Digital - in the vehicle

Familiarize yourself with the contents of the Operator’s Manual directly on the vehicle (menu item “Vehicle”). Start with the quick guide, discover your vehicle’s highlights or broaden your knowledge with useful tips.

Vehicle documents wallet

Here you can find comprehensive information about operating your vehicle and about services and warranties in printed form.

Digital - on the Internet

You can find the Operator’s Manual on the Mercedes-Benz homepage.

Digital - as an App

The Mercedes-Benz Guides App is available free of charge in familiar App stores.

Mercedes-AMG GT 4-door Coupe

Operator’s Manual

Mercedes-Benz
In this Operator's Manual, you will find the following symbols:

DANGER Danger due to not observing the warning notices.

Warning notices draw your attention to hazards that may endanger your health or life, or the health or life of others.

• Please observe the warning notices in this manual.

ENvironmenTal NOTE Environmental damage due to failure to observe environmental notes.

Environmental notes include information on environmentally responsible behavior or environmentally responsible disposal.

• Observe environmental notes.

NOTE Damage by property due to failure to observe notes on material damage.

Notes on material damage inform you of risks which may lead to your vehicle being damaged.

• Observe notes on material damage.

Useful instructions or further information that could be helpful to you.

Instruction • page Further information on a topic.

Display Information in the multifunction display/multimedia display.

− Highest menu level, which is to be selected in the multimedia system.

Corresponding submenus, which are to be selected in the multimedia system.

• Marks a cause.

Example

WARNING Risk of injury or fatal injuries if the front passenger airbag is enabled.

If the front passenger front airbag is enabled, a child on the front passenger seat may be struck by the front passenger airbag during an accident.

NEVER use a rearward-facing child restraint system on a seat with an ENABLED FRONT AIRBAG, DEATH or SEVERE INJURY to the CHILD can occur.

Observe the "Children in the vehicle" section.

Internet

Vehicle manufacturer

Daimler AG

Mercedesstrasse 137

70327 Stuttgart

Germany.

As at 26.02.2018
Welcome to the world of Mercedes-Benz

Before you first drive off, read this Operator's Manual carefully and familiarize yourself with your vehicle. For your own safety and a longer operating lifespan, follow the instructions and warning notices in this Operator's Manual. Disregarding them may lead to damage to the vehicle or personal injury. Vehicle damage resulting from the disregard of the instructions is not covered by the Mercedes-Benz Limited Warranty.

The equipment or model designation of your vehicle may vary according to:
- Model
- Order
- National version
- Availability

Mercedes-Benz reserves the right to introduce changes in the following areas:
- Design
- Equipment
- Technical features

The equipment in your vehicle may therefore differ from that shown in the descriptions and illustrations.

The following are integral parts of the vehicle:
- Printed Operator's Manual
- Maintenance Booklet
- equipment-dependent Supplements

Keep these documents in the vehicle at all times. If you sell the vehicle, always pass all of the documents on to the new owner.

Mercedes-Benz USA, LLC
Mercedes-Benz Canada, Inc.
A Daimler Company

Calling up the Digital Operator’s Manual

Multimedia system:

Vehicle ➢ Operator’s Manual

Select a menu item.

In addition, you can also call up the Operator’s Manual within a main function (e.g. via Navigation Info).

The Digital Operator’s Manual describes the function and operation of the vehicle and the multimedia system.

For safety reasons, the Digital Operator’s Manual is deactivated while driving.

The Digital Operator’s Manual contains the following menu items:

- **Search**: allows you to search precisely for keywords.
- **Quick start**: provides you with important information so that you can start using your vehicle immediately.
- **Tips**: provides tips on how to use your vehicle in certain situations.
- **Messages**: provides you with further information about the messages in the instrument cluster.
- **Bookmarks**: provides you with a list of all the bookmarks you have stored yourself.

Some sections of the Digital Operator’s Manual, such as warnings, can be made visible by highlighting and pressing them.

The Operator’s Manual can also be found in the Mercedes-Benz Guides app in all common app stores.
Protecting the environment

ENVIRONMENTAL NOTE Environmental damage due to operating conditions and personal driving style

The pollutant emission of your vehicle is directly related to the way you operate your vehicle.

You can help to protect the environment by operating your vehicle in an environmentally responsible manner. Please observe the following recommendations on operating conditions and personal driving style.

Operating conditions:

- Make sure that the tire pressure is correct.
- Do not carry any unnecessary weight (e.g. roof luggage racks once you no longer need them).
- Adhere to the service intervals. A regularly serviced vehicle will contribute to environmental protection.

- Always have maintenance work carried out at a qualified specialist workshop.

Personal driving style:

- Do not depress the accelerator pedal when starting the engine.
- Do not warm up the engine while the vehicle is stationary.
- Drive carefully and maintain a suitable distance from the vehicle in front.
- Avoid frequent, sudden acceleration and braking.
- Change gear in good time and use each gear only up to ２/₃ of its maximum engine speed.
- Switch off the engine in stationary traffic, e.g. by using the ECO start/stop function.
- Drive fuel-efficiently. Observe the ECO display for a fuel-efficient driving style.

ENVIRONMENTAL NOTE Environmental pollution caused by irresponsible disposal of the high-voltage battery

A high-voltage battery contains materials which are harmful to the environment.

- Dispose of defective high-voltage batteries at a qualified specialist workshop.

Environmental issues and recommendations:

It is recommended that you re-use or recycle materials instead of just disposing of them. The relevant environmental guidelines and regulations serve to protect the environment and must be strictly observed.
**Genuine Mercedes-Benz parts**

- Door sills
- Seats
- Cockpit
- Instrument cluster
- Center console
- Lateral roof frame
- Do not install accessory parts such as audio systems in these areas.
- Do not carry out repairs or welding.
- Have aftermarket installation of accessories carried out at a qualified specialist workshop.

You could jeopardize the operating safety of your vehicle if you use parts, tires and wheels as well as accessories relevant to safety which have not been approved by Mercedes-Benz. Safety-relevant systems, e.g. the brake system, may malfunction. Only use Mercedes-Benz Genuine Parts or parts of equal quality. Only use tires, wheels and accessories that have been specifically approved for your vehicle model.

Mercedes-Benz Genuine Parts are subject to strict quality control. Each part has been specially developed, manufactured or selected for Mercedes-Benz vehicles and fine-tuned for them. Therefore, only Mercedes-Benz Genuine Parts should be used.

More than 300,000 different Mercedes-Benz Genuine Parts are available for Mercedes-Benz models.

All authorized Mercedes-Benz Centers maintain a supply of Mercedes-Benz Genuine Parts for necessary service and repair work. In addition, strategically located parts delivery centers provide for quick and reliable parts service.

Always specify the vehicle identification number (VIN) (→ page 418) when ordering Mercedes-Benz Genuine Parts.

---

**Operator’s Manual**

This Operator’s Manual describes all models and all standard and optional equipment available for your vehicle at the time of this Operator’s Manual going to press. Country-specific differences are possible. Note that your vehicle may not be...
equipped with all features described. This is also the case for systems and functions relevant to safety. Therefore, the equipment on your vehicle may differ from that in the descriptions and illustrations.

The original purchase agreement for your vehicle contains a list of all of the systems in your vehicle.

Should you have any questions concerning equipment and operation, please consult an authorized Mercedes-Benz Center.

The Operator’s Manual and Maintenance Booklet are important documents and should be kept in the vehicle.

Service and vehicle operation

Vehicle operation outside the USA or Canada

When you are abroad with your vehicle, observe the following points:

- service points or replacement parts may not be available immediately.
- unleaded fuel may not be available for vehicles with a catalytic converter. Leaded fuel may cause damage to the catalytic converter.
- the fuel may have an extremely low octane number. Unsuitable fuel can cause engine damage.

Some Mercedes-Benz models are available in Europe through our European Delivery Program. For more information, please consult an authorized Mercedes-Benz service center, or write to one of the following address:

in the USA:
Mercedes-Benz USA, LLC
European Delivery Department
One Mercedes-Benz Drive
Sandy Springs, GA 30328

in Canada:
Mercedes-Benz Canada, Inc.
European Delivery Department
98 Vanderhoof Avenue
Toronto, Ontario M4G 4C9

Maintenance

Your customer advisor confirms the service in the service report.

Roadside Assistance

The Mercedes-Benz Roadside Assistance Program offers technical help in the case of a breakdown. Your calls to the toll-free Roadside Assistance Hotline are answered by our agents 24 hours a day, 365 days a year.

1-800-FOR-MERcedes (1-800-367-6372) (USA)
1-800-387-0100 (Canada)

You can find further information in the Mercedes-Benz Roadside Assistance Program brochure (USA) or the "Roadside Assistance" section in the maintenance and warranty information booklet (Canada). You will find both in the vehicle document wallet.

Change of address or change of ownership

In the event of a change of address, please send us the "Notification of address change" in the
Service and Guarantee booklet or simply call the Mercedes-Benz Customer Assistance Center (USA) on the hotline number 1-800-FOR-MERcedes (1-800-367-6372) or Customer Service (Canada) on 1-800-387-0100. We can then reach you in a timely fashion, if necessary.

If you sell your Mercedes, please leave all literature in the vehicle so that it is available to the next owner. If you have purchased a used vehicle, please send us the "Notice of Purchase of Used Car" in the Service and Guarantee booklet or simply call the Mercedes-Benz Customer Assistance Center (USA) at the hotline number 1-800-FOR-MERcedes (1-800-367-6372) or Customer Service (Canada) at 1-800-387-0100.

Operating safety

⚠️ WARNING Risk of accident due to malfunctions or system failures

If you do not have the prescribed service/maintenance work or any required repairs carried out, this could result in malfunctions or system failures.

- Always have the prescribed service/maintenance work as well any required repairs carried out at a qualified specialist workshop.

⚠️ WARNING Risk of accident or injury due to incorrect modification of electronic components and parts

Modification to electronic components, their software or wiring could impair their function and/or the function of other networked component parts. In particular, systems relevant to safety could also be affected.

As a result, these may no longer function properly and/or jeopardize the operating safety of the vehicle.

- Never tamper with the vehicle’s wiring, electronic components or software.
- You should have all work on electrical and electronic components carried out at a qualified specialist workshop.

⚠️ WARNING Risk of fire due to flammable materials on hot parts of the exhaust system

Flammable material such as leaves, grass or twigs may ignite if they come into contact with hot parts of the exhaust system.

- When driving on unpaved roads or off-road, regularly check the vehicle underside.
- Remove trapped plants or other flammable material.
- If there is damage, consult a qualified specialist workshop immediately.

⚠️ NOTE Damage to the vehicle

In the following situations, in particular, there is a risk of damage to the vehicle:

- The vehicle becomes grounded, e.g. on a high curb or an unpaved road
• The vehicle is driven too fast over an obstacle, e.g. a curb, speed bump or pot‐hole
• A heavy object strikes the underbody or chassis components

In situations such as this, the body, the underbody, chassis components, wheels or tires could be damaged without the damage being visible. Components damaged in this way can unexpectedly fail or, in the case of an accident, may not absorb the loads that arise as intended.

If the underbody paneling is damaged, flammable materials such as leaves, grass or twigs can collect between the underbody and the underbody paneling. These materials may ignite if they come into contact with hot parts on the exhaust system.

▶ Have the vehicle checked and repaired immediately at a qualified specialist workshop.

▶ If driving safety is impaired while continuing your journey, pull over and stop the vehicle immediately in accordance with the traffic conditions, and contact a qualified specialist workshop.

Vehicles with a 48 V on-board electrical system (EQ Boost technology)

▶ Never touch damaged component parts of high-voltage components.
▶ Never touch component parts of high-voltage components after an accident.

Vehicles with a 48 V on-board electrical system contain high voltage components. These components are marked with a high voltage label:

▶ All work on high voltage components must be carried out at a qualified specialist workshop.

▶ Never perform modifications to component parts of high-voltage components.
Declaration of conformity for wireless vehicle components

USA: "The wireless devices of this vehicle comply with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1) These devices may not cause harmful interference, and 2) These devices must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment."

Canada: "The wireless devices of this vehicle comply with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) These devices may not cause interference, and (2) These devices must accept any interference, including interference that may cause undesired operation of the device."

USA: "Wireless charging system for mobile devices (Model: D-WMI2015A): this device complies with Part 18 of the FCC Rules."

Diagnostics connection

The diagnostics connection is only intended for the connection of diagnostic devices at a qualified specialist workshop.

⚠️ WARNING Risk of accident due to connecting devices to the diagnostics connection

If you connect equipment to a diagnostics connection in the vehicle, it may affect the operation of vehicle systems. As a result, the operating safety of the vehicle could be affected.

- Only connect equipment to a diagnostics connection in the vehicle which is approved for your vehicle by Mercedes-Benz.

⚠️ WARNING Risk of accident due to objects in the driver’s footwell

Objects in the driver's footwell may impede pedal travel or block a depressed pedal. This jeopardizes the operating and road safety of the vehicle.

- Stow all objects in the vehicle securely so that they cannot get into the driver's footwell.
- Always install the floor mats securely and as prescribed in order to ensure that there is always sufficient room for the pedals.
- Do not use loose floor mats and do not place floor mats on top of one another.
NOTE Battery discharging from using devices connected to the diagnostics connection

Using devices at the diagnostics connection drains the battery.
- Check the charge level of the battery.
- If the charge level is low, charge the battery, e.g. by driving a considerable distance.

Connecting equipment to the diagnostics connection can lead to emissions monitoring information being reset, for example. This may lead to the vehicle failing to meet the requirements of the next emissions inspection during the main inspection.

Qualified specialist workshop
An authorized Mercedes-Benz Center is a qualified specialist workshop. It has the necessary special skills, tools and qualifications to correctly carry out the work required on your vehicle. This particularly applies to safety-relevant works.

For the following, always have your vehicle checked at an authorized Mercedes-Benz Center:
- safety-relevant works
- service and maintenance work
- repair work
- modifications as well as installations and conversions
- work on electronic components

Mercedes-AMG recommends a Mercedes-Benz service center.

Correct use of the vehicle
If you remove any warning stickers, you or others could fail to recognize certain dangers. Leave warning stickers in position.

When using the vehicle, observe the following information:
- the safety notes in this manual

- technical data for the vehicle
- traffic rules and regulations
- laws and safety standards pertaining to motor vehicles

Information on the REACH regulation
The REACH Regulation (Regulation (EC) No. 1907/2006, Article 33) stipulates an information obligation for substances of very high concern (SVHC).

Daimler AG is acting to the best of its knowledge to avoid the use and application of these SVHCs and to enable the customer to handle these substances safely. According to supplier information and internal product information of Daimler AG, SVHCs are known which are more than 0.1 percent by weight in individual products of this vehicle.

Further information can be found at:
- http://www.daimler.com/reach
Problems with your vehicle

If you should experience a problem with your vehicle, particularly one that you believe may affect its safe operation, we urge you to contact an authorized Mercedes-Benz Center immediately to have the problem diagnosed and rectified. If the problem is not resolved to your satisfaction, please discuss the problem again with an authorized Mercedes-Benz Center or, if necessary, contact us at one of the following addresses:

In the USA:
Mercedes-Benz USA, LLC
Customer Assistance Center
One Mercedes-Benz Drive
Sandy Springs, GA 30328

In Canada:
Mercedes-Benz Canada, Inc.
Customer Relations Department
98 Vanderhoof Avenue
Toronto, Ontario M4G 4C9

Reporting safety defects

USA only:
The following text is published as required of manufacturers under Title 49, Code of U.S. Federal Regulations, Part 575 pursuant to the "National Traffic and Motor Vehicle Safety Act of 1966".

If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying Mercedes-Benz USA, LLC.

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or Mercedes-Benz USA, LLC.

To contact NHTSA, you may call the Vehicle Safety Hotline toll-free at 1-888-327-4236 (TTY: 1-800-424-9153) (inside the USA); go to http://www.safercar.gov; or write to: Administrator, NHTSA, 400 Seventh Street, SW., Washington, DC 20590, USA.

Further information on vehicle safety can be found at: http://www.safercar.gov

Limited Warranty

NOTE Damage to the vehicle arising from violation of these operating instructions.

Damage to the vehicle can arise from violation of these operating instructions. This damage is not covered either by the Mercedes-Benz implied warranty or by the New- or Used-Vehicle Warranty.

Follow the instructions in these operating instructions on proper operation of your vehicle as well as on possible vehicle damage.

26  General notes
QR code for rescue card

The QR code is secured in the fuel filler flap and on the opposite side on the B-pillar. In the event of an accident, rescue services can use the QR code to quickly find the appropriate rescue card for your vehicle. The current rescue card contains the most important information about your vehicle in a compact form, e.g. the routing of the electric lines.

Further information can be obtained at http://www.mercedes-benz.de/qr-code.

Data storage

Electronic control units

Electronic control units are installed in your vehicle. Some of these are necessary for the safe operation of your vehicle, while some assist you when driving (driver assistance systems). In addition, your vehicle provides comfort and entertainment functions, which are also made possible by electronic control units.

Electronic control units contain data memories which can temporarily or permanently store technical information about the vehicle's operating state, component loads, maintenance requirements and technical events or malfunctions.

In general, this information documents the state of a component part, a module, a system or the surroundings such as:

- operating states of system components (e.g. fluid levels, battery status, tire pressure)
- status messages concerning the vehicle or its individual components (e.g. number of wheel revolutions/speed, longitudinal acceleration, lateral acceleration, display of fastened seat belts)
- malfunctions or defects in important system components (e.g. lights, brakes)
- information on events leading to vehicle damage
- system reactions in special driving situations (e.g. airbag deployment, intervention of stability control systems)
- ambient conditions (e.g. temperature, rain sensor)

In addition to providing the actual control unit function, this data assists the manufacturer in detecting and rectifying malfunctions and optimizing vehicle functions. The majority of this data is temporary and is only processed in the vehicle itself. Only a small portion of the data is stored in the event or malfunction memory.

When your vehicle is serviced, technical data from the vehicle can be read out by service network employees (e.g. workshops, manufacturers) or third parties (e.g. breakdown services). Services include repair services, maintenance processes, warranty claims and quality assurance measures, for example. The read out is performed via the legally prescribed port for the diagnostics connection in the vehicle. The respective service network locations or third parties collect, process and use the data. They document technical statuses of the vehicle, assist in finding malfunctions and improving quality and are transmitted to the manufacturer, if necessary. Furthermore, the manufacturer is subject to product liability. For this, the manufacturer requires technical data from vehicles.
Malfunction memories in the vehicle can be reset by a service outlet as part of repair or maintenance work.

Depending on the selected equipment, you can import data into vehicle convenience and information functions yourself.

This includes, for example:

- multimedia data such as music, films or photos for playback in an integrated multimedia system
- address book data for use in connection with an integrated hands-free system or an integrated navigation system
- entered navigation destinations
- data about the use of Internet services

This data can be saved locally in the vehicle or it is located on a device which you have connected to the vehicle (e.g. smartphone, USB flash drive or MP3 player). If this data is stored in the vehicle, you can delete it at any time. This data is sent to third parties only at your request, particularly when you use online services in accordance with the settings that you have selected.

You can store or change convenience settings/individualization in the vehicle at any time.

Depending on the equipment, this includes, for example:

- settings for the seat and steering wheel positions
- suspension and climate control settings
- customizations such as interior lighting

If your vehicle is accordingly equipped, you can connect your smartphone or another mobile end device to the vehicle. You can control this by means of the control elements integrated in the vehicle. Images and audio from the smartphone can be output via the multimedia system. Certain information is simultaneously transferred to your smartphone.

Depending on the type of integration, this can include:

- general vehicle data
- position data

This allows you to use selected apps on your smartphone, such as navigation or music playback. There is no further interaction between the smartphone and the vehicle; in particular, vehicle data is not directly accessible. Which type of further data processing occurs is determined by the provider of the specific app used. Which settings you can make, if any, depends on the specific app and the operating system of your smartphone.

**Online services**

**Wireless network connection**

If your vehicle has a wireless network connection, it enables data to be exchanged between your vehicle and additional systems. The wireless network connection is enabled via the vehicle’s transmission and reception unit or via connected mobile end devices (e.g. smartphones). Online functions can be used via the wireless network connection. This includes online services and applications/apps provided by the manufacturer or other providers.

**Manufacturer’s services**

Regarding online services of the manufacturer, the individual functions are described by the
manufacturer in a suitable place (e.g. Operator's Manual, website of the manufacturer) along with the relevant data protection information. Personal data may be used for the provision of online services. Data is exchanged via a secure connection, e.g. the manufacturer's designated IT systems. Personal data is collected, processed and used via the provision of services exclusively on the basis of legal permissions or with prior consent.

The services and functions (sometimes subject to a fee) can usually be activated or deactivated. In some cases, this also applies to the entire vehicle's data connection. This excludes, in particular, legally prescribed functions and services.

**Third party services**

If it is possible to use online services from other providers, these services are subject to the data protection and terms of use of the responsible provider. The manufacturer has no influence on the content exchanged.

Please inquire, therefore, about the type, scope and purpose of the collection and use of personal data as part of third party services from their respective provider.

**COMAND/mbrace**

If the vehicle is equipped with COMAND or mbrace, additional data about the vehicle's operation, the use of the vehicle in certain situations, and the location of the vehicle may be compiled through COMAND or the mbrace system.

For additional information please refer to the chapter Multimedia system and/or the mbrace Terms and Conditions.

**Event data recorders**

USA only:

This vehicle is equipped with an event data recorder (EDR). The main purpose of an EDR is to record, in certain crash or near crash-like situations, such as an airbag deployment or hitting a road obstacle, data that will assist in understanding how a vehicle's systems performed. The EDR is designed to record data related to vehicle dynamics and safety systems for a short period of time, typically 30 seconds or less.

The EDR in this vehicle is designed to record such data as:

- How various systems in your vehicle were operating
- Whether or not the driver and front passenger seat belts were buckled/fastened
- How far (if at all) the driver was depressing the accelerator and/or brake pedal and
- How fast the vehicle was traveling

This data can help provide a better understanding of the circumstances in which accidents and injuries occur. NOTE: EDR data is recorded by your vehicle only if a non-trivial crash situation occurs; no data is recorded by the EDR under normal driving conditions and no personal data (e.g. name, gender, age and accident location) is recorded. However, other parties, such as law enforcement, could combine EDR data with the type of personally identifying data routinely acquired during a crash investigation.
Access to the vehicle and/or the EDR is needed to read data that is recorded by the EDR, and special equipment is required. In addition to the vehicle manufacturer, other parties that have the special equipment, such as law enforcement, can read the information by accessing the vehicle or the EDR.

EDR data may be used in civil and criminal matters as a tool in accident reconstruction, accident claims and vehicle safety. Since the Crash Data Retrieval (CDR) tool that is used to extract data from the EDR is commercially available, Mercedes-Benz USA, LLC ("MBUSA") expressly disclaims any and all liability arising from the extraction of this information by unauthorized Mercedes-Benz personnel.

MBUSA will not share EDR data with others without the consent of the vehicle owner or, if the vehicle is leased, without the consent of the lessee. Exceptions to this representation include responses to subpoenas by law enforcement; by federal, state or local government; in connection with or arising out of litigation involving MBUSA or its subsidiaries and affiliates; or, as required by law.

Warning: the EDR is a component of the Restraint System Module. Tampering with, altering, modifying or removing the EDR component may result in a malfunction of the Restraint System Module and other systems. State laws or regulations regarding EDRs that conflict with federal regulation are pre-empted. This means that in the event of such conflict, the federal regulation governs. As of February 2013, 13 states have enacted laws relating to EDRs.

Copyright

Restraint system

Protection provided by the restraint system

The restraint system comprises the following components:

- Seat belt system
- Airbags
- Child restraint system
- Child seat securing systems

The restraint system can reduce the risk of vehicle occupants coming into contact with parts of the vehicle's interior in the event of an accident. The restraint system can also reduce the forces to which vehicle occupants are subjected in the event of an accident.

Only a seat belt which is worn correctly can provide the intended level of protection. Depending on the detected accident situation, Emergency Tensioning Devices and/or airbags supplement a correctly worn seat belt. Emergency Tensioning Devices and/or airbags are not deployed in every accident.

For the restraint system to provide its full protection, each occupant must observe the following:

- Fasten the seat belt correctly.
- Be in an almost upright position with their back against the seat backrest.
- Sit with their feet resting on the floor, if possible.
- Always secure persons under 5 ft (1.50 m) tall in an additional restraint system suitable for Mercedes-Benz vehicles.

However, no system available today can completely eliminate injuries and fatalities in every accident situation. In particular, the seat belt and airbag generally do not protect against objects penetrating the vehicle from the outside. The risk of an injury resulting from airbag deployment also cannot be ruled out entirely.

Reduced restraint system protection

⚠️ WARNING Risk of injury or death from modifications to the restraint system

The restraint system can no longer function correctly after alterations have been made. The restraint system may then not protect the vehicle occupants as intended by failing in an accident or triggering unexpectedly, for example

- Never alter the parts of the restraint system.
- Never tamper with the wiring or any electronic component parts or their software.

If it is necessary to modify the vehicle to accommodate a person with disabilities, contact an authorized Mercedes-Benz Center for details.

USA only: for details, contact our Customer Assistance Center on 1-800-FOR-MERCEdes (1-800-367-6372).
Restraint system functionality

When the ignition is switched on, a self-test is performed, during which the restraint system warning lamp lights up. It goes out no later than a few seconds after the vehicle is started. The components of the restraint system are then functional.

Malfunctioning restraint system

A malfunction has occurred in the restraint system if:

- the restraint system warning lamp does not light up when the ignition is switched on
- the restraint system warning lamp lights up continuously or repeatedly during a journey

⚠️ WARNING Risk of injury or fatal injury due to a malfunction in the restraint system

If the restraint system is malfunctioning, restraint system components may be triggered unintentionally or might not be triggered at all in the event of an accident. This may affect the Emergency Tensioning Device or airbag, for example.

- Have the restraint system checked and repaired immediately at a qualified specialist workshop.

Function of the restraint system in an accident

How the restraint system works is determined by the severity of the impact detected and the type of accident anticipated:

- Frontal impact
- Rear impact
- Side impact
- Rollover

The activation thresholds for the components of the restraint system are determined based on the evaluation of the sensor values measured at various points in the vehicle. This process is preemptive in nature. The triggering/deployment of the components of the restraint system must take place in good time at the start of the collision.

Factors which can only be seen and measured after a collision has occurred do not play a decisive role in the deployment of an airbag. Nor do they provide an indication of airbag deployment. The vehicle may be deformed significantly without an airbag being deployed. This is the case if only parts which are relatively easily deformed are affected and the rate of vehicle deceleration is not high. Conversely, an airbag may be deployed even though the vehicle suffers only minor deformation. If very rigid vehicle parts such as longitudinal members are hit, for example, this may result in sufficiently high levels of vehicle deceleration.
The components of the restraint system can be activated or deployed independently of each other:

<table>
<thead>
<tr>
<th>Component</th>
<th>Detected deployment situation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergency Tensioning Devices</td>
<td>Frontal impact, rear impact, side impact, rollover</td>
</tr>
<tr>
<td>Driver’s airbag, front passenger front airbag</td>
<td>Frontal impact</td>
</tr>
<tr>
<td>Knee airbag</td>
<td>Frontal impact</td>

<tr>
<td>Side airbag</td>
<td>Side impact</td>
</tr>
<tr>
<td>Window curtain airbag</td>
<td>Side impact, rollover, frontal impact</td>
</tr>
<tr>
<td>PRE-SAFE® Impulse Side</td>
<td>Side impact</td>
</tr>
</tbody>
</table>

The front passenger front airbag can only be deployed in an accident if the PASSENGER AIR BAG OFF indicator lamp is off. If the front passenger seat is occupied, make sure, both before and during the journey, that the status of the front passenger front airbag is correct (→ page 44).

**WARNING** Risk of burns from hot air bag components

The air bag parts are hot after an air bag has been deployed.
- Do not touch the air bag parts.
- Have a deployed air bag replaced at a qualified specialist workshop as soon as possible.

Mercedes-Benz recommends that you have the vehicle towed to a qualified specialist workshop after an accident. Take this into account, particularly if an Emergency Tensioning Device is triggered or an airbag deployed.

If the Emergency Tensioning Devices are triggered or an airbag is deployed, you will hear a bang, and a small amount of powder may also be released:
- The bang will not generally affect your hearing.
- In general, the powder released is not hazardous to health but may cause short-term breathing difficulties to persons suffering from asthma or other pulmonary conditions. Provided it is safe to do so, leave the vehicle immediately or open the window in order to prevent breathing difficulties.

Airbags and pyrotechnic Emergency Tensioning Devices contain perchlorate material, which may require special handling or environmental protection measures. National guidelines regarding waste disposal must be observed. In California, see http://www.dtsc.ca.gov/HazardousWaste/Perchlorate/index.cfm.
Seat belts
Protection provided by the seat belt

Always fasten your seat belt correctly before starting a journey. A seat belt can only provide the best level of protection if it is worn correctly.

**WARNING** Risk of injury or death due to incorrectly fastened seat belt

If the seat belt is not worn correctly, it cannot perform its intended protective function. In addition, an incorrectly fastened seat belt can also cause injuries, for example, in the event of an accident or when braking or changing direction suddenly.

- Always ensure that all vehicle occupants have their seat belts fastened correctly and are sitting properly.

In order for the correctly worn seat belt to provide the intended level of protection, each vehicle occupant must observe the following information:

- The seat belt must not be twisted and must fit tightly and snugly across the body.
- The seat belt must be routed across the center of the shoulder and as low down across the hips as possible.
- The shoulder section of the seat belt should not touch your neck nor be routed under your arm or behind your back.
- Avoid wearing bulky clothing, e.g. a winter coat.
- Push the lap belt down as far as possible across your hips and pull tight with the shoulder section of the belt. Never route the lap belt across your abdomen.
- Never route the seat belt across sharp, pointed, abrasive or fragile objects.
- Only one person should use each seat belt at any one time. Never allow babies and children to travel sitting on the lap of another vehicle occupant.

- Never secure objects with a seat belt if the seat belt is also being used by one of the vehicle’s occupants. Always observe the instructions for loading the vehicle when securing objects, luggage or loads (→ page 98). Also ensure that no objects, e.g. a cushion, are ever placed between a person and the seat.

The seat belts on the following seats are equipped with a special seatbelt retractor:

- Front passenger seat
- Rear seats

Activate or deactivate the special seatbelt retractor (→ page 53).

If children are traveling in the vehicle, be sure to observe the instructions and safety notes on "Children in the vehicle" (→ page 49).
Reduced seat belt protection

WARNING Risk of injury or death due to incorrect seat position

The seat belt does not offer the intended level of protection if you have not moved the seat backrest to an almost vertical position. When braking or in the event of an accident, you could slide underneath the seat belt and sustain abdominal or neck injuries, for example.

- Adjust the seat properly before beginning your journey.
- Always ensure that the seat backrest is in an almost vertical position and that the shoulder section of your seat belt is routed across the center of your shoulder.

WARNING Risk of injury or death when additional restraint systems are not used for persons with a smaller build

Persons under 5 ft (1.50 m) tall cannot wear the seat belt correctly without a suitable additional restraint system. If the seat belt is not worn correctly, it cannot perform its intended protective function. In addition, an incorrectly fastened seat belt can also cause injuries, for example, in the event of an accident or when braking or changing direction suddenly.

- Always secure persons under 5 ft (1.50 m) tall in a suitable restraint system.

WARNING Danger of injury or death due to blocked seat belt anchorages

The restraint effect of the seat belt is impaired if objects between the front seat and the door are blocking the movable seat belt anchorage on the front seat.

The seat belt may not then provide the proper protection.

- Before starting a journey, make sure that there are no objects between the front seat and the door.

WARNING Risk of injury or death due to damaged or modified seat belts

Seat belts cannot provide protection in the following situations:

- If the seat belts are damaged, modified, extremely dirty, bleached or dyed
- If the seat belt buckle is damaged or extremely dirty
- If the Emergency Tensioning Devices, seat belt anchorages or seat belt retractors have been modified

Seat belts may be damaged in an accident, although the damage may not be visible, e.g. due to splinters of glass.

Modified or damaged seat belts may tear or fail, e.g. in an accident.
Modified Emergency Tensioning Devices can accidentally trigger or fail to function as intended.

- Never modify the seat belts, Emergency Tensioning Devices, seat belt anchorages or seat belt retractors.
- Make sure that the seat belts are undamaged, not worn and clean.
- Always have the seat belts checked immediately after an accident at a qualified specialist workshop.

Only use seat belts which have been approved for your vehicle by Mercedes-Benz.

The AMG sport seat and the AMG Performance seat are designed for the standard three-point seat belt. If you install a different multipoint seat belt, e.g. sport or racing seat belts, the restraint system cannot provide the intended level of protection.

