cue and the category containing the personal POI must be activated.

- To switch to navigation mode: slide \( \textcircled{1} \) the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle's current position.
- To show the menu: slide \( \textcircled{2} \) the controller.
- To select Options: turn and press the controller.
- Select Personal POIs.
- Select Approaching POI Cue.
  The menu displays the categories available on the SD card.
- Select Audible or Optical.
  The function is switched on \( \checkmark \) or off \( \Box \), depending on the previous status.
- To select a category: turn the controller and press to confirm.
  The function is switched on \( \checkmark \) or off \( \Box \), for all personal POIs of this category, depending on the previous setting.

### Saving personal POIs and routes

#### General notes

Personal POIs and routes are geodata which are saved in open GPX format (GPS ExChange format) on the SD card.

Requirements: the SD card has the FAT data system format (e.g. FAT32).

#### Personal POI from current vehicle position or crosshair position

- Insert the SD memory card (page 142).
- To switch to navigation mode: slide \( \textcircled{1} \) the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle's current position.
- When the map is displayed, press the controller until a message appears.
  The current vehicle position is saved to the Not Classified category on the SD card.
and also stored in the "Last destinations" memory (page 79).

If the "Move map" function is selected (page 49), the crosshair position is saved.

If no SD card is inserted, the personal POI will only be stored in the "Last destinations" memory.

Personal POI from destination address

- To switch to navigation mode: slide the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller.
- The map shows the vehicle’s current position.
- Call up the address entry menu and enter the destination address (page 52).
- To select Save, slide the controller.
- Turn and press the controller.
- To make a selection, turn and press the controller.
- Enter the name.
- Select a category.
  The current address is saved as a personal POI on the SD card.

You can select a destination from the From Previous Destinations or From Contacts memories and save it on the SD card.

- From Previous Destinations (page 56)
- From Contacts (page 57)

Personal route from a tour including intermediate destinations

- To switch to navigation mode: slide the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller.
  The map shows the vehicle’s current position.
- Enter a destination, e.g. by address (page 53).
- Start route calculation (page 54).
- Enter an intermediate destination (page 60).
- Select Save As Personal Route in the intermediate destinations menu.
  The route is saved in the Personal Routes folder on the SD card.

Importing personal destinations and routes via Mercedes-Benz Apps

You can import destinations and routes into the navigation via the Mercedes-Benz apps. These have their own symbol and are filed in the Mercedes-Benz Apps category.

Mercedes-Benz apps are, for example:

- Download POI
- Local Search

You can save the imported destinations and routes as personal POIs and routes (page 64).

When importing routes, please note:

- The Mercedes-Benz Apps may generate a route based on a different map from the one used by the multimedia system. Points on the route may therefore be situated off the digital roads.
- The Mercedes-Benz Apps minimize the number of route points offered. For this reason an imported route commenced in the multimedia system may deviate from the original route from the Mercedes-Benz Apps.

Selecting and editing personal POIs and routes

Selecting
The example shows a personal POI.

- Insert the SD memory card (> page 142).
- **To switch to navigation mode**: slide the controller.
- To select **Navi**: turn and press the controller.
The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller.
The map shows the vehicle's current position.
- **To show the menu**: slide the controller.
- To select **Destination**: turn and press the controller.

The map displays the current vehicle position.

- **To select Navi**: turn and press the controller.
- The navigation menu appears, press the controller.
The map shows the vehicle's current position.
- **To show the menu**: slide the controller.
- To select **Destination**: turn and press the controller.
- Select From Memory Card.
The menu displays the categories available on the SD card.
- To select a category or **Personal Routes**, turn and press the controller.
The available personal POIs or route entries are displayed.
- Select personal POI or personal route.
The address of the personal POI appears or the personal route is displayed in the map.

If a large number of entries are stored, a register for quick selection appears. Personal POIs and routes can be saved and sorted with different character sets (e.g. Latin, Cyrillic, Arabic).

- **To select a register**: slide the controller.
- To select a character: turn and press the controller.
- **To select a character set for sorting**: slide the controller to select B.
- Press the controller.
The available character sets are displayed.
- Turn and press the controller.

**Editing**

The example shows a personal route.

- Select personal POI or personal route (> page 65).
- **To explore a personal POI or personal route**: turn and press the controller to select **Map**.
The map with the crosshair appears and shows the destination.
- Scroll the map (> page 49).
- Set the map scale (> page 79).
- To switch to the menu: press the button.
- **To call the personal POI**: turn and press the controller to select **Call**.
If a mobile phone is connected to the multimedia system and the telephone number is available, the call is connected (> page 96).
- **To save a personal POI**: turn and press the controller to select **Save**.
- Continue saving (> page 77).
- **To edit the name and symbol**: turn and press the controller to select **Edit**.
- Select **Change Name** or **Edit Icon**.
- Character entry (> page 28).
- Select a symbol.
- To delete a personal POI or route: turn and press the controller to select **Delete**.
A prompt will appear.
- Select **Yes** or **No**.
If you select **Yes**, the personal destination or personal route is deleted.
- Select **Yes** or **No**.
If you select **Yes**, the personal destination or personal route is deleted.
- **To select the outward and return routes**: select **Swap** by turning and pressing the controller.
The starting and destination positions of your personal route, and thus the direction for route guidance, are switched round. One-way streets or restricted intersections are taken into consideration. Therefore, the outward and return routes may differ from each other.
- **To start route guidance**: turn and press the controller to select **Start**.

**Recording the route**

**General notes**

Routes are recorded using the SD card.
Requirements: the SD card has the FAT data system format (e.g. FAT32).
When recording the route, bear in mind the following:

- If the SD card is inserted, it must not be removed during recording.
- If route recording is started manually, it must be finished manually before the multimedia system is switched off (e.g. when the engine is switched off).
- The multimedia system minimizes the number of route points recorded. Therefore when the recorded route is subsequently commenced, it may differ from the route that was originally recorded.

**Starting/finishing route recording**

- Insert the SD memory card (> page 142).
- **To switch to navigation mode:** slide  and press the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle's current position.
- **To show the menu:** slide  and press the controller.
- To select Destination: turn and press the controller.
- Select From Memory Card.
- Select Start Route Recording. The route is recorded and REC appears at the bottom edge of the screen.
- To stop recording, select End Route Recording from the menu. The route is stored under Personal Routes.

**Displaying/editing the recorded route**

- Insert the SD memory card (> page 142).
- **To switch to navigation mode:** slide  and press the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle’s current position.
- **To show the menu:** slide  and press the controller.
- To select Destination: turn and press the controller.
- Select From Memory Card.

- Select Personal Routes. Previously recorded routes are displayed.
- To select a route, turn and press the controller. The map appears with a menu. The recorded route is shown on the map in blue.
- **To calculate a route:** select Start.
- **To change the name and symbol:** select Edit.
- Select Change Name or Edit Icon.
- Character entry (> page 28).
- Select a symbol.

**Route guidance**

**General notes**

The multimedia system calculates the route to the destination without taking the following into account, for example:

- traffic lights
- stop and yield signs
- parking or stopping restrictions
- road narrowing
- temporary traffic rules and regulations

The navigation system can give differing driving recommendations if the actual street/traffic situation does not correspond with the digital map's data. For example, if the road layout or the direction of a one-way street has been changed.

For this reason, you must always observe road and traffic rules and regulations during your journey. Road and traffic rules and regulations always have priority over system driving recommendations.

Route guidance begins once a route has been calculated (> page 54).

The multimedia system guides you to your destination by means of navigation announcements in the form of audible navigation announcements and route guidance displays.

The route guidance displays can be seen if navigation mode is switched on.

If you do not follow the navigation announcements or if you leave the calculated route, the multimedia system automatically calculates a new route to the destination.
If the digital map contains the corresponding information, the following applies:

- During route guidance, the multimedia system tries to avoid roads with restricted access. These include, for example, roads which are closed to through-traffic.
- Roads that have time restrictions (e.g. closed on Sundays and public holidays) are considered for route guidance on days when they are open. For this purpose, the relevant times must be correctly stored in the database.

Change of direction

Overview

Changes of direction have three phases:

- Preparation phase
- Announcement phase
- Change-of-direction phase

Changes in direction are also shown in the multifunction display of the instrument cluster (see the vehicle Operator’s Manual).

Preparation phase

The multimedia system prepares you for the upcoming driving maneuver, e.g. with the announcement "Prepare to turn right". You see the full-screen map.

Announcement phase

The display is now split into two sectors. The map is shown on the left side of the display, and a detailed image of the intersection or a 3D image of the imminent change of direction is shown on the right side of the display.

Change-of-direction phase

The multimedia system announces the immediate change of direction. The change of direction is announced ahead of time, e.g. with the announcement "Now turn right".

The display is split in two like in the announcement phase.

The change of direction is performed when the light-color bar on the right drops down to 0 ft and the current vehicle position symbol has reached the white change-of-direction point.

When the change of direction is completed, the map will appear in full screen mode again.

Display on highways

The image shows an example of route guidance at a highway intersection when driving on a highway.
Lane recommendations

Display on multi-lane roads

Lanes not recommended (dark gray)
Possible lane (light gray)
Recommended lanes (white)

If the digital map contains the relevant data, the multimedia system can display lane recommendations on multi-lane roads for the next change of direction.
Lane not recommended: you will not be able to complete the next change of direction if you stay in this lane.
Possible lane: you will only be able to complete the next change of direction in this lane.
Recommended lane: in this lane you will be able to complete the next change of direction and the one after that.
The multimedia system shows the lane recommendations for the next two changes of direction. Lane recommendations are also shown in the multifunction display of the instrument cluster (see the vehicle Operator's Manual).

Approaching new lanes

Approaching new lane
During the change of direction, new lanes may be added. These will be shown in the display of lane recommendations with a lower boundary line.

Highway information

Display mode

Requirement: the Highway Information map content must be enabled (⇒ page 81).
While driving on the highway, gas stations, rest stops, rest areas and highway exits are displayed along with their immediate distances from the current vehicle position.

Calling up the selection mode

When highway information is displayed, slide the controller.
The marker is on the highway information. The associated position is highlighted on the map.
To select the desired rest stop/freeway exit: turn and press the controller.
The available POIs are displayed.
Starting route guidance to a POI

- To select a POI: turn the controller and press to confirm. The POI details are displayed.
  You can perform the following functions:
  - Store in the address book (page 77)
  - View on the map (page 82)
  - Call if a phone is connected and a phone number is available (page 96)
  - Select for route guidance and calculate a route to it (page 54)

Using the traffic jam function

Highway information enables the use of the traffic jam function. The remaining route on the highway in this case is blocked in the direction of travel from the selected exit.

- To select Detour: turn and press the controller. The traffic jam function appears (page 73).

Destination reached

Once the destination is reached, you will see the checkered flag. Route guidance is finished.

Navigation announcements

Repeating navigation announcements

If you missed the current navigation announcement, you can call it up again.

- To switch to navigation mode: slide the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle's current position.
- To show the menu: slide the controller.
- To select : turn and press the controller. The navigation announcement is repeated.

If the Repeat Spoken Driving Recommendations function has previously been added as a favorite, you can alternatively select the function using the favorites button (page 31).

Setting the volume manually

- During a navigation announcement, turn the control knob.

When you start the engine, the volume is set to the lowest setting.
Switching navigation announcements on/off

- To switch off navigation announcements: press the button on the multifunction steering wheel during a navigation message.
- To switch navigation announcements back on: slide the controller.
- To select : turn and press the controller.
  
  The multimedia system automatically switches the navigation announcements back on when:
  
  - a new route is calculated
  - the vehicle is started
  
  A navigation message is given if the route is recalculated during dynamic route guidance due to new traffic reports (page 74).

Canceling/continuing route guidance

Canceling route guidance

- Slide the controller. The menu is shown.
- To select Destination: turn and press the controller.
- Select Cancel Active Route Guidance. The blue route line is no longer shown on the map.

Resuming route guidance

- Slide the controller. The menu is shown.
- To select Destination: turn and press the controller.
- Select Continue Route Guidance. The multimedia system calculates the route.

Route information

Destination information

- To switch to navigation mode: slide the controller.
- To select Navi: turn and press the controller.
  
  The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller.
  
  The map shows the vehicle's current position.
- To show the menu: slide the controller.
- To select Route: turn and press the controller.
- Select Destination Information.
  
  The destination and existing intermediate destinations are displayed with distances, travel time and arrival time.
- To select destination or intermediate destination: turn and press the controller.
  
  The address appears.
- Select Save.
  
  The destination or intermediate destination can be saved as:
  
  - a navigable address book contact
  - a home address
- To call up the map, select Map.
- Move the map, change the map scale and select the destination or the intermediate destination (page 60).
- To call the destination or intermediate destination, select Call.
  
  If a phone is connected and a phone number is available, the multimedia system switches to the telephone function.
Taking an alternative route

If the Calculate Alternative Routes setting is activated, different routes will be offered each time a route is calculated (see page 50). You can call up alternative routes to the current route.

Routes 1, 2 and 4 are displayed with a dark blue line.

Route 3 is the most economic route and is displayed with a green line.

To switch to navigation mode: slide the controller.

To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.

If the navigation menu appears, press the controller. The map shows the vehicle's current position.

To show the menu: slide the controller.

To select Route: turn and press the controller.

Select Alternative Route.

Route 1 is shown.

To display additional routes: select Next or Previous.

To start a new route guidance: select Start.

Route list

To switch to navigation mode: slide the controller.

To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.

If the navigation menu appears, press the controller. The map shows the vehicle's current position.

To show the menu: slide the controller.

To select Route: turn and press the controller.

Select Route List.

The route list shows the next change of direction and the immediate distances from the current vehicle position.

To display additional route sections: turn the controller.

The position of the change of direction that belongs to the respective route section is indicated on the map with a cross.

Where am I?

To switch to navigation mode: slide the controller.

To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.

If the navigation menu appears, press the controller. The map shows the vehicle's current position.

To show the menu: slide the controller.

To select Position: turn and press the controller.

Select Where am I?.

The street you are currently on and the previous and next intersections are displayed.
Traffic jam function

- To switch to navigation mode: slide ⬅️ the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle’s current position.
- To show the menu: slide ⬅️ the controller.
- To select Route: turn and press the controller.
- Select Detour.
- To specify the start of the traffic jam section: select Beginning. The next possible traffic jam section starting point is marked.
  - Turn the controller. The marking moves along the route to the next starting position.
  - Press the controller. The start of the traffic jam is set.
- To specify the end of a traffic jam section: select End. The next possible traffic jam section end point is marked.
  - Turn the controller. The marking moves along the route to the next end position.
  - Press the controller. The end of the traffic jam is determined.
- To calculate the detour: select Start.

Off-road

General notes

The navigation system may guide you to off-road routes that your vehicle cannot drive on without causing damage to the tires or wheels or the vehicle itself. It is the driver’s sole responsibility to determine the suitability of the route. The condition of the off-road routes may vary. The navigability of off-road routes may be influenced by various factors such as time of day, time of year and prevailing weather conditions. The navigation system cannot judge these factors or take them into account for route guidance.

Route guidance to an off-road destination

The multimedia system can guide you to destinations which are within the area of the digital map, but which are not themselves on the map. These destinations are known as off-road destinations, which you can enter using the map, for example. The multimedia system guides you for as long as possible with navigation announcements and displays on roads known to the system.

If the vehicle reaches an area which is not part of the digital map, the display appears as a split-screen view. On the right, an arrow appears that points to the off-road destination. You hear the announcement: "Please follow the arrow on the display". As the vehicle approaches the destination, you will see a display to this effect.

Route guidance from an off-road location to a destination

Off-road location: the vehicle's position is on the digital map, but the map does not contain any information about that location. The multimedia system is able to guide you to a destination even from an off-road location.

At the start of route guidance, you will see the Road Not Mapped message, an arrow and the distance to the destination. The arrow shows the compass heading to the actual destination. As soon as the vehicle is back on a road known to the system, route guidance continues in the usual way.

Off-road during route guidance

Due to road construction, for example, there may be differences between the data on the digital map and the actual course of the road. In such cases, the system will temporarily be unable to locate the vehicle position on the digital map. The vehicle is therefore in an off-road position.
In the display, you will then see the Road Not Mapped message, an arrow and the distance to the destination. The direction arrow shows the compass heading to the destination. As soon as the system can assign the vehicle position to the map again, route guidance continues in the usual way.

**Real-time traffic reports**

**Prerequisites**

This function is currently not available for Canada.

In order to receive real-time traffic reports via satellite radio, you need to subscribe to SIRIUS XM Satellite Radio Traffic Message Service.

Further information on satellite radio (> page 134).

The multimedia system can receive traffic reports via satellite radio and take account of these for route guidance in the navigation system. Received traffic reports are displayed on the map either as text or as symbols.

**Real-time traffic reports on the map**

The multimedia system can show certain traffic incidents on the map with symbols (type of incident) and colored lines (extent). Traffic reports are shown on the map at scales of 1/32 mi to 20 mi.

When ① is displayed, traffic reports can be received or traffic reports are available. If it is not displayed, no reception is possible.

**Displaying real-time traffic reports**

**Starting a search for traffic reports**
To switch to navigation mode: slide the controller.
To select Navi: turn and press the controller.
The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller.
The map shows the vehicle’s current position.
To show the menu: slide the controller.
To select Traffic: turn and press the controller.
If satellite signals cannot be received or there are no traffic reports, you will see a message to this effect.
To close the report: press the controller.

Traffic symbol information

1. Affected roads with indication of direction
2. Symbol for report type, e.g. traffic flow message

To switch to navigation mode: slide the controller.
To select Navi: turn and press the controller.
The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller.
The map shows the vehicle’s current position.
To show the menu: slide the controller.
To select Traffic: turn and press the controller.
To select Traffic Symbol Information: turn and press the controller.
The map appears and shows the available traffic information as icons. The first traffic information is highlighted.

To highlight additional traffic symbols, select Next or Previous.
To move the map: select Map.
You can move the map to enable further traffic information to be displayed.

You can have the traffic report relevant to a traffic icon shown.
To select Details: turn and press the controller.
The report shows the following information:
• State/province, road and display of the affected direction
• Section of the road to which the traffic report applies
• Traffic icon and traffic report
To close the detailed display: press the button.

Displaying reports on the route

The function is only available while route guidance is active. It shows the available traffic reports affecting the current route.
If there are no reports for the route or the function is not supported in the selected language: the Messages On Route menu item is gray and cannot be selected.
To switch to navigation mode: slide the controller.
To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller. The map shows the vehicle's current position.
To show the menu: slide the controller.
To select Traffic: turn and press the controller.
To select Messages On Route: turn and press the controller. The traffic report window appears. Several traffic reports may be available for the calculated route, marked for example by 1/3. The report shows the following information:
- State/province, road and display of the affected direction
- Section of the road to which the traffic report applies
- Traffic icon and traffic report
To display the next/previous traffic report: turn the controller.
To close the display: press the button.

Displaying all traffic reports

To switch to navigation mode: slide the controller.
To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller. The map shows the vehicle's current position.
To show the menu: slide the controller.
To select Traffic: turn and press the controller.
To select Traffic Information On Map: turn and press the controller.
Select Incidents, Speed & Flow or Free Flow. The display is on or off.

Reading out traffic reports on the route

Introduction

The text reader function is only available while route guidance is active. It reads out traffic reports affecting the current route.
You can select from the following text reader properties:
- Language (page 38)
- Text reader speed (page 35)
You can start the text reader function manually or set it to automatic.

**Starting the text reader function manually**

- **To switch to navigation mode:** slide 1 ∘ the controller.
- **To select Navi:** turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears, press the controller.** The map shows the vehicle’s current position.
- **To show the menu:** slide 2 ∘ the controller.
- **To select Traffic:** turn and press the controller.
- **Select Read Out All Messages on Route.** The multimedia system reads out the reports in sequential order.
  - If there are no reports for the route, the Read Out All Messages on Route menu item is gray and cannot be selected.
- **To cancel the read-aloud function:** select Cancel Read-Aloud Function. The multimedia system reads the current report aloud and then exits the read-aloud function.

**Automatic text reader function**

- **To switch to navigation mode:** slide 1 ∘ the controller.
- **To select Navi:** turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears, press the controller.** The map shows the vehicle’s current position.
- **To show the menu:** slide 2 ∘ the controller.
- **To select Traffic:** turn and press the controller.
- **Select Read Traffic Announcements Automatically.** Depending on the previous state, switch the option on √ or off □.

**Storing destinations**

**General notes**

If a route to a destination has been calculated, the multimedia system saves the destination to the last destinations memory. If the memory is full, the multimedia system overwrites the oldest destination. When you save the current vehicle position or a crosshair position, this position is stored in the "Last destinations" memory.

You can save destinations permanently in the address book and on an SD card. For example, you can save a destination as your home address immediately after entering the address (> page 53).

**Requirements:** the SD card has the FAT data system format (e.g. FAT32).

**Storing the destination in the address book**

The example shows a POI.

- **To select Save:** turn and press the controller. A menu appears.
- **New contact:** select As New Contact. If the address book already contains contacts, the entry Add to Contact is also available.
- **Select Not Classified, Home or Work.** An input menu shows the destination address.

**Recalculating the route dynamically**

The Dynamic Traffic Route route type takes into account all of the traffic reports it receives for the current route when calculating the route (> page 50).

If you have selected Dynamic Traffic Route as the route type, the multimedia system guides you to your destination along the updated route.
Enter a surname and first name. Character entry (page 28).

To select OK: turn and press the controller. The Saving Successful message appears. The destination address is saved in the address book as a navigable contact.

To add to a contact: select Add to Contact. The address book appears.

Search for a contact (page 103).

Press the controller. The Saving Successful message appears. The destination address is allocated to a contact in the address book. Telephone numbers are not transferred to the telephone number fields of the address book. After selecting the destination address from the address book for navigation, the associated telephone number will be displayed. If the contact already has two destination addresses, a prompt will appear asking if a destination address should be overwritten.

Select Yes or No. If you select Yes, a list showing both destination addresses appears.

To select the destination address: turn and press the controller. The destination address is overwritten.

To save as "My address" select As "My Address". The destination is saved as your home address.

Insert the SD memory card (page 142).

Select a POI, for example (page 57).

To select Save: turn and press the controller. A menu appears.

Select To Memory Card. If no destination has been saved yet on the SD card, an input menu will appear.

or

Select Not Classified or, if available, select a category that you have created yourself. An input menu appears.

Enter a new name and a new category for the destination in the input menu if required. Character entry (page 29).

Select OK. The Saving Successful message appears. The destination is saved to the SD card.

To switch to navigation mode: slide 1 to the controller.

To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.

If the navigation menu appears, press the controller. The map shows the vehicle's current position.

To show the menu: slide 2 to the controller.

To select Position: turn and press the controller.

Select Save. The current vehicle position is saved in "Last destinations".

To switch to navigation mode: slide 1 to the controller.

To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.

If the navigation menu appears, press the controller. The map shows the vehicle's current position.

To display the crosshair: press the controller.

Move the map to the desired position (page 49).

To show the menu: press the controller.

To select Position: turn and press the controller.

Select Save. The crosshair position is saved in the last destinations.
Editing the last destinations

➤ To switch to navigation mode: slide 1 the controller.
➤ To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
➤ If the navigation menu appears, press the controller. The map shows the vehicle’s current position.
➤ To show the menu: slide 2 the controller.
➤ To select Destination: turn and press the controller.
➤ Select From Previous Destinations. The "Last destinations" memory appears.
➤ To save the destination: select the destination. The destination address appears.
➤ Store the destination in the address book (> page 77).
➤ Save the destination to the SD card (> page 78).
➤ To view the details: while in the "Last destinations" memory, turn the controller and highlight the entry.
➤ Slide 3 the controller. A menu appears.
➤ To select Details: press the controller.

*i* The destination address can be changed if desired. For instance, a different street or house number can be selected.

➤ To delete one or all destinations: while in the "Last destinations" memory, turn the controller and highlight the entry.
➤ Slide 4 the controller. A menu appears.
➤ To select Delete or Delete All: turn and press the controller. A prompt appears.
➤ Select Yes or No. Selecting Yes deletes the selected destination or all destinations.