Depending on the type of seat, there may be openings in the seat backrest. These openings have no function.

**WARNING** Risk of injury or fatal injury due to modified seat belt systems

If you feed seat belts through the opening in the seat backrest, the seat backrest may be damaged or may even break in the event of an accident.

- Only use the standard three-point seat belt.
- Never modify the seat belt system.

**WARNING** Risk of injury or death from deployed pyrotechnic Emergency Tensioning Devices

Pyrotechnic Emergency Tensioning Devices that have been deployed are no longer operational and are unable to perform their intended protective function.

- Therefore, have deployed pyrotechnic Emergency Tensioning Devices immediately replaced at a qualified specialist workshop.

Mercedes-Benz recommends that you have the vehicle towed to a qualified specialist workshop after an accident.

**NOTE** Damage caused by trapping the seat belt

If an unused seat belt is not fully retracted, it may become trapped in the door or in the seat mechanism.

- Always ensure that an unused seat belt is fully retracted.

**Fastening and adjusting the seat belts**

If the seat belt is pulled quickly or sharply, the seat belt retractor locks. The seat belt strap cannot be pulled out any further.
Always engage seat belt tongue 2 of the seat belt into seat belt buckle 1 of the corresponding seat.

Press and hold the seat belt outlet release and slide seat belt outlet 3 into the desired position.

Let go of the seat belt outlet release and ensure that seat belt outlet 3 locks into position.

Vehicles with automatic front passenger front airbag shutoff:

**NOTE** Deployment of the Emergency Tensioning Device and side airbag when the front passenger seat is unoccupied

If the seat belt tongue is engaged in the seat belt buckle of the unoccupied front passenger seat, the Emergency Tensioning Device and the side airbag may also deploy in the event of an accident along with other systems.

Only one person should use each seat belt at any one time.

Vehicles without automatic front passenger front airbag shutoff:

**NOTE** Deployment of the Emergency Tensioning Device when the front passenger seat is unoccupied

If the seat belt tongue is engaged in the seat belt buckle of the unoccupied front passenger seat, the Emergency Tensioning Device may also deploy in the event of an accident along with other systems.

Only one person should use each seat belt at any one time.

**Seat belt adjustment function**

**Vehicles with PRE-SAFE®:** If the front seat belt is not pulled tight across your body, the seat belt adjustment may automatically apply a certain tightening force. Do not hold the seat belt tightly while it is adjusting.

You can activate and deactivate the seat belt adjustment function using the multimedia system (→ page 39).

**Releasing seat belts**

Press the release button in the seat belt buckle and guide the seat belt back with the seat belt tongue.
Activating/deactivating seat belt adjustment via the multimedia system

Multimedia system:

Vehicle ➤ Vehicle Settings ➤ Belt Adjustment

 Activate ✔ or deactivate ☐ the function.

Seat belt warning function for the driver and front passenger

The seat belt warning lamp in the Instrument Display is a reminder that all vehicle occupants must wear their seat belts correctly. The seat belt warning lamp lights up for six seconds every time the vehicle is started. In addition, a warning tone may sound.

When the driver’s and front passenger’s doors are closed and the driver and front passenger have fastened their seat belts, the seat belt warning goes out.

In the following cases, the seat belt warning lights up during a journey if:

- The vehicle speed exceeds 15 mph (25 km/h) and the driver’s or front passenger seat belt is not fastened.
- The driver or front passenger unfastens their seat belt while the vehicle is in motion.

Airbags

Overview of airbags

In the following cases, the seat belt warning lights up during a journey if:

1. Driver’s knee bag
2. Driver’s airbag
3. Front passenger front airbag
4. Front passenger knee airbag
5. Window curtain airbag
6. Side airbag

The installation location of an airbag is identified by the AIRBAG symbol. When enabled, an airbag can provide additional protection for the respective vehicle occupant.

Potential protection from each airbag:

<table>
<thead>
<tr>
<th>Airbag</th>
<th>Potential protection for:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Knee airbag</td>
<td>Thigh, knee and lower leg</td>
</tr>
<tr>
<td>Driver’s airbag, front passenger front airbag</td>
<td>Head and ribcage</td>
</tr>
<tr>
<td>Window curtain airbag</td>
<td>Head</td>
</tr>
<tr>
<td>Side airbag</td>
<td>Ribcage, also pelvis(^\text{1}) for front seat occupants</td>
</tr>
</tbody>
</table>
AMG Performance seat: potential protection for the ribcage.

The front passenger front airbag can only be deployed in an accident if the PASSENGER AIR BAG OFF indicator lamp is off. If the front passenger seat is occupied, make sure, both before and during the journey, that the status of the front passenger front airbag is correct (→ page 44).

**NOTE** Important points to remember if the front passenger seat is unoccupied

In an accident, the components of the restraint system may deploy unnecessarily on the front passenger side if:
- There are heavy objects on the front passenger seat.
- The seat belt tongue is engaged in the seat belt buckle of the front passenger seat and the front passenger seat is unoccupied.
- Stow objects in a suitable place.

**Protection by the airbags**

Depending on the accident situation, an airbag may supplement the protection offered by a correctly fastened seat belt.

**WARNING** Risk of injury or death due to incorrect seat position

If you deviate from the correct seat position, the airbag cannot perform its intended protective function and deployment may even cause further injuries. To avoid hazardous situations, always make sure that all vehicle occupants:
- Have their seat belt fastened correctly, including pregnant women.
- Are seated properly and that distance to the air bags is as large as possible.
- Observe the following information.

Only one person should use each seat belt at any one time.

Always make sure that there are no objects between the air bag and the vehicle occupant.

To avoid the risks resulting from the deployment of an airbag, each vehicle occupant must observe the following information:
- Before starting your journey, adjust your seat correctly; the driver's seat and front passenger seat should be moved as far back as possible.

When doing so, always observe the information on the correct driver's seat position (→ page 86).
- Only hold the steering wheel by the steering wheel rim. This allows the airbag to be fully deployed.
- Always lean against the seat backrest when the vehicle is in motion. Do not lean forwards or against the door or side window. You may otherwise be in the deployment area of the airbags.
- Always keep your feet on the floor. Do not put your feet on the cockpit, for example.
Your feet may otherwise be in the deployment area of the airbag.
- If children are traveling in the vehicle, observe the additional notes (→ page 49).
- Always stow and secure objects correctly.

Objects in the vehicle interior may prevent an airbag from functioning correctly. Each vehicle occupant must always make sure of the following:
- There are no people, animals or objects between the vehicle occupants and an airbag.
- There are no objects between the seat, door and door pillar (B-pillar).
- There are no hard objects, e.g. coat hangers, hanging on the grab handles or coat hooks.
- There are no accessory parts, such as PNDs (Personal Navigation Devices), mobile phones or cup holders attached to the vehicle within the deployment area of an airbag, e.g. on the cockpit, on doors, side windows or side paneling.

In addition, no connecting cable, tensioning strap or retaining strap may be routed through or attached in the deployment area of an airbag. Always observe the accessory manufacturer’s installation instructions, in particular the information on suitable places for installation.
- There are no heavy, sharp-edged or fragile objects in the pockets of your clothing. Store such objects in a suitable place.

Limited protection from airbags

**WARNING** Risk of injury due to modifications to the airbag cover

If you modify the cover of an airbag or affix objects such as stickers to it, the airbag may no longer function correctly.
- Never modify the cover of an airbag and do not affix objects to it.

The installation location of an airbag is identified by the AIRBAG symbol (→ page 39).

**WARNING** Risk of injury due to the use of unsuitable seat covers

Unsuitable seat covers can obstruct or prevent the deployment of airbags integrated into the seats. Consequently, the airbags cannot protect vehicle occupants as they are designed to do. In addition, operation of the automatic front passenger airbag shutoff may be restricted.
- You should only use seat covers that have been approved for the corresponding seats by Mercedes-Benz.

**WARNING** Risk of injury due to malfunction of the sensors in the door paneling

Sensors to control the airbags are located in the doors. Modifications or work not performed correctly to the doors or door paneling, as well as damaged doors, can lead to the function of the sensors being impaired. The airbags might therefore not function properly any more.
Consequently, the airbags cannot protect vehicle occupants as they are designed to do.

- Never modify the doors or parts of the doors.
- Always have work on the doors or door paneling carried out at a qualified specialist workshop.

<table>
<thead>
<tr>
<th>WARNING</th>
<th>Risk of injury due to deployed airbag</th>
</tr>
</thead>
<tbody>
<tr>
<td>A deployed airbag no longer has a protective function and cannot protect as intended in the event of an accident.</td>

<td>Have the vehicle towed to a qualified specialist workshop in order to have the deployed airbag replaced.</td>
<td></td>
</tr>
</tbody>
</table>

Have deployed airbags replaced immediately.

### Status of the front passenger front airbag

#### Function of the automatic front passenger front airbag shutoff

The automatic front passenger front airbag shutoff is able to detect whether the front passenger seat is occupied by a person or a child restraint system. The front passenger front airbag and front passenger knee bag are then accordingly either enabled or deactivated.

When installing a child restraint system on the front passenger seat, always make sure of the following:

- Ensure that the child restraint system is positioned correctly (→ page 48).
- Always observe the child restraint system manufacturer's installation instructions.
- Never place objects, e.g. cushions, under or behind the child restraint system.
- Fully retract the seat cushion length adjustment.
- The entire base of the child restraint system must always rest on the seat cushion of the front passenger seat.

- The backrest of the forward-facing child restraint system must lie as flat as possible against the backrest of the front passenger seat.
- The child restraint system must not touch the roof or be put under strain by the head restraints. Adjust the seat backrest inclination and the head restraint setting accordingly.

### WARNING | Risk of injury or death due to objects between the sitting surface and the child restraint system

Objects between the sitting surface and the child restraint system could affect the function of the automatic front passenger airbag shutoff.

This could result in the front passenger airbag not functioning as intended during an accident.

- Do not place any objects between the sitting surface and the child restraint system.
The entire base of the child restraint system must always rest on the sitting surface of the front passenger seat.

The backrest of the forward-facing child restraint system must, as far as possible, be resting on the seat backrest of the front passenger seat.

Always comply with the child restraint system manufacturer’s installation instructions.

A person on the front passenger seat must observe the following information:

- Fasten seat belts correctly (→ page 35).
- Sit in an almost upright seat position with their back against the seat backrest.
- Sit with their feet resting on the floor, if possible.

The front passenger front airbag may otherwise be deactivated by mistake, for example in the following situations:

- The front passenger transfers their weight by supporting themselves on a vehicle armrest.
- The front passenger sits in such a way that their weight is raised from the sitting surface.

**WARNING Risk of injury or death due to deactivated front passenger airbag**

If the PASSENGER AIR BAG OFF indicator lamp is lit, the front passenger airbag is disabled. It will not be deployed in the event of an accident and cannot perform its intended protective function.

A person in the front passenger seat could then, for example, come into contact with the vehicle interior, especially if the person is sitting too close to the cockpit.

If the front passenger seat is occupied, always ensure that:

- The classification of the person in the front passenger seat is correct and the front passenger airbag is enabled or disabled in accordance with the person in the front passenger seat.
- The front passenger seat has been moved as far back as possible.
- The person is seated correctly.

Ensure, both before and during the journey, that the status of the front passenger airbag is correct.

If the front passenger seat is occupied, the classification of the person or child restraint system on the front passenger seat takes place after the front passenger front airbag shutoff self-test.

The PASSENGER AIR BAG indicator lamps display the status of the front passenger front airbag.

Always observe the notes on the function of the PASSENGER AIR BAG indicator lamps (→ page 44).
Function of the PASSENGER AIR BAG indicator lamps

The status of the front passenger front airbag is displayed after the self-test:

- PASSENGER AIR BAG ON lights up for 60 seconds, subsequently both indicator lamps are off (PASSENGER AIR BAG ON and OFF): the front passenger front airbag is able to deploy in the event of an accident.
- PASSENGER AIR BAG OFF lights up continuously: the front passenger front airbag is disabled. It will then not be deployed in the event of an accident.

If the PASSENGER AIR BAG ON indicator lamp is off, only the PASSENGER AIR BAG OFF indicator lamp shows the status of the front passenger front airbag. The PASSENGER AIR BAG OFF indicator lamp may be lit continuously or be off.

If the PASSENGER AIR BAG OFF indicator lamp and the restraint system warning lamp light up simultaneously, the front passenger seat may not be used. Also in this case, do not install a child restraint system on the front passenger seat. Have the automatic front passenger front airbag shutoff checked and repaired immediately at a qualified specialist workshop.

Self-test of automatic front passenger front airbag shutoff

When the ignition is switched on, a self-test is performed during which the two PASSENGER AIR BAG ON and OFF indicator lamps light up simultaneously.

Status display

If the front passenger seat is occupied, ensure, both before and during the journey, that the status of the front passenger front airbag is correct for the current situation.

After installing a rearward-facing child restraint system on the front passenger seat: PASSENGER AIR BAG OFF must be lit continuously.

**WARNING** Risk of injury or death from using a rearward-facing child restraint system when the front passenger front airbag is enabled

If you secure a child in a rearward-facing child restraint system on the front passenger seat and the PASSENGER AIR BAG OFF indicator lamp is off, the front passenger airbag can deploy in the event of an accident. The child could be struck by the airbag. Always ensure that the front passenger airbag is deactivated. The PASSENGER AIR BAG OFF indicator lamp must be lit.
NEVER use a rearward-facing child restraint system on a seat protected by an ENABLED FRONT AIRBAG in front of it, DEATH or SERIOUS INJURY to the CHILD can occur.

When installing a child restraint system on the front passenger seat, observe the vehicle-specific information (→ page 59).

Depending on the child restraint system and the stature of the child, the PASSENGER AIR BAG OFF indicator lamp may be off. In this case, do not install the rearward-facing child restraint system on the front passenger seat.

Instead, install the rearward-facing child restraint system on a suitable rear seat.

After installing a forward-facing child restraint system on the front passenger seat: depending on the child restraint system and the stature of the child, PASSENGER AIR BAG OFF may be lit continuously or be off. Always observe the following information.

**WARNING** Risk of injury or death due to incorrect positioning of the forward-facing child restraint system

If you secure a child in a forward-facing child restraint system on the front passenger seat and you position the front passenger seat too close to the cockpit, in the event of an accident, the child could:

- Come into contact with the vehicle interior if the PASSENGER AIR BAG OFF indicator lamp is lit, for example.
- Be struck by the air bag if the PASSENGER AIR BAG OFF indicator lamp is off.

Always move the front passenger seat as far back as possible and fully retract the seat cushion length adjustment. Always make sure that the shoulder belt strap is correctly routed from the seat belt outlet on the vehicle to the shoulder belt guide on the child restraint system. The shoulder belt strap must be routed forwards and downwards from the vehicle belt outlet. If necessary, adjust the seat belt outlet and the front passenger seat accordingly.

Always observe the child restraint system manufacturer's installation instructions.

When installing a child restraint system on the front passenger seat, observe the vehicle-specific information (→ page 59).

**If a person is sitting on the front passenger seat:** PASSENGER AIR BAG OFF may be lit continuously or be off, depending on the person’s stature.

A person on the front passenger seat must always observe the following information:

- If the front passenger seat is occupied by an adult or a person with a stature corresponding to that of an adult, the PASSENGER AIR BAG OFF indicator lamp must be off. This indicates that the front passenger front airbag is enabled.

If the PASSENGER AIR BAG OFF indicator lamp is lit continuously, an adult or person with a build corresponding to that of an adult
should not use the front passenger seat. Instead, they should use a rear seat.

- If the front passenger seat is occupied by a person of smaller stature (e.g. a teenager or small adult), the PASSENGER AIR BAG OFF indicator lamp either lights up continuously or remains off, depending on the result of the classification.
  - If the PASSENGER AIR BAG OFF indicator lamp is off: move the front passenger seat as far back as possible, or the person of smaller stature should use a rear seat.
  - If the PASSENGER AIR BAG OFF indicator lamp is lit continuously: the person of smaller stature should not use the front passenger seat.

**WARNING**  Risk of injury or death when the PASSENGER AIR BAG OFF indicator lamp is lit

If the PASSENGER AIR BAG OFF indicator lamp remains lit after the system self-test, the front passenger air bag is deactivated. It will not be deployed in the event of an accident. In this case, the front passenger air bag cannot perform its intended protective function, e.g. when a person is seated in the front passenger seat. That person could, for example, come into contact with the vehicle interior, especially if the person is sitting too close to the cockpit.

If the front passenger seat is occupied, always ensure that:
- The classification of the person in the front passenger seat is correct and the front passenger air bag is enabled or deactivated in accordance with the person in the front passenger seat.
- The person is seated properly with a correctly fastened seat belt.
- The front passenger seat has been moved as far back as possible.

Be sure to also observe the following further related subjects:
- Child restraint system on the front passenger seat (→ page 59).

**PRE-SAFE® system**

**PRE-SAFE® (anticipatory occupant protection)**

PRE-SAFE® is able to detect certain critical driving situations and implement pre-emptive measures to protect the vehicle occupants.

PRE-SAFE® can implement the following measures independently of each other:
- Tightening the seat belts on the driver’s seat and front passenger seat.
- Closing the side windows.
- **Vehicles with sliding sunroof**: Closing the sliding sunroof.
- **Vehicles with memory function**: Moving the front passenger seat to a more favorable seat position.
- **Vehicles with multicontour seat:** Increasing the air pressure in the seat side bolsters of the seat backrest.
- **PRE-SAFE® Sound:** provided that the multimedia system is switched on, generates a brief noise signal to stimulate the innate protective mechanism of a person's hearing.

<table>
<thead>
<tr>
<th>NOTE</th>
<th>Damage caused by objects in the footwell or behind the seat</th>
</tr>
</thead>
<tbody>
<tr>
<td>The automatic adjustment of the seat position may result in damage to the seat and/or the object.</td>
<td></td>
</tr>
<tr>
<td>Stow objects in a suitable place.</td>
<td></td>
</tr>
</tbody>
</table>

**Reversing the PRE-SAFE® system measures**

If an accident did not occur, the pre-emptive measures that were taken are reversed.
You will need to perform certain settings yourself.

- If the seat belt pre-tensioning is not reduced, move the seat backrest back slightly. The locking mechanism releases.

**Function of PRE-SAFE® PLUS (anticipatory occupant protection plus)**

PRE-SAFE® PLUS can detect certain impacts, particularly an imminent rear impact, and take pre-emptive measures to protect the vehicle occupants. These measures cannot necessarily prevent an imminent impact.
PRE-SAFE® PLUS can implement the following measures independently of each other:
- Tightening the seat belts on the driver's seat and front passenger seat.
- Increasing brake pressure when the vehicle is stationary. This brake application is canceled automatically when the vehicle pulls away.

If an accident did not occur, the pre-emptive measures that were taken are reversed.

**System limitations**

The system will not initiate any action in the following situations:
- when backing up

The system will not initiate any braking application in the following situations:
- whilst driving
- when entering or exiting a parking space while using Active Parking Assist

**Information on PRE-SAFE® Impulse Side**

If an imminent side impact is detected, PRE-SAFE® Impulse Side can pre-emptively move the front seat vehicle occupant's upper body towards the center of the vehicle. It does this by rapidly inflating an air cushion in the outer seat side bolster of the seat backrest on the side on which the impact is anticipated. This increases the distance between the door and the vehicle occupant.
If PRE-SAFE® Impulse Side has been deployed or is faulty, the PRE-SAFE Impulse Side Inoperative message appears (→ page 429).

**Safely transporting children in the vehicle**

**Always observe when children are traveling in the vehicle**

1. Also strictly observe the safety notes for the specific situation. In this way you can recognize potential risks and avoid dangers if children are traveling in the vehicle (→ page 49).

**Be diligent**

Bear in mind that neglecting to secure a child in the child restraint system may have serious consequences. Always be diligent in securing a child carefully before every journey.

To improve protection for children younger than 12 years old or under 5 ft (1.50 m) in height, Mercedes-Benz recommends you observe the following information:

- Always secure the child in a child restraint system suitable for this Mercedes-Benz vehicle.
- The child restraint system must be appropriate to the age, weight and size of the child.
- The vehicle seat must be suitable for installing a child restraint system.

Accident statistics show that children secured in the rear seats are generally safer than children secured in the front seats. For this reason, Mercedes-Benz strongly advises that you install a child restraint system to a rear seat.

**Generic term "child restraint system"**

The generic term child restraint system is used in this Operator’s Manual. A child restraint system is, for example:

- a baby car seat
- a rearward-facing child seat
- a forward-facing child seat
- a child booster seat with a backrest and seat belt guide

Mercedes-Benz recommends using a child booster seat with a backrest.

The child restraint system must be appropriate to the age, weight and size of the child.

**Observing laws and legal requirements**

Always observe the legal requirements when using a child restraint system in the vehicle.

**Observing standards for child restraint systems**

All child restraint systems must meet the following standards:

- U.S. Federal Motor Vehicle Safety Standards 213 and 225
- Canadian Motor Vehicle Safety Standards 213 and 210.2

Confirmation that the child restraint system complies with the standards can be found on an instruction label on the child restraint system. This confirmation can also be found in the instal-
lation instructions that are included with the child restraint system.

Detecting risks, avoiding danger

Securing systems for child restraint systems in the vehicle

Only use the following securing systems for child restraint systems:
- the LATCH-type (ISOFIX) mounting brackets
- the vehicle’s seat belt system
- the Top Tether anchorages

Installing a LATCH-type (ISOFIX) child restraint system is preferred.

Simply attaching to the securing rings on the vehicle can reduce the risk of installing the child restraint system incorrectly.

When securing a child with the integrated seat belt of the LATCH-type (ISOFIX) child restraint system, always comply with the permissible gross weight for the child and child restraint system (→ page 54).

A booster seat may be necessary to achieve proper seat belt positioning for children over 40 lbs (18 kg) in weight or until they reach a height where a three-point seat belt can be installed properly without a booster seat.

Mercedes-Benz recommends a suitable child booster seat with a backrest and seat belt guide.

Advantage of a rearward-facing child restraint system

It is preferable to transport a baby or a small child in a suitable rearward-facing child restraint system. In this case, the child sits in the opposite direction to the direction of travel and faces backwards.

Babies and small children have comparatively weak neck muscles in relation to the size and weight of their head. The risk of injury to the cervical spine during an accident can be reduced in a rearward-facing child restraint system.

Always secure a child restraint system correctly

**WARNING** Risk of injury or death caused by incorrect installation of the child restraint system

If the child restraint system is incorrectly installed on a suitable seating position, it cannot perform its intended protective function.

The child cannot be restrained in the event of an accident, heavy braking or a sudden change of direction.

- Always comply with the manufacturer’s installation instructions for the child restraint system and its correct use.
- Make sure that the entire base of the child restraint system always rests on the sitting surface of the seat.
- Never place objects under or behind the child restraint system, e.g. cushions.
Always use child restraint systems with the original cover designed for them.

Always replace damaged covers with genuine covers.

**WARNING** Risk of injury or death from unsecured child restraint systems in the vehicle

If the child restraint system is not correctly installed or secured, it could release in the event of an accident, sudden braking or a sudden change in direction.

The child restraint system could be flung around and hit vehicle occupants.

- Always install child restraint systems correctly, even when not in use.
- Always comply with the child restraint system manufacturer’s installation instructions.

- Always observe the child restraint system manufacturer’s installation and operating instructions as well as the vehicle-specific information:
  - Install the LATCH-type (ISOFIX) child restraint system to the rear seat (→ page 54).
  - Secure the child restraint system with the seat belt on the rear seat (→ page 57).
  - Secure the child restraint system with the seat belt on the front passenger seat (→ page 59). Observe the specific instructions for the rearward-facing and forward-facing child restraint systems (→ page 59).
  - If the front passenger seat is occupied, ensure, both before and during the journey, that the status of the front passenger front airbag is correct for the current situation (→ page 44).
  - Observe the warning labels in the vehicle interior and on the child restraint system.
  - Also secure Top Tether if present.

**Do not modify the child restraint system**

**WARNING** Risk of injury due to modifications to the child restraint system

The child restraint system may no longer function as it is supposed to if you make modifications or attach objects to it, e.g. toys or unsuitable accessories. This poses an increased risk of injury!

Never modify the child restraint system. Only attach accessories which the manufacturer of the child restraint system has authorized especially for this child restraint system.

**Only use child restraint systems which are in proper working condition**

**WARNING** Risk of injury or death caused by the use of damaged child restraint systems

Child restraint systems or their retaining systems that have been subjected to a load in an accident may then not be able to perform their intended protective function.
The child cannot be restrained in the event of an accident, heavy braking or a sudden change of direction.

- Always replace child restraint systems immediately that have been damaged or involved in an accident.
- Have the securing systems for the child restraint systems checked at a qualified specialist workshop before installing a child restraint system again.

Avoiding direct sunlight

**WARNING** Risk of burns when the child seat is exposed to direct sunlight

If the child restraint system is exposed to direct sunlight or heat, parts could heat up. Children could suffer burns from these parts, particularly on metallic parts of the child restraint system.

- Always make sure that the child restraint system is not exposed to direct sunlight.
- Protect it with a blanket, for example.
- If the child restraint system has been exposed to direct sunlight, allow it to cool before securing a child into it.
- Never leave children unattended in the vehicle.

Observe when stopping or parking

**WARNING** Risk of accident and injury due to children left unattended in the vehicle

If you leave children unattended in the vehicle, they may be able to set the vehicle in motion, for example by:

- Releasing the parking brake.
- Shifting the automatic transmission out of park position [P].
- Starting the engine.

In addition, they may operate vehicle equipment and become trapped.

**WARNING** Risk of fatal injury due to exposure to extreme heat or cold in the vehicle

If people – particularly children – are exposed to extreme temperatures over an extended period of time, there is a risk of serious or even fatal injury.

- Never leave anyone – particularly children – unattended in the vehicle.
- Never leave animals in the vehicle unattended.

Never leave children unattended in the vehicle.

When leaving the vehicle, always take the SmartKey with you and lock the vehicle.

Never leave children unattended in the vehicle.

### Activating/deactivating the seat belt's special seatbelt retractor

**WARNING** Risk of injury or death if a seat belt is unfastened while the vehicle is in motion

If the seat belt is released while the vehicle is in motion, the child restraint system is no longer correctly secured. The child seat safety feature is deactivated and the seat belt is drawn in a bit by the inertia reel. It is therefore not possible to engage the seat belt again.

- Pull over and stop the vehicle safely as soon as possible, paying attention to road and traffic conditions.
- Activate the child seat safety feature again and correctly secure the child restraint system.

### Requirements

When enabled, the special seatbelt retractor ensures that the seat belts of the front passenger seat and rear seats do not slacken once the child restraint system is secured.

The seat belts on the following seats are equipped with a special seatbelt retractor:

- Front passenger seat
- Rear seats

### Installing a child restraint system

- When installing a child restraint system, always observe the manufacturer’s installation and operating instructions as well as the information in this Operator’s Manual.
- Pull the seat belt smoothly from the seat belt outlet.
- Engage the seat belt tongue in the seat belt buckle.
Activating the special seatbelt retractor

Pull the seat belt out fully and let the inertia reel retract it again. When the special seatbelt retractor is activated, you should hear a ratcheting sound. Push the child restraint system down until the seat belt sits tightly.

Deactivating the special seatbelt retractor

Press the release button of the seat belt buckle. Hold the seat belt tongue and guide back to the seat belt outlet.

Installing the LATCH-type (ISOFIX) child restraint system on the rear seat

If the rear bench seat/rear seat and seat backrest are not engaged they could fold forwards, e.g. when braking suddenly or in the event of an accident.

- If this is the case, the vehicle occupant would be forced into the seat belt by the rear bench seat/rear seat or by the seat backrest. The seat belt cannot protect as intended and could result in additional injury.
- Objects or loads in the trunk/cargo compartment cannot be restrained by the seat backrest.

WARNING Risk of injury if the rear bench seat/rear seat and seat backrest are not engaged

Make sure that the seat backrest and the rear bench seat/rear seat are engaged before every trip.

If the seat backrest is not engaged and locked, this will be shown on the multifunction display on the instrument cluster.

WARNING Risk of injury or death if the permissible gross mass of the child and child restraint system together is exceeded

For LATCH-type (ISOFIX) child restraint systems in which the child is secured using the integrated seat belt integrated in the child restraint system, the permissible gross mass of the child and child restraint system is 73 lb (33 kg).

If the child and the child restraint system together weigh more than 73 lb (33 kg), the LATCH-type (ISOFIX) child restraint system with integrated seat belt does not offer sufficient protection. An excessive load may be placed on the LATCH-type (ISOFIX) child seat.
attachments and the child may not be restrained in the event of an accident, for example.

- If the child and the child restraint system together weigh more than 73 lb (33 kg), only use a LATCH-type (ISOFIX) child restraint system which secures the child with the vehicle seat belt.
- Also secure the child restraint system with the Top Tether belt, if available.

Always comply with the information about the mass of the child restraint system:
- in the manufacturer’s installation and operating instructions for the child restraint system used
- on a label on the child restraint system, if present

Regularly check that the permissible gross mass of the child and child restraint system is still complied with.

When installing a child restraint system, observe the following:

- Always observe the correct use and the suitability of the seats for attaching a child restraint system.
- Always comply with the manufacturer's installation and operating instructions for the child restraint system used.
- Make sure that the child's feet do not touch the front seat. If necessary, move the front seat forward slightly.

When installing a LATCH-type (ISOFIX) child restraint system, observe the following:

- When using a baby car seat in Group 0/0+ and a rearward-facing child restraint system in Group I on a rear seat: adjust the front seat so that it does not touch the child restraint system.
- When using a forward-facing child restraint system in Group I: remove the head restraint from the respective seat, if possible. In addition, the seat backrest of the child restraint system must, as far as possible, lie flat against the backrest of the vehicle seat.

When you remove the child restraint system, install the head restraint again immediately and adjust all the head restraints correctly.

- For certain child restraint systems in weight group II or III, there may be restrictions in the maximum size setting, e.g. due to possible contact with the roof.
- The child restraint system must not be put under strain between the roof and the seat cushion and/or be installed facing the wrong direction. Where possible, adjust the seat cushion inclination accordingly.
- The child restraint system must not be put under strain by the head restraints. Adjust the head restraints accordingly.
Before every trip, make sure that the LATCH-type (ISOFIX) child restraint system is engaged correctly in both mounting brackets in the vehicle.

**NOTE** Be careful not to damage the seat belt for the center seat when installing the child restraint system.

- Make sure that the seat belt is not trapped.

### Securing Top Tether

- Open the cover by using zipper 1.
- Carefully open the zip further.
- Attach the LATCH-type (ISOFIX) child restraint system to both mounting brackets 2 in the vehicle.

**WARNING** Risk of injury or death if the rear seat backrests are not locked after installing Top Tether belts

If the rear seat backrests are not locked, they could fold forwards in the event of an accident or during braking or sudden changes of direction.

As a result, child restraint systems cannot perform their intended protective function. Rear seat backrests that are not locked can also cause additional injuries, e.g. in the event of an accident.

- Always lock rear seat backrests after installing Top Tether belts.
- Observe the lock verification indicator.

If the seat backrest is not engaged and locked, this will be shown on the multifunction display on the instrument cluster.

If the child restraint system is equipped with a Top Tether belt:

The risk of injury can be reduced by Top Tether. The Top Tether belt facilitates an additional connection between the child restraint system attached with LATCH-type (ISOFIX) and the vehicle.
If necessary, move head restraint \( \textbf{1} \) upwards (→ page 91).

Install the LATCH-type (ISOFIX) child restraint system with Top Tether. Always comply with the child restraint system manufacturer’s installation instructions when doing so.

- Guide Top Tether belt \( \textbf{4} \) under head restraint \( \textbf{1} \) between the two head restraint bars.
- Hook Top Tether hook \( \textbf{3} \) without twisting into Top Tether anchorage \( \textbf{2} \).
- Tension Top Tether belt \( \textbf{4} \). Always comply with the child restraint system manufacturer’s installation instructions when doing so.
- If necessary, slide head restraint \( \textbf{1} \) downwards (→ page 91). Make sure that you do not interfere with the correct routing of Top Tether belt \( \textbf{4} \).

**Securing the child restraint system with the seat belt**

**Attaching the child restraint system with the seat belt on the rear seat**

**WARNING** Risk of injury if the rear bench seat/rear seat and seat backrest are not engaged

If the rear bench seat/rear seat and seat backrest are not engaged they could fold forwards, e.g. when braking suddenly or in the event of an accident.

- If this is the case, the vehicle occupant would be forced into the seat belt by the rear bench seat/rear seat or by the seat backrest. The seat belt cannot protect as intended and could result in additional injury.
- Objects or loads in the trunk/cargo compartment cannot be restrained by the seat backrest.
Make sure that the seat backrest and the rear bench seat/rear seat are engaged before every trip.

If the seat backrest is not engaged and locked, this will be shown on the multifunction display on the instrument cluster.

When installing a belt-secured child restraint system, observe the following:

- Always comply with the manufacturer’s installation and operating instructions for the child restraint system used.
- **When using a category 0/0+ baby car seat and a category I rearward-facing child restraint system on a rear seat:** adjust the front seat so that the seat does not touch the child restraint system.
- **When using a category I forward-facing child restraint system:** remove the head restraint from the respective seat, if possible.

When you remove the child restraint system, install the head restraint again immediately and adjust all the head restraints correctly.

- The backrest of the forward-facing child restraint system must, as far as possible, be resting on the seat backrest of the rear seat.
- For certain child restraint systems in weight category II or III, there may be restrictions in the maximum size setting, e.g. due to possible contact with the roof.
- The child restraint system must not be put under strain between the roof and the seat cushion and/or be installed facing the wrong direction. Where possible, adjust the seat cushion inclination accordingly.
- The child restraint system must not be put under strain by the head restraints. Adjust the head restraints accordingly.
- Make sure that the child’s feet do not touch the front seat. If necessary, move the front seat forward slightly.

The seat belts on the following seats are equipped with a special seatbelt retractor:
- Front passenger seat
- Rear seats

When enabled, the special seatbelt retractor ensures that the seat belts of the front passenger seat and rear seats do not slacken once the child restraint system is secured (→ page 53).

- Install the child restraint system. The entire base of the child restraint system must always rest on the sitting surface of the rear seat.
- Always make sure that the shoulder belt strap is correctly routed from the seat belt outlet of the vehicle to the shoulder belt guide on the child restraint system. The shoulder belt strap must be routed forwards and downwards from the seat belt outlet.
Notes on rearward-facing and forward-facing child restraint systems on the front passenger seat

⚠️ WARNING Risk of injury or death from using a rearward-facing child restraint system when the front passenger front airbag is enabled

If you secure a child in a rearward-facing child restraint system on the front passenger seat and the PASSENGER AIR BAG OFF indicator lamp is off, the front passenger airbag can deploy in the event of an accident. The child could be struck by the airbag. Always ensure that the front passenger airbag is deactivated. The PASSENGER AIR BAG OFF indicator lamp must be lit. NEVER use a rearward-facing child restraint system on a seat protected by an ENABLED FRONT AIRBAG in front of it, DEATH or SERIOUS INJURY to the CHILD can occur.

Observe the specific instructions for the rearward-facing and forward-facing child restraint systems (→ page 59).

Warning notice on the front passenger sun visor

Always observe the status of the front passenger front airbag on the PASSENGER AIR BAG OFF indicator lamp:

- When using a rearward-facing child restraint system on the front passenger seat, the front passenger front airbag must always be disabled. This is only the case if the PASSENGER AIR BAG OFF indicator lamp is lit continuously (→ page 44).
- If the PASSENGER AIR BAG OFF indicator lamp is out, the front passenger front airbag is enabled. The front passenger front airbag may deploy during an accident.

Securing the child restraint system with the seat belt on the front passenger seat

When installing a belt-secured child restraint system on the front passenger seat, always observe the following:

✅ Observe the child restraint system manufacturer’s installation and operating instructions.

✅ When using a forward-facing child restraint system in Group I: remove the head restraint from the respective seat, if possible.

When you remove the child restraint system, install the head restraint again immediately and adjust all the head restraints correctly.

✅ The backrest of the forward-facing child restraint system must lie as flat as possible against the backrest of the front passenger seat.

✅ For certain child restraint systems in weight group II or III, there may be restrictions in the maximum size setting, e.g. due to possible contact with the roof.
The child restraint system must not be put under strain between the roof and the seat cushion and/or be installed facing the wrong direction. Adjust the seat backrest inclination accordingly.

The child restraint system must not be put under strain by the head restraints. Adjust the head restraints accordingly.

Never place objects under or behind the child restraint system, e.g. cushions.

The seat belt on the front passenger side is equipped with a special seatbelt retractor. When activated, the special seatbelt retractor ensures that the seat belt does not slacken once the child restraint system is secured (→ page 53).

- Set the front passenger seat as far back as possible and move the seat into the highest position.
- Fully retract the seat cushion length adjustment.
- Adjust the seat cushion inclination so that the front edge of the seat cushion is in the highest position and the rear edge of the seat cushion is in the lowest position.
- Set the seat backrest to an almost vertical position.
- Install the child restraint system. The entire base of the child restraint system must always rest on the seat cushion of the front passenger seat.
- Always make sure that the shoulder belt strap is correctly routed from the seat belt outlet of the vehicle to the shoulder belt guide on the child restraint system. The shoulder belt strap must be routed forwards and downwards from the seat belt outlet.
- If necessary, adjust the seat belt outlet and the front passenger seat accordingly.

### Child safety locks

#### Activating/deactivating the child safety lock for the rear doors

**WARNING** Risk of accident and injury due to children left unattended in the vehicle

If you leave children unattended in the vehicle, they may be able to set the vehicle in motion, for example by:

- Releasing the parking brake.
- Shifting the automatic transmission out of park position [P].
- Starting the engine.

In addition, they may operate vehicle equipment and become trapped.

- Never leave children unattended in the vehicle.
- When leaving the vehicle, always take the SmartKey with you and lock the vehicle.
**WARNING** Risk of fatal injury due to exposure to extreme heat or cold in the vehicle

If people – particularly children – are exposed to extreme temperatures over an extended period of time, there is a risk of serious or even fatal injury.

- Never leave anyone – particularly children – unattended in the vehicle.
- Never leave animals in the vehicle unattended.

**WARNING** Risk of accident and injury due to children left unattended in the vehicle

When children are traveling in the vehicle, they could:
- open doors, thereby endangering other people or road users
- get out of the vehicle and be hit by traffic
- operate vehicle equipment and become trapped, for example

When children are traveling in the vehicle, always activate the available child safety locks.
- Never leave children unattended in the vehicle.
- When leaving the vehicle, always take the key with you and lock the vehicle.

Child safety locks for the rear doors and the rear side windows are available. The child safety lock on the rear doors secures each door separately. The doors can no longer be opened from the inside.

- Press the lever in direction 1 (activate) or 2 (deactivate).
- Make sure that the child safety locks are working properly.

Activating/deactivating the child safety lock for the rear passenger compartment side windows
To activate/deactivate: press button 2.
The rear passenger compartment side window can be opened or closed in the following cases:

- With indicator lamp 1 lit: via the switch on the driver's door
- With indicator lamp 1 off: via the switch on the corresponding rear passenger compartment door or driver's door

Notes on pets in the vehicle

**WARNING** Risk of accident and injury due to animals left unsecured or unattended in the vehicle

If you leave animals in the vehicle unattended or unsecured, they could possibly press down buttons or switches. Thereby an animal may:

- activate vehicle equipment and become trapped, for example
- switch systems on or off and endanger other road users

Unsecured animals may be thrown around in the vehicle in the event of an accident or sudden steering and braking maneuver and injure vehicle occupants in the process.

- Never leave animals in the vehicle unattended.
- Always correctly secure animals while driving, for example using a suitable animal carrier.
SmartKey
Overview of SmartKey functions

⚠️ WARNING Risk of accident and injury due to children left unattended in the vehicle

If children are left unattended in the vehicle, they could:
- Open doors, thereby endangering other persons or road users.
- Get out of the vehicle and be hit by oncoming traffic.
- Operate vehicle equipment and become trapped, for example.

In addition, children could also set the vehicle in motion, for example, by:
- Releasing the parking brake.
- Shifting the automatic transmission out of park position \( P \) or shifting manual transmission into neutral.
- Starting the engine

⚠️ NOTE Damage to the key caused by magnetic fields

- Keep the key away from strong magnetic fields.

When leaving the vehicle, always take the SmartKey with you and lock the vehicle.
Never leave children and animals unattended in the vehicle.
Keep the SmartKey out of reach of children.

*NOTE* Damage to the key caused by magnetic fields

- Keep the key away from strong magnetic fields.

When leaving the vehicle, always take the SmartKey with you and lock the vehicle.
Never leave children and animals unattended in the vehicle.
Keep the SmartKey out of reach of children.

1. Locks
2. Battery check lamp
3. Unlocks
4. Opens/closes the tailgate
5. Panic alarm

The SmartKey may vary from the one shown in the diagram, depending on the vehicle equipment.

The SmartKey locks and unlocks the following components:
- the doors
- the tailgate
- the fuel filler flap
If the vehicle is not opened within approximately 40 seconds after unlocking, it locks again. Anti-theft protection is activated again.

Do not keep the SmartKey together with electronic devices or metal objects. This can affect the SmartKey's functionality.

If battery check lamp \(^2\) does not light up after pressing the \(^{\text{1}}\) or \(^{\text{2}}\) button, the battery is discharged.

Replacing the SmartKey battery (→ page 65).

Activating/deactivating the panic alarm

Requirements:

- The panic alarm function is only available in certain countries.
- The ignition is switched off.

To activate: press button \(^{\text{1}}\) for approximately one second. A visual and audible alarm is triggered.

To deactivate: briefly press button \(^{\text{1}}\) again, or

Press the start/stop button on the cockpit (the SmartKey is inside the vehicle).

Changing the unlocking settings

Possible unlocking functions of the SmartKey:

- Central unlocking
- Unlocking the driver's door and fuel filler flap

To switch between settings: press the \(^{\text{1}}\) and \(^{\text{2}}\) buttons simultaneously for approximately six seconds until the battery check lamp flashes twice.

If the unlocking function for the driver's door and fuel filler flap has been selected:

- Pressing the \(^{\text{1}}\) button a second time centrally unlocks the vehicle

Vehicles with KEYLESS-GO: If you touch the inner surface of the door handle on the driver's door, only the driver's door and fuel filler flap are unlocked.

Deactivating the SmartKey functions

If you do not use the vehicle or a SmartKey for an extended period of time, you can reduce the energy consumption of the respective Smart-
To deactivate: press the \[ \text{\&} \] button on the SmartKey twice in quick succession. The battery check lamp of the SmartKey flashes twice briefly and lights up once.

To activate: press any button on the SmartKey.

When the vehicle is started with the SmartKey in the stowage compartment of the center console, the SmartKey functions are automatically activated (→ page 137).

Removing/inserting the emergency key

To remove: press release button \( \text{1} \). Emergency key \( \text{2} \) is pushed out slightly.

Pull out emergency key \( \text{2} \) until it engages in the intermediate position.

You can use the intermediate position of emergency key \( \text{2} \) to attach the SmartKey to a key ring.

Press release button \( \text{1} \) again and fully remove emergency key \( \text{2} \).

To insert: press release button \( \text{1} \).

Insert emergency key \( \text{2} \) to the intermediate position or fully until it engages.

Replacing the SmartKey battery

**DANGER** Serious damage to health caused by swallowing batteries

Batteries contain toxic and corrosive substances. Swallowing batteries may cause serious damage to health.

There is a risk of fatal injury.

Keep batteries out of the reach of children.

If batteries are swallowed, seek medical attention immediately.

**ENVIRONMENTAL NOTE** Environmental damage caused by improper disposal of batteries

Batteries contain pollutants. It is illegal to dispose of them with the household rubbish.

Dispose of batteries in an environmentally responsible manner. Take discharged batteries to a qualified specialist workshop or to a collection point for used batteries.
Requirements:
- You require a CR 2032 3 V cell battery.

Mercedes-Benz recommends that you have the battery replaced at a qualified specialist workshop.

- Remove the emergency key (→ page 65).

Press release button 2 down fully and slide cover 1 in the direction of the arrow.
- Fold out cover 1 in the direction of the arrow and remove.
- Remove battery compartment 3 and take out the discharged battery.
- Insert the new battery into battery compartment 3. Observe the positive pole marking in the battery compartment and on the battery when doing this.
- Push in battery compartment 3.
- Re-attach cover 1 and push it until it engages.

Problems with the SmartKey

Doors

Unlocking and opening doors from the inside

To unlock and open a front door: pull door handle 2. Locking pin 1 pops up when the door is unlocked.

To unlock a rear passenger compartment door: pull the rear passenger compartment door handle. The locking pin pops up when the rear passenger compartment door is unlocked. To open a rear passenger compartment door: pull the rear passenger compartment door handle again.

Centrally locking and unlocking the vehicle from the inside

To unlock: press button 1.
To lock: press button 2.

This does not lock or unlock the fuel filler flap.
The vehicle is not unlocked:
- If you have locked the vehicle using the SmartKey.
- If you have locked the vehicle using KEYLESS-GO.

**Locking/unlocking the vehicle with KEYLESS-GO**

**Requirements**
- The SmartKey is outside the vehicle.
- The distance between the SmartKey and the vehicle does not exceed 3 ft (1 m).
- The driver’s door and the door at which the door handle is used are closed.

**Problems with KEYLESS-GO**

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible causes/consequences and Solutions</th>
</tr>
</thead>
</table>
| You can no longer lock or unlock the vehicle using KEYLESS-GO. | Possible causes are:  
  - The SmartKey functions have been deactivated.  
  - The SmartKey battery is discharged or nearly discharged.  
  - There is interference from a powerful radio signal source. |
### Possible causes/consequences and Solutions

- **The SmartKey is faulty.**
- **Activate the SmartKey functions (→ page 64).**
- **Check the battery using the battery check lamp and replace if necessary (→ page 65).**
- **Use the emergency key to unlock or lock the vehicle (→ page 65).**
- **Have the vehicle and SmartKey checked at a qualified specialist workshop.**

#### Activating/deactivating the automatic locking feature

The vehicle is locked automatically when the ignition is switched on and the wheels are turning faster than walking pace.

- **To activate:** press and hold button ② for approximately five seconds until an acoustic signal sounds.
- **To deactivate:** press and hold button ① for approximately five seconds until an acoustic signal sounds.

In the following situations, there is a danger of being locked out when the function is activated:

- While the vehicle is being tow started/pushed.
- The vehicle is being tested on the dynamometer.
Locking/unlocking the driver's door with the emergency key

If you wish to lock the vehicle entirely using the emergency key, first press the button for locking from the inside while the driver’s door is open. Then proceed to lock the driver’s door using the emergency key.

1. Insert the emergency key as far as it will go into opening 1 in the cover.
2. Pull and hold the door handle.
3. Pull the cover on the emergency key as straight as possible away from the vehicle until it releases.
4. Release the door handle.

To unlock: turn the emergency key counterclockwise to position 1.
To lock: turn the emergency key clockwise to position 1.
Carefully press the cover onto the lock cylinder until it engages and is seated firmly.

Cargo compartment
Opening the tailgate

DANGER Risk of exhaust gas poisoning
Combustion engines emit poisonous exhaust gases such as carbon monoxide. Exhaust gases can enter the vehicle interior if the tailgate is open when the engine is running, especially if the vehicle is in motion.

1. Always switch off the engine before opening the tailgate.
2. Never drive with the tailgate open.
Damage to the tailgate caused by obstacles above the vehicle

The tailgate swings rearwards and upwards when it is opened.

- Make sure that there is sufficient space behind and above the tailgate.

To open the tailgate, the following options are available:

- Pull on the handle for the tailgate in the bumper above the license plate.

- Pull remote opening switch 1 for the tailgate.
- Press and hold the button on the SmartKey.
- Vehicles with HANDS-FREE ACCESS: Make a kicking movement with your foot below the bumper (→ page 75).

For a tailgate stopped in an intermediate position, pull it upwards and release it as soon as it starts to open.

Closing the tailgate

**WARNING** Risk of injury from unsecured items in the vehicle

If objects, luggage or loads are not secured or not secured sufficiently, they could slip, tip over or be thrown around and thereby hit vehicle occupants.

There is a risk of injury, particularly in the event of sudden braking or a sudden change in direction.

- Always stow objects in such a way that they cannot be thrown around.
- Before the journey, secure objects, luggage or loads against slipping or tipping over.
**WARNING** Risk of becoming trapped during automatic closing of the tailgate

Parts of the body could become trapped during automatic closing of the tailgate. Moreover, people, e.g. children, may be standing in the closing area or may enter the closing area during the closing process.

- Make sure that nobody is in the vicinity of the closing area during the closing process.

Use one of the following options to stop the closing process:
- Press the \[\text{\textcolor{black}{\textbullet}}\] button on the SmartKey.
- Press or pull the remote operating switch on the driver’s door.
- Press the closing or locking button on the tailgate.
- Pull the tailgate handle.

**Vehicles with HANDS-FREE ACCESS:** It is also possible to stop the closing process by making a kicking movement with your foot below the rear bumper.

---

To close the tailgate, the following options are available:

- Pull the tailgate downwards slightly. Release it as soon as it begins to close.
- **Vehicles with HANDS-FREE ACCESS:** Make a kicking movement with your foot below the bumper (→ page 75).
- **Vehicles with KEYLESS-GO:** Press and hold the \[\text{\textcolor{black}{\textbullet}}\] button on the SmartKey (with the SmartKey in the vicinity of the vehicle).

Press remote operating switch \[\text{\textcolor{black}{\textbullet}}\] for the tailgate.
Press closing button 1 on the tailgate.

**Vehicles with KEYLESS-GO:** Press locking button 2 on the tailgate.
If a SmartKey is detected outside the vehicle, the tailgate will close and the vehicle will be locked.

**Automatic reversing function for the tailgate**
The tailgate is equipped with automatic obstacle detection with reversing function. If a solid object blocks or restricts the tailgate when automatically closing, the tailgate automatically opens again slightly. Automatic obstacle detection with reversing function is only an aid. It is not a substitute for your attentiveness when you are closing the tailgate.

- When closing, make sure that no body parts are in the closing area.

**WARNING** Risk of becoming trapped despite the reversing function

The reversing function does not react:

- To soft, light and thin objects, e.g. fingers.
- Over the last 3/16 in (8 mm) of the closing path.

In these situations in particular, the reversing function cannot prevent someone being trapped.

- When closing, make sure that no body parts are in the closing area.

If someone is trapped:

- Press the button on the SmartKey, or
- Press or pull the remote operating switch on the driver’s door, or
- Press the closing or locking button on the tailgate, or
- Pull the tailgate handle.
With HANDS-FREE ACCESS you can open, close or stop the closing process of the tailgate by performing a kicking movement under the rear bumper.

The kicking movement triggers the opening or closing process alternately.

Observe the notes when opening (→ page 71) and closing (→ page 72) the tailgate.

⚠️ Two warning tones sound when the tailgate is opening or closing.

**WARNING** Risk of burns caused by a hot exhaust system

The vehicle exhaust system can become very hot. If you use HANDS-FREE ACCESS, you could burn yourself by touching the exhaust system.

- Always ensure that you only make a kicking movement within the detection range of the sensors.

**NOTE** Vehicle damage due to unintentional opening of the tailgate

- when using an automatic car wash
- when using a high pressure cleaner
- Deactivate KEYLESS-GO or make sure that the key located is at least 10 ft (3 m) away from the vehicle in such situations.

When making the kicking movement, make sure that your feet are firmly on the ground, otherwise you could lose your balance, e.g. on ice.

**Requirements:**
- The SmartKey is behind the vehicle.
- Stand at least 12 in (30 cm) away from the vehicle while performing the kicking movement.
- Do not come into contact with the bumper while making the kicking movement.
- Do not carry out the kicking movement too slowly.
- The kicking movement must be towards the vehicle and back again.
Detection range of the sensors

If several consecutive kicking movements are not successful, wait ten seconds.

**System limitations**

The system may be impaired or may not function if:

- Snow or dirt, e.g. from road salt, covers the sensor area.
- The kicking movement is made using a prosthetic leg.
- A person’s arms or legs are moving in the sensor detection range, e.g. when polishing the vehicle or picking up objects.
- Objects are moved or placed behind the vehicle, e.g. tensioning straps or luggage.
- Clamping straps, tarps or other coverings are pulled over the bumper.
- A protective mat with a length reaching over the trunk sill down into the detection range of the sensors is used.
- The protective mat is not secured correctly.
- Work is being undertaken on the trailer hitch, on trailers or rear bicycle racks.

Deactivate the SmartKey functions (→ page 64) or do not carry the SmartKey about your person in such situations.

### Limiting the opening angle of the tailgate

**Activating the opening angle limiter**

You can limit the opening angle of the tailgate in the top half of its opening range to approximately 8 in (20 cm) before the end position.

- Stop the opening procedure of the tailgate at the desired position.
- Press and hold the closing button in the tailgate until you hear a short acoustic signal. The opening angle limiter will be activated. The tailgate will then stop in the stored position when opened.

To open the tailgate fully, pull the handle on the outside of the tailgate again after it has stopped automatically.

**Deactivating the opening angle limiter**

- Press and hold the closing button in the tailgate until two short acoustic signals sound.

### Unlocking the tailgate with the emergency key

- Fold the rear seat backrest forwards.
Insert emergency key 2 into opening 1 in the trim and push it in. The tailgate will be unlocked.

Sun blind
Folding up or down the sun blind for the rear window

- Fold the sun blind up or down.
- To fold the sun blind while the tailgate is open, unhook the cargo compartment cover in advance.

Side windows
Opening and closing the side windows

**WARNING** Risk of entrapment when opening a side window

When opening a side window, parts of the body could be drawn in or become trapped between the side window and window frame.

- When opening, make sure that nobody is touching the side window.
- If someone is trapped, release the button immediately or pull it in order to close the side window again.

**WARNING** Risk of becoming trapped when closing a side window

When closing a side window, body parts could be trapped in the closing area in the process.

- When closing, make sure that no body parts are in the closing area.
If someone is trapped, release the button immediately or press the button in order to reopen the side window.

Requirements:
- The power supply or the ignition is switched on.

To start automatic operation: press the button beyond the point of resistance or pull and release it.

To interrupt automatic operation: press or pull the button again.

When the vehicle is switched off, the side windows can continue being operated. The function is available for around five minutes or until a front door is opened.

Automatic reversing feature of the side windows
If an object blocks a side window during the closing process, the side window opens again automatically. The automatic reversing feature is only an aid and is not a substitute for your attentiveness.

When closing, make sure that no body parts are in the closing area.

WARNING Risk of becoming trapped despite there being reversing protection on the side window
The reversing function does not react:
- To soft, light and thin objects, e.g. fingers
- During resetting
This means that the reverse function cannot prevent someone from becoming trapped in these situations.

- When closing, make sure that no body parts are in the closing area.
- If someone becomes trapped, press the button to open the side window again.

### Convenience opening (ventilating the vehicle before starting a journey)

**WARNING** Risk of entrapment when opening a side window

When opening a side window, parts of the body could be drawn in or become trapped between the side window and window frame.

- When opening, make sure that nobody is touching the side window.

- Release the button immediately if somebody becomes trapped.

- Press and hold the button on the SmartKey.
  The following functions are performed:
  - The vehicle is unlocked.
  - The side windows are opened.
  - The sliding sunroof is opened.
  - The seat ventilation of the driver’s seat is switched on.

**To interrupt convenience opening:** release the button.

### Convenience closing (closing the vehicle from outside)

**WARNING** Risk of entrapment caused by inadvertent convenience closing

When the convenience closing feature is operating, parts of the body could become trapped in the closing area of the side window and the sliding sunroof.

- Observe the complete closing procedure when using convenience closing.
- When closing, make sure that no body parts are in the closing area.

- Press and hold the button on the SmartKey.
  The following functions are performed:
  - The vehicle is locked.
  - The side windows are closed.
  - The sliding sunroof is closed.

**To interrupt convenience closing:** release the button.

Convenience closing can also be operated with KEYLESS-GO (→ page 69).
## Problems with the side windows

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible causes/consequences and ► Solutions</th>
</tr>
</thead>
</table>
| A side window cannot be closed and you cannot see the cause.           | ► Check to see whether any objects are in the window guide.  
**WARNING** Risk of becoming trapped or fatally injured if reversing protection is not activated  
If you close a side window again immediately after it has been blocked or reset, the side window closes with increased or maximum force. The reversing feature is then not active.  
Parts of the body could become trapped in the closing area in the process.  
► Make sure that no parts of the body are in the closing area.  
► To stop the closing process, release the button or press the button again to reopen the side window.  
If a side window is obstructed during closing and reopens again slightly:  
► Immediately after the window is blocked, pull the corresponding switch again until the side window has closed, and hold the switch for an additional second.  
The side window will be closed with increased force.  
If a side window is obstructed again during closing and reopens again slightly:  
► Repeat the previous step.  
The side window is closed without the automatic reversing function. |
<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible causes/consequences and Solutions</th>
</tr>
</thead>
</table>
| The side windows cannot be opened or closed using the convenience opening feature. | The SmartKey battery is discharged or nearly discharged.  
  - Check the battery using the battery check lamp and replace if necessary (→ page 65). |

### Sliding sunroof

**Opening and closing the sliding sunroof**

**WARNING** Risk of becoming trapped while opening and closing the sliding sunroof

During opening and closing, parts of the body could get caught in the sweep of the sliding sunroof.

- When opening or closing, make sure that no body parts are in the sweep.
- Release the button immediately if somebody becomes trapped.

or

**WARNING** Risk of becoming trapped if the sliding sunroof is operated by children

Children operating the sliding sunroof could get caught in the moving parts, particularly if unattended.

- Never leave children unattended in the vehicle.
- When leaving the vehicle, always take the key with you and lock the vehicle.

**NOTE** Malfunction caused by snow and ice

Snow and ice may lead to a malfunction of the sliding sunroof.

- Only open the sliding sunroof if it is free of snow and ice.

**NOTE** Damage caused by protruding objects

Objects that protrude from the sliding sunroof may damage the sealing strips.

- Do not allow anything to protrude from the sliding sunroof.
To start automatic operation: press the button beyond the point of resistance or pull and release it.

To interrupt automatic operation: briefly press the button in any direction. The opening/closing process is stopped.

- Vehicles without a panoramic sliding sunroof: The automatic opening and raising feature is available only when the sliding sunroof is closed.

Automatic reversing feature of the sliding sunroof
If there is an object obstructing the sliding sunroof during the closing process, the sliding sunroof will open again automatically. The automatic reversing feature is only an aid and is not a substitute for your attentiveness.

- When closing, make sure that no body parts are in the closing area.

WARNING Risk of entrapment even with the reversing function active

The reversing feature does not react in particular:
- To soft, light and thin objects, e.g. fingers
- Over the last 1/8 in (4 mm) of the closing path
- During resetting

This means that the reverse function cannot prevent someone from becoming trapped in these situations.

- When closing, make sure that no body parts are in the closing area.
- Release the button immediately if somebody becomes trapped.

or

- Briefly press the button in any direction during automatic operation. The closing process is stopped.

Problems with the sliding sunroof
<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible causes/consequences and Solutions</th>
</tr>
</thead>
</table>
| The sliding sunroof cannot be closed and you cannot see the cause. | **WARNING** Risk of becoming trapped or fatal injury by closing the sliding sunroof again. If you close the sliding sunroof again immediately after it has been blocked or reset, the sliding sunroof closes with increased force. Parts of the body could become trapped in the closing area in the process.  
- Make sure that no parts of the body are in the closing area.  
- Release the button immediately if somebody becomes trapped.  
- Press the button in any direction during the automatic closing process. The closing process is stopped. |

If the sliding sunroof is obstructed during closing and reopens again slightly:  
- Immediately after automatic reversing, pull and hold the button down again to the point of resistance until the sliding sunroof is closed. The sliding sunroof will be closed with increased force.

If the sliding sunroof is obstructed again and reopens again slightly:  
- Repeat the previous step. The sliding sunroof will be closed again with increased force.
Problem Possible causes/consequences and Solutions

**Vehicles without a panoramic sliding sunroof:** The sliding sunroof does not operate smoothly.

- Push the button up to the point of resistance until the sliding sunroof is fully open.
- Press the button for another second.
- Close the sliding sunroof.

**Anti-theft protection**

**Function of the immobilizer**

The immobilizer prevents your vehicle from being started without the correct SmartKey.

The immobilizer is automatically activated when the ignition is switched off and deactivated when the ignition is switched on.

When leaving the vehicle, always take the SmartKey with you and lock the vehicle. Anyone can start the engine if a valid SmartKey has been left inside the vehicle.

In the event the engine cannot be started (yet the vehicle’s starter battery is charged), the system is not operational. Contact an authorized Mercedes-Benz Center or call 1-800-FOR-MERCedes (in the USA) or 1-800-387-0100 (in Canada).

**ATA (anti-theft alarm system)**

**Function of the ATA system**

If the ATA system is armed, a visual and audible alarm is triggered in the following situations:
- when a door is opened
- when the tailgate is opened
- when the hood is opened

The ATA system is armed automatically after approximately ten seconds in the following situations:
- after locking the vehicle with the SmartKey
- after locking the vehicle using KEYLESS-GO

Indicator lamp flashes when the ATA system is armed.
The ATA system is deactivated automatically in the following situations:

- after unlocking the vehicle with the SmartKey
- after pressing the start/stop button with the SmartKey in the stowage compartment (→ page 137)
- after unlocking the vehicle using KEYLESS-GO

When the Mercedes-Benz emergency call system is active and the alarm stays on for more than 30 seconds, a message is automatically sent to the Customer Assistance Center (→ page 318).

**Deactivating the ATA**

- Press the \[ \text{\textsuperscript{1}}, \text{\textsuperscript{2}} \] or \[ \text{\textsuperscript{3}} \] button on the SmartKey.

  or

- Press the start/stop button with the SmartKey in the stowage compartment (→ page 137)

**Deactivating the alarm using KEYLESS-GO:**

- Grasp the outside door handle with the SmartKey outside the vehicle.
Notes on the correct driver’s seat position

**WARNING** Risk of injury from adjusting the vehicle settings while the vehicle is in motion

You could lose control of the vehicle in the following situations:
- if you adjust the driver’s seat, the head restraint, the steering wheel or the mirror while the vehicle is in motion
- if you fasten your seat belt while the vehicle is in motion

Before starting the engine: adjust the driver’s seat, the head restraint, the steering wheel or the mirror and fasten your seat belt.

Ensure the following when adjusting the steering wheel 1, seat belt 2 and driver’s seat 3:
- you are as far away from the driver’s airbag as possible
- you are sitting in an upright position
- your thighs are slightly supported by the seat cushion
- your legs are not fully extended and you can depress the pedals properly
- the back of your head is supported at eye level by the center of the head restraint
- you can hold the steering wheel with your arms slightly bent
- you can move your legs freely
- you can see all the displays on the instrument cluster clearly
- you have a good overview of the traffic conditions
- your seat belt is pulled snugly against your body and is routed across the center of your shoulder and across your hips in the pelvic area
Seats

Adjusting the front seat mechanically and electrically

- **WARNING** Risk of becoming trapped if the seats are adjusted by children
  
  Children could become trapped if they adjust the seats, particularly when unattended.
  
  - When leaving the vehicle, always take the SmartKey with you and lock the vehicle.
  
  - Never leave children unattended in the vehicle.
  
  The seats can be adjusted when the ignition is switched off.

- **WARNING** Risk of becoming trapped when adjusting the seats
  
  When you adjust a seat, you or other vehicle occupants could become trapped, e.g. on the seat guide rail.

- When adjusting a seat, make sure that no one has any body parts in the sweep of the seat.

  Observe the safety notes on "Airbags" and "Children in the vehicle".

- **WARNING** Risk of accident due to the driver’s seat not being engaged
  
  If the driver’s seat is not engaged, it could move unexpectedly while the vehicle is in motion.
  
  This could cause you to lose control of the vehicle.

  - Always make sure that the driver’s seat is engaged before starting the vehicle.

- **WARNING** Risk of becoming trapped if the seat height is adjusted carelessly
  
  If you adjust the seat height carelessly, you or other vehicle occupants could be trapped and thereby injured.

  - Always drive with the head restraints installed.

  - Before driving off, make sure for every vehicle occupant that the center of the head restraint supports the back of the head at about eye level.

- **WARNING** Risk of injury due to head restraints which are not installed or are adjusted incorrectly
  
  If head restraints are not installed or are adjusted incorrectly, the head restraints cannot provide protection as intended.

  There is an increased risk of injury in the head and neck area, e.g. in the event of an accident or when braking.

  - Always drive with the head restraints installed.

  - Before driving off, make sure for every vehicle occupant that the center of the head restraint supports the back of the head at about eye level.
Do not interchange the head restraints of the front and rear seats. Otherwise, you will not be able to adjust the height and angle of the head restraints correctly.

Adjust the head restraint fore-and-aft position so that it is as close as possible to the back of your head.

**WARNING** Risk of injury or death due to incorrect seat position

The seat belt does not offer the intended level of protection if you have not moved the seat backrest to an almost vertical position. When braking or in the event of an accident, you could slide underneath the seat belt and sustain abdominal or neck injuries, for example.