Map functions

General notes

Company logos displayed on the map are trademarks of the respective companies and used solely for the purpose of indicating the locations of these companies. The use of such logos on the map does not indicate approval of, support of or advertising by these companies for the navigation system itself.

*i* Alternatively, you can carry out this operation using the touchpad (> page 22).

Map settings

Setting the map scale

Requirement: the map is in full screen mode, the menu is faded out (> page 49). The lower left-hand section of the map shows the currently set map scale and compass needle.

Right-hand-drive vehicles: the currently set map scale and compass needle are displayed in the lower right-hand section of the map.

➤ To show the map in full screen mode: to hide the menu, push the button. or
➤ Slide the controller to the center of the map and press to confirm.

➤ To set the map scale: as soon as you turn the controller, the scale bar appears on the bottom of the display.
➤ Turn the controller until the needle points to the desired map scale. Once you are finished selecting a map scale, the new map scale will be shown.
Selecting map orientation

- **To switch to navigation mode:** slide the controller.
- **To select Navi:** turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears,** press the controller. The map shows the vehicle's current position.
- **To show the menu:** slide the controller.
- **To select Options:** turn and press the controller.
- **Select Map Orientation.** The ● dot indicates the current setting.
- **Turn and press the controller.** The map orientation is set.

<table>
<thead>
<tr>
<th>Change map direction</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>North Up</strong></td>
<td>The map view is displayed so that north is always up.</td>
</tr>
<tr>
<td><strong>Heading Up</strong></td>
<td>The map view is aligned to the direction of travel. The direction of travel is always at the top; the red tip of the symbol points north.</td>
</tr>
<tr>
<td><strong>3-D Map</strong></td>
<td>The map view is aligned to the direction of travel. The map displays a 3D oblique view with elevation; the red tip of the symbol points north.</td>
</tr>
</tbody>
</table>

Selecting POI symbols on the map

POIs can be displayed as symbols in the map display. POIs include, for example, gas stations, hotels and restaurants.

- **To switch to navigation mode:** slide the controller.
- **To select Navi:** turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears,** press the controller. The map shows the vehicle's current position.
- **To show the menu:** slide the controller.
- **To select Options:** turn and press the controller.
- **Select Map Content.**
- **Select POI Symbols On Map.**
  The ● dot indicates the current setting.
- **Turn and press the controller.**

**Default Symbols** shows symbols of predefined categories in the map. **Custom Symbols** allows symbols to be selected from other/all available categories.

- **Turn and press the controller.**

You have the option of selecting symbols to be displayed or not displayed on the map. The list shows all symbols that are contained on the digital map across all countries. However, not all points of interest are available in all countries. As a result, certain point of interest symbols may not be displayed on the map, even if the symbol display is switched on.

Selecting text information on the map

At the bottom of the display, you can specify whether to display geo-coordinates or not to display text information for the street you are currently on.
Displaying the next crossroads

If route guidance is not active, the next crossroads can be displayed at the upper edge of the display.

To switch to navigation mode: slide ⑤ the controller.
To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller. The map shows the vehicle’s current position.
To show the menu: slide ② the controller.
To select Options: turn and press the controller.
Select Map Content.
Select Next Intersecting Street.
Switch the display in the map on  ✔️ or off  ❌.

Showing the map version

To switch to navigation mode: slide ⑤ the controller.
To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller. The map shows the vehicle’s current position.
To show the menu: slide ② the controller.
To select Options: turn and press the controller.
Select Map Content.
Select Map Version.
Information on the current map version is shown. Information about new versions of the digital map can be obtained from an authorized Mercedes-Benz Center.
Rotating the 3D map

You can use this function to explore the vicinity of the destination in a 3D view. The function is available in all map scales.

- **To switch to navigation mode**: slide the controller.
- **To select Navi**: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- **If the navigation menu appears**, press the controller. The map shows the vehicle's current position.
- **To show the menu**: slide the controller.
- **To select Position**: turn and press the controller.
- **Select 3D Map Rotation**.
- Turn the controller to change to the 3D map perspective.

Additional functions:
- Moving the map (page 49)

Map display

Displaying the navigation map

The multimedia system displays the navigation map and globe satellite images. This allows for a realistic map display free from distortion in all map scales.

Other functions:
- Moving the map (page 49)
- Changing the map scale (page 79)

Building images

In small map scales 1/32 mi (20 m) and 1/16 mi (50 m) important buildings are depicted realistically on the map. Other buildings are shown as models.

Elevation model

The map uses elevation modeling to show a realistic illustration.

Avoiding an area

General notes

The multimedia system enables you to avoid areas you do not wish to drive through. If you activate or deactivate a route block while route guidance is active, the multimedia system will calculate a new route. If you activate or deactivate a route block while route guidance is inactive, the multimedia system will use the new setting for the next route guidance.

The calculated route may include an area to be avoided if:
- your destination is located in such an area
- there is no alternative route of comparable length available

Highways within blocked areas are always taken into consideration in the route calculation.

Alternatively, you can carry out this operation using the touchpad (page 22).
Avoiding a new area

To switch to navigation mode: slide the controller.
To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller. The map shows the vehicle’s current position.
To show the menu: slide the controller.
To select Options: turn and press the controller.
Select Route Settings.
Select Avoid Options.
Select Avoid Area.
Select Avoid New Area. A menu appears.
Select Using Map or Address Entry. If you select Using Map, the map with crosshair appears.
When you have selected Address Entry the address entry menu appears (> page 52). The map appears with the crosshair after the address is entered.

To select an area: when the map with crosshair appears, press the controller. A red square appears on the map, symbolizing the area to be blocked.
To change the size of the area, turn the controller. The map scale is shown at the bottom of the display. The needle points to the map scale currently selected.
When the desired size is set, press the controller. The area is entered into the list.

Turning an area on/off and displaying/changing the area

To switch to navigation mode: slide the controller.
To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
If the navigation menu appears, press the controller. The map shows the vehicle’s current position.
To show the menu: slide the controller.
To select Options: turn and press the controller.
Select Route Settings.
Select Avoid Options.
Select Avoid Area.
A list appears.
To switch an area to avoid on/off: select an area by turning and pressing the controller. The area will be avoided or not.
To display/change an area: mark an area by turning the controller.
Slide the controller.
To select Display/Change: press the controller. The map with the crosshair appears.
The area currently blocked is displayed as a red square.

- To move the area to a new location: slide ← →, ↑ ↓, ◀ ▶ the controller.
- To change the size of the area: press the controller.
- Turn the controller.
- To accept changes: press the controller. A message appears stating that the area has been set.

**Deleting one/all areas**

- To switch to navigation mode: slide ① the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle's current position.
- To show the menu: slide ④ the controller.
- To select Options: turn and press the controller.
- Select Route Settings.
- Select Avoid Options.
- Select Avoid Area. A list appears.
- To delete an area: mark an area by turning the controller.
- Slide ◀ the controller.
- Select Delete or Delete All. A prompt appears asking whether you wish to delete the area.
- Select Yes or No. After selecting Yes, the area is deleted.
- To delete all areas: when the list appears, slide ◀ the controller.
- Select Delete All. A prompt appears asking whether you wish to delete all areas.
- Select Yes or No. After selecting Yes, all areas are deleted.

**SIRIUS XM service**

**Displaying SIRIUS XM service information**

You can display the SIRIUS XM service information.

- To switch to navigation mode: slide ① the controller.
- To select Navi: turn and press the controller. The map displays the current vehicle position or the navigation menu appears.
- If the navigation menu appears, press the controller. The map shows the vehicle's current position.
- To show the menu: slide ④ the controller.
- To select Traffic: turn and press the controller.
- Select SIRIUS Service. The provider's phone number (SIRIUS XM) and the serial number of your service module are displayed.

Alternatively you can call up this function using the touchpad (▷ page 22).

**Registering for the SIRIUS XM traffic report service**

- Call the provider telephone number shown on the multimedia system display.

You can also have the satellite service activated online. To do so, visit the SIRIUS XM Radio website at http://www.sirius.com (USA).

- The connection is established: follow the service employee's instructions. The activation process may take up to ten minutes.

If registration is not included when purchasing the system, your credit card details will be required to activate your account.

**Updating the digital map**

**Introduction**

The digital maps generated by the map software become outdated in the same way as conventional road maps. Optimal route guidance can only be provided by the navigation system in
conjunction with the most up-to-date map software. Information about new versions of the digital map can be obtained from an authorized Mercedes-Benz Center. You can have the digital map updated there using a data medium, or you can update it yourself.

For USA and Mexico, it is possible to update the map data for the multimedia system free of charge for a period of three years. Information on the availability of this service for your vehicle can be obtained from your Mercedes-Benz Service Center.

**Entitlement to the free update**

For the first three years after your vehicle is registered, you are entitled to all available updates to the map software for the multimedia system. They are usually installed during a regular vehicle service. After this period, you can purchase further updates from your Mercedes-Benz Service Center.

The free updates relate to the vehicle and not to an individual. If there is a change of ownership within the three years after first registration, the new owner is entitled to the map software updates.

**Updating at an authorized Mercedes-Benz Center**

If an update for your map software is available, you will receive it free of charge at your Mercedes-Benz Service Center during your vehicle’s annual service. You can arrange a separate appointment for this at your Mercedes-Benz Service Center on request.

The update can only be performed:
- at an authorized Mercedes-Benz Center
- for map data for North America

The map software is not provided on DVD.

**Carrying out a manual update**

After the free update of the map data has expired or when buying map data, you can update the data yourself.

The update process may take some time (up to 45 minutes), depending on the size of the digital map. The update will be completed more quickly if the vehicle is stationary. If you begin the update while the vehicle is stationary and the starter battery has insufficient power, the multimedia system may switch off automatically. This protects the battery. In order to prevent this, a suitable power supply to the vehicle must be maintained.

**Navigation functions**

**Calling up the navigation system menu**

- To switch to navigation mode: slide the controller.
- To select Navi: turn and press the controller. The navigation menu appears or the map displays the current vehicle position.
- If the map appears, slide the controller.
- Press the controller. The navigation menu appears.
- To return to the map: turn the controller until Navigation appears and then press the controller.

**Calling up the online map display**

Requirement for online map display (USA): mbrace must be activated for Internet access (page 118).

Requirement for the online map display (Canada): a mobile phone is connected to the multimedia system via Bluetooth® (page 90) or USB (page 155).

- Call up the navigation menu (page 85).
- Turn the controller until Online Map Display is brought to the front.
- Press the controller. The online connection is established. Once the connection is established, the Google Maps™ map shows the vicinity of the current vehicle position.

Alternatively you can call up this function using the touchpad (page 22).

- To exit the online map display: press the button.
Calling up the compass display

Call up the navigation menu (› page 85).
Turn the controller until Compass is brought to the front.
Press the controller.
The compass display provides the following information:
- The current direction of travel with bearing (360 degree format) and compass direction
- Longitude and latitude coordinates in degrees, minutes and seconds
- Height (rounded off) above sea level
- Number of GPS satellites from which a signal can be received

Alternatively you can call up this function using the touchpad (› page 22).
To exit the compass display: press the button.

Route flight

Call up the navigation menu (› page 85).
Turn the controller until Route Flight is brought to the front.
Press the controller.
Alternatively you can call up this function using the touchpad (› page 22).
Select ➔.
The route will be flown along from a helicopter perspective.
To stop route flight: select ➕.
To exit the route flight: press the controller.
Press the button.

Info on navigation

Call up the navigation menu (› page 85).
Turn the controller until Info on Navigation is brought to the front.
Press the controller.
The Digital Operator’s Manual is opened at the section on navigation.
Alternatively you can call up this function using the touchpad (› page 22).
## Problems with the navigation system

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible causes/consequences and Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>The multimedia system does not resume route guidance after the journey has been interrupted.</td>
<td>Route guidance is canceled if you interrupt the journey for more than two hours. &quot;Interrupting the journey&quot; refers to stopping the vehicle. &quot;Continuing route guidance&quot; refers to switching the multimedia system back on and driving on. ► Continue route guidance manually (➔ page 71).</td>
</tr>
</tbody>
</table>
| The multimedia system is unable to determine the vehicle’s position. | The multimedia system must identify the vehicle’s position again after it has been transported. Example:  
- After transporting the vehicle by ferry  
- After transporting the vehicle by motorail  
► Start the vehicle and pull away.  
The multimedia system calculates the vehicle’s position. Depending on the driving situation, this may take some time.  
Route guidance may be restricted during the determination of the vehicle’s position.  
When positioning is complete, route guidance is resumed with navigation announcements and route guidance displays. |
| The Navigation Unavailable Please refer to the Operator’s Manual message appears. | The multimedia system has an integrated hard drive on which the digital map is stored.  
To protect the integrated hard drive against damage, the multimedia system deactivates it at very high and low temperatures. The navigation system will then be temporarily unavailable.  
► Let the vehicle and the multimedia system heat up or cool down to a normal temperature.  
► To hide the message: switch the multimedia system off and then on again. |
| A message informs you that the data medium containing the digital map is incompatible with the vehicle software. | The data medium containing the digital map cannot be used for the update.  
► To confirm the message: press the controller.  
► Remove the data medium.  
► Have the system database checked at an authorized Mercedes-Benz Center. |
## Problems with the navigation system

</tr>
</thead>
</table>
| The map software update has failed.                                     | The data medium is dirty.  
▶ Clean the data medium.  
▶ Restart the update.                                                       |
|                                                                         | The data medium is scratched.  
▶ Consult an authorized Mercedes-Benz Center.                                  |
|                                                                         | There is overheating due to excessive temperatures in the vehicle interior.  
▶ Wait until the vehicle interior has cooled down.  
▶ Restart the update.                                                       |
|                                                                         | The multimedia system’s integral hard disk has been physically damaged.  
▶ Consult an authorized Mercedes-Benz Center.                                |
| The multimedia system asks for an activation code during the map update.| The digital map is secured with an activation code.  
▶ Consult an authorized Mercedes-Benz Center.                                |
Your multimedia system equipment

These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions.

Read the information on qualified specialist workshops in the vehicle Operator’s Manual.

Important safety notes

⚠️ WARNING

If you operate mobile communication equipment while driving, you will be distracted from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident.

Only operate this equipment when the vehicle is stationary.

If you make a call on your mobile phone while driving, always use hands-free mode. Only use the mobile phone when road, weather and traffic conditions permit. Some jurisdictions prohibit the driver from using a mobile phone while driving a vehicle.

Bear in mind that at a speed of 30 mph (approximately 50 km/h), the vehicle covers a distance of 44 feet (approximately 14 m) per second.

Excessive levels of electromagnetic radiation may cause damage to your health and the health of others.

There is scientific discussion surrounding the possible health risks posed by electromagnetic fields. You can reduce this risk by using an exterior antenna.

Therefore, connect your mobile communications equipment to the vehicle’s exterior antenna wherever possible.

General notes

Telephony

A Bluetooth® interface is available for telephony.

If your mobile phone supports the Bluetooth® profile PBAP (Phone Book Access Profile), the contacts are automatically displayed in the multimedia system.

You can use the message function if your mobile phone supports the MAP Bluetooth® profile (Message Access Profile).

With a suitable mobile phone, you can use the hands-free system and receive vCards via the Bluetooth® interface.

You can obtain more information about suitable mobile phones on the Internet at http://www.mercedes-benz.com/connect.

Or call the Mercedes-Benz Service Center at 1-800-FOR-MERCEDES (1-800-367-6372) for the USA or at 1-800-387-0100 for Canada.

HD Voice®

The multimedia system supports telephone calls in HD Voice®. The voice quality can be improved with this procedure.

Requirements for HD Voice®:

- Your mobile phone and mobile phone network provider support HD Voice®.
- The mobile phone and mobile phone network provider of the person you are calling support HD Voice®.

Depending on the quality of the connection, the voice quality may fluctuate.

Call disconnection while the vehicle is in motion

A call may be disconnected if:

- there is insufficient network coverage in certain areas
- you move from one transmitter/receiver area (cell) into another and no channels are free
- you use a SIM card that is not compatible with the network available

Operating options

You can operate the telephone by:

- using the controller by turning, pressing, sliding ↔️ or ↑️↓️
- using the touchpad (page 22)
• using the \( \text{\textcopyright} \) or \( \text{\textregistered} \) button on the multifunction steering wheel
• using the Voice Control System (see the separate operating instructions)

**Function restrictions**

You may have to wait to use telephony via the multimedia system in the following situations:

- if the mobile phone is switched off
- if Bluetooth® is switched off on the mobile phone
- if the mobile phone is not (or not yet) logged into a mobile phone network
- if the Bluetooth® function is switched off in the multimedia system

The telephone automatically tries to log on to a network. If no network is available, you may not be able to make a "911" emergency call. If you attempt to make an outgoing call, the *No Service* message will appear for a short while.

**Telephone menu**

1. Mobile phone network provider
2. Signal strength of the mobile phone network
3. Receiver icon \( \text{\textcopyright} \) or \( \text{\textregistered} \)
4. Telephone menu character bar
5. Bluetooth® device name of the currently connected mobile phone
6. Enters characters using the touchpad
7. Displays the phone book

Symbols \( \text{\textcopyright} \) to \( \text{\textregistered} \) are not shown until after a mobile phone has been connected to the multimedia system. The symbols depend on your mobile phone and your mobile phone network provider. Further information on connecting a mobile phone (page 90).

Symbol \( \text{\textregistered} \) shows the current signal strength of the mobile phone network. If all bars are filled, you have optimum reception.
If the bars are not filled, you have very poor reception or no reception at all.

1. Receiver icon shows whether a call is active/being connected \( \text{\textcopyright} \) or not \( \text{\textregistered} \).

**Calling up the telephone menu**

- To show the main function bar: slide \( \text{\textcopyright} \) the controller.
- To select Phone: turn and press the controller. The telephone menu is displayed.

**Showing the menu bar**

- Slide \( \text{\textcopyright} \) the controller.

If the mobile phone connected supports the MAP Bluetooth® profile (Message Access Profile), the \( \text{\textcopyright} \) menu item is available. Further information on text messages and e-mail (page 111).

If you have an unread text message or e-mail, the \( \text{\textcopyright} \) mail symbol is displayed at the top in the status bar. The symbol disappears once you have read the text message or e-mail. The \( \text{\textcopyright} \) symbol is displayed as soon as the message memory on the mobile phone or SIM card is full. The symbol disappears once you delete at least one message.

**Connecting/disconnecting a mobile phone**

**Prerequisites**

For telephony via the Bluetooth® interface, you require a Bluetooth®-capable mobile phone. The mobile phone must support Hands-Free Profile 1.0 or above.

**On the multimedia system**

- Activate Bluetooth® (page 38).

**On the mobile phone**

- Switch on the mobile phone and enter the PIN when prompted to do so (see the manufacturer’s operating instructions).
- Activate Bluetooth® and, if necessary, Bluetooth® visibility for other devices (see the manufacturer’s operating instructions).
This visibility is for restricted periods of time on some mobile phones (see the manufacturer's operating instructions).

► Set the Bluetooth® device name for the mobile phone if necessary.

The Bluetooth® device names for all of one manufacturer's products might be identical. To make it possible to clearly identify your mobile phone, change the device name (see the manufacturer's operating instructions). The name can be freely selected.

If the mobile phone supports the PBAP (Phone Book Access Profile) and MAP (Message Access Profile) Bluetooth® profiles, the following information will be transmitted after you connect:

- Phone book
- Call lists
- Messages

Further information on allowing or suppressing the automatic download of the phone book (> page 106).

The battery of the mobile phone should always be kept sufficiently charged in order to prevent malfunctions.

Not all mobile phones available on the market are equally suitable. You can obtain further information about suitable mobile phones and about the connection between the mobile phone and the multimedia system on the Internet at http://www.mercedes-benz.com/connect.

You can also obtain more information by calling.

In the USA, you can get in touch with the Mercedes-Benz Customer Assistance Center on 1-800-FOR-MERCEDES (1-800-367-6372).

In Canada, you can get in touch with the Customer Relations Center on 1-800-387-0100.

Some displays (e.g. the signal strength) depend on the supported version of the Hands-Free Profile.

Procedure and general information

Searching for and authorizing (connecting) a mobile phone

Before using your mobile phone with the multimedia system for the first time, you will need to search for the phone (> page 91) and then authorize it (> page 92). Depending on the mobile phone, authorization either takes place by means of Secure Simple Pairing or by entering a passkey. The multimedia system automatically makes the procedure that is relevant for your mobile phone available. You can recognize Secure Simple Pairing by the fact that a code is displayed on the mobile phone and on the multimedia system. You can recognize the passkey system by the fact that you have to enter a code on the mobile phone and on the multimedia system. The mobile phone is always connected automatically after authorization.

If the multimedia system does not detect your mobile phone, this may be due to particular security settings on your mobile phone. You can also start the search procedure and authorization on the mobile phone (> page 93).

Device-specific information on authorizing and connecting Bluetooth®-capable mobile phones can be found on the Internet at http://www.mercedes-benz.com/connect.

You can authorize up to 15 mobile phones. After authorization, the connection of the last two telephones used always functions automatically. Only one mobile phone can be connected to the multimedia system at any one time.

De-authorizing (disconnecting) a mobile phone

The connection is terminated automatically if you leave the receiver range of the multimedia system or deactivate Bluetooth® on your mobile phone.

If you no longer want the Bluetooth® connection to be established automatically, the mobile phone must be de-authorized (disconnected) (> page 94).

Searching for a mobile phone
To show the main function bar: slide the controller.

To select **Phone**: turn and press the controller. The telephone menu is displayed.

To switch to the menu bar in the telephone menu: slide the controller. The device list is displayed.

To select **Search for Phones**: turn and press the controller.

A message is displayed that Bluetooth® must be activated on the mobile phone and must be made visible to other devices.

To select **Start Search**: press the controller.

The available mobile phones are displayed in the device list.

The duration of the search depends on the number of Bluetooth® telephones within range and their characteristics.

If a new phone is found, it appears in the device list with the symbol. You can now authorize (connect) the mobile phone found (page 92).

If the maximum number of authorized devices in the device list is reached, you will be requested to de-authorize a mobile phone (page 94). When you call up the device list again, de-authorized devices will be removed from the list. To update the device list, start the search again.

### Symbols in the device list

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="symbol.png" alt="New mobile phone found, not yet authorized" /></td>
<td>New mobile phone found, not yet authorized.</td>
</tr>
<tr>
<td><img src="symbol.png" alt="Mobile phone is authorized, but is not connected" /></td>
<td>Mobile phone is authorized, but is not connected</td>
</tr>
<tr>
<td><img src="symbol.png" alt="Mobile phone is authorized and connected" /></td>
<td>Mobile phone is authorized and connected</td>
</tr>
</tbody>
</table>

To select a mobile phone from the device list: turn the controller and press to confirm. A code is displayed in the multimedia system and on the mobile phone.

**The code is the same**

- **Multimedia system**: select **Yes**.
- **Mobile phone**: confirm the code. Depending on the mobile phone used, you may have to confirm the connection to the multimedia system and for the PBAP and MAP Bluetooth® profiles. The prompt to confirm may take up to two minutes to be displayed. You may also save the confirmation on the mobile phone (see the manufacturer’s operating instructions).

The mobile phone is now authorized and connected to the multimedia system. You can now speak using the hands-free system.

To ensure an optimum language quality, you can set the mobile phone’s transmission and reception volume (page 94).

**The code is different**

- **Multimedia system**: select **No**.

The process is canceled. Repeat the authorization.

### Authorization via passkey entry (access code)

If the multimedia system has found your mobile phone, you can authorize (connect) it.

- To select the Bluetooth® name of the desired mobile phone in the device list: turn and press the controller.

The input menu for the passkey is displayed. The passkey is a one- to sixteen-digit number combination which you can choose yourself.

- **Multimedia system**: enter the passkey using the character bar.

Select once all the numbers have been entered.

- **Mobile phone**: enter the same passkey and confirm your entry. Depending on the mobile phone used, you may have to confirm the connection to the multimedia system and for the PBAP and MAP Bluetooth® profiles. The prompt to confirm may take up to two minutes to be displayed. You may also save the confirmation on the mobile phone (see the manufacturer’s operating instructions).
the confirmation on the mobile phone (see the manufacturer's operating instructions). The mobile phone is now authorized and connected to the multimedia system. You can now speak using the hands-free system.

To ensure an optimum language quality, you can set the mobile phone's transmission and reception volume (page 94).

If the Authorization Failed message appears, you may have entered a different passkey or exceeded the prescribed time limit. Repeat the procedure.

Some mobile phones require a passkey with four or more digits.

If you wish to re-authorize the mobile phone after de-authorizing it, you can choose another passkey for it.

### Establishing the connection from the mobile phone

The Bluetooth® device name of the multimedia system is MB Bluetooth.

- **Multimedia system**: call up the telephone menu.
- **To switch to the menu bar**: slide the controller.
- **To select Connect Device**: turn and press the controller. The device list is displayed.
- **To select Connect via Phone**: turn and press the controller. A message is displayed, stating that you can start the search on your mobile phone.
- **Mobile phone**: start the search for a Bluetooth® device (see manufacturer's operating instructions). The multimedia system is displayed with the name MB Bluetooth in the mobile phone's device list.
- **Select MB Bluetooth**. A prompt appears in the multimedia system's display asking if the mobile phone should be authorized.
- **Multimedia system**: select Yes.

If No is selected, the procedure is canceled. If your mobile phone supports Secure Simple Pairing, a code is now displayed on both devices.

#### The code is the same

- **Multimedia system**: select Yes.
- **Mobile phone**: confirm the code. Depending on the mobile phone used, you may have to confirm the connection to the multimedia system and for the PBAP and MAP Bluetooth® profiles. The prompt to confirm may take up to two minutes to be displayed. You may also save the confirmation on the mobile phone (see the manufacturer's operating instructions).

The mobile phone is now authorized and connected to the multimedia system. You can now speak using the hands-free system.

To ensure an optimum language quality, you can set the mobile phone's transmission and reception volume (page 94).

#### The code is different

- **Multimedia system**: select No.
  
  The process is canceled. Repeat the procedure.

If your mobile phone does not support Secure Simple Pairing, an input menu is displayed for the passkey. The passkey is a one- to sixteen-digit number combination which you can choose yourself. Enter the same passkey in both the multimedia system and on the mobile phone and confirm. Depending on the mobile phone used, you may have to confirm the connection to the multimedia system and for the PBAP and MAP Bluetooth® profiles.

### Reconnecting automatically

The multimedia system always searches for the last connected mobile phone. If no connection can be made to the most recently connected mobile phone, the system searches for the mobile phone that was connected before that one.

### Switching between mobile phones

If you have authorized more than one mobile phone, you can switch between the individual phones.

- **To show the main function bar**: slide the controller.
- **To select Phone**: turn and press the controller. The telephone menu is displayed.
To show the menu bar: slide the controller.

To select Connect Device: turn and press the controller. The device list is displayed.

To select the desired mobile phone: turn and press the controller. The selected mobile phone is searched for and connected if it is within Bluetooth® range and if Bluetooth® is activated.

Only one mobile phone can be connected at any one time. The currently connected mobile phone is indicated by the dot in the device list.

You can only switch to another authorized mobile phone if you are not currently making a call.

De-authorizing (disconnecting) a mobile phone

Mercedes-Benz USA, LLC recommends de-authorization in the multimedia system as well as on the mobile phone. Subsequent authorization may otherwise fail.

To show the main function bar: slide the controller.

To select Phone: turn and press the controller. The telephone menu is displayed.

To show the menu bar: slide the controller.

To select Connect Device: turn and press the controller.

To highlight the desired mobile phone in the device list: turn the controller.

To select G: slide the controller.

To select Details: turn and press the controller.

The following information concerning the selected mobile phone is shown:
- Bluetooth® device name
- Bluetooth® address
- Availability status (shown after a new search)
- Authorization status

To close the detailed display: slide the controller.

Reception and transmission volume

Once the mobile phone has been authorized, you can optimize the transmission and reception volume settings. To find out about the best possible settings for your mobile phone, visit http://www.mercedes-benz.com/connect.

Or call the Mercedes-Benz Customer Assistance Center at 1-800-FOR-MERCEDES (1-800-367-6372) (USA) or Customer Relations at 1-800-387-0100 (Canada).
To show the main function bar: slide the controller.
To select **Phone**: turn and press the controller. The telephone menu is displayed.
To switch to the menu bar: slide the controller.
To select **Connect Device**: turn and press the controller. The device list appears.
To highlight the desired mobile phone in the device list: turn the controller.
To select a volume setting: turn the controller.
To accept changes: press the controller.
- Incorrect settings may have an impact on the quality of calls.

### Making a call

#### Using the telephone menu
- To show the main function bar: slide the controller.
- To select **Phone**: turn and press the controller. The telephone menu is displayed.
- To select the sequence of numbers: turn and press the controller for each number.
- To select **Reception Volume** or **Transmission Volume**: turn and press the controller.
- To select a volume setting: turn the controller.
- To accept changes: press the controller.

Further information about ending a call (› page 98).

#### Using the touchpad
- To display the main function bar: slide the controller.
- To select **Phone**: turn and press the controller. The telephone menu is displayed.
- To select **Reception Volume** or **Transmission Volume**: turn and press the controller.
- Draw the sequence of numbers on the touch-sensitive surface.
- To select **Reception Volume** or **Transmission Volume**: turn and press the controller.
- The call is made.

Further information about the touchpad (› page 24).

#### Using favorites
This function can be used when a telephone number has been added as a favorite. Further information about adding favorites (› page 31).
- Press the favorites button on the controller. The favorites are displayed.
- To select a telephone number: turn the controller.
- To make a call: press the controller.

### Rejecting a call
- To select **Reject**: turn and press the controller.
- Press the multifunction steering wheel.

#### Telephone menu
- To show the main function bar: slide the controller.
- To select **Phone**: turn and press the controller. The telephone menu is displayed.
- To select the sequence of numbers: turn and press the controller for each number.
- To select **Reception Volume** or **Transmission Volume**: turn and press the controller.
- To select a volume setting: turn the controller.
- To accept changes: press the controller.

Further information about ending a call (› page 98).

#### Touchpad
- To display the main function bar: slide the controller.
- To select **Phone**: turn and press the controller. The telephone menu is displayed.
- To select **Reception Volume** or **Transmission Volume**: turn and press the controller.
- Draw the sequence of numbers on the touch-sensitive surface.
- To select **Reception Volume** or **Transmission Volume**: turn and press the controller.
- The call is made.

Further information about the touchpad (› page 24).

#### Using favorites
This function can be used when a telephone number has been added as a favorite. Further information about adding favorites (› page 31).
- Press the favorites button on the controller. The favorites are displayed.
- To select a telephone number: turn the controller.
- To make a call: press the controller.

### Redial
- To show the main function bar: slide the controller.
- To select **Phone**: turn and press the controller. The telephone menu is displayed.
To select \( \text{in the telephone menu: turn and press the controller. The list of outgoing calls is displayed. The most recently dialed number is at the top.} \)

To select an entry and make a call: turn and press the controller.

For redialing using the multifunction steering wheel (see the vehicle Operator’s Manual).

Further information about ending a call (\( \text{page 98.} \))

### Using call lists

- To show the main function bar: slide \( \text{the controller.} \)
- To select \( \text{Phone: turn and press the controller. The telephone menu is displayed.} \)
- To switch to the menu bar: slide \( \text{the controller.} \)
- To select \( \text{Call Lists: turn and press the controller.} \)
- To select \( \text{Calls Received or Calls Dialed: turn and press the controller. The relevant list is displayed.} \)
- To select an entry and make a call: turn and press the controller.

Selecting and placing a call using the multifunction steering wheel (see vehicle Operator’s Manual)

Further information about ending a call (\( \text{page 98.} \))

### Using the phone book

- To show the main function bar: slide \( \text{the controller.} \)
- To select \( \text{Phone: turn and press the controller. The telephone menu is displayed.} \)
- To select \( \text{Name in the telephone menu: turn and press the controller.} \)
- Search for a contact (\( \text{page 100.} \))
- To make a call: press the controller.

Selecting and placing a call using the multifunction steering wheel (see vehicle Operator’s Manual)

Further information about ending a call (\( \text{page 98.} \))

### Using speed dial

- To show the main function bar: slide \( \text{the controller.} \)
- To select \( \text{Phone: turn and press the controller. The telephone menu is displayed.} \)
- To highlight a number from the character bar: turn the controller.
- Press the controller for longer than two seconds.
  The telephone menu displays the selected entry. The number is dialed.

Further information on setting up speed dial (\( \text{page 110.} \))

Further information about ending a call (\( \text{page 98.} \))

### Functions available during a call

#### Overview

1. Adds a call (\( \text{page 97.} \))
2. Person you are calling
3. Symbol for active telephone connection
4. Ends a call
5. Switches the microphone on or off (\( \text{page 97.} \))
6. Sends DTMF tones (not possible with all mobile phones) (\( \text{page 97.} \))

Other functions:
- Accepting a waiting call (\( \text{page 98.} \))
- Call waiting (\( \text{page 97.} \))
- Conducting a conference call (\( \text{page 98.} \))

Availability depends on the network (only possible on GSM networks) and the Bluetooth® mobile phone.
Adding a call

If the mobile phone network provider and the mobile phone support the function, you can make another call during an existing call. The previously active call is held.

If you would like to listen to the messages on your answering machine, for example, dial the corresponding number.

Transmitting individual characters

Once a connection has been established to the answer phone, select the desired characters in the telephone menu: turn and press the controller each time. Every character selected will be transmitted immediately.

Calls with several participants

Switching between calls (call waiting)

If you make another call, you can switch between the two calls (call waiting). This function depends on your mobile phone network provider and the mobile phone (see the manufacturer's operating instructions). The calls are marked 1 and 2. The active call is highlighted.

Switching between the calls

To select \( \mathbb{1} \) or \( \mathbb{2} \): turn and press the controller.

or

Press \( \mathbb{6} \) on the multifunction steering wheel. The selected call is active. The other call is on hold.

Ending the active call

To select \( \mathbb{3} \) in the telephone menu: turn and press the controller.

or

Press \( \mathbb{7} \) on the multifunction steering wheel. The other call is still on hold.

Switching the microphone on/off

This function is available in the telephone menu during an active phone call.

Switching off the microphone:

To switch to the menu bar: slide \( \mathbb{\circ} \) the controller.

To select Microphone Off: turn and press the controller.

If the microphone is switched off, the symbol and the message are displayed.

Switching on the microphone:

Select Microphone On.

The symbol disappears. The message is shown.

Sending DTMF tones

This function is not supported by all mobile phones.

Answering machines or other devices can be controlled by DTMF tones, e.g. for remote query functions.
To activate the call on hold: select Resume.
The call on hold is activated. If you select Hang Up, the call on hold is also ended.

On some mobile phones, the call on hold is activated as soon as the active call is ended.

Conference call

You can interconnect active and held calls. This permits several parties to hear one another and speak with one another. This function depends on your mobile phone network provider and the mobile phone (see the manufacturer’s operating instructions).

Accepting

To select Accept: press the controller.

Press on the multifunction steering wheel.
The incoming call is active, the previously active call is on hold. You can switch back and forth between both calls (call waiting) (page 97).

Depending on the mobile phone, you may also be able to accept the incoming call (call waiting) on your mobile phone. This function and behavior depends on your mobile phone network provider and the mobile phone (see the manufacturer’s operating instructions).

Rejecting

To select Reject: turn and press the controller.

Press on the multifunction steering wheel.
The behavior after the call is rejected depends on your mobile phone and mobile phone network provider.

Option 1: The originally active call is continued and the incoming call is rejected.
Option 2: The originally active call is ended and the incoming call is accepted.
Option 3: Both calls are ended.

Ending an active call

To select in the telephone menu: turn and press the controller.

Press on the multifunction steering wheel.
The active call is ended.

Mobile phone voice recognition

You can start or end voice recognition on your mobile phone with this function. Further information on the voice recognition service; see the manufacturer’s operating instructions.

To start the mobile phone voice recognition:
Connect the mobile phone to the multimedia system (>
page 90).
Press and hold the \[a\] button on the multifunction steering wheel for more than one second.
You can now use the mobile phone voice recognition.

To end the mobile phone voice recognition:
Press \[a\] on the multifunction steering wheel.
The mobile phone voice recognition is stopped.

Phone book

Introduction
The phone book displays the contacts from the address book which have a phone number.
The phone book of the mobile phone is automatically displayed in the multimedia system
after the connection is established (default setting). You can deactivate automatic calling up
(>
page 106).
In the phone book, you can:
• Create new contacts (> page 101)
• Add information to contacts (> page 101)
• Search for contacts (> page 100)
• Store contacts (> page 101)
• Delete contacts (> page 102)
Further information on importing contacts (> page 107).
When you import, save, edit or add contacts, they will be permanently saved in the multimedia system. These contacts will remain available even when you connect the multimedia system to a different mobile phone. You can view these contacts even without a mobile phone.

Calling up the phone book

- To show the main function bar: slide \(\) the controller.
- To select Phone: turn and press the controller. The telephone menu is displayed.
- To select Name in the telephone menu: turn and press the controller.
If the phone book contains contacts, they will be displayed in alphabetical order. The character bar at the bottom of the display is active.
You can now search for a contact (> page 100).
Further information on the symbols shown (> page 99).

You can also call up the phone book with the multifunction steering wheel; see the Vehicles Operator’s Manual.

Searching for a contact

Using the character bar

You determine the first letter of the contact you are looking for with the first character you enter.

- To select characters: turn the controller and press to confirm.
  
  The first contact with the selected first character is highlighted in the phone book. If there are similar contacts, the next different character is shown. For example, with contacts such as Jana and John, the beginnings of the names are identical. The next different characters A and O are offered for selection.

- Select the characters of the contact you are searching for one by one, pressing and confirming with the controller each time.

- To select ☐: turn and press the controller.
  
  The contacts in the phone book are displayed.

- To select a contact: turn and press the controller.

The ☐ symbol indicates that a contact contains more than one phone number.

- To select a contact with the ☐ symbol: turn the controller and press to confirm.
  
  The phone numbers are displayed. The ☐ symbol changes to ☑.

Information about character entry (＞ page 28).

Using the touchpad

You determine the first letter of the contact you are looking for with the first character you enter.

- Draw the letter on the touchpad surface.
  
  The first contact with the selected first character is highlighted in the phone book.

Further information on handwriting recognition on the touchpad (＞ page 24).

- Draw additional letters on the touchpad surface one after another.

- To complete the search and return to the phone book: press the touchpad.

- To select and call the contact: glide up or down and press.

Using the multifunction steering wheel

- Dial a number from the phone book; see the vehicle Operator’s Manual.

Displaying the details of a contact

- To highlight a contact in the phone book: turn the controller.

- To select ☐: slide ☑ the controller.

- To select Details: turn and press the controller.
  
  The detailed view appears.

Closing the detailed display

- To select ☐: slide ☑ and press the controller.
Adding a new contact

- Slide the controller repeatedly in the phone book until the selection list appears.
- To select : slide the controller.
- To select New: turn and press the controller.
- To select a category for the number, e.g. Home: turn the controller and press to confirm.
- To select a telephone category, e.g. Mobile Phone: turn the controller and press to confirm.
- To select Continue: turn and press the controller.
- The input menu with input lines is displayed.
- Enter characters using the controller (page 28) or the touchpad (page 24).
- To finish and save an entry: select . The contact is created in the phone book and in the address book.

Adding information to a contact

You can add a telephone number to an existing contact.
- To highlight a contact in the phone book: turn the controller.
- To select : slide the controller.
- To select Add Phone No.: turn and press the controller.
- To select a category for the number, e.g. Home: turn the controller and press to confirm.
- To select a telephone category, e.g. Mobile Phone: turn the controller and press to confirm.

If you have marked a number as favored, it appears at the top of the list and is highlighted.
- To select Continue: turn and press the controller.
- An input line appears.
- Enter the telephone number.
- Select .

A maximum of five entries can be saved for one category.
If five numbers are already stored for the entry you are searching for, a prompt will appear asking whether you wish to overwrite one of the existing numbers.

Overwriting an entry

- To select Yes: turn and press the controller.
- A list of the existing five phone numbers is displayed.
- To select the number to be overwritten from the list: turn the controller and press to confirm.
- The entry field for the new phone number is displayed.
- Enter characters using the controller (page 28) or the touchpad (page 24).

Canceling the overwriting of an entry

- To select No: turn and press the controller.
- The process is canceled.

Saving a contact

Saved contacts are indicated in the phone book by different symbols (page 99).
- Search for a contact on the mobile phone (page 100).
- To select : slide the controller.
- To select Save: turn and press the controller.
- The contact has now been saved. The contact is identified by the symbol in the phone book.

Saved contacts are also displayed in the address book.
Saving or editing the contact data in the multimedia system does not change the contacts on the mobile phone. If automatic calling-up of phone contacts is activated, the multimedia system displays the copy with the changed data.
To add additional data, such as additional phone numbers or e-mail addresses, select this contact. In this way, you avoid creating additional copies of the mobile phone entry.

**Deleting a name**

You can delete contacts that have been added, supplemented, saved or imported in the multimedia system.

If there are only phone numbers saved under the contact, the contact is deleted from the phone book and the address book.

If there are additional entries under the contact, such as a navigable destination, only the phone numbers are deleted. The contact is retained in the address book with the remaining entries.

- To highlight a contact in the phone book: turn the controller.
- To select [Delete Entry]: turn and press the controller.
- A prompt appears asking whether the contact should be deleted.
- To select Yes: turn and press the controller. The phone number is deleted.

**Closing the phone book**

- To select [ ] from the character bar: turn the controller and press to confirm.

**Address book**

**Introduction**

Always pay attention to traffic conditions.

Familiarize yourself with the address book functions before beginning your journey.

You can use the multimedia system when the road and traffic conditions permit. You could otherwise become involved in an accident in which you or others could be injured.

The address book displays all the contacts from the various sources (mobile phone, memory card, USB device, the phone book of the multimedia system, navigation).

You can use the contacts to make telephone calls, navigate and to write messages.

If a mobile phone is connected to the multimedia system and automatic calling up is activated (> page 106), the mobile phone’s contacts are displayed in the address book. If you disconnect the mobile phone from the multimedia system, these contacts are no longer displayed in the address book.

When you import, save, edit or add contacts, they will be saved in the multimedia system. These contacts will remain available even when you connect the multimedia system to a different mobile phone. You can view these contacts even without a mobile phone.

- The address book can store a total of 5,000 contacts:
  - 2000 entries are reserved for permanently saved contacts.
  - 3000 entries are reserved for contacts that you can load from the mobile phone.

Before selling your vehicle, delete the contacts saved in the multimedia system using the reset function (> page 40).

**Calling up the address book**

- To display the main function bar: slide [ ] the controller.
- To select Phone: turn and press the controller. The telephone menu is displayed.
- To select Phone: slide [ ] and press the controller.
- To select Address Book: turn and press the controller.
- To browse in the address book: turn the controller.

An address book entry can also include a picture. This is shown to the left of the address data. Address book entries with pictures can only be created by importing vCards (vcf files). Further information on importing...
vCards (page 107). The quality of the picture depends on the picture’s resolution.

**Searching for a contact**

**Using the character bar**

- Call up the address book (page 102).
- To switch to the menu bar: slide the controller.
- To select **Search**: turn and press the controller.
- To select characters: turn the controller and press to confirm.

The first contact with the selected first character is highlighted in the phone book. If there are similar contacts, the next different character is shown. For example, with contacts such as Jana and John, the beginnings of the names are identical. The next different character A and O are offered for selection.

- Select the characters of the contact you are searching for one by one, pressing and confirming with the controller each time.
- To complete the search: slide the controller repeatedly until the character bar disappears.
- Or to select **OK**: turn and press the controller.

The details for the contact are displayed.

**Adding a new contact**

You can enter address data directly into the address book. If you store telephone numbers in the phone book of the multimedia system, these are also saved in the address book. If you store a navigation destination, the multimedia system creates an address book entry that includes the complete navigable address data.

- Call up the address book (page 102).
- To switch to the menu bar: slide the controller.
- To select **New**: turn and press the controller.

The surname and first name input lines are displayed.

- To save the surname and first name: select **OK**.

The details for the contact are displayed.

- To add a desired entry (e.g. **Add E-Mail Address**): turn and press the controller. Depending on the type of entry, the corresponding input menu appears.
- To enter characters using the controller (page 28) or the touchpad (page 24).
- To save the surname and first name: select **OK**.

The details for the contact are displayed.

- To add a desired entry (e.g. **Add E-Mail Address**): turn and press the controller. Depending on the type of entry, the corresponding input menu appears.
- To enter characters using the controller (page 28) or the touchpad (page 24).
- To finish and save an entry: select **OK**.

**Displaying contact details**

- Call up the address book (page 102).
- To select a contact: turn and press the controller.

The details for the contact are displayed.
The entries can be categorized as follows:

- Business details
- Home details

An address book entry can contain the following information:

- name
- first name
- company
- up to five telephone numbers
- two email addresses
- Internet address
- two addresses
- two navigation addresses (transferred from navigation (page 53))
- geo-coordinates

Adding information to a contact

- Call up the address book (page 102).
- To select a contact: turn and press the controller.
- The details for the contact are displayed.
- To add a desired entry (e.g. Add E-Mail Address): turn and press the controller.
  Depending on the type of entry, the corresponding input menu appears.
- Enter characters using the controller (page 28) or the touchpad (page 24).
- To finish and save an entry: select ok .

A maximum of five telephone numbers can be saved for one contact.

Starting route guidance to an address or geo-coordinates

If an address with a ZIP code is saved, the address can be used for route guidance. If the ZIP code cannot be assigned to an exact address, you can adjust the destination subsequently using the controller.

- Call up the address book (page 102).
- To select a contact: turn and press the controller.
- The details for the contact are displayed.
- To select an address: turn and press the controller.
- To select an entry with geo-coordinates: turn and press the controller.
  The navigation menu is displayed.
- To select Start Route Guidance: slide and press the controller.
  The route to the destination address is calculated and route guidance starts.

Making a call

- Call up the address book (page 102).
- To select a contact: turn and press the controller.
  The details for the contact are displayed.
- To select a telephone number: turn and press the controller.
  The number is dialed. Further information about the functions during a call (page 96).

Sending text messages

- Call up the address book (page 102).
- To select a contact: turn and press the controller.
  The details for the contact are displayed.
- To highlight the telephone number: turn the controller.
- To select Send Text Message: turn and press the controller.
  The entry fields for a text message are displayed (page 114).

Observethe requirements for the message function (page 111).

Sending an e-mail

- Call up the address book (page 102).
- Select an entry: turn and press the controller.
  The details for the contact are displayed.
- To select an e-mail address: turn and press the controller.
  The entry fields for an e-mail are displayed (page 115).

Observe the requirements for the message function (page 111).
**Displaying sub-entry information**

- Call up the address book (> page 102).
- Select an entry: turn and press the controller. The details for the contact are displayed.
- To highlight the desired entry: turn the controller.
- To select **Menu**: slide ⬇️ the controller.
- To select **Details**: turn and press the controller. The display is shown in full.

**Editing a contact**

- Call up the address book (> page 102).
- To select a contact: turn and press the controller. The details for the contact are displayed.
- To highlight the desired entry: turn the controller.
- To select **Menu**: slide ⬇️ the controller.
- To select **Edit**: turn and press the controller. The entry field for the selected entry is displayed.

Information about character entry (> page 28).

**Changing the category of an entry**

- Call up the address book (> page 102).
- Select an entry: turn and press the controller. The details for the contact are displayed.
- To highlight the desired entry: turn the controller.
- To select **Menu**: slide ⬇️ the controller.
- To select **Change Category**: turn and press the controller.
- To select a category: turn the controller and press to confirm.

**Storing the phone number as a speed dial number**

- Call up the address book (> page 102).
- Select an entry: turn and press the controller. The details for the contact are displayed.
- To highlight the desired telephone number: turn the controller.
- To select **Menu**: slide ⬇️ the controller.
- To select **Speed Dial**: turn and press the controller.
- To select **Assign Speed Dial Preset**: turn and press the controller.
- To select a memory position for the speed dial: turn and press the controller. The phone number has been saved as a speed dial.