- Adjust the seat properly before beginning your journey.
- Always ensure that the seat backrest is in an almost vertical position and that the shoulder section of your seat belt is routed across the center of your shoulder.

To adjust the seat fore-and-aft position:

1. Seat cushion inclination
2. Seat height
3. Seat backrest inclination
4. Seat fore-and-aft position
5. Seat cushion length

- Make sure that the seat is engaged in position.
- **To adjust the seat cushion length**: lift lever 5 and slide the front section of the seat cushion forwards or backwards.

To adjust the seat fore-and-aft position:

- Lift lever 4 and slide the seat into the desired position.
Adjusting the front seat electrically

Adjusting the front passenger seat electrically from the driver's seat

Requirements:
- The power supply is switched on
This function is available only in vehicles with an electrically adjustable front passenger seat.

You can call up the following functions for the front passenger seat:
- Seat adjustment
- Seat heating
- Seat ventilation
- Memory function

1. Save the settings with the memory function (→ page 97).

1. Head restraint height
2. Seat backrest inclination
3. Seat height
4. Seat cushion length
5. Seat cushion inclination
6. Seat fore-and-aft position
To select the front passenger seat: press button 1. When the indicator lamp lights up, the front passenger seat is selected.

Adjust the front passenger seat using the buttons on the door control panel on the driver's side.

Adjusting the 4-way lumbar support

Adjust the 4-way lumbar support via the multimedia system (→ page 92).

Adjusting the AMG Performance seat

To adjust the contour of the seat and for improved lateral support, you can adjust the front seats individually.

On the front passenger seat, you can adjust only the seat side bolsters of the seat backrest.

Adjust the AMG Performance seat via the multimedia system (→ page 92).

Head restraints

Adjusting the front seat head restraints mechanically

**WARNING** Risk of injury from adjusting the vehicle settings while the vehicle is in motion

You could lose control of the vehicle in the following situations:
- if you adjust the driver's seat, the head restraint, the steering wheel or the mirror while the vehicle is in motion
- if you fasten your seat belt while the vehicle is in motion

Before starting the engine: adjust the driver's seat, the head restraint, the steering wheel or the mirror and fasten your seat belt.

**WARNING** Risk of injury due to head restraints which are not installed or are adjusted incorrectly

If head restraints are not installed or are adjusted incorrectly, the head restraints cannot provide protection as intended.

There is an increased risk of injury in the head and neck area, e.g. in the event of an accident or when braking.

- Always drive with the head restraints installed.
- Before driving off, make sure for every vehicle occupant that the center of the head restraint supports the back of the head at about eye level.

Do not interchange the head restraints of the front and rear seats. Otherwise, you will not be able to adjust the height and angle of the head restraints correctly.

Adjust the head restraint fore-and-aft position so that it is as close as possible to the back of your head.
To raise: pull the head restraint up.
To lower: press release knob 1 in the direction of the arrow and push the head restraint down.
To move forwards: pull the head restraint forwards.
To move backwards: press release knob 2 and push the head restraint backwards.

Adjusting the head restraints of the rear seats mechanically

To raise: pull the head restraint up.
To lower: press release knob 1 in the direction of the arrow and push the head restraint down.

Installing/removing the outer rear seat head restraints

Removing

Release the rear seat backrest and fold it forwards slightly.
Pull the head restraint upwards as far as it will go.
Push release knob in the direction of the arrow and pull out the head restraint.

Installing
- Insert the head restraint such that the notches on the bar are on the left when viewed in the direction of travel.
- Push the head restraint down until you hear it engage in position.
- Fold the rear seat backrest back until it engages.

Configuring the seat settings
Multimedia system:
- Vehicle » Seats
- Select Driver’s Seat or Passenger Seat.

Adjusting the backrest side bolsters
- Select Side Bolsters.
- Adjust the air cushions.

Adjusting the side bolsters of the driver’s seat cushion (only vehicles with AMG Performance seat)
- Select Lateral Support, Cush.
- Adjust the air cushions.
- This setting can only be made for the driver’s seat. This setting is not available for the front passenger seat.

Adjusting the seat contour in the lumbar region of the seat backrest (lumbar)
- Select Lumbar.
- Adjust the air cushions.

Memory function
- Save the seat settings with the memory function (→ page 97).

Setting automatic adjustment of the lateral support (active multicontour seat)
Multimedia system:
- Vehicle » Seats
With this function, the lateral support of the active multicontour seat is automatically adjusted to the driving and cornering dynamics of the vehicle.
- Select Driver’s Seat or Passenger Seat.
- Select Dynamic Seat.
- Select setting: Off, Level 1 or Level 2.

Overview of massage and workout programs
Massage program
The following programs can be selected:
- Hot Relaxing Back
- Hot Relaxing Shoulder
- Activating Massage
- Classic Massage
- Wave Massage
• Mobilizing Massage

Active Workout
The Act. Workout Back and Act. Workout Cushion programs require your active cooperation. Tensing and releasing also helps to improve blood flow to your muscles. Press against a pressure point as soon as you feel it.

Selecting the massage program for the front seats
Multimedia system:
► Vehicle ► Seats
► Select Driver’s Seat or Passenger.
► Select Massage.
► Select a massage program. The massage program runs for approximately 9 to 15 minutes, depending on the setting.
► To set the massage intensity: switch High Intensity on √ or off ☐.

Resetting seat adjustments
Multimedia system:
► Vehicle ► Seats ► Reset
► Select Yes or No.
Depending on whether the settings for the driver or front passenger seat are selected, only the selected seat can be reset.

Switching the seat heating on/off
► WARNING Risk of burns due to repeatedly switching on the seat heating
Repeatedly switching on the seat heating can cause the seat cushion and seat backrest padding to become very hot. The health of persons with limited temperature sensitivity or a limited ability to react to high temperatures may be affected or they may even suffer burn-like injuries.
► Do not repeatedly switch on the seat heating.

Requirements:
• The power supply is switched on

To protect against overheating, the seat heating may be temporarily deactivated after it is switched on repeatedly.

□ NOTE Damage to the seats caused by objects or documents when the seat heater is switched on

When the seat heater is switched on, overheating can occur due to objects or documents placed on the seats e.g. seat cushions or child seats. This could cause damage to the seat surface.
► Make sure that no objects or documents are on the seats when the seat heater is switched on.
To switch on/increase the level: press button 1 repeatedly until the desired heating level is set. Depending on the heating level, up to three indicator lamps light up.

To switch off/reduce the level: press button 1 repeatedly until the desired heating level is set. If all indicator lamps are off, the seat heating is switched off.

The seat heating automatically switches down from the three heating levels after 8, 10 and 20 minutes until the seat heating is switched off.

Vehicles with the Warmth Comfort Package: you can heat the armrests in the door and the center console. You can also set the panel heating in the multimedia system (→ page 94).

Setting the panel heating

Multimedia system:

Vehicle ➔ Vehicle Settings ➔ Panel Heating

When the seat heater is switched on, the armrests in the vehicle as well as the center console can be heated using this function.

Setting options
Select Front and Rear, Front Only, Rear Only or Off.

Switching the seat ventilation on/off

Requirements:
- The power supply is switched on

To switch on/increase the level: press button 1 repeatedly until the desired ventilation level is set. Depending on the ventilation level, up to three indicator lamps light up.

To switch off/reduce the level: press button 1 repeatedly until the desired ventilation level is set. If all indicator lamps are off, the seat ventilation is switched off.

Steering wheel

Adjusting the steering wheel electrically

The steering wheel can be adjusted when the power supply is switched off.

- Adjusts the distance to the steering wheel
- Adjusts the height
- Save the settings with the memory function (→ page 97).
Switching the steering wheel heater on or off

Requirements:
- The power supply or the ignition is switched on.

To switch on: turn the lever in the direction of arrow 1. Indicator lamp 3 lights up.

To switch off: turn the lever in the direction of arrow 2. Indicator lamp 3 goes out.
When you switch the ignition off, the steering wheel heater switches off.

Easy entry and exit feature

Using the easy entry and exit feature

⚠️ WARNING Risk of accident when driving off while adjusting the easy exit feature

- If you drive off while the easy entry and exit feature is making adjustments, you could lose control of the vehicle.
- Always wait until the adjustment process is complete before driving off.

⚠️ WARNING Risk of entrapment when adjusting the easy entry and exit feature

- When the easy entry and exit feature adjusts the steering wheel, you and other vehicle occupants – particularly children – could become trapped.
- While the easy entry and exit feature is making adjustments, make sure that no one has any body parts in the sweep of the steering wheel.
- Move the adjustment lever of the steering wheel if there is a risk of becoming trapped by the steering wheel.
- The adjustment process is stopped.
- Never leave children unattended in the vehicle.
- When leaving the vehicle, always take the key with you and lock the vehicle.

Vehicles with memory function: You can stop the adjustment process by pressing one of the memory function position buttons.
If the easy entry and exit feature is active, the steering wheel will move upwards in the following situations:

- You switch the ignition off
- You open the driver's door when the ignition is switched on

The steering wheel moves back to the last drive position in the following cases:

- You switch the ignition on when the driver's door is closed
- You close the driver's door when the ignition is switched on

The last drive position is stored in the following situations:

- You switch the ignition off
- **Vehicles with memory function**: Save the seat settings via the memory function.

**Vehicles with memory function**: Press one of the memory function saved position buttons to stop the adjustment process.

### Setting the easy entry and exit feature

Multimedia system:
- ➤ Vehicle ➫ Vehicle Settings ➤ Easy Entry/Exit
- Select Steering Wheel & Seat, Steering Wheel Only or Off.

### Operating the memory function

**WARNING** Risk of an accident if the memory function is used while driving

If you use the memory function on the driver's side while driving, you could lose control of the vehicle as a result of the adjustments being made.

- Only use the memory function on the driver's side when the vehicle is stationary.

**WARNING** Risk of entrapment when setting the seat with the memory function

When the memory function adjusts the seat or steering wheel, you and other vehicle occupants – particularly children – could become trapped.

- During the setting procedure of the memory function, ensure that no body parts are in the sweep of the seat or the steering wheel.
- If somebody becomes trapped, immediately release the memory function position button. The adjustment process is stopped.

**WARNING** Risk of entrapment if the memory function is activated by children

Children could become trapped if they activate the memory function, particularly when unattended.

- Never leave children unattended in the vehicle.
When leaving the vehicle, always take the key with you and lock the vehicle.

The memory function can be used when the ignition is switched off.

**Storing**

Seat adjustments for up to three people can be stored and called up using the memory function. The following systems can be selected:

- Seat, backrest and head restraint
- Steering wheel
- Outside mirrors
- Head-up Display

Set the seat, the steering wheel, the Head-up Display and the outside mirrors to the desired position.

Press memory button M together with one of preset position buttons 1, 2 or 3. An acoustic signal sounds. The settings are stored.

**To call up:** press and hold the relevant preset position button 1, 2 or 3 until the front seat, the steering wheel, Head-up Display and outside mirror are in the stored position.

**Stowage areas**

**Notes on loading the vehicle**

**DANGER** Risk of exhaust gas poisoning

Combustion engines emit poisonous exhaust gases such as carbon monoxide. Exhaust gases can enter the vehicle interior if the tailgate is open when the engine is running, especially if the vehicle is in motion.

- Always switch off the engine before opening the tailgate.
- Never drive with the tailgate open.

**WARNING** Risk of injury from unsecured items in the vehicle

If objects, luggage or loads are not secured or not secured sufficiently, they could slip, tip over or be thrown around and thereby hit vehicle occupants.
There is a risk of injury, particularly in the event of sudden braking or a sudden change in direction.

- Always stow objects in such a way that they cannot be thrown around.
- Before the journey, secure objects, luggage or loads against slipping or tipping over.

**WARNING** Risk of injury due to objects being stowed incorrectly

If you do not adequately stow objects in the vehicle interior, they could slip or be tossed around and thereby strike vehicle occupants. In addition, cup holders, open stowage spaces and mobile phone brackets cannot always restrain the objects they contain in the event of an accident.

There is a risk of injury, particularly in the event of sudden braking or a sudden change in direction.

- Always stow objects in such a way that they cannot be tossed about in these or similar situations.
- Always make sure that objects do not project from stowage spaces, parcel nets or stowage nets.
- Close the lockable stowage spaces before starting a journey.
- Stow and secure objects that are heavy, hard, pointed, sharp-edged, fragile or too large in the cargo compartment.

**WARNING** Risk of burning from the tailpipe or tailpipe trim

The tailpipe and tailpipe trim can become very hot. If you come into contact with these car parts, you could burn yourself.

- Always be particularly careful when in the vicinity of the tailpipe and tailpipe trims and supervise children very closely when in this area.
- Before any contact, allow the car parts to cool down.

The driving characteristics of your vehicle are dependent on the distribution of the load within the vehicle. You should bear the following in mind when loading the vehicle:

- never exceed the permissible gross mass or the gross axle weight rating for the vehicle (including occupants). The values are specified on the vehicle identification plate on the vehicle's B-pillar.
- the load must not protrude above the upper edge of the seat backrests.
- always place the load behind unoccupied seats if possible.
- secure the load using the tie-down eyes and distribute the load evenly.
Stowage spaces in the vehicle interior

Overview of the front stowage compartments

1. Stowage compartment in the doors
2. Stowage compartment in the armrest with a multimedia and USB connection
3. Stowage compartment in the front center console with a USB connection
4. Glove box

Locking and unlocking the glove box

- Turn the emergency key a quarter turn clockwise 2 (to lock) or counter-clockwise 1 (to unlock).

Opening the eyeglasses compartment

- Press button 1.

Opening the stowage compartment in the rear armrest
Press release catch 1 and swing the cover of the armrest upwards.

**Through-loading feature in the rear bench seat**

**Locking the release catch of the center rear seat backrest**

**Requirements:**
- The left and center seat backrests are engaged and joined together.

Lock the center seat backrest release catch if you want to secure the cargo compartment from unauthorized access. The center seat backrest can then be folded forwards only together with the left seat backrest.

- Fold the center and left seat backrests forwards.
- **To lock:** slide catch 1 upwards. The release catch of the center seat backrest will be locked.
- **To unlock:** slide catch 1 downwards.

**Securing the ski/snowboard bag in the cargo compartment**

**WARNING** Risk of injury due to using the through-load ski bag incorrectly

The through-load ski bag in conjunction with the lashing straps cannot restrain any objects other than skis. Vehicle occupants could be struck in the event of sudden braking or an accident in the following cases:

- if you transport other heavy or sharp-edged objects in the through-load ski bag
- if you do not secure the through-load ski bag with the lashing straps

*Only store skis in the through-load ski bag.*

*Always secure the through-load ski bag with the lashing straps so that it cannot move around.*
A maximum of four pairs of skis or two snowboards may be transported in the ski and snowboard bag.

- Fold the center rear seat backrest forwards.
- Slide the ski and snowboard bag between the outer seat backrests into the rear passenger compartment.
- Open zip 2.

- Load the ski and snowboard bag with the skis or snowboards.
- Close zip 3.
- Pull the tensioning strap tight by the loose end.
- Cross lashing straps 1.
- Engage hooks 3 of lashing straps 1 in tie-down eyes 4. Make sure that the fasteners of hooks 3 are facing upwards.

**Overview of the tie-down eyes**

Observe the notes on loading the vehicle (→ page 98).

**Overview of bag hooks**

**WARNING** Risk of injury when using bag hooks with heavy objects

The bag hooks cannot restrain heavy objects or items of luggage.
Objects or items of luggage could be thrown around and thereby hit vehicle occupants when braking or abruptly changing directions.

- Only hang light objects on the bag hooks.
- Never hang hard, sharp-edged or fragile objects on the bag hooks.

Observe the notes on loading the vehicle (→ page 98).

The bag hooks can bear a maximum load of 6.6 lbs (3 kg). Do not use them to secure a load.

**EASY-PACK load-securing kit**

Information on snap-in module for the cargo compartment (telescopic rods)
The EASY-PACK load-securing kit allows you to use your cargo compartment for a variety of purposes. The components are located in the stowage space under the cargo compartment floor.

![Diagram](image)

1. **Bag hook**

1. **Telescopic rod with mounting elements and holders**

**Installing a telescopic rod**

![Diagram](image)

1. **Telescopic rod**

**WARNING** Risk of injury due to an open cargo compartment floor

If you drive when the cargo compartment floor is open, objects could be thrown around and thereby strike vehicle occupants. There is a risk of injury, particularly in the event of...
Opening or closing the stowage space under the cargo compartment floor

**WARNING** Risk of injury due to an open cargo compartment floor

If you drive when the cargo compartment floor is open, objects could be thrown around and thereby strike vehicle occupants. There is a risk of injury, particularly in the event of sudden braking or a sudden change in direction.

- Always close the cargo compartment floor before a journey.

Open the cargo compartment floor.

Attach holders 1 in the desired position to the side of the trunk floor.

Insert mounting elements 2 into holders 1.

Extend telescopic rod 1.

Insert telescopic rod 3 into mounting elements 2.

Turn both mounting elements 2 to until you feel them engage.

Close the cargo compartment floor.

Always close the cargo compartment floor before a journey.

sudden braking or a sudden change in direction.

Opening or closing the stowage space under the cargo compartment floor
To open: pull handle 1 upwards.
- Lift the cargo compartment floor upwards using handle 1.
- To close: fold the cargo compartment floor down.

Cup holder
Installing the cup holder in or removing it from the center console (automatic transmission)

> WARNING - Risk of accident or injury when using the cup holder while the vehicle is moving.

The cup holder cannot secure containers while the vehicle is moving. If you use a cup holder while the vehicle is moving, the container may be flung around and liquids may be spilled. The vehicle occupants may come into contact with the liquid and if it is hot, they could be scalded. You could be distracted from traffic conditions and you may lose control of the vehicle.

> Only use the cup holder when the vehicle is stationary.
> Only use the cup holder for containers of the right size.
> Close the container, particularly if the liquid is hot.

To remove: slide catch 2 forwards and pull out cup holder 1.
To install: insert cup holder 1 and slide back catch 2.

The cup holder rubber mat can be removed for cleaning, e.g. using clean, lukewarm water.
Opening or closing the cup holder in the rear armrest

**NOTE** Damage to the rear armrest

When folded out, the rear armrest can be damaged by the weight of your body.

- Do not sit or support yourself on the rear armrest.

**NOTE** Damage to the cup holder

When the rear armrest is folded back the cup holder could become damaged.

- Only fold the rear armrest back when the cup holder is closed.

To open: press cup holder 1 or 2. Cup holder 1 or 2 extends automatically.

To close: push cup holder 1 or 2 back until it engages.

Switching the cooling or heating function for the temperature-controlled cup holder on or off

When the heating function is used, the metal insert of the cup holder is heated. For this reason, you must not reach into the cup holder insert.

To switch on: press button 2 repeatedly until the blue (keep cool) or red (keep warm) indicator lamp on the button lights up.

To switch off: press button 2 repeatedly until the indicator lamp on the button goes out.

Clean the removable rubber mat only with clear, lukewarm water, and clean cup holder 1 only with a soft cloth.
Ashtray and cigarette lighter

Using the ashtray in the front center console

**NOTE** Damage to the stowage compartment under the ashtray

The stowage compartment under the ashtray is not heat resistant and could be damaged if you rest a lit cigarette on it.

- Make sure that the ashtray is fully engaged.

| To open: push up cover 2 of the ashtray on its right or left side. |
| To remove the insert: press insert 1 upwards slightly and pull it out upwards. |
| To re-install the insert: press insert 1 into the holder until it engages. |

Using the rear passenger compartment ashtray

| To open: pull cover 2 out by its top handle edge. |
| To remove the insert: push ribbing 3 from the left side and pull insert 1 upwards and out. |

| To install the insert: install insert 1 from above and press down on the holder until it engages. |

Using the cigarette lighter in the front center console

**WARNING** - Risk of fire and injury from hot cigarette lighter

You can burn yourself if you touch the hot heating element or the socket of the cigarette lighter.

In addition, flammable materials may ignite if:

- you drop the hot cigarette lighter
- a child holds the hot cigarette lighter to objects, for example
- Always hold the cigarette lighter by the knob.
- Always make sure that the cigarette lighter is out of reach of children.
Never leave children unattended in the vehicle.

Requirements:
- The ignition is switched on.

Press in cigarette lighter ①. The cigarette lighter will pop out automatically when the heating element is red-hot.

Sockets
Using the 12 V socket in the front center console

Requirements:
- Only devices with up to a maximum of 180 watts (15 A) are permissible.

Lift up socket cap ①.
- Insert the plug of the device.

If you have connected a device to the 12 V socket, leave the cover of the stowage compartment open.

Using the 12 V socket in the rear passenger compartment

Requirements:
- Only connect devices up to a maximum of 180 watts (15 A).

Pull cover ② out by its top handle edge.
- Lift up the cap on socket ①.

Vehicles with luxury individual rear seats: the 12 V socket is in the stowage compartment in the center console.
Lift up the cap on socket 1.

Using the 115 V socket in the rear passenger compartment

**DANGER** Risk of fatal injury due to damaged connecting cables or sockets

If a suitable device is connected, the 115 V socket will be carrying a high voltage. If the connecting cable or the 115 V socket is pulled out of the trim or is damaged or wet, you could receive an electric shock.

- Only use dry and damage-free connecting cables.
- When the ignition is switched off, ensure that the 115 V socket is dry.
- If the 115 V socket is damaged or gets pulled out of the paneling, immediately have the socket checked or replaced at a qualified specialized workshop.
- Never plug the connecting cable into a 115 V socket that is damaged or has been pulled out of the trim.

**DANGER** Risk of fatal injury due to incorrect handling of the socket

You could receive an electric shock:
- if you reach into the socket.
- if you insert unsuitable devices or objects into the socket.
- Do not reach into the socket.
- Only connect suitable devices to the socket.

**Requirements:**
- Devices must be equipped with a suitable plug which conforms to the standards specific to the country you are in.
- Only devices up to a maximum of 150 W are permitted.
- Multiple sockets are not permitted.

Open flap 3.
Insert the plug of the device into 115 V socket 1. When the on-board electrical system voltage is sufficient, indicator lamp 2 lights up.

**Vehicles with luxury individual rear seats:** the 115 V socket is in the stowage compartment in the center console.

Open flap 3.

Insert the plug of the device into 115 V socket 1. When the on-board electrical system voltage is sufficient, indicator lamp 2 lights up.

**Using the 12 V socket in the cargo compartment**

**Requirements:**
- Only connect devices up to a maximum of 180 watts (15 A).

Lift up cap 1 of the socket and insert the plug of the device.
USB port in the rear passenger compartment

If the ignition is switched on you can charge a USB device, e.g. a mobile phone, at USB port 1 using a suitable charging cable.

Vehicles with luxury individual rear seats: the USB port is in the stowage compartment in the center console.

If the ignition is switched on you can charge a USB device, e.g. a mobile phone, at USB port 1 using a suitable charging cable.

Wireless charging of the mobile phone and connection with the exterior antenna

Notes on wirelessly charging the mobile phone

⚠️ WARNING Risk of injury due to objects being stowed incorrectly

If objects in the vehicle interior are stowed incorrectly, they can slide or be thrown around and hit vehicle occupants. In addition, cup holders, open stowage spaces and mobile phone receptacles cannot always retain all objects they contain. There is a risk of injury, particularly in the event of sudden braking or a sudden change in direction.

- Always stow objects so that they cannot be thrown around in such situations.
- Always make sure that objects do not protrude from stowage spaces, luggage nets or stowage nets.
Close the lockable stowage spaces before starting a journey.
Always stow and secure heavy, hard, pointed, sharp-edged, fragile or bulky objects in the trunk/load compartment.

Observe the notes on loading the vehicle.

**WARNING** Risk of fire from placing objects in the mobile phone stowage compartment

If you place objects in the mobile phone stowage compartment, they may heat up excessively and even catch fire.

Do not place additional objects, especially those made of metal, in the mobile phone stowage compartment.

**NOTE** Damage to objects caused by placing them in the mobile phone stowage compartment

If objects are placed in the mobile phone stowage compartment, they may be damaged by electromagnetic fields.

Do not place credit cards, storage media or other objects sensitive to electromagnetic fields in the mobile phone stowage compartment.

**NOTE** Damage to the mobile phone stowage compartment caused by liquids

If liquids enter the mobile phone stowage compartment, the compartment may be damaged.

Ensure that no liquids enter the mobile phone stowage compartment.

- Depending on the vehicle equipment, the mobile phone is connected to the vehicle’s exterior antenna via the charging module.
- The charging function and wireless connection of the mobile phone to the vehicle’s exterior antenna are only available if the ignition is switched on.
- Small mobile phones may not be able to be charged in every position of the mobile phone stowage compartment.
- Large mobile phones which do not rest flat in the mobile phone stowage compartment may not be able to be charged or connected with the vehicle’s exterior antenna.
- The mobile phone may heat up during the charging process. This can also depend on the applications (apps) currently running.
- To ensure more efficient charging and connection with the vehicle’s exterior antenna, remove the protective cover from the mobile phone. Protective covers which are designed for wireless charging are excluded.
Wireless charging of the mobile phone

Requirements:
- The mobile phone must be suitable for wireless charging (Qi-compatible mobile phone). You can find a list of Qi-compatible mobile phones at:
  http://www.mercedes-benz.com/connect

Place the mobile phone as close to the center of mat 1 as possible with the display facing upwards. When the charging symbol is shown in the multimedia system, the mobile phone is being charged.

Malfunctions during the charging process are shown in the multimedia system display.
- The mat can be removed for cleaning, e.g. using clean, lukewarm water.

Vehicles with luxury individual rear seats
You can charge a mobile phone in the stowage compartment in the center console.

Install/remove the floor mats

**WARNING** Risk of accident due to objects in the driver’s footwell

Objects in the driver’s footwell may impede pedal travel or block a depressed pedal. This jeopardizes the operating and road safety of the vehicle.

- Stow all objects in the vehicle securely so that they cannot get into the driver’s footwell.
- Always install the floor mats securely and as prescribed in order to ensure that there is always sufficient room for the pedals.
- Do not use loose floor mats and do not place floor mats on top of one another.

Fasten the mobile phone behind rubber strap 1.
To install: slide the seat backwards and lay the floor mat in the footwell.
Press studs 1 onto holders 2.
Adjust the corresponding seat.
To remove: pull the floor mat off holders 2.
Remove the floor mat.
**Exterior lighting**

**Information about lighting systems and your responsibility**

The various lighting systems of the vehicle are only aids. The driver of the vehicle is responsible for correct vehicle illumination in accordance with the prevailing light and visibility conditions, legal requirements and traffic situation.

---

**Light switch**

**Operating the light switch**

1. **P** Left standing light
2. **P** Right standing light
3. **P** Parking lights and license plate lamp
4. **Auto** Automatic driving lights (preferred light switch position)
5. **D** Low beam/high beam
6. **B** Switches the rear fog lights on or off

When low beam is activated, the **D** indicator lamp for the parking lights is deactivated and replaced by the **P** low beam indicator lamp.

- Always park your vehicle safely and in a well-lit area, in accordance with the relevant legal stipulations.

**NOTE** Battery discharging by operating the standing lights

Operating the standing lights over a period of hours puts a strain on the battery.

- Where possible, switch on the right **P** or left **P** parking light.

In the case of severe battery discharging, the standing lights or parking lights are automatically switched off to facilitate the next engine start.

The exterior lighting (except standing and parking lights) switches off automatically when the driver’s door is opened.
• Observe the notes on surround lighting (→ page 119).

**Automatic driving lights function**
The parking lights, low beam and daytime running lamps are switched on automatically depending on the ignition status and the ambient light.

⚠️ **WARNING** Risk of accident when the low beam is switched off in poor visibility

When the light switch is set to **auto**, the low beam may not be switched on automatically if there is fog, snow or other causes of poor visibility such as spray.

- In such cases, turn the light switch to **on**.

The automatic driving lights are only an aid. You are responsible for vehicle lighting.

**Switching the rear fog lights on or off**

**Requirements:**

- The light switch is in the **on** or **auto** position.

 ➤ Press the **on** button.
Please observe the country-specific laws on the use of rear fog lamps.

---

**Operating the combination switch for the lights**

- **1** High-beam headlamps
- **2** Turn signal, right
- **3** High-beam flasher
- **4** Turn signal, left

➤ Use the combination switch to activate the desired function.
High-beam headlamps

- **To switch on:** turn the light switch to the [SLD] or [AUTO] position.
- Press the combination switch beyond the point of resistance in the direction of arrow 1.
  When the high beam is activated, the indicator lamp for low beam [SLD] is deactivated and replaced by the indicator lamp for the high beam [HL].
- **To switch off:** move the combination switch back to its starting position.

High-beam flasher

- Pull the combination switch in the direction of arrow 3.

Turn signals

- **To indicate briefly:** press the combination switch briefly to the point of resistance in the direction of arrow 2 or 4.
  The corresponding indicator will flash three times.

- **To indicate permanently:** press the combination switch beyond the point of resistance in the direction of arrow 2 or 4.

**Vehicles with Active Lane Change Assist**
The Active Lane Change Assist can:
- lengthen turn signal operation for the duration of the lane change if the driver has activated the indicator.
- automatically activate the turn signal indicator if the driver indicated to turn in that direction immediately beforehand but a lane change was not immediately possible.

Activating/deactivating the hazard warning lights

- Press button 1.
Cornering light

Cornering light function

The cornering light improves the illumination of the roadway over a wide angle in the turning direction, enabling better visibility on tight bends, for example. It can be activated only when the low beam is switched on.

The function is active:

- At speeds below 25 mph (40 km/h) when the turn signal light is switched on or the steering wheel is turned
- At speeds between 25 mph (40 km/h) and 45 mph (70 km/h) when the steering wheel is turned

Traffic circle and intersection function: the cornering light is activated on both sides through an evaluation of the current GPS position of the vehicle. It remains active until after the vehicle has left the traffic circle or the intersection.

Adaptive Highbeam Assist

Adaptive Highbeam Assist function

⚠️ **WARNING** Risk of accident despite Adaptive Highbeam Assist

Adaptive Highbeam Assist does not recognize the following road users:

- Road users without lights, e.g. pedestrians
- Road users with poor lighting, e.g. cyclists
- Road users whose lighting is obstructed, e.g. by a barrier

On very rare occasions, Adaptive Highbeam Assist may fail to recognize other road users with their own lighting, or may recognize them too late.

In these or similar situations, the automatic high beam is not deactivated or is activated despite the presence of other road users.

- Always observe the traffic carefully and switch off the high beam in good time.

Adaptive Highbeam Assist cannot take into account road, weather or traffic conditions. Detection may be restricted:

- in poor visibility, e.g. fog, heavy rain or snow
- if there is dirt on the sensors or the sensors are obscured

Adaptive Highbeam Assist is only an aid. You are responsible for adjusting the vehicle's lighting to the prevailing light, visibility and traffic conditions.
Adaptive Highbeam Assist switches automatically between:

- Low-beam headlamps
- High-beam headlamps

At speeds above 19 mph (30 km/h):
- If no other road users are detected, the high beam will be switched on automatically.

The high beam switches off automatically:
- At speeds below 16 mph (25 km/h).
- If other road users are detected.
- If street lighting is sufficient.

At speeds above approximately 31 mph (50 km/h):
- The headlamp range of the low beam is regulated automatically based on the distance to other road users.

The system’s optical sensor is located behind the windshield near the overhead control panel.

Switching Adaptive Highbeam Assist on/off

- **To switch on:** turn the light switch to the **AUTO** position.
- **To switch off:** switch off the high beam using the combination switch.

Switching the daytime running lamps on/off

Multimedia system:

- Vehicle ➤ Light Settings ➤ Daytime Run. Lights
- Activate ☑ or deactivate ☐ the function.

Setting the exterior lighting switch-off delay time

Multimedia system:

- Vehicle ➤ Light Settings ➤ Ext. Light Switch Off
- Set the switch-off delay time.

Setting the surround lighting

Multimedia system:

- Vehicle ➤ Light Settings ➤ Locator Lighting
- Activate ☑ or deactivate ☐ the function.

If the surround lighting is switched on, the exterior lighting remains lit for 40 seconds after the
vehicle is unlocked. When you start the vehicle, the surround lighting is deactivated and the automatic driving lights are activated.

**Interior lighting**

**Adjusting the interior lighting**

**Front overhead control panel**

- 1: Front left reading lamp
- 2: Automatic interior lighting control
- 3: Front interior lighting
- 4: Rear interior lighting
- 5: Front right reading lamp

- **To switch on or off:** press button 1 – 5 accordingly.

**Control panel in the rear passenger compartment**

- 6: Rear reading lamp

- **To switch on or off:** press button 6.

**Adjusting the ambient lighting**

Multimedia system:

- Vehicle ➔ Light Settings ➔ Ambient Light

**Setting the color**

- Select Color.
- Set a color.