**Voice tags**

**Introduction**

You can enter voice tags via the Voice Control System (see the separate operating instructions). Once you have assigned a voice tag to an address book entry, you can call up this entry with a voice command and dial a phone number, for example. You can add one voice tag per address book entry.

**Adding a voice tag**

- Call up the address book (> page 102).
- Search for an address book entry with or without a voice tag (> page 103).
- To select **Menu**: slide ⬇️ the controller.
- To select **Voice Tag**: turn and press the controller.
- To select **Add**: turn and press the controller. Subsequent operation is voice-controlled. The Voice Control System guides you through the dialogs.

**Deleting a voice tag**

- Call up the address book (> page 102).
- Search for an address book entry with a voice tag (> page 103).
- To select **Menu**: slide ⬇️ the controller.
To select **Voice Tag**: turn and press the controller.

To select **Delete**: turn and press the controller.

To select **Yes**: turn and press the controller. The voice tag is deleted.

**Listening to a voice tag**

- Search for an address book entry with a voice tag (> page 103).
- To select **Voice Tag**: turn and press the controller.
- To select **Listen**: turn and press the controller.

You hear the voice tag.

**Changing the display and sorting criteria for contacts**

- Call up the address book (> page 102).
- To show the menu bar: slide ➤ the controller.
- To select **Options**: turn and press the controller.
- To select **Display and Sorting**: turn and press the controller.

You have the following options:

- **Last Name, First Name** (default setting)
  The contacts are sorted by surname and displayed with a comma.

- **Last Name First Name**
  The contacts are sorted by surname and displayed without a comma.

- **First Name Last Name**
  The contacts are sorted by first name and displayed without a comma.

- To select the required option: turn and press the controller.

The contacts are sorted and displayed according to the selection.

**Automatically importing contacts from the phone**

Depending on the mobile phone used, you can set whether the contacts should be called up automatically after the mobile phone is connected to the multimedia system.

- Connect a mobile phone (> page 90).
- Call up the address book (> page 102).
- To show the menu bar: slide ➤ the controller.
- To select **Options**: turn and press the controller.
- To select **Automatically Import Contacts from Phone**: turn and press the controller.

You can allow ✔ or deactivate □ the automatic download.

**Saving a contact**

Saved contacts are indicated in the phone book by different symbols (> page 99).

- Call up the address book (> page 102).
- To select a contact: turn and press the controller.

The details for the contact are displayed.

- To select ➤: slide ➤ the controller.
- To select **Save**: turn and press the controller.

The contact has now been saved.

If the saved address book entry contains a phone number, the entry is also displayed in the phone book.

Saving or editing the contact data in the multimedia system does not change the contacts on the mobile phone. If automatic downloading of phone contacts is activated, the multimedia system displays the copy with the changed data. To add additional data, such as additional phone numbers or e-mail addresses, select this contact. In this way, you avoid creating additional copies of the mobile phone entry.

**Deleting a name**

- Call up the address book (> page 102).
- Search for a contact (> page 103).
- To select ➤: slide ➤ the controller.
- To select **Delete Entry**: turn and press the controller.
- To select **Yes**: turn and press the controller.

The contact is deleted.
Importing contacts

Information and requirements

Contacts can be imported as vCards (vcf files). A vCard is an electronic business card. A memory card, USB device or a Bluetooth® connection can be used for importing.

- Up to 2000 entries can be imported into the address book. A message notifies you when the maximum number is reached. In order to be able to then import new contacts, you have to delete existing contacts (> page 106).

<table>
<thead>
<tr>
<th>Source</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Memory card</td>
<td>The SD card is inserted. It contains importable contact details.</td>
</tr>
<tr>
<td>USB device</td>
<td>The USB device is inserted into the USB port. It contains importable contact details.</td>
</tr>
<tr>
<td>Bluetooth® connection</td>
<td>If the sending of vCards is supported via Bluetooth®, vCards can be received on mobile phones or netbooks, for example. Bluetooth® must be activated in the multimedia system and on the respective device; see the manufacturer’s operating instructions.</td>
</tr>
</tbody>
</table>

- If automatic calling up of the contacts is deactivated (> page 106), the Import from Phone option is available.

Importing from the memory card or USB device

Contacts imported from the memory card or from a USB device are identified by the icon.

The following conditions must be fulfilled in order to import vCards:

- vCards (vcf files) may be located in the main directory or in folders. The multimedia system allows for a targeted selection of the corresponding directories.
- vCards must have the file extension "vcf".

The multimedia system supports vCards in versions 2.1 and 3.0.

- To switch to the menu bar in the telephone menu or the address book: slide the controller.
- To select Options: turn and press the controller.
- To select Download Contacts: turn and press the controller.
- To select From Memory Card or From USB device: turn and press the controller.

Receiving vCards via Bluetooth®

Multimedia system

- To switch to the menu bar in the telephone menu or the address book: slide the controller.
- To select Options: turn and press the controller.
- To select Download Contacts: turn and press the controller.
- To select From Bluetooth Device: turn and press the controller.

If the multimedia system is connected to a mobile phone, the connection is terminated. vCards can now be received by a device (PC, mobile phone) via Bluetooth®.

External device

- Start the data transfer; see the manufacturer's operating instructions.

The number of vCards received is displayed in the multimedia system.

Multimedia system

- To cancel the transfer: press the controller.

If a mobile phone was connected, the connection to the mobile phone is established again.

Received vCards are identified by the BT symbol in the address book.

- If you switch to another main function, e.g. navigation, while receiving vCards, the reception of vCards will be terminated.
Deleting imported contacts

To change to the menu bar when in the address book or the telephone menu: slide the controller.

To select Options: turn and press the controller.

To select Delete Contacts: turn and press the controller.

Select one of the following options:

- Internal Contacts
- Imported from Storage Device
- Imported from Bluetooth Devices
- Downloaded from Phone

Turn and press the controller.

To select Yes: turn and press the controller. The contacts are deleted.

Opening the call list and selecting an entry

Example: list of selected phone numbers

1. Date and time (if available)
2. Telephone number of the highlighted entry and symbols (if assigned)

To show the main function bar: slide the controller.

To select Phone: turn and press the controller. The telephone menu is displayed.

To switch to the menu bar: slide the controller.

To select Call Lists: turn and press the controller.

To select Calls Received or Calls Dialed: turn and press the controller. The relevant list is displayed.

To select an entry and make a call: turn and press the controller.

Closing the call list

To select & to the left of the list: slide the controller and press to confirm.

or

Press the button.
The list is closed.

Displaying details from a list entry

Abbreviated list entries can also be shown in full.

To show the main function bar: slide the controller.

To select Phone: turn and press the controller. The telephone menu is displayed.

To switch to the menu bar: slide the controller.

To select Call Lists: turn and press the controller.
To select Calls Received or Calls Dialed: turn and press the controller. The relevant list is displayed.
To highlight the desired entry: turn the controller.
To select [ ]: slide ( ) the controller.
To select Details: turn and press the controller. The details are displayed.
To go back to the list: slide ( ) the controller repeatedly until the list is highlighted.

**Saving telephone numbers**

**Adding new entries to the address book**

To show the main function bar: slide ( ) the controller.
To select Phone: turn and press the controller. The telephone menu is displayed.
To switch to the menu bar: slide ( ) the controller.
To select Call Lists: turn and press the controller.
To select Calls Received or Calls Dialed: turn and press the controller. The relevant list is displayed.
To highlight the desired telephone number: turn the controller.
To select [ ]: slide ( ) the controller.
To select Save: turn and press the controller.
Select Add to Contact.
Select a number category, e.g. Home.
Select a telephone category, e.g. Mobile Phone.
Select Continue. The address book is displayed.
Search for the desired contact ( page 103).
Press the controller when you have finished searching. The telephone number has been saved.
A maximum of five telephone numbers can be saved for one contact.

If five numbers are already stored for the entry you are searching for, a prompt will appear asking whether you wish to overwrite one of the existing numbers.

**Adding information to an address book entry**

To show the main function bar: slide ( ) the controller.
To select Phone: turn and press the controller. The telephone menu is displayed.
To switch to the menu bar: slide ( ) the controller.
To select Call Lists: turn and press the controller.
To select Calls Received or Calls Dialed: turn and press the controller. The relevant list is displayed.
To highlight the desired telephone number: turn the controller.
To select [ ]: slide ( ) the controller.
To select Save: turn and press the controller.
To finish and save an entry: select ( ). The new contact has been created.
Overwriting an entry

- To select Yes: turn and press the controller. A list of the existing five numbers is displayed.
- To select the number to be overwritten from the list: turn the controller and press to confirm. The entry is overwritten with the new telephone number.

Canceling the overwriting of an entry

- To select No: turn and press the controller. The process is canceled.

Deleting call lists

Call lists which are generated and managed by the multimedia system can be deleted in the multimedia system.

You cannot delete call lists from the multimedia system which are displayed on a mobile phone that supports the PBAP Bluetooth®.

- To show the main function bar: slide ⌊○⌋ the controller.
- To select Phone: turn and press the controller. The telephone menu is displayed.
- To switch to the menu bar: slide ⌊©⌋ the controller.
- To select Call Lists: turn and press the controller.
- Select Delete Call Lists.
  A prompt appears asking whether you wish to delete all call lists.
- To select Yes: turn and press the controller. The call lists are deleted.

If you delete call lists from the mobile phone (see the manufacturer's operating instructions), the multimedia system updates the call list display the next time it connects.

Speed dial lists

Setting up

- To show the main function bar: slide ⌊○⌋ the controller.
- To select Phone: turn and press the controller. The telephone menu is displayed.
- To call up the menu bar: slide ⌊©⌋ the controller.

Deleting

Deleting a speed dial preset

- To show the main function bar: slide ⌊○⌋ the controller.
- To select Phone: turn and press the controller. The telephone menu is displayed.
- To call up the menu bar: slide ⌊©⌋ the controller.
- To select Call Lists: turn and press the controller.
- Select Speed Dial Preset List.
  The speed dial list is displayed.
- To highlight the memory position you want to delete: turn the controller.
- To select [G]: slide ⌊©⌋ the controller.
- To select Delete Speed Dial Preset: turn and press the controller.
- To select Yes: turn and press the controller. The speed dial preset has been deleted.

Deleting all speed dial presets

- To show the main function bar: slide ⌊○⌋ the controller.
- To select Phone: turn and press the controller. The telephone menu is displayed.
- To call up the menu bar: slide ⌊©⌋ the controller.
- To select Call Lists: turn and press the controller.
Select **Speed Dial Preset List.**
The speed dial list is displayed.

- To highlight the desired memory position: turn the controller.
- To select `[ ]`: slide ↔ the controller.
- To select **Delete All Speed Dial Presets**: turn and press the controller.
- To select **Yes**: turn and press the controller. All speed dials are deleted.

**Messages**

**General notes**

New messages are identified by the `✉` symbol in the display of the multimedia system and an audible signal. Once you have read all the messages, the symbol is no longer displayed. The multimedia system displays the 100 newest text messages and e-mails. The `✉` symbol is displayed when the mobile phone’s message memory is full. The symbol is no longer displayed if you delete messages on the mobile phone.

**Function restrictions**

Text messages cannot be written while the vehicle is in motion.

**Requirements**

To use the message functions, the connected mobile phone must support the MAP Bluetooth® profile. The prompt for the MAP Bluetooth® profile may have to be confirmed on the mobile phone.

With some mobile phones, some settings still have to be made after connecting to the multimedia system (see the manufacturer’s operating instructions). The messages are then displayed the next time you connect to the multimedia system.

An e-mail account must be set up on the mobile phone for the e-mail function (see the manufacturer’s operating instructions). To read and write e-mails in the multimedia system, the e-mail account first needs to be configured (page 112).

Some mobile phones with the MAP Bluetooth® profile:

- only show new text messages
- do not support the deleting or editing of text messages
- do not support the drafts folder for text messages
- do not support the sending of text messages
- do not support the e-mail function
- do not send messages when in a locked status.

Not all mobile phones available on the market are equally suitable. Further information about settings and supported functions of Bluetooth®- capable mobile phones can be found on the Internet at [http://www.mercedes-benz.com/connect](http://www.mercedes-benz.com/connect). Or call the Mercedes-Benz Customer Assistance Center at 1-800-FOR-MERcedes (1-800-367-6372) (for the USA) or Customer Relations at 1-800-387-0100 (for Canada).

**Settings**

**Calling up the settings menu for messages**

- To show the main function bar: slide → the controller.
- To select **Phone**: turn and press the controller. The telephone menu is displayed.
- To switch to the menu bar: slide ↔ the controller.
- To select `✉`: turn and press the controller. The message menu is displayed.
- To switch to the menu bar: slide ↔ the controller.
- To select **Settings**: turn and press the controller. The text message settings and the available e-mail accounts of the connected mobile phone will be displayed.

**Configuring the text messages displayed**

- Call up the settings menu for messages (page 111).
- To highlight **Text Message**: turn the controller.
To select 

The controller.

A menu with the following options is shown:

- **All Messages**
  All the messages are displayed.

- **New Messages**
  Only the messages that are new on the mobile phone are displayed. You can also display the last 100 text messages using the Download option in the message menu.

- **Off**
  The messages are not displayed automatically. You can display the last 100 text messages using the Download option in the message menu.

To select the required option: turn and press the controller.

### Configuring the e-mails displayed

- Call up the settings menu for messages (page 111).
- To highlight an e-mail account: turn the controller.
- To select [ ]: slide the controller.

A menu with the following options is shown:

- **All Messages**
  All the messages are displayed.

- **New Messages**
  Only the messages that are new on the mobile phone are displayed. You can also display the last 100 text messages using the Download option in the message menu.

- **Off**
  The messages are not displayed automatically. You can display the last 100 text messages using the Download option in the message menu.

### Configuring an e-mail account

- Call up the settings menu for messages (page 111).
- To select an e-mail account: turn and press the controller.
  The e-mail account is now configured. E-mails can now be received and sent in the multimedia system.

### Deactivating the e-mail function

- Call up the settings menu for messages (page 111).
- To select E-Mail Off: turn and press the controller.
  E-mail reception is deactivated.

### Changing the displayed name of the e-mail account

Some mobile phones:

- do not support the changing of the displayed name
- support only the e-mail address of the e-mail account

- Call up the settings menu for messages (page 111).
- To highlight an e-mail account: turn the controller.
- To select [ ]: slide the controller.
- To select Own E-Mail Address: turn and press the controller.
  The input menu for entering your own e-mail address is displayed.

### Downloading messages manually

- To show the main function bar: slide the controller.
- To select Phone: turn and press the controller.
  The telephone menu is displayed.
- To switch to the menu bar: slide the controller.
- To select [ ]: turn and press the controller.
  The message menu is displayed.
- To switch to the menu bar: slide the controller.
- To select Download: turn and press the controller.

### Downloading text messages and e-mails from the phone

- Select From the Phone.
  The messages are downloaded. If you have selected Automatic Download in the e-mail settings, manual downloading is not possible.
Updating from the e-mail server by the mobile phone

- Select From the E-Mail Server.
  The e-mails in the mobile phone are updated.
  This function is not supported by all mobile phones.

Reading messages

In the message menu

The message menu contains all the unread text messages and e-mails. If the corresponding folder is called up, the messages are displayed sorted by text messages and e-mails.

- To show the main function bar: slide 1 the controller.
- To select Phone: turn and press the controller.
  The telephone menu is displayed.
- To switch to the menu bar: slide 1 the controller.
- To select Folder: turn and press the controller.
  The selected folder is displayed.
- To select Text Message or E-Mail: turn and press the controller.
  The selected folder is displayed.
- To select the message: turn and press the controller.
  The message is displayed.

To close the message text: press the button.

If you want to read messages that have already been read again, you have to call up the corresponding message folder (> page 113).

In the message folder

- To show the main function bar: slide 1 the controller.
- To select Phone: turn and press the controller.
  The telephone menu is displayed.
- To switch to the menu bar: slide 1 the controller.
- To select Folder: turn and press the controller.
  The selected folder is displayed.
- To select the message: turn and press the controller.
  The message is displayed.
- To scroll through the message or select phone numbers in the text: turn the controller.
  The display scrolls up or down line by line, or skips to the next or previous telephone number and automatically highlights it.
- To return to the list: press  

The following sub-folders can be selected for text messages and e-mails:

- **Inbox**
  This folder contains all the incoming messages.

- **Outbox**
  This folder contains all the outgoing messages.

- **Drafts**
  This folder contains all the messages that you have saved as a draft.

Folders cannot be selected if they are empty.
Depending on the mobile phone used, the subfolder function may be available.

**Read-aloud function for messages**
- To start the read-aloud function: press the controller when the message is displayed.
- To select Read Aloud: turn and press the controller.
  The multimedia system reads out the message.
- To cancel the read-aloud function: press the controller, select Cancel Read-Aloud Function and press the controller again.

You can set the language (> page 38) and the speed (> page 35) of the read-aloud function.

**Displaying details and phone numbers**
The multimedia system can also show a shortened sender display in full.
- To show the main function bar: slide the controller.
- To select Phone: turn and press the controller.
  The telephone menu is displayed.
- To switch to the menu bar: slide the controller.
- To select 1: turn and press the controller.
- To select Folder: turn and press the controller.
- To select Text Message or E-Mail: turn and press the controller.
  The selected folder is displayed.
- To highlight the desired message: turn the controller.
- To select Details: turn and press the controller.
  The detailed view appears.
- To close the detailed display: slide the controller.
- To return to the telephone menu: press the button.

**Writing text messages**

**Writing a new text message**

Observe the requirements for the message function (> page 111).
- To show the main function bar: slide the controller.
- To select Phone: turn and press the controller.
  The telephone menu is displayed.
- To switch to the menu bar: slide the controller.
- To select New: turn and press the controller.
- To select Text Message: turn and press the controller.
  The text message input menu is displayed. The To: input line is selected.

**Entering a recipient**
- Enter characters using the controller (> page 28) or the touchpad (> page 25).
  or
- To enter a phone number from the phone book: select .
  The contacts from the address book which have a phone number are displayed.
- Search for and select an entry (> page 100).
  The number is copied to the recipient line.

**Entering text and sending text messages**
- To select an input line for text: select in the character bar.
- Enter characters.
  The multimedia system contains templates which you can use to compile your messages (> page 116).
- To send the text message: select OK.
**Answering a text message**

Observe the requirements for the message function (› page 111).

- Display the message (› page 113).
- Press the controller.
- To select **Reply**: turn and press the controller. The text message input menu is displayed. The addressee’s details are automatically filled in using the details in the original message.

**Writing e-mails**

**Writing a new e-mail**

- To show the main function bar: slide 5 the controller.
- To select **Phone**: turn and press the controller. The telephone menu is displayed.
- To switch to the menu bar: slide 6 the controller.
- To select **New**: turn and press the controller.
- To select **E-Mail**: turn and press the controller. The e-mail input menu appears. The **To**: input line is selected.

**Entering a recipient**

- Enter characters using the controller (› page 28) or the touchpad (› page 25).
- To insert an e-mail address from the address book: select ...
  The contacts from the address book which have an e-mail address are displayed.
- Search for and select an entry (› page 100). The e-mail address is copied to the addressee line.

**Entering the subject**

- To select the **Subject**: input line: select in the character bar.
- Enter characters.

**Entering text and sending e-mails**

- To select an input line for text: select in the character bar.
- Enter characters.

The multimedia system contains templates which you can use to compile your messages (› page 116).

- To send the e-mail: select **OK**.

**Answering an e-mail**

Observe the requirements for the message function (› page 111).

- Display the message (› page 113).
- To call up a menu: press the controller.
- To select **Reply**: turn and press the controller. The e-mail input menu appears. The addressee’s details are automatically filled in using the details in the original message.

When replying to an e-mail, you can also select **Reply to All** instead of **Reply**. In this case, the reply is sent not just to the sender but to all those who received the original message.

**Forwarding an e-mail**

Observe the requirements for the message function (› page 111).

- Display the message (› page 113).
- To call up a menu: press the controller.
- To select **Forward**: turn and press the controller. The input menu appears. The subject line is automatically filled in with the same details as those in the original message.
Text templates

Using text templates

Displays text templates

► Select the input line for a text message (► page 114) or e-mail (► page 115).
► To select text templates 1 in the character bar: turn and press the controller.
The text templates are displayed.
► To select and insert a text template: turn and press the controller.
The text template is inserted into the text message or e-mail.

Editing text templates

Displays text templates

► Select the input line for a text message (► page 114) or e-mail (► page 115).
► To select text templates 1 in the character bar: turn and press the controller.
The text templates are displayed.
► To highlight the text template to be edited: turn the controller.
► To select Edit: slide  the controller.
► To select Edit: turn and press the controller.
The text template is displayed in an input line.
► Edit the text template as desired. Further information on character entry using the controller (► page 28) and on handwriting recognition on the touchpad (► page 24).
► To adopt changes to the text template, select  : turn and press the controller.
The text template has been changed.

Calling a text message sender

► Display the message (► page 113).
► To call up a menu: press the controller.
► To select Call Sender: turn and press the controller.
The call is made.

Using a phone number in the text

Numbers in text messages that are highlighted can be used.
► To highlight and select a usable phone number while the message is displayed: turn and press the controller.
► To select Use: press the controller.
► To select Call Number: turn and press the controller.
The call is made.

It is possible that a highlighted numerical sequence may not contain a telephone number.

Storing a sender as a new entry in the address book

Storing the sender of a text message

► To call up the menu when a text message is displayed: press the controller.
► To select Save Number: turn and press the controller.
► To select New Entry: turn and press the controller.
► Select a number category, e.g. Home.
► Select a telephone category, e.g. Mobile Phone.
► Select Continue.
The input line for the name of the new contact is displayed. The input line for the telephone number is filled in automatically.
Saving the sender of an e-mail

To call up the menu when an e-mail is displayed: press the controller.
To select **Save Sender's E-Mail Address**: turn and press the controller.
To select **New Entry**: turn and press the controller.
The input line for the name of a new contact is displayed. The input line for the e-mail address is filled in automatically.

Enter characters using the controller (p. 28) or the touchpad (p. 25).
To finish the entry: select **OK**.
The new contact has been created.

Saving the sender of an e-mail

Enter characters using the controller (p. 28) or the touchpad (p. 25).
To finish the entry: select **OK**.
The new contact has been created.

Adding the sender to an address book

Storing the sender of a text message

To call up the menu when a text message is displayed: press the controller.
To select **Save Number**: turn and press the controller.
To select **Add Phone Number**: turn and press the controller.
To select a category for the number, e.g. **Home**: turn the controller and press to confirm.
To select a telephone category, e.g. **Mobile Phone**: turn the controller and press to confirm.
To select **Continue**: turn and press the controller.
The address book is displayed.
Search for the desired entry (p. 103).
Press the controller when you have finished searching.
The e-mail address has been added.

Deleting messages

Call up the message folder (p. 113).
To select the message: turn and press the controller.
To select the message: turn and press the controller.
To select **Delete**: turn and press the controller.
To select **Yes**: turn and press the controller.
The message is deleted.

This delete function is not supported by all mobile phones. The **Delete failed** message then appears.
Your multimedia system equipment

These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions.

Read the information on qualified specialist workshops in the vehicle Operator’s Manual.

Important safety notes

⚠️ WARNING

If you operate information systems and communication equipment integrated in the vehicle while driving, you will be distracted from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident.

Only operate the equipment when the traffic situation permits. If you are not sure that this is possible, park the vehicle paying attention to traffic conditions and operate the equipment when the vehicle is stationary.

You must observe the legal requirements for the country in which you are driving when operating the system.