**Adjusting the brightness**

- Select Brightness.
- Set a brightness value.

**Activating the brightness for zones**

- Select Brightness Zones.
- Activate ✔ or deactivate ☐ the function.
  
  The Display, Front and Rear zones can be set separately.

**Activating multi-color lighting**

- Select Multi-color.
- Activate ✔ or deactivate ☐ the function.
  
  There are ten preset color combinations available.
Activating multi-color animation

- Select Multi-color Anim..
- Activate ☑ or deactivate ☐ the function.
  The chosen color combination changes at predefined intervals.

Activating dependency on air conditioning settings

- Select Climate.
- Activate or deactivate the function.
  If changes are made to the temperature setting in the vehicle, the color of the ambient lighting changes briefly.

Activating welcome lighting

- Select Welcome.
- Activate ☑ or deactivate ☐ the function.
  When the vehicle is unlocked, a special interior lighting sequence runs.

Setting the interior lighting switch-off delay time

Multimedia system:

- Vehicle ➔ Light Settings ➔ Int. Light Switch Off
- Set the switch-off delay time.

Windshield wiper and windshield washer system

Switching the windshield wiper on/off

1. Windshield wipers off
2. Intermittent wiping, normal
3. Intermittent wiping, frequent
Continuous wiping, slow
Continuous wiping, fast

- Turn the combination switch to the corresponding position 1 – 5.
- **Single wipe/washing:** push the button on the combination switch in the direction of arrow 1.
  - Single wipe
  - Wipes with washer fluid

### Changing the windshield wiper blades

| WARNING | Risk of becoming trapped if the windshield wipers are switched on while wiper blades are being replaced |

If the windshield wipers begin to move while you are changing the wiper blades, you can be trapped by the wiper arm.

- Always switch off the windshield wipers and the ignition before changing the wiper blades.

#### Moving the wiper arms to the change position

- Switch the ignition on and switch off again immediately.
- Within around 15 seconds, press the button on the combination switch for approximately three seconds (→ page 121). The wiper arms will move into the change position.

#### Removing the wiper blades

- Fold the wiper arms away from the windshield.

  - Hold the wiper arm with one hand. With the other hand, turn the wiper blade in the direction of arrow 1 away from the wiper arm as far as it will go.
  - Slide catch 2 in the direction of arrow 3 until it engages in the removal position.
  - Remove the wiper blade from the wiper arm in the direction of arrow 4.
Installing the wiper blades

- Insert the new wiper blade into the wiper arm in the direction of arrow 1.
- Slide catch 2 in the direction of arrow 3 until it engages in the locking position.
- Make sure that the wiper blade sits correctly.
- Fold the wiper arms back onto the windshield.

Switch the ignition on.

Press the button on the combination switch (→ page 121). The wiper arms will move into the original position.

Maintenance display

Remove protective film 1 from the maintenance display on the tip of the newly installed wiper blades.

If the color of the maintenance display changes from black to yellow, the wiper blades should be replaced.

The duration until the color changes varies depending on the usage conditions.

Maintenance display

Mirrors

Operating the outside mirrors

WARNING Risk of injury from adjusting the vehicle settings while the vehicle is in motion

You could lose control of the vehicle in the following situations:
- if you adjust the driver’s seat, the head restraint, the steering wheel or the mirror while the vehicle is in motion
- if you fasten your seat belt while the vehicle is in motion
Before starting the engine: adjust the driver’s seat, the head restraint, the steering wheel or the mirror and fasten your seat belt.

**WARNING** Risk of accident due to misjudgment of distances when using the passenger mirror

The outside mirror on the front passenger side reflects objects on a smaller scale. The objects in view are in fact closer than they appear.

As a result, you may misjudge the distance between you and the road user driving behind you, for example, when changing lanes.

Therefore, always look over your shoulder in order to ensure that you are aware of the actual distance between you and the road users driving behind you.

---

**Folding the outside mirrors in/out**

Briefly press switch 1.

**Resetting the outside mirrors**

Briefly press switch 1.

**Adjusting the outside mirrors**

- Press buttons 3 or 4 to select the outside mirror to be adjusted.
- Press button 2 to adjust the position of the mirror glass.

**Engaging the outside mirrors**

- Press and hold button 1.
  You will hear a click and the mirror will audibly engage in position. The outside mirror is set to the correct position.

**Automatic anti-glare mirrors function**

- **WARNING** Risk of burns and poisoning due to the anti-glare mirror electrolyte

Electrolyte may escape if the glass in an automatic anti-glare mirror breaks.

The electrolyte is harmful and causes irritation. It must not come into contact with your skin, eyes, respiratory organs or clothing or be swallowed.
If you come into contact with electrolyte, observe the following:
- Rinse the electrolyte from your skin and seek medical attention immediately.
- If electrolyte comes into contact with your eyes, rinse them thoroughly with clean water and seek medical attention immediately.
- If the electrolyte is swallowed, immediately rinse your mouth out thoroughly. Do not induce vomiting. Seek medical attention immediately.
- Immediately change out of clothing which has come into contact with electrolyte.
- If an allergic reaction occurs, seek medical attention immediately.

**System limitations**
The system does not go into anti-glare mode in the following situations:
- The engine is switched off
- Reverse gear is engaged
- The interior lighting is switched on

**Function of the front-passenger outside mirror parking position**
The parking position makes parking easier. The front-passenger outside mirror tilts downwards and shows the rear wheel on the front-passenger side in the following situations:
- the parking position is stored (→ page 125)
- the passenger mirror is selected
- reverse gear is engaged

The front-passenger outside mirror moves back to its original position in the following situations:
- you shift the transmission to another transmission position
- at speeds greater than 9 mph (15 km/h)

**Storing the parking position of the front-passenger outside mirror using reverse gear**

1. button for the outside mirror
2. button for the outside mirror on the driver’s side
Select the front-passenger outside mirror using button 2.
Engage reverse gear.
Move the front-passenger outside mirror into the desired parking position using button 3.

Calling up
- Select the front-passenger outside mirror using button 2.
- Engage reverse gear.
The front-passenger outside mirror will move to the stored parking position.

Activating/deactivating the automatic mirror folding function
Multimedia system:
- Vehicle ➔ Vehicle Settings ➔ Autom. Mirror Folding
- Activate ✔ or deactivate ☐ the function.

Operating the sun visors
Using the single sun visor

- Glare from the front: fold sun visor 1 down.
- Glare from the side: swing sun visor 1 to the side.

- Vehicles with an extendable sun visor: slide sun visor 1 horizontally as required.

Infrared reflective windshield function
The infrared reflective windshield is coated and reduces the build-up of heat in the vehicle interior.

The coating shields the vehicle interior from radio waves up to the gigahertz range.

Radio-controlled equipment, such as toll systems, can only be mounted on areas of the windshield which are permeable to radio waves. Areas permeable to radio waves are best visible from outside the vehicle when the windshield is illuminated using an external light source.
Overview of climate control systems

Notes on climate control

An interior air filter must always be used so that the air conditioning system, pollution level monitoring and the air filtering function work correctly. Make sure that the filter is installed correctly and the filter housing in the engine compartment is closed correctly using the cap and always tightly sealed when in operation. Use filters recommended and approved by Mercedes-Benz. Always have service work carried out at a qualified specialist workshop.

Overview of the control panel for dual-zone automatic climate control

The indicator lamps on the buttons indicate that the corresponding function is activated.

1. \(\uparrow\downarrow\) Sets the temperature, left
2. \(\rightarrow\) Sets the air distribution
3. \(\rightarrow\uparrow\) Sets the airflow or switch off climate control
4. AUTO Sets climate control to automatic mode (→ page 130)
5. DEF Defrosts the windshield
6. MENU Calls up the air conditioning menu
7. 
     Switches the rear window heater on/off
8. 
     Activates or deactivates synchronization (→ page 130)
9. 
     Switches air-recirculation mode on/off (→ page 131)
10. \(\rightarrow\) Switches the A/C function on/off (→ page 129)
11. \(\downarrow\uparrow\) Sets the temperature, right

Overview of the control panel for 3-zone automatic climate control

The indicator lamps on the buttons indicate that the corresponding function is activated.

1. \(\uparrow\downarrow\) Sets the temperature, left
2. \(\rightarrow\) Sets the air distribution, left
3. \(\rightarrow\uparrow\) Sets the airflow or switches off climate control
4  **AUTO**  Sets climate control to automatic mode (→ page 130)
5  **Defrost**  Defrosts the windshield
6  **Call up menu**  Calls up the air conditioning menu
   Switches residual heat on/off (→ page 131)
7  **Switch back**  Switches the rear window heater on/off
8  **A/C**  Switches the A/C function on/off (→ page 129)
9  **Recirculation**  Switches air-recirculation mode on/off (→ page 131)
10  **Set temp.**  Sets the air distribution, right
11  **Set temp.**  Sets the temperature, right

**Rear operating unit**
You can set the temperature for the entire rear passenger compartment using buttons 1 or 2.

---

**Operating the climate control system**

**Switching climate control on/off**

- **To switch on:** set the airflow to level 1 or higher using the [ ] button.
- **To switch off:** set the airflow to level 0 using the [ ] button.

---

**i** If climate control is switched off, the windows may fog up more quickly. Switch off climate control only briefly.

---

**Switching the A/C function on/off via the control panel**

The A/C function heats, cools and dehumidifies the vehicle's interior air.

- Press the [A/C] button.

Switch off the A/C function only briefly otherwise the windows may fog up more quickly. Condensation may drip from the underside of the vehicle when cooling mode is active. This is not a sign that there is a malfunction.

---

**Activating/deactivating the A/C function via the multimedia system**

Multimedia system:

- Vehicle ➔ Climate Control ➔ A/C

The A/C function heats, cools and dehumidifies the vehicle's interior air.
Activate [✓] or deactivate [ ] the function.

**Setting climate control to automatic mode**

In automatic mode, the set temperature is controlled and maintained at a constant level by the air supply.

- Press the [AUTO] button.

To switch to manual mode: press the [ ] or [ ] button.

**Climate style**

**Climate style function**

In automatic mode, you can select the following climate style settings for the driver’s and front passenger areas:

- **FOCUS:** high airflow, slightly cooler setting
- **MEDIUM:** medium airflow, standard setting
- **DIFFUSE:** low airflow, slightly warmer and draft-free setting

**Setting the climate style**

Multimedia system:

- [Vehicle] [Climate Control] [Climate Mode]
- Select **FOCUS**, **MEDIUM** or **DIFFUSE**.

To feel the effect of the climate style, the [ ] function must be active (→ page 130).

**Overview of the air distribution settings**

The symbols on the display indicate which vents the airflow is being directed through:

- [ ] defroster vents
- [ ] center and side air vents
- [ ] footwell vents
- [ ] center, side and footwell vents
- [ ] defroster and footwell vents
- [ ] all vents
- [ ] defroster, middle and side air vents
- [ ] automatic air distribution

**Activating/deactivating the climate control synchronization function via the control panel**

The climate control can be operated centrally using the synchronization function. The temperature and air distribution setting for the driver side is adopted automatically for the front passenger side.

- Press the [SYNC] button.

The synchronization function is deactivated if the settings for one of the other climate zones are changed.

**Activating or deactivating the climate control synchronization function using the multimedia system**

Multimedia system:

- [Vehicle] [Climate Control] [SYNC]

The climate control can be controlled centrally using the synchronization function. The tempera-
ture setting is automatically adopted for all climate zones.
>
Activate ☑ or deactivate ☐ the function.

Removing condensation from the windows

Windows fogged up on the inside
>
Press the AUTO button.
>
If the windows continue to fog up: press the button.

Windows fogged up on the outside
>
Switch on the windshield wipers.
>
Press the AUTO button.

Switching air-recirculation mode on/off
>
Press the button.
>
The interior air will be recirculated.

Air-recirculation mode automatically switches to fresh air mode after some time.

If air-recirculation mode is switched on, the windows may fog up more quickly. Switch on air-recirculation mode only briefly.

Switching the residual heat on or off

Requirements:
- The vehicle is parked.

It is possible to make use of the residual heat from the engine to continue heating or ventilating the front compartment of the vehicle for approximately 30 minutes.

To switch on: press the button.

Residual heat is switched off automatically.

Activating/deactivating ionization

Multimedia system:

Vehicle ⏯ Climate Control ⏯ Ionization

Ionization cleans and refreshes the interior air of the vehicle. The ionization of the interior air is odorless.

Activate ☑ or deactivate ☐ the function.

Fragrance system

Setting the fragrance system

Requirements:
- Automatic climate control is activated.
- The glove box is closed.

Multimedia system:

Vehicle ⏯ Climate Control ⏯ Air Freshener

The fragrance system distributes a pleasant fragrance throughout the vehicle interior from a flask located in the glove box.

To set the intensity: select High, Medium, Low or Off.
Inserting or removing the flacon of the fragrance system

**WARNING** Risk of injury from liquid perfume

If children open the flacon, they could drink the liquid perfume or it could come into contact with their eyes.

- Do not leave children unattended in the vehicle.
- Consult a doctor immediately if liquid perfume has been drunk.
- If liquid perfume comes into contact with your eyes or skin, rinse your eyes with clean water.
- If symptoms continue, consult a doctor.

**ENVIRONMENTAL NOTE** Environmental damage due to improper disposal of full flacons

- Full flacons must not be disposed of with household waste.
- Full flacons must be taken to a harmful substance collection point.

**To insert:** slide flacon 2 into the holder as far as it will go.

**To remove:** pull out flacon 2.

If you do not use genuine Mercedes-Benz interior perfumes, observe the manufacturers' safety notices on the perfume packaging.
Dispose of the genuine Mercedes-Benz interior perfume flacon when it is empty and do not refill it.

**Refillable flacon**
- Unscrew cap 1 of empty flacon 2.
- Fill flacon 2 with a maximum of 0.5 fl. oz. (15 ml).
- Screw cap 1 back onto flacon 2.

Always refill the empty refillable flacon with the same perfume. Observe the separate information sheet attached to the flacon.

**Information on the windshield heater**
The windshield heater is switched on automatically if the button is activated.

After the vehicle is started, the windshield heater is switched on automatically as required.

**Air vents**

**Adjusting the front air vents**

**WARNING** - Danger of burns or frostbite due to being too close to the air vents

Very hot or very cold air can flow from the air vents.

This could result in burns or frostbite in the immediate vicinity of the air vents.

- Make sure that all vehicle occupants always maintain a sufficient distance to the air vents.
- If necessary, direct the airflow to another area of the vehicle interior.

To guarantee the flow of fresh air through the air vents into the vehicle interior, comply with the following:
- Always keep the vents and the ventilation grille in the vehicle interior free.
- Keep the air inlet free of deposits (→ page 356).

**To open or close**: turn the center of air vent 1 to the left or right as far as it will go.

**To adjust the air direction**: hold air vent 1 in the center and move it up or down or to the left or right.
Adjusting the rear air vents

To open or close: hold rear air vent 1 in the center and turn it left (open) or right (closed) as far as it will go.

To adjust the air direction: hold rear air vent 1 in the center and move it up or down or to the left or right.

Opening or closing the air vent in the glove box

**NOTE** Damage to temperature-sensitive objects in the glove box

Temperature-sensitive objects stored in the glove box may be damaged by the air vent located inside it.

- Close the air vent when you heat the vehicle.
- At high outside temperatures, open the air vent and switch on the A/C function.

The automatic climate control must be switched on to cool the glove box.

To open or close: turn controller 1 to the left or right.
Driving

Switching the power supply or ignition on without starting the engine

**WARNING** Risk of accident and injury due to children left unattended in the vehicle

If children are left unattended in the vehicle, they could:
- open doors, thereby endangering other persons or road users.
- get out of the vehicle and be hit by oncoming traffic.
- operate vehicle equipment and become trapped, for example.

In addition, children could also set the vehicle in motion, for example, by:
- releasing the parking brake.
- shifting the automatic transmission out of park position \( P \).
- starting the engine

**Never leave children and animals unattended in the vehicle.**

**When leaving the vehicle, always take the SmartKey with you and lock the vehicle.**

**Keep the SmartKey out of the reach of children.**

**DANGER** Risk of fatal injuries due to exhaust gases

Combustion engines emit poisonous exhaust gases such as carbon monoxide. Inhaling these exhaust gases is hazardous to health and can lead to poisoning.

**Never leave the engine running in an enclosed space without sufficient ventilation.**

**WARNING** Risk of fire caused by flammable material on the exhaust system

Flammable materials brought in by either animals or environmental influences may ignite if they come into contact with hot parts of the engine or exhaust system.

**Therefore, check regularly that there are no flammable materials in the engine compartment or on the exhaust system.**

**Requirements:**
- The SmartKey is in the vehicle and is recognized.
- The brake pedal is not depressed.
To switch on the power supply: press button 1 once. You can activate the windshield wipers, for example.

The power supply is switched off again if the following conditions are met:
- You open the driver’s door.
- You press button 1 twice.

To switch on the ignition: press button 1 twice. The indicator lamps in the instrument cluster light up.

The ignition is switched off again if one of the following conditions is met:
- You do not start the vehicle within 15 minutes and the transmission is in position P or the electric parking brake is applied.
- You press button 1 once.

Starting the vehicle

Starting the vehicle with the start/stop button

Requirements:
- The SmartKey is in the vehicle and is recognized.
- Shift the transmission to position P or N.
- Depress the brake pedal and press button 1 once.

If the vehicle does not start: switch off non-essential consumers and press button 1 once.

If the vehicle still does not start and the Place the Key in the Marked Space See Operator’s Manual display message also appears in the multifunction display: start the vehicle in emergency operation mode.

You can switch off the engine while driving by pressing button 1 for about three seconds or by pressing button 1 three times within a second. Be sure to observe the safety notes under “Driving tips”.

Function of Emotion Start
Start the vehicle with the start/stop button (→ page 136) and simultaneously pull one of the steering wheel paddle shifters 1 or 2.
- The idle speed is increased briefly when starting the engine.
- The exhaust gas flaps are opened (sporty characteristic) (→ page 146).

Starting the vehicle in emergency operation mode
If the vehicle does not start and the message appears in the multifunction display, you can start the vehicle in emergency operation mode.

Start the vehicle with the start/stop button (→ page 136) and simultaneously pull one of the steering wheel paddle shifters 1 or 2.
- The idle speed is increased briefly when starting the engine.
- The exhaust gas flaps are opened (sporty characteristic) (→ page 146).

Starting the vehicle in emergency operation mode
If the vehicle does not start and the message appears in the multifunction display, you can start the vehicle in emergency operation mode.

Starting the vehicle via Remote Online services
Cooling or heating the vehicle interior before commencing your journey
This function is not available in all countries. If you start the vehicle via your smartphone, the previously selected air conditioning adjustment is active. Ensure the following before starting the engine:
- The legal stipulations in the area where your vehicle is parked allow engine starting via smartphone.
- It is safe to start and run the engine where your vehicle is parked.
- The fuel tank is sufficiently filled.
- The starter battery is sufficiently charged.

Charging the battery before commencing your journey
This function is not available in all countries.
- If the vehicle battery is discharged, you receive a message on your smartphone.
You can then start the vehicle with the smartphone to charge the battery.

The vehicle is automatically switched off after ten minutes.

Ensure the following before starting the engine:
- The legal stipulations in the area where your vehicle is parked allow engine starting via smartphone.
- It is safe to start and run the engine where your vehicle is parked.
- The fuel tank is sufficiently filled.

Starting the vehicle

**WARNING** Risk of crushing or entrapment due to unintentional starting of the engine

Limbs could be crushed or trapped if the engine is started unintentionally during service or maintenance work.

Always secure the engine against unintentional starting before carrying out maintenance or repair work.

**Requirements:**
- Park position P is selected.
- The anti-theft alarm system is not activated.
- The panic alarm is not activated.
- The hazard warning lights are switched off.
- The hood is closed.
- The doors are closed and locked.
- The windows and sliding sunroof are closed.

Start the vehicle using the smartphone:
- After every vehicle start, the engine runs for ten minutes.
- You can carry out a maximum of two consecutive starting attempts. The vehicle must be started once with the SmartKey before trying to start the vehicle again with the smartphone.
- You can stop the vehicle again at any time.
- Further information can be found in the smartphone app.

**Securing the engine against starting before carrying out maintenance or repair work:**

- Switch on the hazard warning lights.
- Unlock the doors.
- Open a side window or the sliding sunroof.

**Breaking-in notes**

To preserve the engine during the first 1,000 miles (1,500 km):
- drive at varying road speeds and engine speeds.
- do not drive faster than 85 mph (140 km/h).
- only briefly allow the engine to reach a maximum engine speed of 4,500 rpm (4,500 rpm).
- drive the vehicle in drive program C.
- change gear before the tachometer needle is ⅔ of the way to the red area of the tachometer.
• do not shift down a gear manually in order to brake.
• avoid overstraining the vehicle, e.g. driving at full throttle.
• do not depress the accelerator pedal past the pressure point (kickdown).
• only increase the engine speed gradually and accelerate the vehicle to full speed after 1,000 miles (1,500 km).

This also applies when the engine or parts of the drivetrain have been replaced.

Please also observe the following breaking-in notes:

• In certain driving and driving safety systems, the sensors adjust automatically while a certain distance is being driven after the vehicle has been delivered or after repairs. Full system effectiveness is not reached until the end of this teach-in process.
• Brakepads, brake discs and tires that are either new or have been replaced only achieve optimum braking effect and grip after several hundred kilometers of driving. Com-

pensate for the reduced braking effect by applying greater force to the brake pedal.

Notes on the locking differential
After a breaking-in period of 2000 miles (3000 km) the oil on the locking differential should be changed in a qualified specialist workshop. This oil change prolongs the service life of the locking differential.

Notes on driving

⚠️ WARNING Risk of accident due to unsuitable footwear
Operation of the pedals may be restricted due to unsuitable footwear such as:
• Shoes with platform soles
• Shoes with high heels
• Slippers

⚠️ WARNING Risk of accident when switching off the ignition when driving
If you switch off the ignition while driving, safety functions are restricted or no longer available. This may affect the power steering
system and the brake force boosting, for example. You will then need to use considerably more force to steer and brake.

- Do not switch off the ignition while driving.

⚠️ **DANGER** Risk of fatal injuries due to exhaust gases

Combustion engines emit poisonous exhaust gases such as carbon monoxide. Inhaling these exhaust gases is hazardous to health and can lead to poisoning.

- Never leave the engine running in an enclosed space without sufficient ventilation.

⚠️ **WARNING** Risk of skidding and of an accident due to shifting down on slippery road surfaces

If you shift down on slippery road surfaces to increase the engine braking effect, the drive wheels may lose traction.

- Do not shift down on slippery road surfaces to increase the engine braking effect.

⚠️ **DANGER** Risk of fatal injury due to poisonous exhaust gases

If the tailpipe is blocked or sufficient ventilation is not possible, poisonous exhaust gases such as carbon monoxide may enter the vehicle. This is the case if the vehicle gets stuck in snow, for example.

- Keep the tailpipe and the area around the vehicle free from snow when the engine or the stationary heater are running.
- Open a window on the windward side of the vehicle to ensure an adequate supply of fresh air.

⚠️ **WARNING** Risk of accident due to the brake system overheating

If you leave your foot on the brake pedal when driving, the brake system may overheat. This increases the braking distance and the brake system may even fail.
Never use the brake pedal as a footrest.

Do not depress the brake pedal and the accelerator pedal at the same time while driving.

**NOTE**

Do not depress the brake pedal continuously whilst driving.

To use the braking effect of the engine, shift to a lower gear in good time.

**WARNING** Risk of accident due to incorrect gearshifting

If the engine speed is higher than the idle speed and you engage the transmission position **D** or **R**, the vehicle may accelerate sharply.

If you engage the transmission position **D** or **R** always depress the brake pedal firmly and do not accelerate at the same time.

**NOTE** Damage to the catalytic converter due to non-combusted fuel

The engine is not running smoothly and is misfiring. Non-combusted fuel may get into the catalytic converter.

Only depress the accelerator pedal slightly.

Have the cause rectified immediately at a qualified specialist workshop.

**NOTE** Damage to the drivetrain and engine when pulling away

Do not warm up the engine while the vehicle is stationary. Pull away immediately.

Avoid high engine speeds and driving at full throttle until the engine has reached its operating temperature.

Limited braking effect on salt-treated roads:

- Due to salt build-up on the brake discs and brakepads, the braking distance can increase considerably or result in braking only on one side
- Maintain a much greater safe distance to the vehicle in front

To remove the layer of salt:

- Brake occasionally while paying attention to the traffic conditions
- Carefully depress the brake pedal at the end of the journey and when starting the next journey

**Function of rear axle steering**

Depending on the speed, rear axle steering adapts the track of the rear axle to the position of the front wheels. Together with the steering input of the front wheels, this results in greater mobility and improved stability.
Rear axle steering has the following characteristics:
- Reduced steering effort and turning radius, resulting in reduced parking effort
- Improved driving stability, e.g. on curves
- More direct steering, resulting in improved control of the vehicle

Tips for the AMG ceramic high-performance composite brake system

The brake system is designed for heavy loads. This may lead to noise when braking. This effect can also occur after washing the vehicle.
The noise depends on the following factors:
- Speed
- Brake force
- Environmental conditions, e.g. temperature and air humidity

Have the brake system checked at a qualified specialist workshop after it has been subjected to extreme loads.

ECO start/stop function

Operation of the ECO start/stop function
All vehicles (except Mercedes-AMG GT 63 4MATIC+ and GT 63 S 4MATIC+)
The engine is switched off automatically in the following situations if all vehicle conditions for an automatic engine stop are met:
- you have selected drive program [C].
- you brake the vehicle to a standstill in transmission position [D] or [N].
- you engage transmission position [P].
- you depress the brake pedal when driving at speeds below 15 mph (20 km/h).

The needle of the tachometer points to zero in the multifunction display.
The green [A] symbol appears in the multifunction display and in the display button when the vehicle is stationary.
If not all the vehicle conditions are met, the yellow [B] symbol appears in the multifunction display and in the display button.
The engine is restarted automatically if:
- you release the brake pedal in transmission position [D] when the HOLD function is not active.
- you engage transmission position [D] or [R].
- you release the brake pedal, the vehicle is not in glide mode and it starts to move on a gentle downhill gradient at a speed below 2 mph (3 km/h).
- you depress the accelerator pedal.
- you permanently activate manual gearshift-
ing.
- an automatic engine start is necessary.

If the engine was switched off by the ECO start/stop function and you leave the vehicle, a warning tone sounds. The Vehicle Operational Switch the Ignition Off Before Exiting display message also appears in the multifunction display. If you do not switch off the ignition, the ignition is automatically switched off after three minutes.
Mercedes-AMG GT 63 4MATIC+ and GT 63 S 4MATIC+

The engine is automatically switched off if the following conditions are met:

- you have selected drive program [C].
- you brake the vehicle to a standstill in transmission position [D] or [N].
- if all vehicle conditions for an automatic engine stop are met.

The green [A] symbol appears in the multifunction display and in the display button when the vehicle is stationary.

If not all the vehicle conditions are met, the yellow [C] symbol appears in the multifunction display and in the display button.

The engine is restarted automatically if:

- you release the brake pedal in transmission position [D] when the HOLD function is not active.
- you shift from transmission position [P].
- you engage transmission position [D] or [R].
- you depress the accelerator pedal.
- you permanently activate manual gearshift.
- you pull the left-hand or right-hand steering wheel paddle shifter.
- an automatic engine start is necessary.

If the engine was switched off by the ECO start/stop function and you leave the vehicle, a warning tone sounds. The Vehicle Operational Switch the Ignition Off Before Exiting display message also appears in the multifunction display. If you do not switch off the ignition, the ignition is automatically switched off after three minutes.

Deactivating or activating the ECO start/stop function

Press display button 1. The display button indicates current status of the ECO start/stop function:

- OFF (red): deactivated
- (green): activated
- (yellow): inactive
Depending on the model and the vehicle equipment, the button may also be located at a different position in the center console.

### ECO display function

The ECO display summarizes your driving characteristics from the start of the journey to its completion and assists you in achieving the most economical driving style.

You can influence consumption if you:
- drive with particular care
- drive the vehicle in drive program
- observe the gearshift recommendations

The inner segment lights up and the outer segment fills up:
- 1 moderate acceleration
- 2 gentle deceleration and rolling
- 3 consistent speed

The inner segment does not light up and the outer segment empties:
- 1 sporty acceleration
- 2 heavy braking
- 3 fluctuations in speed

You have driven economically when:
- the three outer segments are completely filled simultaneously
- the ECO display lights up

The additional range achieved as a result of your driving style in comparison to a driver with a very sporty driving style is shown under Bonus fr. Start. The range displayed does not indicate a fixed reduction in consumption.

### ECO Assist function

#### All vehicles (except Mercedes-AMG GT 63 4MATIC+ and GT 63 S 4MATIC+):

ECO Assist analyzes data for the vehicle’s expected route. This allows the system to optimally adjust the driving style for the route ahead, save fuel and recuperate.

ECO Assist is available in the following drive programs:
- [C] (Slippery)
- [C] (Comfort)
- [C] (Individual): only with drive setting "Reduced" or "Moderate" (→ page 148)

If the system detects an event ahead, e.g. a speed limit or a traffic circle, it appears on the multifunction display.
Available route results

1 Event ahead
2 Distance to the event ahead
3 "Foot off the accelerator" prompt

A different number of segments 2 will light up around the symbol depending on the distance to the event ahead:
- Few segments: the event ahead is near
- Many segments: the event ahead is further away

When the vehicle nears an event, ECO Assist will calculate the optimal speed for maximum fuel economy and recuperative energy based on the distance, speed and downhill gradient. "Foot off the accelerator" 3 symbol will appear on the multifunction display.

If the driver lifts off the accelerator pedal in good time, the remaining segments on the display will turn green until the event shown is reached. The drivetrain will be set for maximum fuel economy. In the 14 drive program with drive setting "Reduced" or "Moderate", the vehicle will coast, with the combustion engine switched off if necessary.

If there is no response to "Foot off the accelerator" 3 prompt, the segments will remain white.

The event will be shown for a short time after it has been passed.

If the event involves a vehicle ahead and when the coast-down recommendation is given, all segments will immediately turn green once there is a response to "Foot off the accelerator" 3 prompt.

If the system does not intervene during the event ahead, nothing will be displayed. The system is passive.

In the 14 drive program, only the result "Vehicle ahead" is displayed.

**System limitations**

ECO Assist can function more precisely if the route is maintained when route guidance is active. The basic function is also available without active route guidance. Not all information and traffic situations can be foreseen. The quality depends on the map data.

ECO Assist is only an aid. The driver is responsible for keeping a safe distance to the vehicle in front, for vehicle speed and for braking in good time. The driver must be ready to brake at all
times irrespective of whether the system intervenes.
The system may be impaired or may not function in the following situations:
- If there is poor visibility, e.g. due to insufficient illumination of the road, highly variable shade conditions, or due to rain, snow, fog or heavy spray.
- If there is glare, e.g. from oncoming traffic, direct sunlight or reflections.
- If there is dirt on the windshield in the vicinity of the multifunction camera or the camera is fogged up, damaged or obscured.
- If the traffic signs are hard to detect, e.g. due to dirt or snow or insufficient lighting, or because they are covered.
- If the information on the navigation system’s digital map is incorrect or out of date.
- If the signs are ambiguous, e.g. traffic signs on construction sites or in adjacent lanes.

### Displaying ECO Assist

On-board computer:
- ** Assistance
- Select ECO Assist.

### AMG Performance exhaust system

**Function of the AMG Performance exhaust system**

Changing the position of the exhaust gas flaps allows you to select the sound characteristics of the AMG Performance exhaust system:
- Closed exhaust gas flaps: comfort characteristic (balanced)
- Open exhaust gas flaps: sporty characteristic (powerful)

### Operating the AMG Performance exhaust system

- **Press display button 1.**
  The display button indicates the currently selected sound characteristic 2:
  - Button symbol (blue): balanced
  - Button symbol (red): powerful
**DYNAMIC SELECT switch**

**Function of the DYNAMIC SELECT switch**

Use the DYNAMIC SELECT switch to change between the following drive programs:

- **R** (Slippery): optimized pulling away and driving characteristics in wintry and slippery road conditions
- **P** (Individual): individual settings
- **C** (Comfort): comfortable and economical driving style
- **S** (Sport): sporty driving style
- **S** (Sport Plus): particularly sporty driving style
- **I** (RACE): driving like on a race track

The drive program **I** (RACE) is available only for the Mercedes-AMG GT 63 S 4MATIC+ model or for vehicles with AMG DYNAMIC PLUS package.

The **I** (RACE) drive program may not be used on normal roads. **I** (RACE) must only be activated and used on dedicated race circuits, not on public roads.