General notes

Connection difficulties while the vehicle is in motion

The connection may be lost if:

- the mobile phone network coverage is insufficient
- the vehicle has moved into a mobile phone cell with no free channels
- the SIM card used is not compatible with the network available

Function restrictions (Canada)

You will not be able to use the Mercedes-Benz Apps and Internet connection, or will no longer be able to use them, or may have to wait before using them, in the following situations:

- if your mobile phone is switched off
- if your mobile phone has not been enabled for Internet access
- if the Bluetooth® function is switched off on the multimedia system and the desired phone is supposed to be connected via Bluetooth®
- if the Bluetooth® function is switched off on the mobile phone and the phone is supposed to be connected via Bluetooth®
- if the mobile phone is not connected via USB and the phone is supposed to be connected via USB
- if either the mobile phone network or the mobile phone does not allow simultaneous use of a phone and an Internet connection
- if the mobile phone has not been enabled for Internet access via Bluetooth® and/or USB

The driver is not permitted to call up websites while driving and use of the Mercedes-Benz Apps is restricted.

It is possible that you may not be able to receive calls when an Internet connection is active. This depends on the mobile phone and the mobile phone network used.

Conditions for access

USA: to use Mercedes-Benz Apps and Internet access, mbrace must be activated and operational. Furthermore, mbrace must be activated for Mercedes-Benz Apps and Internet access. Take note of the connection priorities. An emergency call has the highest priority. When a service call, e.g. a breakdown service call or the MB Info Call, is active, an emergency call can still be initiated. A service call, on the other hand, has priority over a current Internet connection. Therefore, you cannot establish an Internet connection during a service call.

Canada: a mobile phone must be connected via Bluetooth® (page 90) or USB (page 155) with the multimedia system. Furthermore, you need a valid mobile service contract with a data plan.
option, which is used to calculate the associated connection costs.

**Conditions for a Bluetooth® connection**
- The mobile phone supports at least one of the Bluetooth® profiles DUN (Dial-Up Networking) or PAN (Personal Area Network).
- The Bluetooth® profiles DUN and PAN enable the Internet connection of the mobile phone to be made available to the system.

**Conditions for a USB connection**
- The mobile phone supports at least one of the USB classes:
  - RNDIS (Remote Network Driver Interface Specification)
  - CDC/NCM (Network Control Model)
  - CDC/ECM (Ethernet Control Model)
  - CDC/ACM (Access Control Model)
- The USB classes enable the mobile phone Internet connection to be made available to the system.

The terms of use are shown when the system is used for the first time and then once a year thereafter. Only read and accept the terms of use when the vehicle is stationary.

The driver is not permitted to call up websites while driving and use of the Mercedes-Benz Apps is restricted.

ℹ️ The availability of individual Mercedes-Benz Apps may vary depending on the country.

### Setting up an Internet connection (Canada)

#### Procedure and general information

In order to set up a mobile phone for Internet access, your mobile phone must be connected to the multimedia system via Bluetooth® (page 90) or USB (page 142).

If you are using Internet access for the first time, you must enable the connected mobile phone for Internet access (page 119). If the connected mobile phone supports the Bluetooth® PAN profile or the USB classes RNDIS, CDC/NCM or CDC/ECM, you do not need to make additional settings. The Internet connection is established. If the connected mobile phone does not support the named Bluetooth® profile or the named USB classes, predefined data must be set. While initializing the mobile phone for the Internet connection, access data which is already on the mobile phone may be overwritten. You should therefore check the settings on the mobile phone (see the manufacturer's operating instructions).

### Enabling the mobile phone for Internet access

- Call up Internet functions (page 122).
- To switch to the menu bar: slide the controller.
- To select Settings: turn and press the controller.
- To select Configure Internet Settings: turn and press the controller.
- A message is displayed telling you that the settings for the Internet functions depend on your mobile phone network provider and your mobile phone.
- If a mobile phone has already been enabled, the device list is displayed.
- To select Start Search: turn and press the controller.
- Mobile phones are displayed that:
  - are connected to the multimedia system
  - fulfill the conditions for the Internet functions
  - have not yet been set up for the Internet function
- To select a mobile phone from the device list: turn the controller and press to confirm.
- If the mobile phone supports the Bluetooth® PAN profile or the USB classes RNDIS, CDC/NCM or CDC/ECM, Internet access is set up. You can use the Internet functions.
- If the connected mobile phone does not support the named Bluetooth® profile or the named USB classes, predefined data must be set.
Setting access data of the mobile phone network provider

Selecting the predefined access data of the mobile phone network provider

To select Predefined Settings: turn and press the controller.
A list of countries appears.

If the mobile phone network provider provides multiple access data options, the relevant access data still has to be selected. This depends on the data package used, for example.

To check whether the predetermined dial-in data corresponds with the dial-in data provided by your mobile phone network provider, proceed as follows (▷ page 121) and select Manual Settings. The access data is displayed.

The access data for the mobile phone network provider is selected once for the mobile phone connected and is loaded again each time the mobile phone is connected. Establishing a connection (▷ page 122).

You must set the access data of the mobile phone network provider who provides the SIM card and the associated data package (access settings) for the connected mobile phone. The access data remains the same when you are in a different country (roaming). The access data of another network is not selected.

Manually setting the access data of the mobile phone network provider

To select Manual Settings: turn and press the controller.
An overview of the provider settings appears.

To select Confirm Settings: turn and press the controller.

The access data for the mobile phone network provider is selected once for the mobile phone connected and is loaded again each time the mobile phone is connected. Establishing a connection (▷ page 122).

You must set the access data of the mobile phone network provider who provides the SIM card and the associated data package (access settings) for the connected mobile phone. The access data remains the same when you are in a different country (roaming). The access data of another network is not selected.

Setting access data

Set the access data in accordance with your data package. You can contact your mobile phone network provider to obtain the precise access data.
### Explanation of the access data

<table>
<thead>
<tr>
<th>Input field</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Phone Number:</strong></td>
<td>Access number for establishing the connection. The access number depends on the mobile phone used. For GSM/UMTS mobile phones, <em>99</em>**1# is used as a standard.</td>
</tr>
<tr>
<td><strong>Access Point:</strong></td>
<td>APN network access point (Access Point Name) You can obtain this information from your mobile phone network provider. Entry is not necessary for all mobile phone network providers and mobile phones.</td>
</tr>
<tr>
<td><strong>PDP Type:</strong></td>
<td>Internet protocol used. You can obtain this information from your mobile phone network provider.</td>
</tr>
<tr>
<td><strong>User ID:</strong></td>
<td>The user identification can be obtained from your mobile phone network provider. Entry is not necessary for all mobile phone network providers.</td>

</tbody>
</table>

### Managing existing access data

#### Calling up the device list

- Call up Internet functions (page 122).
- To switch to the menu bar: slide the controller.
- To select **Settings**: turn and press the controller.
- To select **Configure Internet Settings**: turn and press the controller. The device list is displayed.

#### Editing the access data

The mobile phone must be connected with the system for the access data to be changed. When the Internet connection is active, you cannot edit or delete the access data of the currently set mobile phone network provider.

- Call up the device list (page 121).
- To highlight the desired mobile phone in the device list: turn the controller.
- To select **Settings**: slide the controller.
- To select **Change Configuration**: turn and press the controller.
- Select **Predefined Settings** or **Manual Settings**.

The provider settings are displayed. In order to edit the access data of the mobile phone network provider you have two options:

- Option 1: select the predefined access data of the mobile phone network provider (page 120).
- Option 2: manually set the access data of the mobile phone network provider (page 120).

#### Canceling Internet access permission for a mobile phone

- Call up the device list (page 121).
- To highlight the desired mobile phone in the device list: turn the controller.
- To select **Settings**: slide the controller.
- To select **Delete Configuration**: turn and press the controller. A prompt appears asking whether you wish to delete the Internet configuration.
- To select **Yes**: turn and press the controller. The Internet access permission for the mobile phone is now canceled. The mobile phone can...
now no longer be used by the system for Internet functions.

Setting automatic disconnection of the Internet connection

If a preset time has elapsed during which the Internet functions have not been used, the Internet automatically disconnects.

- Call up the device list (page 121).
- To highlight the desired mobile phone in the device list: turn the controller.
- To select Disconnect Automatically When Inactive: turn and press the controller.
- To select 5 Minutes, 10 Minutes or 20 Minutes: turn and press the controller.

Managing all Internet devices

If multiple mobile phones have been enabled for Internet usage, these can be given priorities. The system then selects the mobile phone with the highest priority to establish an Internet connection.

- Call up the device list (page 121).
- To highlight the mobile phone: turn the controller.
- To select Disconnect: slide the controller.
- To select Manage All Internet Devices: turn and press the controller.
  A menu appears.
- To highlight a mobile telephone: turn the controller.
- To select Change Device Priority: turn and press the controller.
  To move the desired mobile phone up or down: turn and press the controller. The mobile phone's priority is changed. The priority of the mobile phones is determined by the hierarchy. The mobile phone at the top of the list has the highest priority.

Establishing/ending the connection

Establishing the connection

Read the conditions for establishing a connection (page 118).

A connection can be established, for example by:

- entering a web address (page 125)
- calling up a Mercedes-Benz App (page 123)
- calling up a favorite
- establishing an Internet connection via a Wi-Fi device

The "Allow shared Wi-Fi usage" option must be activated in the multimedia system for this. (page 36)

Ending the connection

- Press Cancel in the connections window.

Calling up Internet functions

- To show the main function bar: slide the controller.
- To select Internet: turn and press the controller. The menu with the Internet functions is displayed.
Connection status

Display of existing connection and signal strength of the mobile phone network

In most cases, the current connection status is then shown in the status bar when you switch to another main function.

Detailed connection status

- Call up Internet functions (page 122).
- To switch to the menu bar: slide the controller.
- To select Settings: turn and press the controller.
- To select Connection Status: turn and press the controller.

The following information is displayed:
- the volume of transferred data
- connection status
- the device name of the mobile phone

Ending the connection

USA: you cannot cancel the connection yourself. The Internet connection is automatically terminated if the system does not recognize any user input within a five-minute time period.

Canada:
- Call up Internet functions (page 122).
- To switch to the menu bar: slide the controller.
- To select Settings: turn and press the controller.

If the mobile phone Internet connection is canceled, the multimedia system tries to reconnect. You should therefore always end the connection in the multimedia system.

Mercedes-Benz Apps

General notes

To be able to use Mercedes-Benz Apps, you have to register and confirm the terms and conditions.

Calling up Mercedes-Benz Apps

- Call up Internet functions (page 122).
- To select Mercedes-Benz Apps: turn and press the controller.
- To call up the app: turn and press the controller.

You can find further Mercedes-Benz Apps and information under: http://apps.mercedes-benz.com/apps/

- The available features are country-dependent.
  License fees may be applicable.

Mercedes-Benz Companion

Introduction

The Mercedes-Benz Companion app is available in the USA.

Mercedes-Benz Companion enables door-to-door navigation.

Door-to-door navigation means:
- The current destination is transferred from the vehicle’s multimedia system to an external device (iPhone or Apple Watch).
  This enables you to continue navigating to a destination which is in a pedestrian zone, for example.
- Conversely, a destination can be selected on the external device and transferred to the vehicle’s multimedia system.

Requirements

Observe the following requirements for using Mercedes-Benz Companion:
- The iPhone must be switched on and logged into a mobile phone network.
- The iPhone must have an iOS version higher than version 8.0.
Mercedes-Benz Companion must be installed on the iPhone® and activated (see the manufacturer’s operating instructions).

The iPhone® must be connected to the multimedia system (page 90).

Mercedes-Benz Companion must be authorized on the multimedia system (page 124).

To use door-to-door navigation, location access must be enabled on the iPhone®.

The Apple Watch® must be connected to the iPhone® (see the manufacturer’s operating instructions).

**Authorizing Mercedes-Benz Companion**

If you wish to use Mercedes-Benz Companion with the multimedia system, you must first authorize it.

If you wish to use door-to-door navigation, you must first enable location finding on your iPhone®.

**On the multimedia system**

- Switch on the multimedia system.
  
  A prompt appears asking for permission for Mercedes-Benz Companion to connect with the vehicle.

- Give authorization.

**On the iPhone®**

- Call up Mercedes-Benz Companion
  
  A prompt appears asking permission for Mercedes-Benz Companion to access location details.

- Allow access.
  
  Door-to-door navigation using Mercedes-Benz Companion can now be used.

---

**In the vehicle**

- Switch off the engine and remove the Smart-Key.
  
  The current destination and the vehicle's location are transferred from the multimedia system to the iPhone® or Apple Watch®.

**On the iPhone®**

- Select the destination and select the pedestrian symbol.

- Start navigation.
  
  If using the iPhone® to navigate, you will be guided to your destination via navigation displays and spoken instructions.

  If you use an Apple Watch®, navigation is done via the watch.

  The Apple Watch® assists you with route guidance by vibrating, emitting acoustic signals and giving spoken commands.

**Door-to-door navigation (transferring a destination from an external device to the vehicle)**

You can transfer the destination from an external device to the vehicle's multimedia system:

- via the Apple Watch®

- via the iPhone®

**On the iPhone®**

- Select Mercedes-Benz Companion.

- Select **Send a Destination**.

- Enter the destination.
  
  A list of possible destinations is displayed.

- Select the destination.

- Transfer the destination to the vehicle.

**On the Apple Watch®**

- Select Mercedes-Benz Companion.

- Select **Send to Car**.

- Select **Find destinations**.

- Say the destination.

- Confirm the entered text with **Done**.
  
  A list of possible destinations is displayed.

- Select the destination.

- Transfer the destination to the vehicle.

**Door-to-door navigation (transferring a destination from the vehicle to an external device)**

You can transfer the destination from the vehicle to an iPhone® or Apple Watch®.

This way, you can navigate on foot to a destination that cannot be reached by vehicle.
In the vehicle and on the multimedia system

- Switch on the multimedia system.
  The destination in the Apple Watch® or iPhone® is transferred to the multimedia system.
- Accept the displayed destination.
  Route guidance starts.

ℹ️ You also have the option of transferring destinations or coordinates from other applications to Mercedes-Benz Companion.

Navigating to the vehicle

You can be guided to the vehicle’s location:
- via the Apple Watch®
- via the iPhone®

On the iPhone®

- Select **Send a Destination**.
- Select the vehicle location and the pedestrian symbol.
- Start navigation.

On the Apple Watch®

- Select **Locate Car**.
- Select the car symbol.
- Start navigation.

Displaying vehicle information

Mercedes-Benz Companion allows you to display vehicle data on the Apple Watch® or iPhone®, for example:
- Fuel level and range
- Maintenance interval
- Tire pressure

- Select Mercedes-Benz Companion.
  The vehicle information is displayed.

Web browser

Calling up a website

Function restrictions

Internet pages cannot be shown while the vehicle is in motion.

Entering a address

- Call up Internet functions (> page 122).
- To select **www**: turn and press the controller. An input menu for the web address is displayed.
- Enter characters using the controller or the number keypad.
- To finish entry and call up a website: select **OK**.

Selecting a web address from the list

- When the character bar is displayed, slide the controller.
- To select the desired web address: turn and press the controller. The web address can still be changed as desired.
- To call up a website: select **OK**.
  The website is called up.
Navigating the website

<table>
<thead>
<tr>

<tbody>
<tr>
<td>Press the controller.</td>
<td>Opens the selected item.</td>
</tr>
<tr>
<td>Press</td>
<td>Calls up the menu.</td>
</tr>
</tbody>
</table>

To refresh the website: select . The website is refreshed. This procedure may take some time.

While the website is loading, a cross appears in the menu. This can be used to cancel the loading procedure.

To enter a URL: select . Enter a web address (URL) (page 125).

Favorites: select .

To close the active window: select .

Options menu

Opening in a new window

In order to be able to use this function, the cursor must be on a link.

To show the menu: press the button.

To select : turn and press the controller.

Select Open In A New Window.

The website is opened in a new window.

Adding to bookmarks

Adds the current website to the favorites. The website can then be called up using the menu. You can store up to 20 favorites in the menu.

To show the menu: press the button.

To select : turn and press the controller.

Select Add to Bookmarks.

The website is added to the bookmarks.

Current URL

To show the menu: press the button.

To select : turn and press the controller.

Select Current URL.

The URL appears.
Zoom
You can use this function to enlarge web pages.
► To show the menu: press the [ ] button.
► To select [ ]: turn and press the controller.
A menu appears. The • dot indicates the current setting.
► Select Zoom.
► To navigate on the web page: slide ← → ↑ ↓ or rotate the controller.
► To zoom in on the web page: turn the controller.

Jumping from link to link
You can use this function to skip from one link to the next on a website.
► To show the menu: press the [ ] button.
► To select [ ]: turn and press the controller.
A menu appears. The • dot indicates the current setting.
► Select Jump From Link To Link.
If a website has been called up and the controller is turned, the cursor jumps from link to link.

Directional scrolling
You can use this function to scroll up and down on the web page.
► To show the menu: press the [ ] button.
► To select [ ]: turn and press the controller.
A menu appears. The • dot indicates the current setting.
► Select Directional Scrolling.
If a website has been called up and the controller is turned, the cursor moves up or down depending on the direction of the turn.

Settings
Overview
► To show the menu: press the [ ] button.
► To select [ ]: turn and press the controller.
A menu appears.
► Select Settings.
You can activate or deactivate the following settings:
• Download Images Automatically
It may take some time to download the contents of websites that contain a large amount of images. Therefore, it may be useful to deactivate this option.
• Block Pop-Ups
Popups are windows (usually with advertisements) which are displayed automatically when you call up a website. You can block these displays.
• Activate Javascript
Javascript makes it possible to display and interact with dynamic content on the website.
• Allow Cookies
Some websites save information in small text files (cookies) on your system. You can determine whether cookies may be stored.
• Enable Internet Audio
You can switch the browser's audio playback on or off here.
• Hide Scroll Bars
You can show or hide the scroll bar here.

**Favorites**

**Introduction**

Favorites are frequently visited websites.

**Creating favorites**

**Adding a favorite in the menu**

- Call up Internet functions (page 122).
- Select **www**.
- Enter the web address (URL) and name using the character bar and press [✓].

**Adding to favorites**

- To call up the menu: press the [ ] button.
- To select [ ]: turn and press the controller.
- Select **Add to Bookmarks** (page 126).

**Selecting favorites**

- Call up Internet functions (page 122).
- To select the **Internet Favorites** menu: turn and press the controller.
- The Favorites menu appears.
- Select the desired bookmark.
- The favorite is opened in a new window.
Editing favorites

- Call up Internet functions (page 122).
- To select the **Internet Favorites** menu: turn and press the controller.
  The Favorites menu appears.
- To bring the desired favorites to the front.
- To select **Edit**: slide 6 and press the controller.
  An input menu appears.
- Enter a web address (URL).
- Press the touchpad or controller.
- Select T.
- Press the touchpad or controller.
- Slide 6 the controller.
- Enter a name.

Deleting favorites

- Call up Internet functions (page 122).
- To select the **Internet Favorites** menu: turn and press the controller.
  The Favorites menu appears.
- Select the desired favorites.
- Select **Delete**.
  A prompt appears.
- Select Yes.
  The favorite is deleted.

Closing the browser

- Select  in the browser menu
  (page 126)
  or
- Press the  button for longer than two seconds.
  A prompt appears, asking whether you want to close the Internet browser.
- Select Yes.
  The application is closed.
Your multimedia system equipment

These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions.

Read the information on qualified specialist workshops in the vehicle Operator's Manual.

Switching on the radio

To display the main function bar: slide the controller.

To select Radio: turn and press the controller.

The radio display appears. You will hear the last station played on the last waveband selected.

Switching HD Radio on/off

In radio mode: slide the controller.

To select Options: turn and press the controller.

By selecting or in front of HD Radio, you determine whether HD radio is switched on or off.

If HD Radio is switched off, the system does not switch to digital radio and it is not possible to select any sub-channels.

i HD Radio™ and the HD, HD Radio, and “Arc” logos are proprietary trademarks of iBiquity Digital Corp.
Setting the waveband

Using the main function bar

- In radio mode: slide the controller. The radio main function bar and menu bar appear. Radio is active.
- To select the required waveband: turn and press the controller.

Using the menu bar

- In radio mode: slide the controller. The radio menu bar appears.
- To select the required waveband: turn and press the controller.

Station

Selecting a station

Using the main display field

All currently available stations are displayed.
- In radio mode, turn the controller until the desired station is in the center.

Using the current station list

The station list is available in HD FM radio mode or HD AM radio mode. It includes all stations that can be received.

Using direct entry

- In radio mode: slide the controller. The radio menu bar appears.
- To select Options: turn and press the controller.
- Select Direct Entry. An additional menu appears.

HD FM radio mode:
- To select the HD FM Frequency option: turn and press the controller.
- Enter the frequency of the desired station in the entry field.

HD MW radio mode:
- To select the HD AM Frequency option: turn and press the controller.
- Enter the frequency of the desired station in the entry field.

Satellite radio mode:
- To select the SatRadio Channel option: turn and press the controller.
- Enter the number of the desired channel in the entry field.

Station presets:
- To select the Radio Station Presets option: turn and press the controller.
- Enter the station preset of the desired station.

Using the search function

- In radio mode: slide the controller. The radio menu bar appears.
- Select and enter the first letters of the required station using the controller.
- Press OK to confirm. The multimedia system displays a list of available stations.
- To select stations from the list: turn the controller and press to confirm.
Using the preset position

- In radio mode: slide the controller.
- To select **Preset**: turn and press the controller.
- To select **Enter Preset**: turn and press the controller.
- Enter the station preset of the desired station.

Station list

- In radio mode, press the controller. The station list appears with the stations currently available.

Saving/deleting a station

![Image of a storage interface]

Storing current stations

- In radio mode: slide the controller. The radio menu bar appears.
- To select **Preset**: turn and press the controller.
- To select the **Save Current Station/Channel** option: turn and press the controller.
- To select the position of the required preset entry: turn and press the controller.
- Select the **Edit Station Preset** option.
- Select the position of the required preset: turn the controller.
- Slide the controller. An additional menu appears.

Moving highlighted stations

- In radio mode: slide the controller. The radio menu bar appears.
- To select **Preset**: turn and press the controller.
- Select **Edit Station Preset**.
- To select the required preset entry: turn the controller.
- Slide the controller. An additional menu appears.
- To select the **Move Highlighted Station/Channel** option: turn and press the controller.
- To move the highlighted station to the new position: turn the controller and press to confirm.

Deleting highlighted stations

- In radio mode: slide the controller. The radio menu bar appears.
- To select **Preset**: turn and press the controller.
- Select **Edit Station Preset**.
- To select the required preset entry: turn the controller.
- Slide the controller. An additional menu appears.
- To select the **Delete Highlighted Station/Channel** option in the additional menu: turn and press the controller.
- To select **Yes**: turn and press the controller. The highlighted station is deleted.
- To select **No**: turn and press the controller. The process is canceled.

Frequencies have already been stored in the multimedia system. There are 100 preset positions available.
Activating/deactivating the station presets display

You can use this function to change to the station presets display.

Activating

► In radio mode: slide the controller.
► To select **Preset**: turn and press the controller.
► To select **Station Preset View: On**: turn and press the controller.
The station preset display appears.
► To switch between the stored stations: turn the controller.

Deactivating

► In radio mode: slide the controller.
► To select **Preset**: turn and press the controller.
► To select **Station Preset View: Off**: turn and press the controller.
A view of the last waveband you listened to appears.

Tagging music tracks

If an Apple® device is connected, the music tracks and artist displayed in the radio text can be stored. You have the option of purchasing this track using iTunes Store®. Not all radio stations support this function.

► In radio mode: slide the controller.
The radio menu bar appears.
► To select **Options**: turn and press the controller.
► Select **Tag This Track**.
A message appears about storing the track information.

Displaying station information

► In radio mode: slide the controller.
The radio menu bar appears.
► To select **Options**: turn and press the controller.
► You can determine whether or not the artist, track or station name are shown in the main display area with ☑ or ☐ before **Show Station Information**.

Calling up sound settings

► In radio mode: slide the controller.
The radio menu bar appears.
► To select **Info**: turn and press the controller.
The sound menu appears (page 163).

Displaying information

This function is available in HD FM radio and HD AM radio mode.
Reception is only possible if the radio stations provide the relevant information.