Mercedes-AMG recommends selecting the drive program **R** when in city traffic or stop-and-go traffic.

Depending on the drive program selected, the following vehicle characteristics will change:

- **Drive**
  - Engine and transmission management
  - Active Distance Assist DISTRONIC
- **AMG Dynamics**
  - The four agility functions Basic, Advanced, Pro and Master are automatically selected depending on the drive program.
  - The steering, shift timing point, all-wheel drive and stabilization functions are adapted to the selected drive program.
  - When ESP® is activated, agility function Pro is selected in drive program **I** RACE. The Master function is automatically selected when ESP is deactivated.
- **Position of the exhaust gas flaps**
- **Suspension**
- **Steering**
- **Availability of the ECO start/stop function**
- **Availability of glide mode**
- The **I** (RACE) drive program has the following properties:
  - Manual gearshifting is activated automatically.
  - The vehicle exhibits driving characteristics suited for race circuits.
  - All vehicle systems are designed for maximum sportiness.
  - The chassis has a particularly tight suspension and damping system.
  - Glide mode is not available.
  - ECO start/stop function is not available.
  - The sporty sound characteristic of the exhaust system is activated.

You can call up vehicle characteristics via the Performance menu in the on-board computer.
You can call up vehicle characteristics via the Performance menu in the on-board computer (→ page 230).

1. You can also change the following vehicle characteristics using the buttons in the center console:
   - Position of the exhaust gas flaps
   - ECO start/stop function
   - Suspension
   - Manual gearshifting

---

**Selecting the drive program**

1. Press DYNAMIC SELECT switch 1 forwards or backwards. The selected drive program appears in display 2 and in the multifunction display in the instrument cluster.

---

**Configuring drive program I**

Multimedia system:

- Vehicle [ DYNAMIC SELECT ] Individual

Select the individual setting.

---

**Switching the operation feedback for drive program on/off**

Multimedia system:

- Vehicle [ DYNAMIC SELECT ] Notification for User on [ ] or off [ ]. When this function is active, a corresponding message is shown in the media display when a drive program is selected with the DYNAMIC SELECT switch.

---

**Displaying vehicle data**

Multimedia system:

- Vehicle [ DYNAMIC SELECT ]
Displaying engine data

Multimedia system:

Vehicle ➤ DYNAMIC SELECT
Select Engine Data.

The values for engine output and engine torque may deviate from the nominal values. Items that can influence this are, for example:

- Sea level
- Fuel grade
- Outside temperature

Automatic transmission

E-SELECT selector lever

Function of the E-SELECT selector lever

⚠️ WARNING Risk of accident and injury due to children left unattended in the vehicle

If children are left unattended in the vehicle, they could:

- open doors, thereby endangering other persons or road users.
- get out of the vehicle and be hit by oncoming traffic.
- operate vehicle equipment and become trapped, for example.

In addition, children could also set the vehicle in motion, for example, by:

- releasing the parking brake.
- shifting the automatic transmission out of park position [P].
- starting the engine

⚠️ WARNING Risk of accident due to incorrect gearshifting

If the engine speed is higher than the idle speed and you engage the transmission position [D] or [R], the vehicle may accelerate sharply.

- If you engage the transmission position [D] or [R] always depress the brake pedal firmly and do not accelerate at the same time.

Use the E-SELECT selector lever to change the transmission position. The current transmission position is displayed in the multifunction display.

Never leave children and animals unattended in the vehicle.

When leaving the vehicle, always take the SmartKey with you and lock the vehicle.

Keep the SmartKey out of the reach of children.
Engaging reverse gear R
- Depress the brake pedal and push the E-SELECT selector lever upwards past the first point of resistance. The transmission position display shows R in the multifunction display.

Subsequently releasing the brake pedal will allow you to move the vehicle freely, e.g. to push it or tow it away.

If you want the automatic transmission to remain in neutral N even if the ignition is switched off:
- Start the vehicle.
- Depress the brake pedal and engage neutral N.
- Release the brake pedal.
- Switch off the ignition.

If you then exit the vehicle leaving the SmartKey in the vehicle, the automatic transmission remains in neutral N.

Engaging neutral N
- Depress the brake pedal and push the E-SELECT selector lever up or down to the first point of resistance. The transmission position display shows N in the multifunction display.

Engaging park position P
- Observe the notes on parking the vehicle (→ page 156).
- Depress the brake pedal until the vehicle is stationary.
- When the vehicle is stationary, press button P.
- Park position is only engaged when the transmission position display P is shown in the multifunction display. If no transmission position display P appears, secure the vehicle to prevent it from rolling away.

Park position P is engaged automatically if one of the following conditions is met:
- you switch off the ignition when the vehicle is stationary and the transmission is in position D or R.
- you open the driver’s door when the vehicle is stationary or when driving at a very low speed and the transmission is in position D or R.
To maneuver with an open driver's door, open the driver's door while stationary and engage transmission position D or R again.

**Engaging drive position D**

- Depress the brake pedal and pull the E-SELECT selector lever back past the first point of resistance.
- The transmission position display shows D in the multifunction display.

When the automatic transmission is in transmission position D, it shifts the gears automatically. This depends on the following factors:

- The selected drive program
- The position of the accelerator pedal
- The driving speed

**Double-clutch function**

Double-clutch function is active when changing down in all drive programs. Double-clutch function reduces load change reactions and supports sporty driving. The acoustic perception of the double-clutch function changes depending on the drive program.

**Manual gearshifting**

**WARNING** Risk of skidding and of an accident due to shifting down on slippery road surfaces

If you shift down on slippery road surfaces to increase the engine braking effect, the drive wheels may lose traction.

- Do not shift down on slippery road surfaces to increase the engine braking effect.

**To activate/deactivate:** press display button 1.

The display button displays the currently selected gear setting 2:

- M (red): manual gearshifting
- D (blue): automatic transmission

Driving and parking 151
When switching gears in the [RACE] (RACE) driving program, manual shifting is automatically activated.

1. To permanently shift the gears manually in drive program using the steering wheel paddle shifters, select the M (Manual) setting for the transmission.

**NOTE** Damage to the engine due to shifting up too late

The automatic transmission does not shift up in manual mode even when the engine's limiting speed is reached. The fuel supply is interrupted in order to prevent the engine from overrevving.

- Shift up before the engine speed reaches the red area in the tachometer.

If the engine speed is too high or too low, you cannot change gear using the steering wheel paddle shifters. In this case, segments light up red.

**Gearshift recommendation**

The gearshift recommendation assists you in adopting an economical driving style.

- **To shift up:** pull steering wheel paddle shifter 1.
- **To shift down:** pull steering wheel paddle shifter 1.

If gearshift recommendation message 1 is shown on the multifunction display, shift to the recommended gear.
Gearshift recommendation is active only if you have activated manual gearshifting with the button on the center console.

Using kickdown

- **Maximum acceleration**: depress the accelerator pedal beyond the pressure point.
- If you have activated manual gearshifting with the button in the center console, the transmission does not react to the kickdown.

During kickdown, you cannot change gears using the steering wheel paddle shifters. The automatic transmission shifts up to the next gear when the maximum engine speed is reached to protect the engine from overrevving.

Glide mode function

With an anticipatory driving style, glide mode helps you to reduce fuel consumption.

Glide mode is characterized by the following:
- The combustion engine is disconnected from the drivetrain.
- The engine speed corresponds to the idle speed.
- The Ⓐ symbol appears in the multifunction display.

Glide mode is activated if the following conditions are met:
- The ECO start/stop function is activated.
- Drive program Ⓓ is selected with the drive setting "Moderate" or "Reduced".
- The speed is within a suitable range.
- The road's course is suitable, e.g. no steep uphill or downhill inclines or tight bends.
- **Mercedes-AMG GT 53 4MATIC+**: The charge level of the battery is sufficient.
- You are no longer depressing the accelerator or brake pedal.

Glide mode is deactivated again if one of the conditions is no longer met.

When Active Distance Assist DISTRONIC is active, glide mode is not available.

**Function of the 4MATIC**

4MATIC ensures that all four wheels are driven when needed. Together with ESP® and 4ETS, 4MATIC improves the traction of your vehicle whenever a driven wheel spins due to insufficient traction.

If you fail to adapt your driving style, 4MATIC can neither reduce the risk of an accident nor override the laws of physics. 4MATIC cannot take account of road, weather and traffic conditions. 4MATIC is only an aid. You are responsible for maintaining a safe distance from the vehicle in front, for vehicle speed, for braking in good time and for staying in lane.

In wintry road conditions, the maximum effect of 4MATIC can be achieved only if you use winter tires (M+S tires), with snow chains if necessary.
Refueling the vehicle

**WARNING Risk of fire or explosion from fuel**

Fuels are highly flammable.
- Fire, open flames, smoking and creating sparks must be avoided.
- Switch off the ignition and, if it has been in use, switch off the stationary heater before you refuel your vehicle.

**WARNING Risk of injury from fuels**

Fuels are poisonous and hazardous to your health.
- Do not swallow fuel or let it come into contact with skin, eyes or clothing.
- Do not inhale fuel vapor.
- Keep children away from fuel.
- Keep doors and windows closed during the refueling process.

If you or other people come into contact with fuel, observe the following:
- Immediately rinse fuel off your skin with soap and water.
- If fuel comes into contact with your eyes, immediately rinse them thoroughly with clean water. Seek medical attention immediately.
- If you swallow fuel, seek medical attention immediately. Do not induce vomiting.
- Change immediately out of clothing that has come into contact with fuel.

**WARNING Risk of fire or explosion from electrostatic charge**

Electrostatic charge can create sparks and thereby ignite fuel vapors.

Before you open the fuel filler cap or take hold of the pump nozzle, touch the metallic vehicle body. This discharges any electrostatic charge that may have built up.
- Do not get into the vehicle again during the refueling process. Otherwise, electrostatic charge could build up again.

**NOTE** Damage caused by the wrong fuel

Vehicles with a gasoline engine:
Even small amounts of the wrong fuel could result in damage to the fuel system, the engine and the emission control system.
- The RON requirement is located in the fuel filler flap.
- Only refuel with low-sulfur unleaded fuel.

This fuel may contain up to 10% ethanol. Your vehicle is suitable for use with E10 fuel.
Never refuel using any of the following fuels:

- Diesel
- Gasoline with more than 10% ethanol by volume, e.g. E15, E85, E100
- Gasoline with more than 3% methanol by volume, e.g. M15, M30, M85, M100
- Gasoline with additives containing metal

If you accidentally refuel with the wrong fuel:
- Do not switch the ignition on.
- Consult a qualified specialist workshop.

**NOTE** Do not use diesel to refuel vehicles with a gasoline engine.

If you accidentally refuel with the wrong fuel:
- Do not switch the ignition on. Otherwise fuel can enter the engine.
  Even small amounts of the wrong fuel could result in damage to the fuel system and the engine. The repair costs are high.
- Consult a qualified specialist workshop.

Have the fuel tank and fuel lines drained completely.

**NOTE** Damage to the fuel system caused by overfilled fuel tanks.

Only fill the fuel tank until the pump nozzle switches off.

**NOTE** Fuel may spray out when you remove the fuel pump nozzle.

Only fill the fuel tank until the pump nozzle switches off.

**Requirements:**
- The vehicle is unlocked.
- Do not get into the vehicle again during the refueling process. Otherwise, electrostatic charge could build up again.

Observe the notes on operating fluids (→ page 420).

1. Fuel filler flap
2. Bracket for the fuel filler cap
3. Tire pressure table
4. QR code for rescue card
5. Fuel type

Press fuel filler flap 1.
Turn the fuel filler cap counter-clockwise and remove it.
Insert the fuel filler cap into bracket 2.

Completely insert the filler neck of the fuel pump nozzle into the tank, hook in place and refuel.

Only fill the tank until the pump nozzle switches off.

Replace the cap on the filler neck and turn clockwise until it engages audibly.

Close the fuel filler flap.

Parking

Parking the vehicle

**WARNING** Risk of accident and injury caused by an insufficiently secured vehicle rolling away.

If the vehicle is not securely parked sufficiently, it can roll away in an uncontrolled way even at a slight downhill gradient.

Ensure that the parked vehicle is always properly secured against rolling away as follows:

- On uphill or downhill gradients, turn the front wheels so that the vehicle rolls towards the curb if it starts moving.
- Apply the parking brake.
- Switch the transmission to position P.

**WARNING** Risk of fire caused by hot exhaust system parts

Flammable material such as leaves, grass or twigs may ignite if they come into contact with hot parts of the exhaust system or exhaust gas flow.

- Park the vehicle so that no flammable material can come into contact with hot vehicle components.
- In particular, do not park on dry grass-land or harvested grain fields.

**WARNING** Risk of accident and injury due to children left unattended in the vehicle

If you leave children unattended in the vehicle, they may be able to set the vehicle in motion, for example by:

- Releasing the parking brake.
- Shifting the automatic transmission out of park position P.
- Starting the engine.

In addition, they may operate vehicle equipment and become trapped.

Never leave children unattended in the vehicle.

When leaving the vehicle, always take the SmartKey with you and lock the vehicle.
NOTE Damage to the vehicle due to it rolling away

- Always secure the vehicle against rolling away.

- Bring the vehicle to a standstill by applying the brake pedal.

- On uphill or downhill gradients, turn the front wheels so that the vehicle rolls towards the curb if it starts moving.
- Apply the electric parking brake.
- Engage transmission position P in a stationary vehicle with the brake pedal applied (→ page 150).
- Switch off the engine and the ignition by pressing button 1.
- Release the service brake slowly.
- Get out of the vehicle and lock it.

When you park the vehicle, you can still operate the side windows and the sliding sunroof for approximately five minutes if the driver's door is closed.

Garage door opener

Programming buttons for the garage door opener

**DANGER** Risk of fatal injuries due to exhaust gases

Combustion engines emit poisonous exhaust gases such as carbon monoxide. Inhaling these exhaust gases is hazardous to health and can lead to poisoning.

**WARNING** Risk of injury when opening or closing a door with the garage door opener

When you operate or program the door with the integrated garage door opener, people in the range of movement of the door may become trapped or struck by the door.

- When using the integrated garage door opener, always make sure that nobody...
is within the range of movement of the door.

Only operate the following doors using the garage door opener:
- Doors with a safety stop and reversing feature.
- Doors which conform to the current U.S. safety standards.

Requirements:
- The vehicle has been parked outside the garage or outside the range of movement of the door.
- The engine is switched off.
- The ignition is switched on.

The garage door opener function is always available when the ignition is switched on.

Check if the transmitter frequency of the remote control has the frequency range of 280 to 868 MHz.
Radio equipment approval number:
- NZLMUAHL5 (USA)
- 4112A-MUAHL5 (Canada)

Press and hold button 1, 2 or 3 that you wish to program. Indicator lamp 4 flashes yellow.

It can take up to 20 seconds before the indicator lamp flashes yellow.

Release the previously pressed button. Indicator lamp 4 continues to flash yellow.

Point remote control 5 from a distance of 1 in (1 cm) to 3 in (8 cm) towards buttons 1, 2 or 3.

Press and hold button 6 of remote control 5 until:
- Indicator lamp 4 lights up green continuously. Programming is complete.
- Indicator lamp 4 flashes green. Programming was successful. Additionally, synchronization of the rolling code with the door system must also be carried out.

If indicator lamp 4 does not light up or flash green: repeat the procedure.

Release all of the buttons.
The remote control for the door drive is not included in the scope of delivery of the garage door opener.

**Synchronizing the rolling code**

**Requirements:**
- The door system uses a rolling code.
- The vehicle must be within range of the garage door or door drive.
- The vehicle as well as persons and objects, are located outside the range of movement of the door.

1. Press the programming button on the door drive unit. Initiate the next step within approximately 30 seconds.
2. Press previously programmed button 1, 2 or 3 repeatedly, until the door closes. When the door closes, programming is completed.

Please also read the operating instructions for the door drive.

**Troubleshooting when programming the remote control**

1. Check if the transmitter frequency of remote control 5 is supported.
2. Replace the batteries in remote control 5.
3. Hold remote control 5 at various angles at a distance between 1 in (1 cm) to 3 in (8 cm) front of the inside rearview mirror. You should test every position for at least 25 seconds before trying another position.
Hold remote control 5 at the same angles at various distances in front of the inside rearview mirror. You should test every position for at least 25 seconds before trying another position.

Note that some remote controls transmit only for a limited period, press button 6 on remote control 5 again before transmission ends.

Align the antenna line of the door opener unit with the remote control.

Support and additional information on programming:
- On the toll free HomeLink® Hotline on 1-800-355-3515.

Opening/closing a garage door

Requirements:
- The corresponding button is programmed to operate the door.

Press and hold buttons 1, 2 or 3 until the door opens or closes.

If indicator lamp 4 flashes yellow after approximately 20 seconds; press and hold the previously pressed button again until the door opens or closes.

Clearing the garage door opener memory

Press and hold buttons 1 and 3. Indicator lamp 4 lights up yellow.

If indicator lamp 4 flashes green: release buttons 1 and 3. The entire memory has been deleted.

Radio equipment approval numbers for the garage door opener
Brazil

Este equipamento opera em caráter secundário, isto é, não tem direito à proteção contra interferência prejudicial, mesmo de estações do mesmo tipo, e não pode causar interferência a sistemas operando em caráter primário.

Electric parking brake

Electric parking brake function (applying automatically)

⚠️ WARNING Risk of accident and injury due to children left unattended in the vehicle

If you leave children unattended in the vehicle, they may be able to set the vehicle in motion, for example by:
- Releasing the parking brake.
- Shifting the automatic transmission out of park position [P].
- Starting the engine.

In addition, they may operate vehicle equipment and become trapped.
- Never leave children unattended in the vehicle.
- When leaving the vehicle, always take the SmartKey with you and lock the vehicle.

The electric parking brake is applied if the transmission is in position [P] and one of the following conditions is fulfilled:
- The engine is switched off.
- The seat belt tongue is not inserted in the seat belt buckle of the driver's seat and the driver's door is opened.

ℹ️ To prevent application: pull the handle of the electric parking brake.

In the following situations, the electric parking brake is also applied:
- Active Distance Assist DISTRONIC is bringing the vehicle to a standstill.
- The HOLD function is keeping the vehicle stationary.
- Active Parking Assist is keeping the vehicle stationary.

This is the case if one of the following conditions is also fulfilled:
- The engine is switched off.
- The seat belt tongue is not inserted in the seat belt buckle of the driver’s seat and the driver’s door is opened.
- There is a system malfunction.
- The power supply is insufficient.
- The vehicle is stationary for a lengthy period.

When the electric parking brake is applied, the red \( \text{PARK} \) (USA) or \( \text{EP} \) (Canada) indicator lamp appears in the instrument cluster.

The electric parking brake is not automatically applied if the engine is switched off by the ECO start/stop function.

**Electric parking brake function (releasing automatically)**

The electric parking brake is released when the following conditions are fulfilled:
- The engine is running.
- The seat belt tongue is inserted into the seat belt buckle of the driver’s seat.
- The transmission is in position \( D \) or \( R \) and you depress the accelerator pedal or you shift from transmission position \( P \) to \( D \) or \( R \).

If the seat belt tongue is not inserted into the seat belt buckle of the driver’s seat, the following conditions must be fulfilled:
- The driver’s door is closed.
- You move the transmission out of transmission position \( P \) or you have previously driven faster than 2 mph (3 km/h).

When the electric parking brake is released, the red \( \text{PARK} \) (USA) or \( \text{EP} \) (Canada) indicator lamp in the instrument cluster goes out.

### Applying/releasing the electric parking brake manually

**Applying**

- **Push handle**
  - The red \( \text{PARK} \) (USA) or \( \text{EP} \) (Canada) indicator lamp appears in the instrument cluster.
The electric parking brake is only securely applied if the indicator lamp is lit continuously.

**Releasing**
- Switch the ignition on.
- Pull handle 1.
  The red (USA) or (Canada) indicator lamp in the instrument cluster goes out.

**Emergency braking**
- Press and hold handle 1.
  When the vehicle has been braked to a standstill, the electric parking brake is applied. The red (USA) or (Canada) indicator lamp appears in the instrument cluster.

**Notes on parking the vehicle for an extended period**
If you leave the vehicle parked for longer than four weeks, the disconnected battery may be damaged by deep discharge.

If you leave the vehicle parked for longer than six weeks, it may suffer disuse damage.

Further information can be obtained at a qualified specialist workshop.

**Standby mode (extension of the starter battery’s period out of use)**

**Standby mode function**
- This function is not available for all models.
- If standby mode is activated, the vehicle can be parked for an extended period of time without losing power.

Standby mode is characterized by the following:
- the starter battery is preserved.
- the maximum non-operational time out of use is displayed in the multimedia system display.
- the connection to online services is interrupted.

If the following conditions are fulfilled, standby mode can be activated or deactivated using the multimedia system:
- the engine is switched off.
- the ignition is switched on.

Exceeding the vehicle's displayed non-operational time may cause inconvenience, i.e. it cannot be guaranteed that the starter battery will reliably start the engine.

The starter battery must be charged first in the following situations:
- the vehicle's non-operational time must be extended.
- the Battery Charge Insufficient for Standby Mode message appears in the multimedia system display.

Standby mode is automatically deactivated when the ignition is switched on.
Activating/deactivating standby mode
Multimedia system:

Vehicle ➜ Vehicle Settings ➜ Standby Mode

- This function is not available for all models.
- Activate □ or deactivate ☑ the function. When you activate the function, a prompt appears.
- Select Yes.

Standby mode is activated.

Function of the radar sensors

Some driving and driving safety systems use radar sensors to monitor the area in front of, behind or next to the vehicle (depending on the vehicle’s equipment).

Depending on the vehicle’s equipment, the radar sensors are integrated behind the bumpers and/or behind the Mercedes star. Keep these parts free of dirt, ice and slush (→ page 362). The sensors must not be covered, for example by cycle racks, overhanging loads, stickers, foil or foils to protect against stone chipping. In the event of damage to the bumpers or radiator grill, or following a collision impacting the bumpers or radiator grill, have the function of the radar sensors checked at a qualified specialist workshop. The driver assistance system may no longer work properly.

Overview of driving systems and driving safety systems

In this section, you will find information about the following driving systems and driving safety systems:

- 360° Camera (→ page 206)
- ABS (Anti-lock Braking System) (→ page 166)
- Active Distance Assist DISTRONIC (→ page 177)
- AMG adaptive sport suspension system (→ page 195)
- Active Brake Assist (→ page 170)
- Active Lane Keeping Assist (→ page 220)
- ATTENTION ASSIST (→ page 215)
- BAS (Brake Assist System) (→ page 166)
- Hill Start Assist
- DRIFT MODE (→ page 191)
- EBD (Electronic Brake force Distribution) (→ page 170)

Driving and driving safety systems

Driving systems and your responsibility

Your vehicle is equipped with driving systems which assist you in driving, parking and maneuvering the vehicle. The driving systems are aids and do not relieve you of your responsibility pertaining to road traffic law. Pay attention to the traffic conditions at all times and intervene when necessary. Be aware of the limitations regarding the safe use of these systems.
Function of ABS (Anti-lock Braking System)

ABS regulates the brake pressure in critical driving situations:

- During braking, e.g. at full brake application or insufficient tire traction, the wheels are prevented from locking.
- Vehicle steerability while braking is ensured.

If ABS intervenes when braking, you will feel a pulsing in the brake pedal. The pulsating brake pedal can be an indication of hazardous road conditions and can serve as a reminder to take extra care while driving.

**System limitations**

- ABS is active from speeds of approx. 5 mph (8 km/h).
- ABS may be impaired or may not function if a malfunction has occurred and the yellow [ABS] warning lamp lights up continuously in the instrument cluster after the engine is started.
- ABS prevent the wheels from locking.

The brakes will function as usual once you release the brake pedal. BAS is deactivated.

Depress the brake pedal with full force in emergency braking situations. ABS prevents the wheels from locking.

**Function of BAS (Brake Assist System)**

**WARNING** Risk of an accident caused by a malfunction in BAS (Brake Assist System)

If BAS is malfunctioning, the braking distance in an emergency braking situation is increased.
Functions of ESP® (Electronic Stability Program)

⚠️ WARNING Risk of skidding if ESP® is malfunctioning

If ESP® is malfunctioning, ESP® cannot carry out vehicle stabilization. In addition, other driving safety systems are switched off.

- Drive on carefully.
- Have ESP® checked at a qualified specialist workshop.

You can select between the following modes of ESP®:
- ESP® on
- ESP® SPORT
- ESP® off

Characteristics when ESP® is activated

ESP® monitors and improves driving stability and traction, particularly in the following situations:
- When pulling away on a wet or slippery roadway.
- When braking.
- In strong side winds when you are driving faster than 50 mph (80 km/h).

ESP® can stabilize the vehicle by intervening in the following ways:
- One or more wheels are braked.
- The engine output is adapted according to the situation.

ESP® is activated every time the engine is started regardless of whether ESP® was in ESP® SPORT or deactivated before the engine was switched off.

If the ESP® warning lamp flashes in the instrument cluster, one or several vehicle wheels has reached its grip limit:
- Adapt the driving style to suit the prevailing road and weather conditions.
- Do not deactivate ESP® under any circumstances.
- Only depress the accelerator pedal as far as is necessary.

Characteristics when ESP® SPORT is activated

⚠️ WARNING Risk of skidding if ESP® SPORT is used incorrectly

When you activate ESP® SPORT, there is an increased risk of skidding and having an accident.

- Activate ESP® SPORT only in the circumstances described below.

Select ESP® SPORT when the vehicle’s own oversteering and understeering characteristics are desired, e.g. on designated roads.
Driving with ESP® SPORT or with ESP® deactivated requires an extremely qualified and experienced driver.

When ESP® SPORT is activated, the ESP® OFF warning lamp and the ESP SPORT message light up continuously in the instrument cluster. If ESP® SPORT is activated and one or more wheels start to spin, the ESP® warning lamp on the instrument cluster flashes. ESP® then only stabilizes the vehicle to a limited degree.

ESP® SPORT also has the following characteristics:

- ESP® only improves driving stability to a limited degree.
- ETS/4ETS traction control is still active.
- The engine’s torque is only restricted to a limited degree and the drive wheels can spin. The spinning of the wheels results in a cutting action for better traction on loose surfaces.
- ESP® continues to provide assistance when the brakes are firmly applied.
- Crosswind Assist is no longer active.

**Characteristics when ESP® is deactivated**

**WARNING** Risk of skidding if ESP® is deactivated

If you deactivate ESP®, ESP® cannot carry out vehicle stabilization.

ESP® should only be deactivated in the following situations.

When ESP® is deactivated, the ESP® OFF warning lamp and the ESP OFF message light up continuously in the instrument cluster.

- Driving stability will no longer be improved.
- The drive wheels could spin.
- ETS/4ETS traction control is still active.
- Crosswind Assist is no longer active.

Even when ESP® is deactivated, you are still assisted by ESP® when braking hard.

It may be best to activate ESP® SPORT or deactivate ESP® in the following situations:

- When using snow chains.
- In deep snow.
- On sand or gravel.

- Spinning the wheels results in a cutting action which provides better grip.

- Activate ESP® as soon as the situations described above no longer apply. ESP® will otherwise not be able to stabilize the vehicle if the vehicle starts to skid or a wheel starts to spin.

If the ESP® warning lamp lights up continuously even when ESP® is activated, ESP® is not available due to a malfunction.

Observe any information which may be displayed in the instrument cluster:

- Warning and indicator lamps (→ page 474)
- Display messages (→ page 428)

ETS/4ETS (Electronic Traction System) ETS/4ETS traction control is part of ESP®.
ETS/4ETS can improve the vehicle's traction by intervening in the following ways:

- The drive wheels are braked individually if they spin.
- More drive torque is transferred to the wheel or wheels with traction.

**Activating/deactivating ESP® (Electronic Stability Program)**

To activate ESP® SPORT:
- Press and hold display button 1 until the road in button symbol 2 lights up yellow.
- The ESP SPORT message is shown in the instrument cluster and the ESP SPORT and ESP SPORT warning lamps light up.

To deactivate ESP®:
- Press and hold display button 1 until the road in button symbol 2 lights up red.
- The ESP OFF message is shown in the instrument cluster and the ESP and ESP OFF warning lamps light up.

To activate ESP®:
- Press and hold display button 1 until the road in button symbol 2 lights up blue.
- The ESP SPORT or ESP OFF warning lamps in the instrument cluster go out.

When the symbol 2 is shown with a red ! on display button 1, ESP® is malfunctioning. Observe the information on warning lamps and display messages which may be shown in the instrument cluster.

**Function of ESP® Crosswind Assist**

ESP® Crosswind Assist detects sudden gusts of side wind and helps the driver to keep the vehicle in the lane:

- ESP® Crosswind Assist is active at vehicle speeds between 50 mph (80 km/h) and...
125 mph (200 km/h) when driving straight ahead or cornering slightly.
- The vehicle is stabilized by means of individual brake application on one side.

**Function of EBD (electronic brake force distribution)**

EBD is characterized by the following:
- Monitoring and regulating the brake pressure on the rear wheels.
- Improved driving stability when braking, especially on bends.

**Function of STEER CONTROL**

STEER CONTROL helps you by transmitting a noticeable steering force to the steering wheel in the direction required for vehicle stabilization. This steering recommendation is given particularly in the following situations:
- Both right wheels or both left wheels are on a wet or slippery road surface when you brake

- The vehicle starts to skid

**System limitations**

STEER CONTROL may be impaired or may not function in the following situations:
- ESP® is deactivated
- ESP® is malfunctioning
- The steering is malfunctioning

If ESP® is malfunctioning, you will be assisted further by the electric power steering.

**Function of Active Brake Assist**

Active Brake Assist consists of the following functions:
- Distance warning function
- Autonomous braking function
- Situation-dependent braking assistance
- Vehicles with Driving Assistance Package: Evasive Steering Assist

Active Brake Assist can help you to minimize the risk of a collision with vehicles or pedestrians or to reduce the effects of such a collision. If Active Brake Assist has detected a risk of collision, a warning tone sounds and the distance warning lamp lights up in the instrument cluster.

If you do not react to the warning, autonomous braking can be initiated in critical situations. In especially critical situations, Active Brake Assist can initiate autonomous braking directly. In this case, the warning lamp and warning tone occur simultaneously with the braking application.

If you apply the brake yourself in a critical situation or apply the brake during autonomous braking, situation-dependent braking assistance occurs. The brake pressure increases up to maximum full-stop braking if necessary.
If autonomous braking or situation-dependent braking assistance has occurred, display 1 appears in the multifunction display and then automatically goes out after a short time.

If the autonomous braking function or the situation-dependent braking assistance is triggered, additional preventive measures for occupant protection (PRE-SAFE®) may also be initiated.

**WARNING**
Risk of an accident caused by limited detection performance of Active Brake Assist

Active Brake Assist cannot always clearly identify objects and complex traffic situations.

In such cases, Active Brake Assist might:
- Give a warning or brake without reason
- Not give a warning or not brake

Always pay careful attention to the traffic situation; do not rely on Active Brake Assist alone. Active Brake Assist is only an aid. The driver is responsible for maintaining a suitable distance to the vehicle in front, vehicle speed and for braking in good time.

Be prepared to brake or swerve if necessary.

Also observe the system limitations of Active Brake Assist.

The individual subfunctions are available in the following speed ranges:

**Distance warning function**

The distance warning function issues a warning at speeds:
- From approximately 4 mph (7 km/h), if your vehicle is critically close to a vehicle or pedestrian. An intermittent warning tone sounds and the distance warning lamp lights up in the instrument cluster.

Brake immediately or take evasive action, provided it is safe to do so and the traffic situation allows this.
The distance warning function can aid you in the following situations with an intermittent warning tone and a warning lamp:

<table>
<thead>
<tr>
<th></th>
<th>Vehicles traveling in front</th>
<th>Stationary vehicles</th>
<th>Crossing vehicles</th>
<th>Moving pedestrians</th>
<th>Stationary pedestrians</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vehicles without Driving Assistance package</td>
<td>Up to approx. 155 mph (250 km/h)</td>
<td>Up to approx. 50 mph (80 km/h)</td>
<td>No reaction</td>
<td>Up to approx. 37 mph (60 km/h)</td>
<td>No reaction</td>
</tr>
<tr>
<td>Vehicles with Driving Assistance package</td>
<td>Up to approx. 155 mph (250 km/h)</td>
<td>Up to approx. 62 mph (100 km/h)</td>
<td>Up to approx. 43 mph (70 km/h)</td>
<td>Up to approx. 50 mph (80 km/h)</td>
<td>Up to approx. 43 mph (70 km/h)</td>
</tr>
</tbody>
</table>

Autonomous braking function
The autonomous braking function may intervene at speeds starting from approximately 4 mph (7 km/h) in the following situations:

<table>
<thead>
<tr>
<th></th>
<th>Vehicles traveling in front</th>
<th>Stationary vehicles</th>
<th>Crossing vehicles</th>
<th>Moving pedestrians</th>
<th>Stationary pedestrians</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vehicles without Driving Assistance package</td>
<td>Up to approx. 124 mph (200 km/h)</td>
<td>Up to approx. 31 mph (50 km/h)</td>
<td>No reaction</td>
<td>Up to approx. 37 mph (60 km/h)</td>
<td>No reaction</td>
</tr>
<tr>
<td>Vehicles with Driving Assistance package</td>
<td>Up to approx. 155 mph (250 km/h)</td>
<td>Up to approx. 62 mph (100 km/h)</td>

<td>Up to approx. 43 mph (70 km/h)</td>
<td>Up to approx. 43 mph (70 km/h)</td>
</tr>
</tbody>
</table>
Situation-dependent braking assistance
Situation-dependent braking assistance may intervene at speeds starting from approximately 4 mph (7 km/h) in the following situations:

<table>
<thead>
<tr>
<th>Vehicless without Driving Assistance package</th>
<th>Vehicless traveling in front</th>
<th>Stationary vehicles</th>
<th>Crossing vehicles</th>
<th>Moving pedestrians</th>
<th>Stationary pedestrians</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to approx. 155 mph (250 km/h)</td>
<td>Up to approx. 50 mph (80 km/h)</td>
<td>No reaction</td>
<td>Up to approx. 37 mph (60 km/h)</td>
<td>No reaction</td>

<td>Up to approx. 43 mph (70 km/h)</td>
<td>Up to approx. 43 mph (70 km/h)</td>
</tr>
</tbody>
</table>

Canceling a brake application of Active Brake Assist
You can cancel a brake application of Active Brake Assist at any time by:
- Fully depressing the accelerator pedal or with kickdown.
- Releasing the brake pedal.

Active Brake Assist may cancel the brake application when one of the following conditions is fulfilled:
- You maneuver to avoid the obstacle.
- There is no longer a risk of collision.
- An obstacle is no longer detected in front of your vehicle.

Evasive Steering Assist (only vehicles with Driving Assistance Package)
Evasive Steering Assist has the following characteristics:
- The ability to detect stationary or moving pedestrians
- Assistance through power-assisted steering if it detects a swerving maneuver
- Activation by an abrupt steering movement during a swerving maneuver
- Assistance during swerving and straightening of the vehicle
- Reaction from a speed of approximately 12 mph (20 km/h) up to a speed of approximately 43 mph (70 km/h)

You can prevent the assistance at any time by actively steering.
WARNING Risk of an accident despite Evasive Steering Assist

Evasive Steering Assist cannot always clearly identify objects and complex traffic situations. In addition, the steering support of Evasive Steering Assist is generally not sufficient to avoid a collision. In such cases Evasive Steering Assist can:

- give an unnecessary warning or provide assistance
- not give a warning or not provide assistance

Always pay careful attention to the traffic situation; do not rely on Evasive Steering Assist alone.

Be ready to brake and take evasive action if necessary.

Prevent the assistance by actively steering in non-critical driving situations.

System limitations

Full system performance is not available for a few seconds after switching on the ignition or after driving off.

The system may be impaired or may not function in the following situations:

- In snow, rain, fog, heavy spray, if there is glare, in direct sunlight or in greatly varying ambient light.
- If the sensors are dirty, fogged up, damaged or covered.
- If the sensors are impaired due to interference from other radar sources, e.g. strong radar reflections in parking garages.
- If a loss of tire pressure or a faulty tire has been detected and displayed.
- In complex traffic situations where objects cannot always be clearly identified.
- For pedestrians or vehicles if they move quickly into the sensor detection range.
- For pedestrians who are hidden by other objects.
- If the typical outline of a pedestrian cannot be distinguished from the background.
- If a pedestrian is not detected as such, e.g. due to special clothing or other objects.
- On bends with a tight radius.

Setting Active Brake Assist

Multimedia system:

Vehicle ➔ Assistance ➔ Active Brake Assist

Vehicles without Driving Assistance Package: The settings can be made after starting the vehicle.

Vehicles with Driving Assistance Package: The settings can be made when the ignition is switched on.

The following settings are available:

- Early
Select a setting.

Your selection is retained when the vehicle is next started.

Deactivating Active Brake Assist

It is recommended that you always leave Active Brake Assist activated.

Select Off.
The distance warning function and the autonomous braking function are deactivated.

Vehicles without Driving Assistance Package: When the vehicle is next started, the medium setting is automatically selected.

Vehicles with Driving Assistance Package: Evasive Steering Assist is not available. When the ignition is next started, the middle setting is selected automatically and Evasive Steering Assist is available.

If Active Brake Assist is deactivated, the symbol appears in the status bar of the multifunction display.

Speed control cruise control

Function of cruise control
Cruise control regulates the speed to the value selected by the driver.

If you accelerate to overtake, for example, the stored speed is not deleted. If you remove your foot from the accelerator pedal after overtaking, cruise control will resume speed regulation back to the stored speed.

Cruise control is operated using the corresponding steering wheel buttons. You can store any road speed above 15 mph (20 km/h) up to the maximum speed.

If you fail to adapt your driving style, cruise control can neither reduce the risk of an accident nor override the laws of physics. It cannot take into account road, weather or traffic conditions. Cruise control is only an aid. You are responsible for maintaining a safe distance to the vehicle in front, for vehicle speed, for braking in good time and for staying in lane.

Displays on the multifunction display
The status of cruise control and the stored speed are shown in the multifunction display.

System limitations
Cruise control may be unable to maintain the stored speed on uphill gradients. The stored speed is resumed when the gradient evens out.

Change into a lower gear in good time on long and steep downhill gradients. Take particular note of this when driving a laden vehicle. By
doing so, you will make use of the braking effect of the engine. This relieves the load on the brake system and prevents the brakes from overheating and wearing too quickly. Do not use cruise control in the following situations:

- In traffic situations which require frequent changes of speed, e.g. in heavy traffic, on winding roads.
- On slippery roads. Accelerating can cause the drive wheels to lose traction and the vehicle could then skid.
- If you are driving when visibility is poor.

Operating cruise control

**WARNING Risk of accident due to stored speed**

If you call up the stored speed and this is lower than your current speed, the vehicle decelerates.

- Take into account the traffic situation before calling up the stored speed.

**Requirements:**

- ESP® must be activated, but not intervening.
- The driving speed is at least 15 mph (20 km/h).
- The transmission is in position **D**.

**To activate cruise control:** press rocker switch **1** up.

**To increase/reduce speed:**

- Press rocker switch **2** up/down to the pressure point. The stored speed is increased or reduced by 1 mph (1 km/h).
- Press rocker switch **2** beyond the pressure point. The stored speed is increased or reduced by 5 mph (10 km/h).
- Accelerate the vehicle to the desired speed.

**To activate cruise control:** press rocker switch **2** up.

If cruise control is activated and Traffic Sign Assist has detected a speed restriction sign with a maximum permissible speed and this is displayed in the instrument cluster:
To adopt the detected speed: press rocker switch 3 up. The maximum permissible speed shown by the traffic sign is stored and the vehicle maintains this speed.

To deactivate cruise control:
press rocker switch 3 (CNCL) down.

When cruise control is deactivated:
- Rocker switch 2 (SET+) or (SET-) saves the currently driven speed and the vehicle maintains this speed.
- Rocker switch 3 (RES) calls up the speed last stored and the vehicle maintains this speed.

To deactivate cruise control: press rocker switch 1 down.

If you brake, deactivate ESP® or if ESP® intervenes, cruise control is deactivated. When you switch off the vehicle, the last speed stored is cleared.

Active Distance Assist DISTRONIC

Function of Active Distance Assist DISTRONIC
Active Distance Assist DISTRONIC is only available for vehicles with the Driving Assistance Package.

Active Distance Assist DISTRONIC maintains the set speed on free-flowing roads. If vehicles ahead are detected, the set distance is maintained, if necessary, until the vehicle comes to a halt. The vehicle accelerates or brakes depending on the distance to the vehicle in front and the set speed. The speed (in the range between 15 mph (20 km/h) and 130 mph (210 km/h)) and the distance to the vehicle ahead are set and saved on the steering wheel.

Other features of Active Distance Assist DISTRONIC:
- Adjusts the driving style depending on the selected drive program (fuel-saving, comfortable or dynamic).
- Adjusts the driving style depending on the selected drive program (fuel-saving, comfortable or dynamic) (→ page 147).
- Reacts to stationary vehicles detected in urban speed ranges (except bicycles and motorcycles).
- Initiates acceleration to the stored speed if the turn signal indicator is switched on to change to the overtaking lane.
- Takes one-sided overtaking restrictions into account on highways or on multi-lane roads with separate roadways.

If the vehicle has been braked to a standstill on multi-lane, separate roadways by Active Distance Assist DISTRONIC, it can automatically follow the vehicle in front driving off again within
30 seconds. If a critical situation is detected when driving off, a visual and acoustic warning is given indicating that the driver must now take control of the vehicle. The vehicle is not accelerated any further.

Active Distance Assist DISTRONIC is only an aid. The driver is responsible for keeping a safe distance to the vehicle in front, for vehicle speed and for braking in good time.

System limitations
The system may be impaired or may not function in the following instances:

- In snow, rain, fog, heavy spray, if there is glare, in direct sunlight or in greatly varying ambient light.
- The windshield in the area of the camera is dirty, fogged up, damaged or covered.
- If the radar sensors are dirty or covered.
- On slippery roads, braking or accelerating can cause one or several wheels to lose traction and the vehicle could then skid.
- In parking garages or on roads with steep uphill or downhill gradients.
- Narrow vehicles, such as bicycles and motorcycles, are not detected.

Do not use Active Distance Assist DISTRONIC in these situations.

WARNING Risk of accident from acceleration or braking by Active Distance Assist DISTRONIC

Active Distance Assist DISTRONIC may accelerate or brake in the following cases, for example:

- If the vehicle pulls away using Active Distance Assist DISTRONIC.
- If the stored speed is called up and is considerably faster or slower than the currently driven speed.
- If Active Distance Assist DISTRONIC no longer detects a vehicle in front or does not react to relevant objects.

Always carefully observe the traffic conditions and be ready to brake at all times.

| WARNING Risk of accident due to insufficient deceleration by Active Distance Assist DISTRONIC |
| Active Distance Assist DISTRONIC brakes your vehicle with up to 50% of the maximum possible deceleration. If this deceleration is not sufficient, Active Distance Assist DISTRONIC alerts you with a visual and acoustic warning. |
| In these cases, adjust your speed and keep a sufficient distance. |
| Brake the vehicle yourself and/or take evasive action. |

Take into account the traffic situation before calling up the stored speed.
**WARNING** Risk of accident if detection function of Active Distance Assist DISTRONIC is impaired

Active Distance Assist DISTRONIC does not react or has a limited reaction:
- when driving on a different lane or when changing lanes
- to pedestrians, animals, bicycles or stationary vehicles, or unexpected obstacles
- to complex traffic conditions
- to oncoming vehicles and crossing traffic

As a result, Active Distance Assist DISTRONIC may neither give warnings nor intervene in such situations.

Always observe the traffic conditions carefully and react accordingly.

**Operating Active Distance Assist DISTRONIC**

**Requirements:**
- The vehicle has been started.
- The electric parking brake is released.
- ESP® is activated and is not intervening.
- The transmission is in position [D].
- All the doors are closed.
- Check of the radar sensor system has been successfully completed (vehicle traveling faster than 12 mph (20 km/h)).
- Parking Assist PARKTRONIC is not being used to park the vehicle or to exit from a parking space.
- The vehicle does not skid.

To activate/deactivate Active Distance Assist DISTRONIC: press button 1.

To activate Active Distance Assist DISTRONIC: press rocker switch 3 up (SET+) or down (SET-), or press rocker switch 4 up. Remove your foot from the accelerator pedal.

The current speed is stored and maintained by the vehicle.
To activate Active Distance Assist DISTRONIC with a stored speed: press rocker switch 4 up. Remove your foot from the accelerator pedal.

If rocker switch 4 is pressed up twice while driving, Active Distance Assist DISTRONIC is activated with the speed restriction displayed in the instrument cluster.

To accept the displayed speed restriction when Active Distance Assist DISTRONIC is active: press rocker switch 4 (RES) up. The speed limit displayed in the instrument cluster is adopted as the stored speed. The vehicle adapts its speed to that of the vehicle in front, but only up to the stored speed.

To pull away with Distance Assist DISTRONIC activated: remove your foot from the brake pedal.

Press rocker switch 4 (RES) up.

or

- depress the accelerator pedal briefly and firmly. The functions of Active Distance Assist DISTRONIC continue to be carried out.

**WARNING** Risk of accident due to Active Distance Assist DISTRONIC still being activated when you leave the driver’s seat

If you leave the driver’s seat while the vehicle is being braked by Active Distance Assist DISTRONIC only, the vehicle can roll away.

- Always deactivate Active Distance Assist DISTRONIC and secure the vehicle to prevent it from rolling away before you leave the driver’s seat.

To deactivate Active Distance Assist DISTRONIC: press rocker switch 4 (CNCL) down.

To increase/reduce speed: press rocker switch 4 up/down to the pressure point. The stored speed is increased or reduced by 1 mph (1 km/h).

or

Press and hold rocker switch 3 up/down to the pressure point. The stored speed is increased or reduced in increments of 1 mph (1 km/h).

or

Press rocker switch 3 beyond the pressure point. The stored speed is increased or reduced by 5 mph (10 km/h).

or

Press rocker switch 3 beyond the pressure point and hold. The stored speed is increased or reduced in increments of 5 mph (10 km/h).

To increase or reduce the specified distance from the vehicle in front: press rocker switch 2 up or down.

Function of Active Speed Limit Assist

The availability of the following function is country-dependent.
If a change in the speed limit is detected and Active Distance Assist DISTRONIC is activated, Active Distance Assist DISTRONIC adapts this new speed as the stored speed. The driven speed is adjusted when the vehicle is level with the traffic sign at the latest. In the case of signs indicating entry into an urban area, the speed is adapted beforehand. The speed limit display in the Instrument Display is always updated when the vehicle is level with the traffic sign.

If there is no speed restriction on an unlimited stretch of road (e.g. on a freeway), the recommended speed is adopted as the stored speed. The system uses the speed stored on an unlimited stretch of road as the recommended speed. If you do not alter the stored speed on an unlimited stretch of road, the recommended speed is 80 mph (130 km/h).

If Active Distance Assist DISTRONIC has been put into passive mode by pressing the accelerator pedal, only speed limits which are higher than the set speed are adopted. Active Speed Limit Assist is only an aid. The driver is responsible for keeping a safe distance to the vehicle in front, for vehicle speed and for braking in good time. The maximum permissible speed also depends on factors such as the road surface and traffic conditions.

System limitations
Temporary speed restrictions (e.g. for a certain time or due to weather conditions) cannot be properly detected by the system. The maximum permissible speed applying for a vehicle with a trailer is not detected by the system. In these situations you must adjust your speed yourself.

**WARNING** Risk of accident due to Active Speed Limit Assist adapting the vehicle’s speed
The speed adopted by Active Speed Limit Assist may be too high or incorrect in some individual cases, such as:
- In the wet or in fog
- When towing a trailer
- Ensure that the driven speed complies with traffic regulations.
- Adjust the driving speed to suit current traffic and weather conditions.

Function of route-based speed adaptation

The availability of the following function is country-dependent.

When Distance Assist DISTRONIC is active, the function adjusts the speed depending on the
route events ahead. Depending on the drive program selected, the vehicle negotiates the route event ahead in a fuel-saving, comfortable or dynamic manner. When the route event has been passed, the vehicle accelerates again to the stored speed. The set distance to the vehicle in front, vehicles detected ahead and speed restrictions ahead are taken into account.

Route-based speed adjustment can be configured in the multimedia system (→ page 183).

Route events ahead are:
- Bends
- T-intersections, traffic circles and toll stations
- Turns and exits

ɨ When the toll station is reached, Active Distance Assist DISTRONIC adopts the speed as the stored speed.

Also, the speed is reduced if the turn signal to change lanes is switched on and one of the following situations is detected:
- Turning off at intersections
- Driving on slowing-down lanes
- Driving on lanes adjacent to slowing-down lanes

The driver is responsible for choosing the right speed and observing other road users. This applies in particular to intersections, traffic circles and sets of traffic lights, as route-based speed adaptation does not brake the vehicle to a standstill.

When route guidance is active, the first speed adjustment is carried out automatically. If the turn signal indicator is switched on, the selected route is confirmed and further speed adjustment is activated.

Speed adjustment is canceled in the following cases:
- If the turn signal indicator is switched off before the route event.
- If the driver depresses the accelerator or brake pedal during the process.

System limitations
Route-based speed adaptation does not take right of way regulations into account. The driver is responsible for complying with road traffic regulations and driving at a suitable speed.

In difficult conditions (e.g. unclear roads, narrow lanes, wet road surfaces, snow or ice) or when driving with a trailer, the speed adjustment made by the system may not always be suitable. In these situations the driver must intervene accordingly.

⚠️ WARNING Risk of accident in spite of route-based speed adjustment

Route-based speed adjustment might malfunction or be temporarily unavailable in the following situations:
- If map data is not up to date or available
- If you do not follow the selected route guidance
- If the set route is re-planned
- In road construction areas
- When towing a trailer
- In bad weather or road conditions
- If the accelerator pedal is depressed
Adjust the speed to the traffic situation.

**Setting route-based speed adjustment**

**Requirements:**
- Active Distance Assist DISTRONIC is activated.

Multimedia system:
- ➡️ Vehicle ➤️ Assistance ➤️ Speed Adjustment
- ➤️ Activate ✓ or deactivate ❌ the function.

### Active Steering Assist

**Function of Active Steering Assist**

Active Steering Assist assists the driver at speeds up to 130 mph (210 km/h) and helps the driver to stay in the center of the lane by means of moderate steering interventions. The system orients itself using detected lane markings. Depending on the speed driven, Active Steering Assist uses the vehicles ahead as a reference. If the detection of lane markings and vehicles ahead is impaired, Active Steering Assist switches to passive mode. The system does not provide support in the form of steering interventions.

- The driver is required to keep their hands on the steering wheel at all times and be able to intervene at any time to correct the course of the vehicle and keep it in lane.
- The status of Active Steering Assist is displayed in the status bar of the multifunction display.

**Steering and touch detection**

The driver is required to keep their hands on the steering wheel at all times and to be able to intervene at any time. The driver must expect a change from active to passive mode or vice versa at any time.

1. The driver is required to keep their hands on the steering wheel at all times and to be able to intervene at any time. The driver must expect a change from active to passive mode or vice versa at any time.
If the system reaches a system limitation or the driver has not steered the vehicle for a considerable period of time or has removed their hands from the steering wheel, the system will, depending on the situation, first alert the driver with a visual warning. Display 1 appears in the multifunction display. If the driver still does not steer the vehicle, or has still not taken hold of the steering wheel, a repeated warning tone sounds in addition to the visual warning message to remind the driver to take control of the vehicle.

The warning message does not appear or disappears if one of the following conditions are met:
- The driver steers the vehicle.
- The driver presses a steering wheel button or operates Touch Control.

Active Steering Assist is only an aid. The driver is responsible for the distance to the vehicle in front, for vehicle speed, for braking in good time and for staying in lane. Before changing lanes, the driver must make sure that the neighboring lane is free (glance over the shoulder).

### System limitations

Active Steering Assist has a limited steering torque for lateral guidance. In some cases, the steering intervention is not sufficient to keep the vehicle in the lane or to drive past exits. Active Steering Assist cannot provide the driver with steering assistance at traffic circles, T-intersections, intersections, toll stations or turns, for example.

The system may be impaired or may not function in the following instances:
- In snow, rain, fog, heavy spray, if there is glare, direct sunlight, greatly varying ambient light, reflections or strong shadows on the road.
- Insufficient road illumination.
- The windshield in the area of the camera is dirty, fogged up, damaged or covered.
- Absence of lane markings, or several unclear lane markings, or if the markings change rapidly.
- The distance to the vehicle in front is too small and the lane markings thus cannot be detected.
- The roadway is narrow and winding.
- Obstacles on the lane or projecting out into the lane.

The system does not provide assistance in the following conditions:
- On tight bends, traffic circles and when turning.
- When actively changing lane without switching on the turn signal.

**WARNING** Risk of accident if Active Steering Assist unexpectedly stops functioning

If the system limitations of Active Steering Assist are reached there is no guarantee that the system will remain active or will keep the vehicle in lane.

- Always keep your hands on the steering wheel and observe the traffic carefully.
- Always steer the vehicle paying attention to traffic conditions.
WARNING Risk of accident if Active Steering Assist unexpectedly intervenes

A malfunction in the detection of lane markings and objects can occur. This could cause unexpected steering intervention.

➤ Steer according to traffic conditions.

Activating Active Steering Assist

Requirements
• ESP® must be activated, but not intervening.
• Active Distance Assist DISTRONIC is activated.

If indicator lamp 1 is off: press button 2.

Function of Active Lane Change Assist

The following function is country-dependent and only available in conjunction with the Driving Assistance Package.

Active Lane Change Assist supports the driver when changing lanes by applying steering torque if the driver operates a turn signal.

Assistance when changing lanes is provided if all the following conditions are met:
• You are driving on a freeway or road with multiple lanes in the direction of travel.
• The neighboring lane is separated by a broken lane marking.
• No vehicle is detected in the adjacent lane.
• The driven speed is between 50 mph (80 km/h) and 110 mph (180 km/h).
• Active Lane Change Assist is switched on in the multimedia system.
• Active Steering Assist is switched on and active.
If no vehicle is detected in the adjacent lane and a lane change is permitted, the steering wheel symbol and the arrow are shown in green.

The Lane Change to the Left message appears, for example. If Active Lane Change Assist has been activated with the turn signal indicator but a lane change is not immediately possible, the steering wheel symbol remains green and the arrow appears gray. When the lane change support starts, the turn signal indicator is automatically activated.

If the assistance graphic is active when you change lanes, an arrow also appears pointing towards the adjacent lane in the assistance graphic.

If a lane change is not possible, the arrow fades out after a few seconds and a new lane change must be initiated. An immediate lane change is only possible on freeway sections without speed limits.

If the system is impaired, Active Lane Change Assist may be canceled. If it is canceled, the Lane Change Canceled message appears in the multifunction display and a warning tone sounds.

---

**WARNING** Risk of accident from changing lane to an occupied adjacent lane

Lane Change Assist cannot always detect clearly if the adjacent lane is free. The lane change might be initiated although the adjacent lane is not free.

- Before changing lanes, make sure that the neighboring lane is free and there is no danger to other road users.
- Monitor the lane change.

---

**WARNING** Risk of accident if Lane Change Assist unexpectedly stops functioning

If the system limitations for Lane Change Assist have been reached, there is no guarantee that the system will remain active. Lane Change Assist cannot then assist you by applying steering torques.

- Always monitor the lane change and keep your hands on the steering wheel.

---

**System limitations**

The system limitations of Active Steering Assist apply to Active Lane Change Assist.

The system may also be impaired or may not function in the following situations:

- The sensors in the rear bumper are dirty, damaged or covered, for instance by a sticker or ice and snow.
- The exterior lighting shows a malfunction.

**Activating/deactivating Active Lane Change Assist**

Multimedia system:

- Select Lane Change Assist.
- Activate or deactivate the function.

**Function of Active Emergency Stop Assist**

If the driver continues to ignore the warning to put their hands on the steering wheel, Active...
Distance Assist DISTRONIC reduces the speed. If the driver still does not respond, the Beginning Emergency Stop message is shown in the multifunction display. The vehicle is decelerated in stages to a standstill. At speeds below 40 mph (60 km/h) the hazard warning lights switch on automatically.

When the vehicle is stationary, the following actions are carried out:

- The vehicle is secured with the electric parking brake
- Active Distance Assist DISTRONIC is ended
- The vehicle is unlocked
- If possible, an emergency call is placed to the Mercedes-Benz emergency call center

The driver can cancel the deceleration at any time by performing one of the following actions:

- Steering
- Depressing the brake or accelerator pedal
- Pressing a steering wheel button or operating Touch Control

- Activating or deactivating Active Distance Assist DISTRONIC

**Overview of Active Distance Assist DISTRONIC displays in the instrument cluster**

The assistance graphic and the status display show the status of the following functions in the instrument cluster:

- Active Distance Assist DISTRONIC
- Route-based speed adaptation
- Active Steering Assist

**Assistant display**

1. Route-based speed adaptation (type of route event)
2. Vehicle ahead
3. Distance indicator
4. Set specified distance
5. Active Lane Change Assist lane change display
Active Distance Assist DISTRONIC status display and route-based speed adaptation

1. Active Distance Assist DISTRONIC selected, set specified distance
2. Active Distance Assist DISTRONIC deactivated, speed stored
3. Active Distance Assist DISTRONIC active, speed stored, no vehicle detected (bright vehicle symbol)
4. Active Distance Assist DISTRONIC active, speed stored, vehicle detected (green vehicle symbol)
5. Active Distance Assist DISTRONIC and route-based speed adaptation active, speed stored

On highways or high-speed major roads, the green vehicle symbol is displayed cyclically when the vehicle is ready to pull away.

Speedometer

The stored speed is highlighted on the speedometer. If the speed of the vehicle ahead or the speed adjustment is less than the stored speed due to the route event ahead, the segments in the speedometer light up. Activation or deactivation of Active Distance Assist DISTRONIC, as well as alterations in the stored speed and the distance to be maintained, are displayed in the individual control feedback of the multifunction display.

Active Steering Assist status display

1. Gray steering wheel: Active Steering Assist switched on and passive
2. Green steering wheel: Active Steering Assist switched on and active
3. White steering wheel with red hands: transition from active to passive status (system limitation detected or prompt to the driver to actively confirm)
**Hill start assist**

Hill Start Assist holds the vehicle for a short time when pulling away on a hill under the following conditions:
- The transmission is in position **D** or **R**.
- The electric parking brake is released.

This gives you enough time to move your foot from the brake pedal to the accelerator pedal and depress it before the vehicle begins to roll away.

**WARNING** Risk of accident and injury due to the vehicle rolling away

After a short time, Hill Start Assist no longer holds the vehicle and it can roll away.

Therefore, swiftly move your foot from the brake pedal to the accelerator pedal. Never attempt to leave the vehicle if it is being held by Hill Start Assist.

**HOLD function**

**HOLD function**

The HOLD function holds the vehicle at a standstill without requiring you to depress the brake pedal, e.g. while waiting in traffic.

**System limitations**

The HOLD function is only intended to provide assistance when driving and is not a sufficient means of safeguarding the vehicle against rolling away when stationary.
- The incline must not be greater than 30%.

**Activating/deactivating the HOLD function**

**WARNING** Risk of an accident due to the HOLD function being activated when you leave the vehicle

If you leave the vehicle while only the HOLD function is braking the vehicle, the vehicle can roll away in the following situations:
- If there is a malfunction in the system or in the power supply.
- If the HOLD function is deactivated by depressing the accelerator pedal or brake pedal, e.g. by a vehicle occupant.

Always deactivate the HOLD function and secure the vehicle against rolling away before leaving the vehicle.

**NOTE** Damage from automatic braking

If one of the following functions is switched on, the vehicle brakes automatically in certain situations:
- Active Brake Assist
- Active Distance Assist DISTRONIC
- HOLD function
- Active Parking Assist

To avoid damage to the vehicle, deactivate these systems in the following or similar situations:
- During towing
- In a car wash
Requirements:
- The vehicle is stationary.
- The driver’s door is closed or the seat belt on the driver’s side is fastened.
- The engine is running or has been automatically switched off by the ECO start/stop function.
- The electric parking brake is released.
- Active Distance Assist DISTRONIC is deactivated.
- The transmission is in position D, R or N.

Activating the HOLD function
- Depress the brake pedal and after a short time quickly depress further until the HOLD display appears in the multifunction display.
- Release the brake pedal.

Deactivating the HOLD function
- Depress the accelerator pedal to pull away.

  or

- Depress the brake pedal until the HOLD display disappears from the multifunction display.

The HOLD function is deactivated in the following situations:
- Active Distance Assist DISTRONIC is activated.
- The transmission is switched to position P.
- The vehicle is secured with the electric parking brake.

In the following situations, the vehicle is held by the transmission position P or by the electric parking brake:
- The seat belt is unfastened and the driver’s door is opened.
- The drive system is switched off.
- There is a malfunction in the system or the power supply is insufficient.

RACE START

Function of RACE START
- RACE START is available only for the Mercedes-AMG GT 63 S 4MATIC+ model or for vehicles with AMG DYNAMIC PLUS package.
- RACE START enables optimal vehicle acceleration from a standstill. For this, a suitably high-grip road surface is required, the tires and vehicle must also be in good condition.
- RACE START is only available after the vehicle has been broken in (→ page 138).
- RACE START may not be used on normal roads. RACE START must only be activated and used on dedicated race circuits, not on public roads. Be sure to read the safety notes and information on ESP® (→ page 167).

WARNING Risk of skidding and having an accident from wheels spinning

When you use RACE START, individual wheels could spin and you could lose control of the vehicle.

Depending on the ESP® mode selected, there is an increased risk of skidding and having an accident.

- Make sure that no persons or obstacles are in the close vicinity of your vehicle.
Activating RACE START
You can activate RACE START under the following conditions:

- the doors, the hood and the tailgate are closed.
- the engine is running and the transmission and engine are at normal operating temperature.
- the steering wheel is in the straight-ahead position.
- the vehicle is on level ground.
- the vehicle is stationary, the brake pedal is depressed (left foot) and the parking brake is released.
- the transmission is in position D.
- the DRIFT MODE is deactivated.
- one of the drive programs S, S or S is selected (→ page 147).

▶ Rapidly depress the accelerator pedal fully. The engine speed increases.

If the activation conditions are not fulfilled, RACE START cannot be activated. The RACE START is deactivated immediately if you release the accelerator pedal during RACE START or if any of the activation conditions are no longer fulfilled. The RACE START Canceled message appears on the multifunction display.

The RACE START Release brake to start message appears in the multifunction display.

In this phase you can adjust RACE START depending on the road conditions: you can vary the engine speed by pulling on one of the steering wheel paddle shifters. The segments in the multifunction display flicker rapidly.

If the brake pedal is not released after a short while, RACE START is canceled. The RACE START Canceled message appears on the multifunction display.

Take your foot off the brake, but keep the accelerator pedal depressed. The vehicle pulls away at maximum acceleration. The RACE START Active message appears in the multifunction display.

If the activation conditions are not fulfilled, RACE START cannot be activated. The RACE START Not Possible See Operator's Manual message appears on the multifunction display.

DRIFT MODE
Functions of DRIFT MODE

The DRIFT MODE is available only for the Mercedes-AMG GT 63 S 4MATIC+ model or for vehicles with AMG DYNAMIC PLUS package.

DRIFT MODE enables intentional unstable movement (drifting) and oversteering of the vehicle. All activation conditions must be fulfilled for this (ESP® deactivated, for example).

Only a highly qualified and experienced driver should drive in DRIFT MODE. Be sure to read the safety notes and information on ESP® (→ page 167).
**WARNING** Risk of skidding and having an accident from wheels spinning

When you use DRIFT MODE, ESP® is not available. Individual wheels could spin and you could lose control of the vehicle. There is an increased risk of skidding and having an accident.

- Do not use DRIFT MODE on normal roads.
- DRIFT MODE may only be activated and used on closed race circuits, not on public roads.
- Make sure that no persons or obstacles are in the close vicinity of your vehicle.

When DRIFT MODE is active, the vehicle drive occurs only at the rear and 4MATIC+ is deactivated.

From a speed of approximately 70 mph (115 km/h) up to 95 mph (150 km/h) 4MATIC+ is continuously reactivated. From a speed of 95 mph (150 km/h) 4MATIC+ is fully active again, ESP® however, remains deactivated.

Below a speed of 95 mph (150 km/h) to approximately 70 mph (115 km/h) 4MATIC+ is continuously deactivated again.

1. DRIFT MODE is only available after the vehicle has been broken in (→ page 138).

**Activating and deactivating DRIFT MODE**

Requirements:
- ESP® is deactivated (→ page 169).
- drive program [RACE] is selected (→ page 147).
- the doors, the hood and the tailgate are closed.
- the engine is running and the transmission and engine are at normal operating temperature.
- the transmission is in position D.