► In radio mode: slide the controller.
► To select **Info**: turn and press the controller.
Information on the currently received program is displayed.
If available, you will see:
- the track that is currently being played
- the artist of the track that is currently being played
- the album name
- the channel abbreviation
- the logo of the station or Artist Experience®

Back to radio display:

► To select **Info**: slide and press the controller.
The satellite radio mode requires satellite radio equipment and registration with a satellite radio provider. Note that the categories and channels shown in the illustrations depend on the program content offered by the provider. The illustrations and descriptions in these operating instructions may therefore differ from the channels and categories offered by the provider.

Satellite radio mode may be temporarily unavailable or interrupted for a variety of reasons. These include environmental or topographical conditions as well as other factors beyond the control of Mercedes-Benz USA, LLC. This means operation may not be possible in certain areas. These include:

- tunnels
- parking garages
- locations inside or next to buildings
- locations in the vicinity of other structures

Sirius XM® Satellite Radio offers more than 140 digital-quality radio channels, providing 100% commercial-free music, sports, news and entertainment.

Sirius XM® Satellite Radio uses a fleet of high-performance satellites to broadcast around the clock throughout the USA and Canada. The satellite radio program is available for a monthly fee. Details are available from the Sirius XM® Service Center and at [http://www.siriusxm.com](http://www.siriusxm.com) (USA) or [http://www.siriusxm.ca](http://www.siriusxm.ca) (Canada).

Your new Mercedes-Benz vehicle comes with Sirius XM® Satellite Radio pre-installed at the factory. This service is free for a six-month trial period. About a month before the trial period ends, information will be provided on how to extend this subscription. An acoustic signal sounds and a message is shown, describing how the subscription can be extended.

Sirius, XM and all related marks and logos are trademarks of Sirius XM Radio Inc. and its subsidiaries. All other marks, channel names and logos are the property of their respective owners. All rights reserved.

### Registering satellite radio

1. Phone number of provider
2. Sirius XM® ID of your satellite receiver

- Switch on satellite radio mode (> page 135). The satellite radio main menu appears showing the preview channel. You cannot select any other stations.
- Slide the controller. The radio menu bar appears.
- To select Options: turn and press the controller.
- To select Service: turn and press the controller. The service information screen appears.

Once the telephone connection has been established:

- Follow the instructions of the service staff. The activation process may take up to 10 minutes. If the activation is completed successfully, the **Updating Channels...** message appears in the display, followed by the satellite radio main menu.

1. You can also have the satellite service activated online. To do this, visit [http://www.siriusxm.com](http://www.siriusxm.com) (USA) or [http://www.siriusxm.ca](http://www.siriusxm.ca) (Canada).

1. If registration is not included when purchasing the system, your credit card details will be required to activate your account.

If the satellite receiver is not installed correctly, the **Device Unavailable** message will appear.
Switching to satellite radio

- To show the main function bar: slide the controller.
- To select Radio: turn and press the controller. The radio display appears. You will hear the last station played on the last waveband selected.
- To select Radio in radio mode: slide and press the controller. The menu with the available radio modes appears.
- To select Sat Radio: turn and press the controller.

The No Service message appears if there is no signal.

Satellite radio overview

- Main function bar
- Preset
- Channel name and channel number
- Channel information
- Station presets menu
- Category list
- Keyword search
- Options menu

Channel information can be viewed in detail (page 137).

Selecting a category

Satellite radio channels are sorted into categories. You can choose between various categories such as News/Discussions, Sports and Country (if available). The category list is sorted alphabetically. The content of the categories is sorted by channel numbers.

Selecting a channel

- To call up the category list: select Category in the menu bar by turning and pressing the controller. The category list appears.
- To select a category: turn the controller and press to confirm. The category selected is shown in the display. You hear the channel last selected for this category. The dot indicates the current setting.

At the beginning of the category list, the All Channels category appears. This category enables you to browse all available channels.

Entering channel numbers directly

- To select Options: turn and press the controller.
- To select Direct Entry: turn and press the controller. An input menu appears.
- To select a channel number: turn and press the controller.

The multimedia system sets the selected channel.

You can only select currently permitted digits.
Selecting a channel via the satellite radio station list

You can select the channel using the station list displaying the artists and tracks that are currently playing.

- To select Options: turn and press the controller.
- To select Current Station List with Artist & Title: turn and press the controller.
  The channel list appears.
- Select the desired channel

Keyword search

- To select the keyword search in the menu bar: turn and press the controller.
- To enter the required search term: turn and press the controller.
  Direct and indirect results are shown.
- Select the required result.
  The relevant channel is played.

Memory functions

Quick save:

- Set the desired channel in satellite radio mode.
- Press and hold the controller until the preset list appears.
- To select the preset number: turn and press the controller.
  A tone confirms that the storing process was successful.

Saving a channel using the edit function:

- In satellite radio mode, slide the controller.
- To select Preset: turn and press the controller.
- To select Edit Station Preset: turn and press the controller.
  The list of saved channels appears.
- To select the preset: turn the controller and press for about 2 seconds.
  The newly saved channel overwrites the existing preset.

- There are 100 presets available.

Presets menu view

You can use this function to change to the station presets display.

Activating

- In radio mode: slide the controller.
- To select Preset: turn and press the controller.
- To select Station Preset View: On: turn and press the controller.
  The station preset display appears.
- To switch between the stored stations: turn the controller.

Deactivating

- In radio mode: slide the controller.
- To select Preset: turn and press the controller.
- To select Station Preset View: Off: turn and press the controller.
  A view of the last waveband you listened to appears.

Music and sports alerts

General notes

This function makes it possible to store a program alert for your favorite artists, tracks or sporting events.

You can store up to 30 music and sports alerts (favorites).

Music alerts can only be saved whilst a track is being played. You can also specify sports alerts via the menu option. The system then continu-
ously searches through all the channels. If a match is found with a saved message, you will be informed. A window appears with the respective information.

**Setting a music alert**

- To select **Options**: turn and press the controller.
- To select **Alert for Artist, Track & Sports Event**: turn and press the controller. A menu appears.
- Select **Add New Alert**.
  A window with a prompt appears.
- Select **Artist** or **Track**.
  The alert is set for the current artist or track.

**The music alert window appears**

- To select **Change To** or **Ignore**: turn and press the controller.
  If you select **Change To**, the channel is changed and the favorite artist or track is played.
  If you select **Ignore**, the current channel will continue playing.

**Setting a sports alert**

- To select **Options**: turn and press the controller.
- To select **Alert for Artist, Track & Sports Event**: turn and press the controller. A menu appears.
- Select **Manage Sports Alerts**.
  A list of set alerts appears.

**Editing music and sports alerts**

- To select **Alert for Artist, Track & Sports Event**: turn and press the controller. A menu appears.
- Select **Manage Music Alerts** or **Manage Sports Alerts**.
  A list of set alerts appears.

**Tagging music tracks**

If the channel supports this function, you are able to transfer the music track currently playing to an Apple® device. You can then purchase it in the iTunes® store.

- To select **Options**: turn and press the controller.
- To select **Tag This Track**: turn and press the controller.
  A message about saving this music track on the Apple® device appears.

**Displaying information**

- To select **Info** in the radio menu bar: turn and press the controller.
  Information on the currently received program is displayed.
  If available, you will see:
  - the channel logo
  - the channel abbreviation
• the artist of the track that is currently being played
• the current track

► To return to the radio display: select Info by sliding ‹¹ and pressing the controller.

Displaying service information

The provider’s customer service center is available by phone at any time to answer any general questions or questions on the versions available.

► To select Options: turn and press the controller.
► To select Service: turn and press the controller.
The provider’s details appear.
► To return to the main display: press the button.

Channel list updates

During reception of a new channel list, the Updating Channels... message is shown. The channel last selected is switched to mute until the update has been completed. Satellite radio mode is not available during this process. Once the update has been completed, the satellite radio basic menu appears. If the channel last selected is available, this channel will be played.

Sound settings

Information on sound settings (› page 163).
Your multimedia system equipment
These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions. Read the information on qualified specialist workshops in the vehicle Operator's Manual.

Activating media mode

General notes
There are several ways to activate media sources using the multimedia system. The relevant sections of the Operator's Manual describe the simplest way to activate a media source. This section describes all options for activating media sources. If you wish to play external media sources, the default display must already be turned on.

Connections for external media sources
The following external media sources can be used:
- Apple® devices (e.g. iPhone®)
- USB devices (e.g. USB stick, MP3 player)
  Two USB ports are located in the stowage space under the armrest.
- CD
- DVD video
- SD cards
- via devices connected by Bluetooth®

Activating media using the main function bar
- To display the main function bar: slide the controller.
- To select Media in media mode: slide and press the controller. The menu appears with the available media sources.
- To select the media source: turn the controller and press to confirm. Depending on the vehicle equipment, the following options will be available:
  - Disc
  - Eject
  - Memory Card
  - Media Register
  - Media Interface 1
  - Media Interface 2
  - Bluetooth Audio
If playable music files are found, they will be played by the multimedia system. The corresponding basic display appears.

Activating media using the device list
- In media mode, slide the controller. The media menu bar is shown.
- To select Devices: turn and press the controller. The available media sources will be shown. The dot indicates the current setting.
- Select the media source. If the media source contains music or video files, these will be played. The corresponding basic menu will be shown.

Switching on automatically
After inserting a CD/DVD, this media mode is automatically switched on by the multimedia system. If playable music files are found, they will be played by the multimedia system. If a media function is already switched on in the multimedia system, this will be interrupted and the basic display of the CD/DVD mode will appear. If another function, such as navigation, is being operated, the basic display will not change. Only the music from the last inserted CD/DVD will be played.
### Audio/video mode

#### Important safety notes

**WARNING**
The CD/DVD drive is a class 1 laser product. If you open the housing of the CD/DVD drive, there is a risk of exposure to invisible laser radiation. This laser radiation could damage your retina. There is a risk of injury. Never open the housing. Always have maintenance and repair work carried out at a qualified specialist workshop.

**WARNING**
Handling discs while driving may distract you from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident. Handle discs only when the vehicle is stationary.

Bear in mind that at a speed of only 30 mph (approximately 50 km/h), the vehicle covers a distance of 44 ft (approximately 14 m) per second.

#### Notes on audio/video mode

**Permissible data carriers**
- CD audio, CD-R and CD-RW
- DVD-R, DVD-V and DVD-RW
- SD card
- USB storage device

**Permissible file systems**
- ISO 9660/Joliet standard for CDs
- UDF for video DVDs
- FAT16, FAT32, exFAT and NTFS for SD card and USB storage media

**Multisession CDs**
For multisession CDs, the content of the first session determines how the multimedia system processes the CD. The multimedia system plays only one session and gives priority to the audio CD session.

### File structure of a data carrier

When you create a disc with compressed music files, the tracks can be organized in folders. A folder may also contain subfolders. The disc may contain no more than eight directory levels. Files beyond the eighth level will not be recognized by the system.

The multimedia system supports data carriers with up to 50,000 files.

In the case of a data carrier with more than 64 GB of stored data, only files in folders with the following names are supported: Music, Pictures, Video.

### Track and file names

When you create a disc with compressed music files, you can assign names to the tracks and folders.

If MP3 or WMA files are stored in the root directory itself, the root directory will also be treated as a folder.

You should observe the following when assigning track names:
- track names must have at least one character
- track names must have an extension of a supported audio or video format, e.g. mp3, aac or m4v.
- there must be a dot between the track name and the extension

Example of a correct track name: "Track1.mp3."

### Permissible formats

The multimedia system supports the following audio and video formats:

<table>
<thead>
<tr>
<th>Audio formats</th>
<th>MP3, WMA, CDA, AAC formats (.aac, .mp4, .m4a and .m4b)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Video formats</td>
<td>DVD-V, MPEG, WMV, M4V, AVI up to 720p</td>
</tr>
</tbody>
</table>

Copy-protected iTunes® music files with the .m4p file extension are not supported.
Permissible bit and sampling rates

The multimedia system supports MP3 and WMA files of the following type:

<table>
<thead>
<tr>
<th>Format</th>
<th>Bit rates [kbit/s]</th>
<th>Sampling rates [kHz]</th>
</tr>
</thead>
<tbody>
<tr>
<td>MP3</td>
<td>32-320 (fixed and variable bit rates)</td>
<td>8-48</td>
</tr>
<tr>
<td>WMA</td>
<td>5-384 (fixed bit rates)</td>
<td>8-48</td>
</tr>
</tbody>
</table>

The multimedia system does not support WMA files of the following type:

- DRM (Digital Rights Management) encrypted files
- Files with variable bit rates
- WMA Pro
- 5.1 surround sound

Only use tracks with a bit rate of at least 128 kbit/s and a sampling rate of at least 44.1 kHz. Lower rates can cause a noticeable deterioration in quality. This is especially the case if you have activated a surround sound function.

Notes on copyright

Audio or video files that you create or reproduce yourself for playback are generally subject to copyright protection.

In many countries, reproductions, even for private use, are not permitted without the prior consent of the copyright holder.

Make sure that you know about the applicable copyright regulations and that you comply with these.

Notes on CDs/DVDs

Do not affix stickers or labels to the discs. They could peel off and damage the drive. The drive is designed to receive EN 60908 standard discs. Therefore, you can only use discs with a maximum thickness of 1.3 mm.

If you insert thicker discs, e.g. those that contain data on both sides (DVD on one side and audio data on the other), they cannot be ejected and can damage the drive.

Do not use discs with an 8 cm diameter, even when using an adapter. Only use round discs with a 12 cm diameter.

Discs with copy protection are not compatible with the audio CD standard and therefore may not be able to be played.

Playback problems may occur when playing copied discs.

There may be playback problems if you play CDs that you have copied yourself with a storage capacity of more than 700 MB.

The multimedia system is able to play back audio CDs in multichannel audio format.

Inserting and removing a disc from the single CD/DVD drive

Before inserting or removing a CD or DVD, ensure that the cup holder is empty.

Before removing a disc, be aware that the CD or DVD can become hot.

Inserting

Insert a disc into the disc slot with the printed side facing upwards.

The drive closes and the disc is played.

If the CD or DVD is started in Media mode, the corresponding basic menu will be shown. If the CD or DVD is started from another application (e.g. navigation), the display will not change.

The drive may not be able to play discs with copy protection.

Selecting an active partition (USB mass storage devices only)

You can select this function for USB storage devices when the storage device is partitioned. Up to 9 partitions (primary or logical, FAT, FAT32 and NTFS) are supported.

Selecting an active partition

- Select a USB storage device (page 139).
- Slide the controller. The media menu bar is shown.
- To select Options: turn and press the controller.
- Select Select Active Partition.

Notes on CDs/DVDs

- Do not affix stickers or labels to the discs. They could peel off and damage the drive.
- The drive is designed to receive EN 60908 standard discs. Therefore, you can only use discs with a maximum thickness of 1.3 mm.
- If you insert thicker discs, e.g. those that contain data on both sides (DVD on one side and audio data on the other), they cannot be ejected and can damage the drive.
- Do not use discs with an 8 cm diameter, even when using an adapter. Only use round discs with a 12 cm diameter.
- Discs with copy protection are not compatible with the audio CD standard and therefore may not be able to be played.
- Playback problems may occur when playing copied discs.
- There may be playback problems if you play CDs that you have copied yourself with a storage capacity of more than 700 MB.
- The multimedia system is able to play back audio CDs in multichannel audio format.
Removing

In the CD basic menu slide the controller 
To select 
: turn and press the controller.

The drive ejects the disc. If you do not take the disc out of the slot, it is drawn in again automatically after a short while.

or

To select Media in media mode: slide 
and press the controller.

To select Eject: turn and press the controller.

Menu overview

1 Main function bar
2 Ejects the CD/DVD
3 Track display on the disc
4 Track number and number of tracks in the track list
5 Artist and album
6 Numerical time display
7 Graphic time display
8 Cover view (if available)

Inserting an SD card

Insert the SD card into the SD card slot until the SD card engages. The side with the contacts must face down.

If the memory card has been selected as a media source, the medium is played and the files are loaded in the background. If there are no supported audio or video files, you will see a message to this effect.

If the SD card for navigation is inserted into the SD card slot, you can still select the memory card as a media source. The No Playable Files message then appears.

Removing an SD card

Press the SD card.
The SD card is ejected.

Remove the SD card.

Connecting USB devices

There are two USB ports in the stowage space under the armrest (> page 139).

Connect the USB device to the USB port.
If the corresponding media display is visible, the medium is played and the files are loaded in the background. If there are no supported audio or video files, you will see a message to this effect.

MP3 players must support Media Transfer Protocol (MTP).

Activating media mode

After inserting a CD or DVD, the media mode is automatically switched on by the multimedia system.

If playable music files are found, they will be played by the multimedia system.
If a media function is already switched on in the multimedia system, this will be interrupted and the basic display of the CD or DVD mode will appear. If another function, such as navigation, is being operated, the basic display will not change. Only the music from the last inserted CD or DVD will be played.

Depending on the vehicle equipment, the basic display must already be turned on when using with USB devices or SD cards.

- Insert the CDs/DVDs (page 141)
- Insert an SD card: (page 142)
- Connect a USB device: (page 142)

The multimedia system loads the medium inserted and playback starts automatically.

Further options for switching on:
- Using the main function bar (page 139)
- Using the device list (page 139)

Selecting the playback option

Playing similar tracks
- In media mode, slide the controller.
- To select Options: turn and press the controller.
- To select Play More Like This: turn and press the controller.
  The multimedia system automatically creates and plays a track list with similar tracks. If there are no comparable tracks on the data carrier, you will see a message to this effect.
- Select the required track.

Selecting Play mode
- In media mode, slide the controller.
- To select Options: turn and press the controller.
- To select Playback Mode: turn and press the controller.
- Select Normal Track Sequence.
  The current track list is played in the order it is stored on the data medium.
- Select Random Track List.

The current track list is played in random order.
- Select Random Medium.
  All tracks on the data medium are played in random order.

Entering a track number directly
- In media mode, slide the controller.
- To select Options: turn and press the controller.
- To select Track Number: turn and press the controller.
  A menu appears.
- Enter the desired track number.

Skip to time
- In media mode, slide the controller.
- To select Options: turn and press the controller.
- To select Skip to Time: turn and press the controller.
  A menu appears.
- To set the time: turn the controller.

Selecting an active partition
- In media mode, slide the controller.
- To select Options: turn and press the controller.
- To select Select Active Partition: turn and press the controller.
  With the Select Active Partition option, you can select a partition in the USB data carrier.

Showing track information
- In media mode, slide the controller.
- To select Options: turn and press the controller.
- To select Show Track Information: turn and press the controller.
  Ticking or removing the tick from the box in front of Show Track Information displays or hides the information on the track, artist and album in the main display field.
Saving files to Media Register

With the Save Files to Media Register option, you can transfer supported audio, image or video files to the multimedia system hard drive.

- In media mode, slide the controller.
- To select Options: turn and press the controller.
- To select the Save Files to Media Register option: turn and press the controller. A menu appears (page 147).

Managing Media Register

- In media mode, slide the controller.
- To select Options: turn and press the controller.
- Delete or rename individual files in the Media Register (page 148).
- Delete all files in the Media Register (page 149).
- Call up information on the preset (page 149).

Pausing/continuing playback

- To pause playback: in audio or video mode, slide the controller. The media menu bar is shown.
- To select the in the media menu bar: turn and press the controller. Playback is interrupted. The display changes to .
- To continue playback: in audio or video mode, slide the controller. The media menu bar is shown.
- To select in the media menu bar: turn and press the controller. Playback is continued from the point of interruption. The symbol changes to .

Selecting a track

Selecting using the current track list

- To display the current track list: press the controller in the basic display. The category list appears.
- Select the current track list.
- To select a track: turn the controller and press to confirm.

Selecting by skipping to a track

- To skip forwards or backwards to a track: turn or briefly slide or the controller in the media basic display.

Searching for a track

- In media mode, slide the controller. The media menu bar is shown.
- To select Search: turn and press the controller. The category list is shown.
- Select a category, e.g. Genres.
  Sub-categories appear with the selection of the main category (depends on the multimedia system default settings and the music tracks available).
  - Select a sub-category, for example Rock.
  If the sub-category Rock contains music tracks, these will be displayed.

Gracenote® Media Database

General notes

This function is available in audio CD mode.

There is a version of Gracenote® music recognition technology, Emeryville, California, USA on the multimedia system hard disk. You will recognize this by the
logo in the bottom right-hand corner of certain audio displays.

If the audio CD does not contain any CD text information, the multimedia system can use the Gracenote® Media Database to identify unknown audio tracks when in CD audio mode.

**Carrying out an Internet update of metadata**

The Updating Metadata Via Internet option allows any missing metadata for an audio CD (e.g., cover, track, album, artist) to be uploaded retrospectively to the internal Gracenote® database.

An Internet connection is required for this (>

**Selecting Internet update of metadata**

- In media mode, slide the controller.
- To select Options: turn and press the controller.
- Select Updating Metadata Via Internet in the selection list.
- A connection with the Gracenote® data server is established. The missing data is loaded, saved and displayed in the main display field.
- If there is no data found or there is no Internet connection, a corresponding error message will appear.

**Switching the Gracenote® data display on/off**

- Switch on audio CD mode (> page 142).
- To select Gracenote Media Database: turn and press the controller.
- To switch the display off: select None.
- The media menu bar is shown.
- To switch on the display: press the controller.

The multimedia system plays back files from the following data media:

- Disc (audio CD or DVD)
- Memory card
- Media Register
- USB storage device
- Apple® devices (folder, year and photos are not available)

The categories are displayed according to the data available.

**Starting the media search**

- In media mode, slide the controller.
- To select Search: turn and press the controller.
- The category list appears.

**Category list**

- In media mode, slide the controller.
- To select Search: turn and press the controller.
- The category list is shown.

Depending on the connected media sources and files, the following categories are listed:

- Current Tracklist
- Folder
- Select By Cover
- Keyword Search
- Playlists
- Artists
- Albums
- Track
- Genres
- Year
- Composers
- Videos
- Photos
- Podcasts
- Audiobooks

The categories are available as soon as the entire media content has been read and analyzed.

If the same device is reconnected with unchanged media content, these categories are available more quickly.
When connecting Apple® devices, the categories "Folder", "Year" and "Photos" are not available.

Searching a track using the current track list

To select **Current Tracklist** in the category list (> page 145): turn and press the controller.
The selection list appears.
To select the required track.

Searching for a track via a folder

Playable files can be searched for in the active data medium's directories.
To select **Folder** in the category list (> page 145): turn and press the controller.
The folder list appears.
To select the required folder.
The track list appears.
To select the required track.

Searching for a track via cover view

To select **Select By Cover** in the category list (> page 145): turn and press the controller.
A menu with cover views appears.
To select the required cover.
The track list appears.
To select the required track.

Searching for a track via music genre

To select **Genres** in the category list: turn and press the controller.
The multimedia system searches in all media sources. A selection list with Genre and media sources appears.
To select the desired music genre.
A selection list with music tracks from the selected genre appears.
To select a music track.
The track is played. The basic menu for the active media source is shown.
To exit the selection list: press the button.

Searching for a track via a keyword

To select **Keyword Search** in the category list (> page 145): turn and press the controller.
The input field appears.
To select the required characters: turn and press the controller for each one (> page 28).
Entering just part of the name of a track or artist is enough. The search result then displays the entire text.
To select .
The search results are displayed.
The numbers behind the results, for example **Tracks** (5/0), mean: 5 results that contain the exact keyword searched for and 0 results that are similar.
To select one of the results.
Keywords that have already been searched for are displayed in the "Search history" without having to enter them completely. They can be accepted directly and displayed in the search result.
To select an entry.
Albums and covers (if available) are shown.
The multimedia system searches in all media sources.
To select an album.
The tracks are listed.
To select a track.
The basic display appears and playback starts.
**Media Register**

**General notes**

You can store music files, photos or video files in the Media Register. The memory has a capacity of 10.8 GB.

Keep your original music files, photos and video files in a secure location. An error in the multimedia system may result in the loss of files stored in the Media Register. Mercedes-Benz is not liable for any loss of data.

**Switching on the Media Register**

- To display the main function bar: slide  the controller.
- To select Media: turn and press the controller. A menu appears with the available media sources.
- To select Media Register: turn and press the controller.

Playback begins at the point last listened to. If there are no files, you will see a message to this effect.

**Media Register basic display**

1. Main function bar
2. Display for the active data medium
3. Media menu bar
4. Track display on the disc
5. Track number and number of tracks in the track list
6. Numerical time display
7. Graphic time display
8. Cover view (if available)

**Copying files to the Media Register**

**General notes**

You can copy photos, music files and videos from the following data mediums:

- Disc (CD and DVD)
- SD card
- USB storage device
- MP3

Data can only be copied from an MP3 player if this can be configured as a mass storage device. Video files from DVD-V cannot be copied. While copying, several functions will not be available. If this is the case, you will see a message to this effect.

1. Selecting a data medium

- To display the main function bar: slide  the controller.
- To select Media: turn and press the controller. A menu appears with the available media sources.
- To select the media source: turn the controller and press to confirm.
- To switch to the menu bar: slide  the controller.
- To select Options: turn and press the controller.
- Select Save Files to Media Register. The media list appears. A data medium from which files can be copied is selected automatically.

The Save Files to Media Register function can be reached from any media application.

- Select the displayed data medium. The data medium is loaded. If the data medium contains files that can be copied, a selection menu appears.
2. Selecting files

To select **All Media Files**: turn and press the controller.
This command copies all files from the selected data medium. The symbol next to **All Media Files** is filled in. All subsequent entries have a checkmark ✓ beside them.

- To select a folder.
  A checkmark ✓ next to the folder entry highlights the selection.

- To select **Continue**: turn and press the controller.
  The copying menu appears.

3. Starting the copying process

In the example, files are copied from a USB device to the Media Register.

- To select **Start**: press the controller.
  The copying procedure starts and is shown in the progress bar.

  It may take some time for the copying process to be completed, depending on the amount of data. If there is not enough memory space, a message to this effect appears.

  Once the copying procedure is complete, you will hear the first track of the copied album. You can now copy more files to the Media Register.

- To cancel copying: select **Cancel**.
  Files are stored in the Media Register up until the point of cancellation.

  It is possible to change to a different function (e.g. radio) during the copying procedure. The copying procedure continues in the background. While the copying procedure is taking place, this is shown by a symbol in the status bar.

### Renaming/deleting files

- To show the main function bar: slide ⊗ the controller.

- To select **Media**: turn and press the controller. A menu appears with the available media sources.

- To select the media source: turn the controller and press to confirm.

- To switch to the menu bar: slide ⊗ the controller.

- To select **Options**: turn and press the controller.

- Select **Manage Media Register**.

- Select **Rename / Delete Files**.
  The file list is displayed.
To highlight the file: turn and press the controller.

Slide the controller. You can select between Edit and Delete.

Only folders can be renamed.

Renaming a file

To select Edit: turn and press the controller. An input field appears.

Rename folder.

To save changes with OK: turn and press the controller. Renaming a folder only changes the file name. Depending on whether or not the Show Track Information option has been selected, this change may not be visible in the main display field.

Deleting a file

To select Delete: turn and press the controller.

Deleting all files

In order to prevent malfunctions, do not use COMAND during this time.

This function deletes all files from the Media Register.

To show the main function bar: slide the controller.

To select Media: turn and press the controller. A menu appears with the available media sources.

To select the media source: turn the controller and press to confirm.

To switch to the menu bar: slide the controller.

To select Options: turn and press the controller.

To select Manage Media Register.

Select Delete All Media Files.

A prompt appears.

To select Yes: turn and press the controller. All files are deleted.

Calling up memory space info

To show the main function bar: slide the controller.

To select Media: turn and press the controller. A menu appears with the available media sources.

To select the media source: turn the controller and press to confirm.

To switch to the menu bar: slide the controller.

To select Options: turn and press the controller.

To select Manage Media Register.

Selecting a playback mode

To select Options: turn and press the controller.
The following options are available:

- **Normal Track Sequence**: the tracks are played in the normal order (e.g. track 1, 2, 3 etc.).
- **Random Medium**: all tracks on the data medium are played in random order (e.g. track 3, 8, 5 etc.).
- **Random Track List**: the current track list is played in random order (e.g. 3, 8, 5 etc.).

- To show the main function bar: slide 5 the controller.
- To select Media: turn and press the controller. A menu appears with the available media sources.
- To select the media source: turn the controller and press to confirm.
- To switch to the menu bar: slide 6 the controller.
- To select Options: turn and press the controller.
- Select Playback Mode. The options list appears. The • dot indicates the current setting.
- Select the desired option. The option is switched on. For all options except Normal Track Sequence, you will see a corresponding icon in the main display.

The Normal Track Sequence option is automatically selected when you change the disc you are currently listening to or when you select a different medium. If an option is selected, it remains selected after the multimedia system is switched on or off.

The Bluetooth® audio device must support the A2DP and AVRCP Bluetooth® audio profiles.

- **Bluetooth® visibility**
  Certain Bluetooth® audio devices do not just require activation of the Bluetooth® function. In addition, your device must be made "visible" to other devices.

- **Bluetooth® device name**
  This device name is predetermined but can usually be changed. For a clear selection of the Bluetooth® device, Mercedes-Benz recommends that you customize the device name.

- **A2DP (Advanced Audio Distribution Profile)**: Bluetooth® audio profile for audio data transmission
- **AVRCP (Audio Video Remote Control Profile)**: Bluetooth® audio profile for audio data playback

The Bluetooth® device must be visible to the multimedia system for authorization. After authorization, the multimedia system even finds the Bluetooth® device when it is not visible.

**General notes**

Before using your Bluetooth® audio device with the multimedia system for the first time, you will need to authorize it.

When you authorize a new Bluetooth® audio device, it is connected automatically. Connection involves first searching for a Bluetooth® audio device and then authorizing it.

You can authorize up to 15 Bluetooth® devices.

- If you authorize a mobile phone that supports Bluetooth® audio, the A2DP and AVRCP Bluetooth® audio profiles are connected automatically.
- The mobile phone is then entered:
  - in the Bluetooth® telephone list (page 91)
  - in the Bluetooth® device list (page 151)

Mercedes-Benz recommends authorizing a mobile phone in Bluetooth® telephony (page 92).
Bluetooth® audio basic display

1. Audio transmission status (depending on the Bluetooth® audio device, also title name and artist)
2. Data medium position in the media list
3. Sound settings
4. Device list
5. Stops 🎧 or starts ⏯️ playback
6. Name of the connected Bluetooth® audio device (example)
7. Options menu

Switching to Bluetooth® audio

- To show the main function bar: slide 🎧 the controller.
- To select Media: turn and press the controller. The last media source you have set is displayed.
- To select Media: slide 🎧 and press the controller.
- To select Bluetooth Audio: turn and press the controller.

If the Bluetooth® audio device is already authorized, it is activated by the multimedia system. The basic display (> page 151) then appears. Playback starts.
If you see the No Bluetooth Audio Device Connected message, you will need to authorize the Bluetooth® audio device first (> page 151).

If the Bluetooth® audio device connected supports metadata and corresponding data is available, then the artist, track and album name can be displayed.

Searching for and authorizing a Bluetooth® audio device

Searching for a Bluetooth® audio device

- Switch on Bluetooth® audio mode (> page 151).
- Slide 🎧 the controller.
The media menu bar is shown.
- To select Connect Device: turn and press the controller.
- To select Search for Audio Devices: press the controller.
A message appears.
- Select Start Search.
The multimedia system searches for Bluetooth® audio devices within range and adds them to the Bluetooth® device list.
The duration of the search depends on the number of Bluetooth® audio devices within range and their characteristics.

Bluetooth® audio player within range and already authorized

Newly detected mobile phone with Bluetooth® audio mode in range

The Bluetooth® device list displays all authorized devices, whether they are within range or not. After a device search, devices which are within range but not authorized are also displayed.
If the multimedia system cannot find your Bluetooth® audio device, external authorization may follow (> page 152).

Authorizing a Bluetooth® audio device

- In the Bluetooth® device list, select a Bluetooth® audio device that has not yet been authorized: turn and press the controller. Authorization starts.
Depending on which Bluetooth® audio device is being used, the device can be authorized either by entering a passkey or by Secure Simple Pairing. You can find information on this in the "Authorizing (connecting) a mobile phone" section (> page 92).

After successful authorization, the Bluetooth® audio device is connected and starts playing.

With some Bluetooth® audio devices, playback must initially be started on the device itself, so that the multimedia system can play the audio data. Bluetooth® must also be given as a media output location for the audio device used.

The Bluetooth® audio device must support Bluetooth® version 2.1 for connection via Secure Simple Pairing. The multimedia system creates a six-digit code which is displayed simultaneously on both devices that are to be connected.

For some Bluetooth® audio devices, the pairing must also be confirmed within 10 seconds.

External authorization

If the multimedia system does not find your Bluetooth® audio device (> page 151), this may be due to particular security settings on your Bluetooth® audio device. In this case, check whether your Bluetooth® audio device can locate the multimedia system.

The Bluetooth® device name of the multimedia system is MB Bluetooth.

- Switch on Bluetooth® audio mode (> page 151).
- Slide the controller. The media menu bar is shown.
- To select Connect Device: turn and press the controller.
- To select Connect via Audio Device: turn and press the controller.
- Start the authorization on your Bluetooth® audio device (see the manufacturer’s operating instructions). After successful authorization, the Bluetooth® audio device is connected and starts playing.

With some Bluetooth® audio devices, playback must initially be started on the device itself, so that the multimedia system can play the audio data.

Device-specific information on authorizing and connecting Bluetooth®-capable mobile phones can be found on the Internet at http://www.mercedes-benz.com/connect.

Displaying details

- To select a Bluetooth® audio device from the Bluetooth® device list: turn the controller (> page 151).
- To select: slide the controller.
- To select Details: turn and press the controller.

The following information concerning the selected mobile phone is shown:
- Bluetooth® name
- Bluetooth® address
- Availability status (shown after an update)
- Authorization status
- To close the detailed display: press the button.

Starting/stopping playback

Requirement: the Bluetooth® audio basic display (> page 151) is shown.

Starting playback

- To select : turn and press the controller. Playback starts. is selected.

Stops playback

- Select . A message appears. is selected.

Continuing playback

- Select . A message appears. is selected.

Starting playback if the Bluetooth® audio device has been stopped

During the search for mobile phones (> page 91), the connection with the Bluetooth® audio device is terminated. The No Bluetooth
Audio Device Connected message appears in the Bluetooth® audio basic display (page 151). The Connect Last Used Player message cannot be confirmed. When the search is finished, the Bluetooth® audio device can be reconnected.

▶ To confirm the Connect Last Used Player message in the basic display: press the controller. Depending on the Bluetooth® audio device used, playback starts immediately or you must start playback manually. In this case, you will see the Bluetooth Audio Device Paused message.

▶ To start playback: To select ▶: slide ◀ and press the controller. Playback resumes from the beginning.

### Selecting a track

The function is not supported by all Bluetooth® audio devices. Some mobile phones impair function with regard to the following criteria:

- the number of tracks that can be selected.
- the time period until the next or previous track is played.

▶ Use the multifunction steering wheel to switch to the media menu in the on-board computer; see the vehicle Operator’s Manual.

▶ To skip forward or back to a track: press the ▲ or ▼ button on the multifunction steering wheel.

▶ Rapid scroll: press and hold the ▲ or ▼ button on the multifunction steering wheel until the desired track is reached. If you press and hold the ▲ or ▼ buttons, the rapid scrolling speed increases after a short time.

During rapid scrolling, track names are not displayed but only Track+1, Track+2, etc. (or Track-1, Track-2, etc.). There are no playback times shown for tracks that have been played. This is available as an optional function starting with AVRCP Version 1.3.

### Playback options

#### General notes

If the Bluetooth® audio device supports the corresponding function, the following options are available:

- **Normal Track Sequence**: the tracks are played in the normal order (e.g. track 1, 2, 3 etc.). Audio data playback is determined by the order in which the tracks are written to the data medium. Alphabetical order is the most common. Once all the tracks in a folder have been played, the tracks in the next folder are played.

- **Random Track List**: the current track list is played in random order (e.g. 3, 8, 5 etc.).

- **Random Medium**: all tracks on the data medium are played in random order (e.g. track 3, 8, 5 etc.).

Playback options are optional functions and are not, or only partially, supported by Bluetooth® audio devices.

### Selecting the playback option

▶ Slide ◀ the controller in the Bluetooth® audio basic display (page 151).

▶ To select Options: turn and press the controller.

▶ Select Playback Mode. A ◀ dot indicates the current setting.

▶ Select the desired option. If you select Random Track List, a corresponding message appears in the display or selection window.

### Increasing the volume in the multimedia system

▶ Slide ◀ the controller in the Bluetooth® audio basic display (page 151).

▶ To select Options: turn and press the controller.

▶ To select Volume: turn and press the controller. A menu appears. The ◀ dot indicates the current setting.

▶ Select Standard or Boost.
If play back on the Bluetooth® audio player is too quiet, the Boost function may be used. It is recommended, however, that you increase the volume on the Bluetooth® audio player directly.

Reconnecting a Bluetooth® audio device

The Bluetooth® audio profiles are connected automatically under the following circumstances:

- one of the last two mobile phones to have been connected has also been used as a Bluetooth® audio player (if the function is supported by the mobile phone).
- the mobile phone is automatically connected. The Bluetooth® audio player is then connected.

For an automatic connection with the multimedia system, the mobile phone must be within range.

For most Bluetooth® audio devices, the *automatic connection* must be activated by ticking a box. Depending on the device used, this prompt often occurs during authorization (see the manufacturer’s operating instructions).

If the No Bluetooth Audio Device Connected message appears, you have two options to reconnect the Bluetooth® audio device.

**Option 1:**

- To confirm the Connect Last Used Player message in the basic display: press the controller.
  
  If the multimedia system can locate the Bluetooth® audio device, it will be connected and start playing.

**Option 2:**

- Slide the controller. The media menu bar is shown.
- To select Connect Device: turn and press the controller.
- To select a Bluetooth® audio device: turn and press the controller.
  
  If the Bluetooth® audio device has been authorized, playback starts.

Bluetooth® audio device and simultaneous search for mobile phones

When searching for a mobile phone or a new Bluetooth® audio device, the connection to an already activated Bluetooth® audio device is stopped.

In the Bluetooth® audio basic display, you will see the No Bluetooth Audio Device Connected message, and the displayed Connect Last Used Player message cannot be selected.

**De-authorizing (deregistering) a Bluetooth® audio device**

- To select a Bluetooth® audio device from the Bluetooth® device list: turn the controller (> page 151).
- To select Deauthorize: press the controller. A prompt appears asking whether you really wish to de-authorize this device.
- To select Yes: turn and press the controller. If you select Yes, the device will be deleted from the Bluetooth® device list.

Before re-authorizing the Bluetooth® audio device, you should also delete the device name MB Bluetooth from your Bluetooth® audio device’s Bluetooth® list (see the Bluetooth® audio device’s operating instructions).

Operation with the Media Interface

**General notes**

Media Interface is a universal interface for the connection of mobile audio and video devices. Media Interface in the multimedia system has two USB connections.

Two USB ports and an SD card slot are located in the stowage compartment under the armrest.
Media Interface basic display

1. Main function bar
2. Display for the active data medium
3. Media menu bar
4. Track display on the disc
5. Track number and number of tracks in the track list
6. Numerical time display
7. Graphic time display
8. Cover view (if available)

Then follow the instructions in the "Media Interface" section.
Or call the Mercedes-Benz Customer Assistance Center at 1-800-FOR-MERcedes (1-800-367-6372) (for the USA) or Customer Relations at 1-800-387-0100 (for Canada).

Supported data formats

<table>
<thead>
<tr>
<th>Format</th>
<th>Supported data formats</th>

Video files from Apple® devices cannot be played.

Supported devices

The following data media can be connected to the multimedia system via Media Interface:
- iPod®
- iPhone®
- iPad®
- MP3
- USB devices

iPod®, iPhone® and iPad® are registered trademarks of Apple Inc., Cupertino, California, USA.

For details and a list of supported devices, visit http://www.mercedes-benz.com/connect.
Overview

The following categories are listed:

- Current Tracklist
- Folder
- Select By Cover
- Keyword Search
- Playlists
- Artists
- Albums
- Track
- Genres
- Year
- Composers
- Videos
- Photos
- Podcasts
- Audiobooks

The functions are available as soon as the entire media content has been read and analyzed.

If the same device is reconnected with unchanged media content, these functions are available more quickly.

The audio books and podcasts categories are only available for Apple® devices.

When connecting Apple® devices, the categories “Folder”, “Year” and “Photos” are not available.

To select a category, e.g. Current Tracklist: turn and press the controller. A selection list appears.

Keyword search

To select Keyword Search in the category list: turn and press the controller.

Enter and confirm the characters of the desired search using the controller (> page 146). Search results are sorted according to the available categories, displayed and can then be selected.

Selecting the playback option

- In media mode, slide the controller. The media menu bar is shown.
- To select Options: turn and press the controller.
- To select the desired playback option: turn and press the controller.

Additional information on playback options (> page 143).

Selecting video settings

Video files from Apple® devices cannot be played.

If playable video files are found, they will be played by the multimedia system.

- To switch on full-screen mode: press the controller in the basic display.
- To show the video menu: slide the controller in full-screen mode. The Media Interface menu bar appears.
- To select Options: turn and press the controller.
- Select Video Settings.

To change settings (> page 158).

Video DVD mode

Important safety notes

⚠ WARNING

The CD/DVD drive is a class 1 laser product. If you open the housing of the CD/DVD drive, there is a risk of exposure to invisible laser radiation. This laser radiation could damage your retina. There is a risk of injury.
Never open the housing. Always have maintenance and repair work carried out at a qualified specialist workshop.

**WARNING**
Handling discs while driving may distract you from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident.

Handle discs only when the vehicle is stationary.

Bear in mind that at a speed of only 30 mph (approximately 50 km/h), the vehicle covers a distance of 44 ft (approximately 14 m) per second.

**General notes**

**Notes on discs**

![Caution]
Do not affix stickers or labels to the discs. They could peel off and damage the drive.

The drive is designed to receive EN 60908 standard discs. Therefore, you can only use discs with a maximum thickness of 1.3 mm.

If you insert thicker discs, e.g. those that contain data on both sides (DVD on one side and audio data on the other), they cannot be ejected and can damage the drive.

Do not use discs with an 8 cm diameter, even when using an adapter. Only use round discs with a 12 cm diameter.

The variety of data media, burners and burn software means there is no guarantee that the system will be able to play discs that you have copied yourself.

**DVD playback conditions**

The multimedia system can play back video DVDs produced according to the following standards:

- Region code 1 or region code 0 (no region code)
- PAL or NTSC standard

You will generally find the relevant details either on the DVD itself or on the DVD case.

With DVDs that do not meet the standard requirements, you may encounter playback problems.

ℹ️ Observe the following notes:

- It is also possible to play video DVDs with a different region code, provided that they are produced in accordance with the PAL or NTSC standard. If you insert a video DVD with a different region code, a message to this effect appears.

- The multimedia system is set to region code 1 at the factory. This setting can be changed at an authorized Mercedes-Benz Center. The region code can be changed up to five times.

- If a DVD cannot be played back according to national color transfer methods (PAL or NTSC standards), problems with the image, sound or playback may occur.

**Control options**

There are four control menus available in video DVD mode.

Most DVDs have their own control menu. The DVD is operated directly using the controller or DVD functions.

<table>
<thead>
<tr>
<th>Control menu and function</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>DVD’s control menu</td>
<td>Operation with the controller</td>
</tr>
<tr>
<td>Selection of title, scene, language, subtitles ...</td>
<td></td>
</tr>
</tbody>
</table>

| Options menu | Selection of brightness, contrast, color, format | Operation using the menu bar Options, video settings |

| Video menu | Selection of scene, fast forward or rewind | In full-screen mode, slide ⏩ the controller |

| DVD functions | Selection of title, scene, language, subtitles ... | In full-screen mode, press the controller |
Function restrictions

Depending on the DVD, certain functions or actions may not function at all. The symbol appears in the display.

Switching on video DVD mode

- Insert and eject a disc from the single drive (page 141)

Further options for switching on:
- Using the main function bar (page 139)
- Using the device list (page 139)

Showing the DVD basic display

1. Main function bar
2. Main display field
3. Media menu bar

The DVD basic display can be shown in the following situations:
- To show the DVD menu: press the button.
- To show in the video DVD currently playing: slide the controller. The video menu appears.
- Press the controller. The basic display appears.

Switching on DVD full-screen mode

It is possible to switch from the DVD basic display to full screen mode as follows:
- Slide the controller. The main function bar and menu bar are hidden. A full-screen symbol will be shown.
- Press the controller. The full-screen mode appears.

Calling up the options menu

Selecting options
- In full-screen mode, slide the controller. The video menu appears.
- Press the controller. The DVD basic display appears.
- To select Options in the menu bar: turn and press the controller. A menu appears.

Skip to time
- To select Skip to Time: turn and press the controller. A menu appears.
- To set the time: turn the controller.
- To hide the menu: press the button.

Displaying the DVD functions
- To select DVD Functions: turn and press the controller. A menu appears (page 160).

Selecting video settings

Dynamic image enhancement

The dynamic image enhancement function automatically matches brightness, contrast and color to the film being played.

- To activate or deactivate: tick or remove the tick from the box in front of Dynamic Image Enhancement.
Manual image enhancement

In order to manually adjust the brightness, contrast and color, the dynamic image enhancement function and the automatic daylight adjustment feature must be switched off.

- To select **Brightness**, **Contrast** or **Color**: turn and press the controller.
- A sliding menu appears.
- To select the required value: turn the controller.
- To exit the sliding menu: slide the controller.

Setting the picture format

The following screen format options are available for the DVD currently being played:

- **Auto**
- **16:9**
- **4:3**
- **Zoom**

- To set the picture format: turn and press the controller.
  - The dot before the menu entry shows the selected format.

Showing the DVD's control menu

Most DVDs have their own control menu which can be operated using the controller.

Showing the DVD's control menu

- To show DVD functions: in full screen video mode, press the controller.
  - The DVD functions menu is shown.
- To select **Menu** from the DVD functions menu: turn and press the controller.
  - The DVD functions menu is hidden and the DVD's menu entries (e.g. scenes, language, trailers) are displayed.
- To select a menu entry: turn and press the controller.

Operating the video menu

1. Type of data medium
2. Current title
3. Shows the menu bars for the DVD basic display
4. Current scene
5. Track time

Operating the video menu

- To show the video menu: in full-screen video mode, slide the controller.
- To hide the video menu: slide the controller.
- To select the next or previous scene: turn the controller clockwise/counter-clockwise.
- To fast forward or rewind: slide or hold until the desired position has been reached.
- To show the menu bars for the DVD basic display: in the video menu, press the controller.
  - The video menu is hidden and the DVD basic menu appears.
**DVD functions**

**Showing/hiding the DVD functions**

- **To show DVD functions:** in full screen video mode, press the controller. The DVD functions menu is shown.
- **To hide DVD functions:** select \( \rightarrow \) from the DVD functions.
- **To show the DVD basic display:** select \( \triangle \) from the DVD functions.

**Overview of DVD functions**

1. Activates DVD control menu
2. Hides DVD functions
3. Shows the DVD basic display
4. Confirms entry in control menu
5. Navigates DVD lists
6. Jumps to the start of the scene
7. Displays camera perspectives
8. Shows subtitles
9. Selects language
10. Stops playback
11. Pauses playback

**Using the DVD functions**

- In full-screen mode, press the controller. The DVD functions menu is shown.

It is possible to navigate in the DVD's control menu when the arrows in the upper menu bar are activated.
- To select the \( \leftarrow \rightarrow \) arrow to navigate in the menu: turn the controller. The active arrow is highlighted.
- To select a menu entry: press the controller. The next menu entry in the direction of the arrow is highlighted.
- To call up a highlighted menu entry: turn the controller until \( \Delta \) is highlighted.
- Press the controller. The selected DVD scene is played.
- To hide DVD functions: select \( \leftarrow \rightarrow \) using the controller.
- Press the controller. The DVD functions menu is hidden.

If there are functions such as **Display camera perspectives** on the DVD, these functions are shown in the DVD functions menu.
- To call up Display camera perspectives: turn and press the controller.

**Continuing/stopping playback**

**Interrupting playback**

- Show the DVD functions (page 160).
- To select \( \square \) from the DVD functions menu: turn and press the controller. The \( \square \) display changes to \( \triangleright \). Playback is stopped.

**Continuing playback**

- Select \( \triangleright \). Playback continues from the point where it was interrupted.

**Stopping playback**

- While playback is interrupted select \( \square \) again.

**Restarting playback**

- Select \( \triangleright \). Playback restarts from the beginning.

**Pausing/continuing playback**

**Pausing playback**

- Show the DVD functions (page 160).
- Select \( \square \): turn and press the controller. The \( \square \) display changes to \( \triangleright \).
Continuing playback

▶ Select ▶.

Selecting a scene/chapter

If the film is divided into scenes and chapters, you can select these directly while the film is running or you can skip progressively through them. This is not possible at certain points for some DVDs (e.g. during the opening credits). It may also be possible to select the scene and chapter from the functions stored on the DVD.

▶ To skip forward or back: in the video menu, turn the controller. The next or previous scene in the film is skipped to.

The DVD functions can also be used to make selections (▶ page 160).

Picture viewer

General notes

If there are pictures on the active data medium, you can view them on the multimedia system. The following data media and picture formats are supported:

- Data media: Media Register, CD, DVD, USB devices, SD cards
- Picture formats: jpeg, jpg, bmp, png

The maximum image resolution is 20 megapixels. It is not possible to view a picture from the driver’s side while the vehicle is in motion.

Displaying pictures

▶ In media mode, slide ◀ the controller.
▶ To select Search: turn and press the controller. The category list appears.
▶ To select Photos: turn and press the controller. A directory list appears. Folders and picture files can be shown.
▶ Select a folder or picture. If there is no picture on the data medium, an empty list is shown.

Searching for pictures on other data media

▶ You can search for pictures on other data media.
In the directory list, slide ◀ the controller. The device list appears.
▶ To select a data medium with picture files: turn the controller and press to confirm. A directory list appears. Folders and picture files can be shown.
▶ Select a folder or picture.

Starting a slide show

▶ While viewing a picture, press the controller. The image menu appears.
▶ To select Start Slideshow: turn and press the controller. The slide show starts.
▶ To end the slide show: press the controller. The image menu appears.
▶ Select End Slide Show.

Changing the picture view

▶ While viewing a picture, press the controller. The image menu appears.
▶ To select Turn Clockwise: turn the controller and press to confirm. The picture rotates 90 degrees.
▶ Select Turn Counterclockwise. The picture rotates 90 degrees.
▶ Select Zoom In. The size of the picture increases. After you have zoomed into the picture, you can move the section of the picture.
▶ To move the section of the picture: slide ◀ and ◀ the controller.
To revert to the original size: press the controller.

- or -

Press the button.

### Closing the picture viewer

- While viewing a picture, press the controller.
- To select Close Picture Viewer: turn and press the controller.
  The multimedia system returns to the last accessed media function.
Your multimedia system equipment

These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions.

Read the information on qualified specialist workshops in the vehicle Operator’s Manual.

Sound settings

Calling up the sound menu

You can make various sound settings for the different audio and video sources. It is possible to set more bass for radio mode than for CD audio mode, for example. The respective sound menu can be called up from the menu of the desired mode.

- Switch to radio mode (▷ page 130).
- Switch to media mode (▷ page 139).
- To switch to the menu bar: slide 6 the controller.
- To select : turn and press the controller. The menu appears with the last setting accessed, e.g. Equalizer.

Sound menu overview

<table>
<thead>
<tr>
<th>Function</th>
<th>Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equalizer</td>
<td>Sets treble, mid-range and bass</td>
</tr>
<tr>
<td>Balance</td>
<td>Adjusts the volume: left/right</td>
</tr>
</tbody>
</table>

Setting treble, mid-range and bass

- Call up the sound menu (▷ page 163).
- Turn the controller until Equalizer is brought to the front.
- To activate rotary menus for treble, mid-range and bass: slide 9 the controller.
- To switch between the rotary menus: slide ← or → the controller.
- To make the desired Equalizer settings: turn the controller.
- Rotary menus show the set values.
- To return to the menu: slide 9 the controller.
- To return to the basic menu: press the button briefly.

Setting the balance

Balance adjusts the volume left and right. For the best sound, setting 0 is recommended.

- Call up the sound menu (▷ page 163).
- Turn the controller until Balance is brought to the front and then slide 9 the controller.
- To activate the menu for balance: press the controller.
To adjust the balance: slide ◀ or ▶ the controller.
An image shows the sound focus set.
To exit the menu: press the button.

To adjust the balance: slide ◀ or ▶ the controller.
An image shows the sound focus set.
To exit the menu: press the button.

### Burmester® surround sound system

**General notes**

The Burmester® surround sound system is available for all functions in the radio and media modes.

The Burmester® surround sound system has a total output of 640 watts and is equipped with 10 loudspeakers.

For the best sound, we recommend that the **Automatic Volume Adjustment** function is deactivated (page 38). For further information on automatic volume adjustment, see (page 38).

If using Bluetooth® audio mode, we recommend you select the **Boost** setting (page 153).

The following modes are available for the Burmester® surround sound system:
- Radio
- Satellite radio
- Audio CD
- Audio DVD (MLP, PCM DTS® and Dolby® Digital audio formats)
- Video DVD (PCM, DTS® and Dolby® Digital audio formats)
- MP3/AAC
- Media Interface
- Bluetooth® audio mode

For the best sound, CD or WAV CD format is recommended. For data-reduced media, AAC with a data rate of 320 kbit/s is recommended.

### Calling up the sound menu

You can make various sound settings for the different audio and video sources. It is possible to set more bass for radio mode than for CD audio mode, for example. The respective sound menu is called up from the menu of the desired mode.

### Overview of Burmester® surround sound system

</tr>
</thead>
<tbody>
<tr>
<td>Equalizer</td>
<td>Sets treble, mid-range and bass</td>
</tr>
<tr>
<td>Balance</td>
<td>Adjusts the volume: left/right</td>
</tr>
<tr>
<td>Surround</td>
<td>Optimizes spatial composition for all seats</td>
</tr>
</tbody>
</table>

### Setting treble, mid-range and bass

Call up the sound menu (page 164).

- Turn the controller until **Equalizer** is in the center.
- Slide ◀ the controller.
  The rotary menus for treble, mid-range and bass are activated.
- To switch between the rotary menus: slide ◀ or ▶ the controller.
- To make the desired **Equalizer** settings: turn the controller.
  The rotary menus show the set values.
- To return to the menu: slide ◀ the controller.
- To return to the basic menu: press the button briefly.
Setting the balance

Balance adjusts the volume left and right. For the best sound, setting 0 is recommended.

- Call up the sound menu (page 164).
- Turn the controller until Balance is brought to the front and then slide the controller.
- To activate the menu for balance: press the controller.
- To adjust the balance: slide or slide the controller.
- To exit the menu: press the button.

Setting surround sound

The Surround setting enables a wide-ranging sound playback.

Switching on/off

- Call up the sound menu (page 164).
- Turn the controller until Surround is in the center.
- Slide the controller. The left-hand rotary menu to switch surround sound on and off is activated.
- To switch on Surround: turn the controller.
- To exit the menu: press the button.

Setting the balance

Balance adjusts the volume left and right. For the best sound, setting 0 is recommended.

- Call up the sound menu (page 164).
- Turn the controller until Balance is brought to the front and then slide the controller.
- To activate the menu for balance: press the controller.
- To adjust the balance: slide or slide the controller.
- To exit the menu: press the button.

Calling up the sound menu

You can select different sound settings in radio mode and other media modes. It is possible to set more bass for radio mode than for audio CD mode, for example. The respective sound menu can be called up from the menu bar of the desired mode.

- Switch to radio mode (page 130).
- Switch to media mode (page 139).

General notes

The Burmester® high-end 3D surround sound system is available for all functions in the radio and media modes.

The Burmester® high-end surround sound system has a total output of 1000 watts and is equipped with 11 loudspeakers.

For the best sound, we recommend that the Automatic Volume Adjustment function is deactivated (page 38). For further information on automatic volume adjustment, see (page 38).

If using Bluetooth® audio mode, we recommend you select the Boost setting (page 153).

The following modes are available for the Burmester® high-end surround sound system:

- Radio
- Satellite radio
- Audio CD
- Audio DVD (MLP, PCM DTS® and Dolby® Digital audio formats)
- Video DVD (PCM, DTS® and Dolby® Digital audio formats)
- MP3/AAC
- Media Interface
- Bluetooth® audio mode

For the best sound, CD or WAV CD format is recommended. For data-reduced media, AAC with a data transfer rate of 320 kbit/s is recommended.
To switch to the menu bar: slide 6 the controller.

To select [ ]: turn and press the controller. The menu appears with the last setting accessed, e.g. Sound Profile.

Overview of Burmester® high-end surround sound system

<table>
<thead>
<tr>
<th>Function</th>
<th>Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>Equalizer</td>
<td>Sets treble, mid-range and bass</td>
</tr>

</tr>
<tr>
<td>Sound profile</td>
<td>Four defined sound settings: Pure/Easy Listening/Live/Surround</td>
</tr>
</tbody>
</table>

Setting the balance

Balance adjusts the volume left and right. For the best sound, setting 0 is recommended.

- Call up the sound menu (page 165).
- Turn the controller until Balance is in the center and slide 6.
- To activate the menu for balance: press the controller.
- To adjust the balance: slide ← or → the controller.
- An image shows the sound focus set.
- To exit the menu: press the button.

Setting treble, mid-range and bass

- Call up the sound menu (page 165).
- Turn the controller until Equalizer is in the center.
- Slide 6 the controller.
- Rotary menus for treble, mid-range and bass are activated.
- To switch between the rotary menus: slide ← or → the controller.
- To make the desired Equalizer settings: turn the controller.
- Rotary menus show the set values.

VIP & BAL selection

For the best sound, the specific seats will need to be set.

- Call up the sound menu (page 165).
- Turn the controller until VIP & BAL Selection is in the center and slide 6.
To set the desired VIP & BAL Selection: turn the controller. The segment, text and image show the selected setting.

To return to the menu: slide the controller.

To return to the basic menu: press the button briefly.

Setting the sound profile

With the Sound Profile setting, you can select between five defined sound settings.

<table>
<thead>
<tr>
<th>Sound profile for high-end sound system</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pure</td>
<td>Audiophile audio playback without additional effects</td>
</tr>
<tr>
<td>Easy Listening</td>
<td>Subtly mellowed acoustics for laid-back listening over long periods</td>
</tr>
<tr>
<td>Live</td>
<td>Spectacular sound settings with live-performance characteristics</td>
</tr>
<tr>
<td>Surround</td>
<td>Enhanced surround sound for mono and stereo recordings</td>
</tr>
</tbody>
</table>

To select Sound Profile: turn the controller until the desired sound profile is activated.

To return to the menu: slide the controller.

To return to the basic menu: press the button briefly.

Call up the sound menu (page 165).

Turn the controller until Sound Profile is in the center.

Slide the controller.

The rotary menu to select the sound profile is activated.
Your multimedia system equipment

These operating instructions describe all the standard and optional equipment of your multimedia system, as available at the time of going to press. Country-specific differences are possible. Bear in mind that your vehicle may not feature all functions described here. This also applies to safety-relevant systems and functions. Read the information on qualified specialist workshops in the vehicle Operator’s Manual.

Weather forecasts

Introduction

This function is currently not available for Canada.

For the reception of weather forecasts via satellite radio, you will need a SIRIUS XM Satellite Weather subscription.

If the message appears along with the SIRIUS telephone and ID numbers, you will need to have the weather service activated first.

To select Call or Cancel: turn and press the controller.

If a mobile phone is connected to the multimedia system (page 90), when you select Call a call is placed to a member of the SIRIUS service staff. The ID number of the SIRIUS device will be transferred to the telephone display.

This will be followed by instructions from the service employee.

Weather forecasts can be received via the satellite radio for the USA (including Alaska and Hawaii).

The received weather data can be displayed as an information chart (daily forecast, five-day forecast, detailed information) or on the weather map.

The weather data received from the weather station is stored for one hour in the multimedia system. It can therefore be displayed again immediately after restarting the engine (for example after refueling).

Depending on which scale has been selected, the weather map can display the following weather data with symbols:

- rain radar
- storm characteristics
- high and low-pressure areas, weather fronts
- course of tropical cyclones (hurricanes, typhoons)
- storm warnings
- wind direction and speeds

The rain radar cannot be displayed for Alaska, Hawaii and Puerto Rico.

Hurricane: term used to describe the tropical cyclones that primarily develop in the Atlantic, North Pacific and South Pacific oceans. A wind speeds are above 74 mph (118 km/h). Five categories are used to classify the strength of a hurricane.

Typhoon: term used to describe a tropical cyclone that develops in the northwestern Pacific. The wind speeds are in the category of a hurricane.

Switching the SIRIUS Weather display on/off

Activating

To show the main function bar: slide the controller.

To select : turn and press the controller. The menu for selecting Internet applications appears.

To select SIRIUS Weather, turn and press the controller. The information chart shows the daily forecast at the current vehicle position.
You see the following information:
- the date and time of the weather message received last
- information on the current weather (temperature, cloud coverage) and a forecast for the next three, six and twelve hours
- the current highest temperature and forecasts
- the current lowest temperature and forecasts
- the probability of rain

Switching to the 5-day forecast:
- To select **Current**: turn and press the controller.
  A menu appears.
- Select 5-Day.
  The information chart displays the forecast for the next five days in the currently selected location.

![Displaying detailed information](image)

Besides the current temperatures, you can display information such as wind speeds and UV index.
- To select **Current** or 5-Day in the current-day or 5-day forecast: turn and press the controller.
  A menu appears.
- Select **Info**.
  The information chart shows detailed information for the selected area.

![Selecting the area for the weather forecast](image)

**Introduction**

You can select the weather forecasts for:
- the current vehicle position
- the vicinity of the destination
- a winter sports area
- an area within the USA

You can select a location in the information chart (option 1) or in the map (option 2). You can store frequently selected locations in the memory (▶ page 171).

ℹ️ The data for the weather forecasts is received from the weather station nearest to the selected location.

**Deactivating**
- Press [←].
Option 1: selecting the area in the information chart

To select Town in the information chart: turn and press the controller.

To select the current vehicle position:
select Current Position from the menu.
The weather data for the current vehicle position is received from the nearest weather station and automatically displayed.

Requirement for "Near destination": a route to a destination has been calculated (> page 54).
The menu item is otherwise grayed out.

To select the vicinity of the destination:
select Near Destination from the menu: turn the controller and press to confirm.

To select a winter sports area:
select At Ski Area from the menu: turn the controller and press to confirm.

Select a state, e.g. Colorado.
Select a winter sports area from the menu. The weather data and other information is displayed for the winter sports area that has been selected. The data is supplied by the nearest weather station.

The information chart shows the following information (if available):
- ski slopes/ski lifts
- snowboarding and nighttime opening
- snow conditions (e.g. snow depth)
- temperature

The status of a facility is indicated as follows:
- green check mark - open
- red cross - closed
- question mark - not known

Example: city list with character bar
Entry limitation: searching for a location using the character bar is not possible while driving.

To search for a location: select Search Areas: turn and press the controller.

Select Other States or Current State (ABC).
Depending on the selection, the list of states or cities will appear with the character bar. You can limit the search using the character bar.

To select state/province or city: enter the first few letters by turning and pressing the controller.

To switch to the list without the character bar: slide the controller or select ok.

To cancel an entry: highlight in the character bar and press the controller. Pressing briefly deletes the last letter entered.
Pressing and holding longer deletes the entire entry.

To select the state/province or city from the list: turn and press the controller.
After selecting a state (or province) the list of locations appears.
After selecting a location, the information chart displays the weather forecast for the
selected location. The data is supplied by the nearest weather station.

**Option 2: selecting the area in the weather map**
- Call up the weather map (> page 171).
- Move the weather map so that the crosshair is over the desired area (> page 171).
- Press the controller. The information chart shows the weather forecast for the selected area. The data is supplied by the nearest weather station.

**Memory functions**

**Storing the area in the weather memory**
You can save locations that are called up frequently in ten preset positions (0, 1-9) in the weather memory.
- **In the weather memory:** select the area for the weather forecast (> page 169). The selected location appears at the top in the status bar.
- To select **Town** in the information chart: turn and press the controller.
- Select **Presets**.
- Select a preset using the controller.
- Press and hold the controller until you hear a tone. The area is entered on the selected preset.

**Selecting an area from the weather memory**
- **Directly from the weather memory:** select **Town** from the information chart: turn and press the controller.
- Select **Presets**.
- Select the memory position which contains the location you require. The weather data for the selected area is displayed.

**Weather map**

**Calling up the weather map**

To select **Map** in the information chart: turn and press the controller. The weather map is shown on a 500-mi (500-km) scale. The crosshair highlights the weather station that supplies the current weather data.

**Moving the weather map**

- Slide 4 or 1 the controller. The weather map moves in the corresponding direction under the crosshair.

**Changing the scale**

- Turn the controller. The scale bar appears.
- Turn until the desired scale is set.

**Showing/hiding the menu in the weather map**

- To show: press the controller.
- To hide: slide  the controller.

**Selecting a weather station in the map**

- Move the weather map and crosshair to the desired position (> page 171).
- To show the menu: press the controller.
- To select **Weather Table:** press the controller. The weather data for the selected position is received from the nearest weather station and automatically displayed as a current-day forecast.
Switching layers on the map on/off

You can switch on different layers, for example to display the rain radar, weather fronts and the course of tropical storms on the map.

► Display the menu on the weather map (> page 171).
► To select View: turn and press the controller.
► Select a layer.
Switch the display on ✔ or off □.

Explanation of the layers on the weather map

- Menu item Radar Map
  Displays the rain radar as a colored area in all map scales. For an explanation of the colors, see the legend (> page 174).
- Menu item Storm Characteristics
  Displays the characteristics of a storm in all map scales:
  - tornadic storm:
    storm cell with strong winds (super cell), from which a tornado can develop. Tornadoes are also known as twisters.
  - cyclone:
    storm cells from which a tornadic storm can develop
  - hailstorm
  - the likelihood of a hailstorm
- Storm watch areas
  Shows areas for which storm advisories have been issued (red areas). It is shown in map scales 50 mi (50 km), 200 mi (200 km) and 500 mi (500 km).
- Menu item Atmospheric Pressure
  Shows the position of high and low-pressure areas (H, L), weather fronts and isobars. It is shown in map scales 200 mi (200 km) and 500 mi (500 km).
- Menu item Tropical Storm Tracking
  Shows the direction and speed of propagation (track) of a tropical storm in all map scales with information on times and intensity.
- Menu item Winds
  shows the wind direction and wind speed in map scale of 5 mi (5 km).

Sample displays of weather data in the map

Displaying the rain radar:
> Activate the Radar Map display level (> page 172).
The rain radar image is then displayed if weather data is available.

You can call up the legend for the precipitation radar (> page 174).
The transparency of the precipitation radar map display level can be adjusted in five stages.

Displaying storm characteristics:
> Activate the Storm Characteristics display level (> page 172).
If weather data is available, the weather map will then display the storm characteristics.
You can call up the legend for storms (> page 174).
The following information on a storm cell is displayed (if available):
  - characteristics of the storm cell
  - date and time of observation (time stamp)
  - directional movement speed and path
Propagation speed: the speed at which the storm cell is advancing.
Displaying weather fronts:

- Activate the **Atmospheric Pressure** display level (> page 172).
  If weather data is available, the weather map will then display the weather fronts.
  The example shows the position of high and low-pressure areas (H, L), weather fronts and isobars. Isobars are lines that show where the air pressure is the same.

**Legend: weather fronts**

<table>
<thead>
<tr>
<th>Weather front</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cold front (blue line with blue triangles)</td>
<td>If a cold front moves in, the weather remains changeable and there are often rain showers and thunderstorms. The air temperature decreases.</td>
</tr>
<tr>
<td>Warm front (red line with red semi-circles)</td>
<td>A warm front may cause more prolonged steady rain, more cloud cover and a slow rise in temperature.</td>
</tr>
<tr>
<td>Stationary front (red and blue line with red semi-circles and blue triangles)</td>
<td>The weather front moves minimally. The weather remains changeable in this area.</td>
</tr>
<tr>
<td>Occlusion (purple line with purple semi-circles and triangles)</td>
<td>When the faster cold front catches up and joins the warm front ahead of it, an occluded front is formed. The weather remains changeable and rainy within an occlusion.</td>
</tr>
</tbody>
</table>

Displaying storm tracking information:

- Activate the **Tropical Storm Tracking** display level (> page 172).
  If weather data is available, the weather map will then display storm tracking information.
  Example: in the middle of the map you can see the current position of the tropical low-pressure area (cyclone). To the right of this a solid line shows the previous path with positions and times. The forecast for the direction of propagation is shown by a dotted line with positions and times.

You can find out detailed information on a cyclone in the Storm Guide (> page 175).
A tropical storm is separated into different categories according to the location at which it develops.

<table>
<thead>
<tr>
<th>Region of origin</th>
<th>Name of tropical low-pressure system</th>
<th>Name of tropical storm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Atlantic, North and South Pacific Oceans</td>
<td>Tropical Low Press. Sys.</td>
<td>Tropical Storm</td>
</tr>
</tbody>
</table>
## Region of origin | category
---|---
Atlantic, North and South Pacific Oceans | Name of tropical storm *(Hurricane Category 3)*
| Displays hurricane categories 1 through 5
Northwestern Pacific Ocean | Name of tropical storm *(Tropical Low Press. Sys.)*
Northwestern Pacific Ocean | Name of tropical storm *(Tropical Cyclone)*
Northwestern Pacific Ocean | Name of tropical storm *(Typhoon)*
Northwestern Pacific Ocean | Name of tropical storm *(Super-Typhoon)*

If you have selected a map scale of 50 mi (50 km) or smaller, you will also see the time stamp for the current weather data. The weather map shows wind directions and wind speeds.

### Legend (precipitation radar and storms)

- **Rain**: Eleven shades from light (light green) to heavy (red)
- **Mixed**: Light (light violet) to heavy (violet)
- **Snow**: Light (light turquoise) to heavy (turquoise)

### Time stamp

The time stamp shows when the weather data was created by the weather station. A time stamp corresponds to the time at the vehicle's current position. The changeover from summer time to standard time is performed automatically.

- Display the menu on the weather map (page 171).
- To select View: turn and press the controller.
- Select Time Stamp.

### Changing to the information chart

- Display the menu on the weather map (page 171).
- To select Weather Table: turn and press the controller.

### Storm watch areas

Storm watch areas for which there are storm advisories are displayed as red areas on the weather map.
Activating/deactivating the display of areas in red:

- Display the menu on the weather map (⇒ page 171).
- To select View: turn and press the controller. The list of display levels appears.
- Select Storm Watch.
- Select Show Symbols for Storm Areas On Map.
  Depending on the previous setting, activate ☑ or deactivate ☐ the display of areas in red.

Activating/deactivating the automatic display of warning popups:

- Select Display Storm Watch Automatically.
  Depending on the previous setting, activate ☑ or deactivate ☐ the automatic display of warning popups.

Setting the radius for the popups:

- Select 5 Miles (5 km), 50 Miles (50 km) or 200 Miles (200 km).

**Storm overview**

Displaying the Storm Guide:

- Display the menu on the weather map (⇒ page 171).
- To select Guide: turn and press the controller. A menu appears. The current storm is highlighted. There is information about the storm in the status bar.
- To select Next: turn and press the controller. The next storm is marked.
- Select Previous.
  The previous storm is highlighted.

Showing storm details:

- Select Details.
  You see detailed information about the selected storm.

Showing detailed information (if available):
- name of the tropical storm and category
- time stamp
- directional movement speed and path
  Propagation speed: the speed at which the storm cell of a tropical cyclone is advancing.
- maximum wind speed