**Activating DRIFT MODE**

- Pull steering wheel paddle shifter 1 and 2 and hold for half a second. If all activation conditions are fulfilled, the instrument cluster displays the DRIFT MODE Confirm: Paddle UP Cancel: Paddle DOWN message and the DRIFT warning lamp flashes.
- To cancel: pull steering wheel paddle shifter 1. The instrument cluster displays the message DRIFT MODE Canceled and the DRIFT warning lamp goes out.
To confirm: pull steering wheel paddle shifter 2.
The instrument cluster shows the DRIFT MODE Active message and the DRIFT warning lamps lights up permanently.

Deactivating DRIFT MODE
Pull steering wheel paddle shifters 1 and 2 and hold for half a second.
The DRIFT MODE Active message and the DRIFT warning lamp go out.

DRIFT MODE is automatically deactivated in the following situations:
- ESP® is activated.
- the drive program R (RACE) is switched off.
- the vehicle is switched off.
- automatic switch off is required by the vehicle.

Function of the AMG DRIVE UNIT
The AMG DRIVE UNIT consists of two additional control elements on the steering wheel.
Using display buttons 2, you can decide which two functions you would like to operate with the left-hand AMG DRIVE UNIT control element. You can change between the available functions by pressing the respective display button.
You can select between the following functions:
- ESP® (→ page 167)
- AMG adaptive sport suspension system (→ page 195)
- AMG Performance exhaust system (→ page 146)
- ECO start/stop function (→ page 142)
- Manual gearshifting (→ page 151)
- Rear wing (→ page 193)
The selected functions are displayed in display buttons 2.
You can activate and deactivate and/or operate the selected functions by pressing buttons 1.
The selected functions remain stored even after a new engine start but are reset to their basic setting.
You can change between the drive programs with rotary adjuster 3. The selected drive program appears in display button 6. By pressing display button 4, you can directly access the (Individual) drive program (→ page 147).

Rear wing
Function of the rear wing
The rear wing improves the vehicle’s driving stability and automatically retracts and extends dur-
Driving and parking

Depending on the vehicle speed, it adopts different positions and thus adapts the vehicle’s aerodynamics to the driving conditions. Vehicles with the AMG aerodynamic package are equipped with a stationary rear wing (→ page 195).

If you drive at a speed greater than 50 mph (80 km/h), the rear wing will automatically extend.

If you drive at a speed lower than 50 mph (80 km/h), the rear wing will automatically retract.

You can retract and extend the rear wing manually for cleaning (→ page 194).

**Extending/retracting the rear wing for cleaning**

**WARNING** Risk of becoming trapped when extending and retracting the rear wing manually

When you extend or retract the rear wing manually, body parts may become trapped.

Ensure that there are no people in the sweep of the rear wing when extending or retracting the rear wing.

If someone becomes trapped during retraction of the rear wing, press the display button again immediately. The rear wing will then extend again.

**NOTE** Damage to the rear wing when washing the vehicle in a car wash

If the rear wing is extended, it may be damaged when the vehicle is washed in a car wash.

- Only extend the rear wing if washing the car by hand.
- Before entering a car wash, ensure that the rear wing is retracted.

**Requirements:**
- The ignition is switched on.
- The tailgate is closed.

**To extend/retract:** press display button 1. The rear wing extends or retracts completely. Display button symbol 2 and its color indicate the following positions of the rear wing:
  - Rear wing retracted (blue)
  - Rear wing extended in different positions (red)
  - Rear wing extending or retracting (yellow)
If you press display button 1 again during retraction, the rear wing will extend again. The different positions of the rear wing are also shown on the instrument cluster.

**Adjusting the fixed rear wing**

**Requirements**

A socket wrench and a releasable, medium-strength screw lock are available.

Vehicles with the AMG aerodynamic package are installed with a fixed rear wing. The rear wing improves the rear axle output and, therefore, the vehicle’s driving stability. You can move the rear wing into an inclined and a flat position.

When you move the rear wing into the inclined position, the rear axle output and the air resistance increases.

Release screws 1 with a socket wrench.

Tilt the rear wing as far as it will go, upwards in an inclined position, or downwards in a flat position.

Furnish screws 1 with a releasable, medium-strength screw lock and tighten them.

**Specified tightening torque:** 7.5 lb-ft (10 Nm).

---

**AMG adaptive sport suspension system**

**Function of the AMG adaptive sport suspension system**

The AMG adaptive sport suspension system is an electronically controlled damping system for improved driving comfort and increased driving safety.

The damping is adjusted individually to each wheel and depends on the following factors:

- The driving style, e.g. sporty
- The road condition, e.g. bumps.
- The individual selection of "Sport", "Sport Plus" or "Comfort"

**Characteristics of the AMG adaptive sport suspension system**

AMG adaptive sport suspension system comprises:

- Electronically controlled damping system
- ADS PLUS (Adaptive Damping System with constant damping force adjustment)
- DYNAMIC SELECT switch
- Suspension tuning button.
Characteristics of AMG adaptive sport suspension system + (air suspension)
AMG adaptive sport suspension system + is an air suspension system with variable damping for improved driving characteristics. The all-round level control system ensures the best possible suspension and constant ground clearance, even with a laden vehicle. When driving at speed, the vehicle is lowered automatically to improve driving safety and to reduce fuel consumption. You also have the option of manually adjusting the vehicle level.

The damping is tuned individually for each wheel and is affected by the following factors:
- The driving style, e.g. sporty
- The road condition, e.g. bumps.
- The individual selection of "Sport", "Sport Plus" or "Comfort"

AMG adaptive sport suspension system + comprises:
- Air suspension with variable spring rate and automatic level control
- Speed-dependent lowering to reduce fuel consumption.
- Manually selectable high-level setting for greater ground clearance.
- ADS PLUS (Adaptive Damping System with constant damping force adjustment).
- DYNAMIC SELECT switch and level button.
- Suspension tuning button.
### Characteristics of each drive program (vehicles with AMG adaptive sport suspension system + only)

<table>
<thead>
<tr>
<th>Drive program</th>
<th>Characteristics</th>
</tr>
</thead>
</table>
| ![Slippery]  | - The suspension tuning is comfortable.  
| ![Comfort]   | - The vehicle is set to the normal level.  
|               | - When driving at speeds of above 130 mph (210 km/h) the vehicle is lowered.  
|               | - When driving at speeds below 75 mph (120 km/h) the vehicle is raised again.  
|               | - 4MATIC+ is dynamically synchronized. |
| ![Sport]     | - The suspension tuning is firmer.  
|               | - The vehicle is set to the normal level.  
|               | - When driving at speeds of above 130 mph (210 km/h) the vehicle is lowered.  
|               | - When driving at speeds below 75 mph (120 km/h) the vehicle is raised again.  
|               | - 4MATIC+ is dynamically synchronized. |
| ![Sport Plus] | - The suspension tuning is even firmer.  
| ![RACE]      | - The vehicle is set to the low level.  
|               | - The vehicle is not lowered any further if you are traveling at higher speeds.  
|               | - 4MATIC+ is more dynamically synchronized. |

The mode can also be set using the DYNAMIC SELECT switch. To do this, the
samesuspensiontuningmustbeselected fortheAMGadaptivesportsuspensionsys‐
temandtheDYNAMICSELECTswitch.

When the vehicle is started again, the "Com‐
fort" setting is activated automatically.

Selecting the suspension setting
In "Comfort" mode, the driving characteristics of
your vehicle are comfortable. Select this suspen‐
sion setting if you prefer a comfortable driving
style.
"Sport" driving mode ensures a firmer suspen‐
sion tuning. Select this suspension setting when
employing a sporty driving style, e.g. on winding
country roads.
"Sport Plus" driving mode ensures a very firm
suspension tuning.

Press display button 1. The display button shows currently selected suspension setting 2:

- C (blue): Comfort
- S (yellow): Sport
- S+ (red): Sport Plus

The selected suspension setting is shown in
the multifunction display as a message:
- AMG Suspension System COMFORT
- AMG Suspension System SPORT
- AMG Suspension System SPORT +

Setting the vehicle level

WARNING Risk of accident because vehicle level is too high

If you drive at a higher vehicle level, the driv‐
ing characteristics may be impaired due to the
higher vehicle center of gravity.
The vehicle can drift outwards, for example,
when steering or cornering.

Always choose a vehicle level which is
suited to the driving style and the road
surface conditions.
**WARNING** Risk of entrapment from vehicle lowering

When lowering the vehicle, people could become trapped if their limbs are between the vehicle body and the tires or underneath the vehicle.

- Make sure no one is underneath the vehicle or in the immediate vicinity of the wheel arches when you lower the vehicle.

**WARNING** Risk of entrapment from vehicle lowering

*Vehicles with AIR BODY CONTROL or level control system:* When you unload luggage or leave the vehicle, the vehicle first rises slightly and then returns to the set level shortly afterwards.

You or anyone else in the vicinity of the wheel arches or the underbody could thus become trapped.

The vehicle can also be lowered after being locked.

When leaving the vehicle, make sure that nobody is in the vicinity of the wheel arches or the underbody.

This function is only available for vehicles with AMG adaptive sport suspension system + (air suspension) (→ page 195).

**Requirements:**
- The vehicle has been started.
- The vehicle must not be moving faster than 40 mph (65 km/h).

**Raising the vehicle**

Press button 1.

The vehicle is raised to the high level.

Your selection is saved.

The vehicle is lowered again in the following situations:
- When driving faster than 75 mph (120 km/h).
When driving between 50 mph (80 km/h) and 75 mph (120 km/h) for approximately three minutes.

After selecting a drive program using the DYNAMIC SELECT switch.

The vehicle is adjusted to the height of the last active drive program.

**Lowering the vehicle**

Press button 1.

The vehicle is adjusted to the height of the last active drive program.

Parking Assist PARKTRONIC

Function of Parking Assist PARKTRONIC

Parking Assist PARKTRONIC is an electronic parking assistance system with ultrasound. It monitors the area around your vehicle using six sensors 1 in the front bumper and six sensors in the rear bumper. Parking Assist PARKTRONIC shows you the distance between your vehicle and a detected obstacle visually and audibly. Parking Assist PARKTRONIC is only an aid. It is not a substitute for your attention to the surroundings. The responsibility for safe maneuvering and parking remains with you. Make sure that there are no persons, animals or objects in the maneuvering area while maneuvering and parking in/exiting parking spaces.

In the standard setting, an intermittent warning tone sounds from a distance of approximately 1.0 ft (0.3 m) to an obstacle in front and approximately 3.3 ft (1.0 m) to an obstacle behind. A continuous tone sounds from a distance of approximately 0.7 ft (0.2 m). Using the Warn early setting in the multimedia system, the warning tones for front and side impact protection can also be set to sound at a greater distance of approximately 3.3 ft (1.0 m) (→ page 203).

The Warn early setting is always active at the rear of the vehicle.

If Parking Assist PARKTRONIC is deactivated, Active Parking Assist is unavailable.
Parking Assist PARKTRONIC display in the multimedia system

Vehicles with Active Parking Assist without a 360° Camera

If Active Parking Assist is deactivated and an obstacle is detected in the path of the vehicle, a pop-up window for Parking Assist PARKTRONIC appears in the multimedia system at speeds below 6 mph (10 km/h).

System limitations
Parking Assist PARKTRONIC does not necessarily take into account the following obstacles:
- Obstacles below the detection range, e.g. persons, animals or objects.
- Obstacles above the detection range, e.g. overhanging loads, overhangs or loading ramps of trucks.

The sensors must be free of dirt, ice and slush. Otherwise, they may not function correctly. Clean the sensors regularly, taking care not to scratch or damage them.

Function of the passive side impact protection
Passive side impact protection is an additional Parking Assist PARKTRONIC function which warns the driver about obstacles at the side of the vehicle. A warning is issued when obstacles are detected between the front and rear detection range. In order for an object on the side to be detected, the sensors in the front and rear bumper must first detect the object while you are driving past it.

During the parking procedure or maneuvering, objects are detected as the vehicle drives past. If you steer in the direction of a detected obstacle and there is a risk of a lateral collision, a warning is issued. The segments on the sides of the object are highlighted in orange.
light up yellow or red, depending on the distance to the obstacle.

**Segment color depending on distance**

<table>
<thead>
<tr>
<th>Color</th>
<th>Lateral distance in cm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yellow</td>
<td>Approx. 30 - 60</td>
</tr>
<tr>
<td>Red</td>
<td>Approx. &lt; 30</td>
</tr>
</tbody>
</table>

In order for lateral front or rear segments to be displayed, the vehicle must first travel a distance of at least half of the vehicle length. Once the vehicle has traveled the length of the vehicle, all of the lateral front and rear segments can be displayed.

**Vehicles without 360° Camera**

1. Parking Assist PARKTRONIC is only operational in the front and rear
2. Parking Assist PARKTRONIC is operational and can also warn the driver about obstacles at the side of the vehicle
3. Obstacle detected at the front right (yellow) and rear (red)

**Vehicles with 360° Camera**

1. Parking Assist PARKTRONIC is only operational in the front and rear
2. Parking Assist PARKTRONIC is operational and can also warn the driver about obstacles at the side of the vehicle
3. Obstacle detected at the front right (red)

Saved obstacles on the sides are deleted in the following situations, for example:

- You park the vehicle and switch off the ignition.
- You open the doors.
After the engine is restarted, obstacles must be detected again before a new warning can be issued.

**System limitations**
The system limitations for Parking Assist PARKTRONIC apply for passive side impact protection.
The following objects are not detected, for example:
- Pedestrians who approach the vehicle from the side
- Objects placed next to the vehicle

**Deactivating/activating Parking Assist PARKTRONIC**

**NOTE** Risk of an accident from objects at close range

Parking Assist PARKTRONIC may not detect certain objects at close range.

- When parking or maneuvering the vehicle, pay particular attention to any objects which are above or below the sensors, e.g. flower pots or drawbars.

If indicator lamp 1 is not lit, Parking Assist PARKTRONIC is active. If the indicator lamp is lit or the symbol appears in the multifunction display, Parking Assist PARKTRONIC is not active.

The vehicle or other objects could otherwise be damaged.

Depending on the vehicle's equipment, the button may also be located in the center console.

Parking Assist PARKTRONIC is automatically activated when the vehicle is started.

**Adjusting the warning tones of Parking Assist PARKTRONIC**

Multimedia system:

- Vehicle >> Assistance >> Camera & Parking >> Set Warning Tones

**Adjusting the volume of the warning tones**

- Select Warning Tone Volume.
- Set a value.

**Adjusting the pitch of the warning tones**

- Select Warning Tone Pitch.
- Set a value.

**Specifying the starting point for the warning tones**

You can specify whether the Parking Assist PARKTRONIC warning tones should commence when the vehicle is further away from an obstacle.
Select Warn Early.
Activate ✔ or deactivate ☐ the function.

**Activating/deactivating audio fadeout**
You can specify whether the volume of a media source in the multimedia system is to be reduced when Parking Assist PARKTRONIC gives an audible warning.
Select Audio Fadeout During Warning Tones.
Activate ✔ or deactivate ☐ the function.

**Reversing camera**

**Function of the rear view camera**

If you have activated the function in the multimedia system, the image from rear view camera 1 is shown in the multimedia system display when reverse gear is selected. Dynamic guide lines show the path the vehicle will take with the steering wheel in its current position. This helps you to orient yourself and to avoid obstacles when backing up.

The rear view camera is only an aid. It is not a substitute for your attention to the surroundings. The responsibility for safe maneuvering and parking remains with you. Make sure that there are no persons, animals or objects etc. in the maneuvering area while maneuvering and parking.

You can select from the following views:
- Normal view
- Wide-angle view
- Trailer view

The area behind the vehicle is displayed as a mirror image, as in the inside rearview mirror.

The following camera views are available in the multimedia system:
Normal view

1. Yellow lane marking the course the tires will take at the current steering wheel angle (dynamic)
2. Yellow guide line, vehicle width (driven surface) depending on the current steering wheel angle (dynamic)
3. Red guide line at a distance of approximately 12 in (0.3 m) from the rear area
4. Yellow warning display of Parking Assist PARKTRONIC: obstacles are at a distance of between approximately 2.0 ft (0.6 m) and 3.3 ft (1.0 m)
5. Red warning display of Parking Assist PARKTRONIC: obstacles are very close (approximately 1.0 ft (0.3 m) or less)
6. Orange warning display of Parking Assist PARKTRONIC: obstacles are a medium distance away (between approximately 1.0 ft (0.3 m) and 2.0 ft (0.6 m))

If the entire system fails, the inner segments of the warning display are shown in red. The indicator lamp on the PARKTRONIC button lights up and the symbol appears in the multifunction display.

If the system fails at the rear:
- The rear segments are shown in red when backing up.
- The rear segments are hidden when driving forwards.

When Active Parking Assist is active, the lanes are displayed in green.
If Parking Assist PARKTRONIC is deactivated, the warning display fades out.

Wide-angle view

System limitations

The rear view camera will not function or will only partially function in the following situations:
- There is heavy rain, snow or fog.
- The ambient light conditions are poor, e.g. at night.
- The camera lens is obstructed, dirty or fogged up. Observe the notes on cleaning the rear view camera (→ page 362).
- The camera or rear of your vehicle is damaged. In this case, have the camera and its
position and setting checked at a qualified specialist workshop.

The field of vision and other functions of the rear view camera may be restricted due to additional accessories on the rear of the vehicle (e.g. license plate bracket or bicycle rack).

The display contrast may be impaired due to incident sunlight or other light sources. In this case, pay particular attention.

Have the display repaired or replaced if, for example, pixel errors considerably restrict its use.

### 360° camera

#### Function of the 360° Camera

The 360° Camera is a system that consists of four cameras. The cameras cover the immediate vehicle surroundings. The system assists you, e.g. when parking or at exits with reduced visibility.

The 360° Camera is only an aid. It is not a substitute for your attention to the surroundings. The responsibility for safe maneuvering and parking remains with you. Make sure that there are no persons, animals or objects etc. in the maneuvering area while maneuvering and parking.

The system evaluates images from the following cameras:

- Rear view camera
- Front camera
- Two side cameras in the outside mirrors

#### Views of the 360° Camera

You can select from different views:

1. Wide-angle view, front
2. Top view with image from the front camera
3. Top view with images from the side cameras in the outside mirrors
4. Wide-angle view, rear
5. Top view with image from the rear view camera
6. Top view with trailer view (if trailer hitch is installed)
Top view

1. Lane indicating the route the vehicle will take with the steering wheel in its current position
2. Yellow warning display of Parking Assist PARKTRONIC: obstacles at a distance of approximately 3.3 ft (1.0 m) or less
3. Your vehicle from above

If the distance to the object lessens, the color of warning display 2 changes:
- From approx. 3.3 ft (1.0 m): yellow
- From approx. 2.0 ft (0.6 m): orange
- From approx. 1.0 ft (0.3 m): red

Guide lines

1. Yellow lane marking the course the tires will take at the current steering wheel angle (dynamic)
2. Yellow guide line, vehicle width (driven surface) depending on the current steering wheel angle (dynamic)
3. Red guide line at a distance of approximately 12 in (0.3 m) from the rear area
4. Mark at a distance of approx. 3.3 ft (1.0 m)

When Parking Assist PARKTRONIC is operational and no object is detected, the segments of the warning display are shown in gray.

If the entire system fails, the segments of the warning display are shown in red and the symbol appears in the multifunction display in the instrument cluster.

If the system fails at the rear, the display of the segments changes as follows:
- The rear segments are shown in red when backing up.
- The rear segments are hidden when driving forwards.

If Parking Assist PARKTRONIC is deactivated, the warning display fades out.

When Active Parking Assist is active, lanes 4 are displayed in green.
The guidelines in the multimedia system display show the distances to your vehicle. The distances apply to road level.

**Side view of the mirror cameras**
The sides of the vehicle can be seen in this view.

1. Guide line of external vehicle dimensions with outside mirrors folded out
2. Marker of the wheel contact points

**System failure**
If there is no operational readiness, the following message appears in the multimedia system:

| The doors are open. |
| The side mirrors are folded in. |
| There is heavy rain, snow or fog. |
| The ambient light conditions are poor, e.g. at night. |
| The camera lens is obstructed, dirty or fogged up. |
| Cameras, or vehicle components in which the cameras are installed, are damaged. In this event, have the cameras, their positions and their setting checked at a qualified specialist workshop. |

Do not use the 360° Camera under such circumstances. You could otherwise injure others or collide with objects when parking the vehicle.

If the vehicle is carrying a heavy load, leaving the standard height can result in inaccuracies in the guide lines and in the display of the generated images, depending on technical conditions.

The field of vision and other functions of the camera system may be restricted due to additional attachments on the vehicle (e.g. license plate bracket, bicycle rack).

The contrast of the display may be impaired by abrupt direct sunlight or by other light sources, e.g. when driving out of a garage. In this case, pay particular attention.

Have the display repaired or replaced if, for example, pixel errors considerably restrict its use.

See the notes on cleaning the 360° Camera (→ page 362).
Selecting a view for the 360° Camera

Requirements:
- The Auto. Rear View Cam. function is selected in the multimedia system.

- Engage reverse gear.
- In the multimedia system, select the desired view.

Opening the camera cover of the rear view camera
Multimedia system:

- Select Open Camera Cover.

The camera cover closes automatically after some time or after an ignition cycle.

Setting the camera as a favorite
You can call up the camera view directly in the multimedia system by setting it as a favorite.

- Press the button on the control element.
  The main functions are displayed.

- Navigate downwards twice.
  The Favorites menu appears.
- Select New Favorite.
- Select Vehicle.
- Select Camera.

Active Parking Assist

Function of Active Parking Assist
Active Parking Assist is an electronic parking assistance system which uses ultrasound and is automatically activated during forward travel. The system is operational at speeds of up to approximately 22 mph (35 km/h). When all the conditions are fulfilled, the symbol appears in the multifunction display in the instrument cluster and the system automatically searches for and measures parking spaces on both sides of the vehicle parallel and perpendicular to the direction of travel. If Active Parking Assist is activated, suitable parking spaces are shown in the display of the multimedia system. The symbol appears in the display of the multimedia system. The arrows show on which side of the roadway free parking spaces are located.

The parking space and, if necessary, the parking direction can be selected as desired. Active Parking Assist calculates a suitable vehicle path and assists you in parking and exiting the parking space.

Active Parking Assist supports by changing gear, accelerating, braking and steering the vehicle. Active Parking Assist is only an aid. It is not a substitute for your attention to the surroundings. The responsibility for safe maneuvering and parking remains with you. Make sure that no persons, animals or objects etc. are in the maneuvering range.

Active Parking Assist is canceled if, among other things, one of the following actions is carried out:
- You deactivate Parking Assist PARKTRONIC.
- You deactivate Active Parking Assist.
- You begin steering.
- You apply the parking brake.
- You engage transmission position .
- ESP® intervenes.
You open the doors or the trunk lid while driving.

**System limitations**

Objects located above or below the detection range of Active Parking Assist are not detected when the parking space is being measured. These are also not taken into account when the parking maneuver is calculated, e.g. overhanging loads, overhangs or loading ramps of trucks or the boundaries of parking spaces. In some circumstances, Active Parking Assist may therefore guide you into the parking space prematurely.

**WARNING** Risk of accident due to objects located above or below the detection range of Active Parking Assist

If there are objects above or below the detection range, the following situations may arise:

- Active Parking Assist may steer too early.
- Vehicles with automatic transmission: The vehicle may not stop in front of these objects.

This could cause a collision.

In these situations, do not use Active Parking Assist.

Snowfall or heavy rain may lead to a parking space being measured inaccurately. Parking spaces that are partially occupied by trailer drawbars might not be identified as such or be measured incorrectly. Only use Active Parking Assist on level, high-grip ground.

Do not use Active Parking Assist in the following situations:

- In extreme weather conditions such as ice, packed snow or in heavy rain.
- If you are transporting a load that protrudes beyond the vehicle.
- If the parking space is on a steep downhill or uphill gradient.
- If you have installed snow chains.

Active Parking Assist may also display parking spaces that are not suitable for parking, e.g.:

- Parking spaces on unsuitable surfaces.

Active Parking Assist will not assist you with parking spaces at right angles to the direction of travel in the following situations:

- If two parking spaces are located immediately next to each other.
- If the parking space is directly next to a low obstacle such as a curb.

Active Parking Assist will not assist you with parking spaces parallel or at right angles to the direction of travel in the following situations:

- If the parking space is on a curb.
- If the parking space is bordered by an obstacle, e.g. a tree, a post or a trailer.
Parking with Active Parking Assist

Press button 1.

The Active Parking Assist view appears on the multimedia system display. Area 2 displays detected parking spaces 4 and vehicle path 3.

Vehicle path 3 shown on the multimedia system display may differ from the actual vehicle path.

If you have driven past a parking space: bring the vehicle to a standstill.

Select desired parking space 4.

Where necessary, select the parking direction: forwards or reverse. Vehicle path 3 is shown, depending on selected parking space 4 and the parking direction.

Confirm selected parking space 4.

The turn signal indicator is switched on automatically when the parking procedure begins. The turn signal indicator is switched off automatically when you switch to D.

You are responsible for selecting the turn signal in accordance with the traffic conditions. If necessary, select the turn signal accordingly.

⚠️ WARNING Risk of accident due to vehicle swinging out while parking or pulling out of a parking space

While parking or exiting a parking space, the vehicle swings out and can drive onto areas of the oncoming lane.

This could cause you to collide with objects or other road users.
Pay attention to objects and other road users.
- Where necessary, stop the vehicle or cancel the parking procedure with Active Parking Assist.

If, for example, the Please Engage Reverse Gear message appears in the multimedia system display: select the corresponding transmission position. The vehicle drives into the selected parking space.

On completion of the parking procedure, the Parking Assist Finished, Take Control of Vehicle display message appears. Further maneuvering may still be necessary.

- After completion of the parking procedure, safeguard the vehicle against rolling away. When required by legal requirements or local conditions: turn the wheels towards the curb.

You can stop the vehicle and change the transmission position during the parking procedure. The system then calculates a new vehicle path. The parking procedure can then be continued. If no new vehicle path is available, the transmission position will be changed again. If the vehicle has not yet reached the parking space, the parking procedure will be canceled, should a gear be changed.

Exiting a parking space with Active Parking Assist

Requirements:
- The vehicle has been parked with Active Parking Assist.

Please note that you are responsible for the vehicle and surroundings during the entire parking procedure.

- Start the vehicle.

Press button 1. The Active Parking Assist view appears on the multimedia system display.
If the vehicle has been parked at right angles to the direction of travel: in area 2, select direction of travel 3.

The vehicle path shown on the multimedia system display may differ from the actual vehicle path.

Confirm direction of exit 3 to drive out of the parking space.

The turn signal indicator is switched on automatically when the exit the parking space procedure begins.

You are responsible for selecting the turn signal in accordance with the traffic conditions. If necessary, select the turn signal accordingly.

**WARNING** Risk of accident due to vehicle swinging out while parking or pulling out of a parking space

While parking or exiting a parking space, the vehicle swings out and can drive onto areas of the oncoming lane. This could cause you to collide with objects or other road users.

- Pay attention to objects and other road users.
- Where necessary, stop the vehicle or cancel the parking procedure with Active Parking Assist.

If, for example, the Please Engage Forward Gear message appears in the multimedia system display: select the corresponding transmission position. The vehicle moves out of the parking space. The turn signal indicator is switched off automatically.

---

Example: vehicles with 360° Camera

After the exiting procedure has been completed, the Parking Assist Finished, Take Control of Vehicle message appears in the display of the multimedia system. A warning tone and display 4 in the display of the multimedia system prompt you to take over control of the vehicle. You have to accelerate, brake, steer and change gear yourself again.
Function of Drive Away Assist
Drive Away Assist can reduce the severity of an impact when pulling away. If an obstacle is detected in the direction of travel, the vehicle’s speed is briefly reduced to approx. 1 mph (2 km/h). If a critical situation is detected, the symbol appears on the camera image of the multimedia system.

⚠️ WARNING Risk of accident caused by limited detection performance of Drive Away Assist

Drive Away Assist cannot always clearly identify objects and traffic situations.

In such cases, Drive Away Assist might:
- Warn you without reason and limit the vehicle speed.
- Not warn you or not limit the vehicle speed.

Always pay careful attention to the traffic situation; do not rely on Drive Away Assist alone.

Be prepared to brake or swerve as necessary, provided the traffic situation permits and that it is safe to take evasive action.

Drive Away Assist is only an aid. It is not a substitute for your attention to the surroundings. The responsibility for safe maneuvering and parking remains with you. Make sure that no persons, animals or objects etc. are in the maneuvering range.

A risk of a collision may arise in the following situations, for example:
- If the driver mixes up the accelerator and brake pedals.
- If the wrong gear is selected.

The Drive Away Assist function is active under the following conditions:
- If Parking Assist PARKTRONIC is activated.
- Every time the gear is changed to R or D when the vehicle is at a standstill.
- If the detected obstacle is less than approx. 3.3 ft (1.0 m) away.

- If the maneuvering assistance function is activated in the multimedia system.

System limitations
Drive Away Assist is not available on inclines.

Function of Cross Traffic Alert
Also read the instructions on Blind Spot Assist (→ page 218).

Vehicles with Blind Spot Assist: drivers can also be warned of any crossing traffic when backing up out of a parking space. If a critical situation is detected, symbol appears in the multimedia system display. If the driver does not respond to the warning, the vehicle’s brakes can be applied automatically. To do this, the function uses the radar sensors in the bumper. The area adjacent to the vehicle is continually monitored.

If the radar sensors are obstructed by vehicles or other objects, detection is not possible.

The Cross Traffic Alert function is active under the following conditions:
- If Blind Spot Assist is activated.
- If the vehicle is backing up at walking pace.
If the maneuvering assistance function is activated in the multimedia system.

**System limitations**

**Deactivating/activating maneuvering assistance**
Multimedia system:

- Vehicle ➔ Assistance ➔ Camera & Parking ➔ Maneuvering Assist.

- Activate ✔️ or deactivate ❌ the function.

Maneuvering assistance must be active for the function of Drive Away Assist (➔ page 214).

**ATTENTION ASSIST**

**Function of ATTENTION ASSIST**
ATTENTION ASSIST assists you on long, monotonous journeys, e.g. on highways and trunk roads. If ATTENTION ASSIST detects indicators of fatigue or increasing lapses in concentration on the part of the driver, it suggests taking a break.

ATTENTION ASSIST is only an aid. It cannot always detect fatigue or lapses in concentration in time. The system is not a substitute for a well-rested and attentive driver. On long journeys, take regular breaks in good time that allow for adequate recuperation.

You can choose between two settings.

- **Standard**: normal system sensitivity.
- **Sensitive**: higher system sensitivity. The driver is warned earlier and the attention level detected by ATTENTION ASSIST is adapted accordingly.

If drowsiness or increasing lapses in concentration are detected, the **ATTENTION ASSIST: Take a Break!** warning appears in the Instrument Display. You can acknowledge the message and take a break if necessary. If you do not take a break and ATTENTION ASSIST continues to detect increasing lapses in concentration, you will be warned again after a minimum of 15 minutes.

You can have the following status information for ATTENTION ASSIST displayed in the assistance menu of the on-board computer:

- The length of the journey since the last break.
- The attention level determined by ATTENTION ASSIST.

If ATTENTION ASSIST is unable to calculate the attention level and cannot issue a warning, the **System Suspended** message appears.

If a warning is given in the Instrument Display, the multimedia system offers to search for a rest area. You can select a rest area and start naviga-
tion to this rest area. This function can be activated and deactivated in the multimedia system. If ATTENTION ASSIST is deactivated, the symbol appears in the assistance graphic in the Instrument Display when the engine is running. ATTENTION ASSIST is activated automatically when the engine is re-started. The last selected sensitivity level remains stored.

**System limitations**
ATTENTION ASSIST is active in the 37 mph (60 km/h) to 124 mph (200 km/h) speed range. The functionality of ATTENTION ASSIST is restricted, and warnings may be delayed or not occur at all in the following situations:
- If you have been driving for less than approximately 30 minutes.
- If the road condition is poor (uneven road surface or potholes).
- If there is a strong side wind.
- If you adopt a sporty driving style (high cornering speeds or high rates of acceleration).
- If the Steering Assist function of Active Distance Assist DISTRONIC is active.
- If the time has been set incorrectly.
- In active driving situations, if you change lanes and vary your speed frequently.

The ATTENTION ASSIST tiredness or alertness assessment is deleted and restarted when continuing the journey in the following situations:
- If you switch off the engine.
- If you unfasten your seat belt and open the driver’s door (e.g. changing drivers or taking a break).

**Setting ATTENTION ASSIST**
Multimedia system:

- Vehicle ➔ Assistance ➔ ATTENTION ASSIST

**Setting options**
- Select Standard, Sensitive or Off.

**Suggesting a rest area**
- Select Suggest Rest Area.

Activate or deactivate the function . If ATTENTION ASSIST detects fatigue or increasing lack of attention, it suggests a rest area in the vicinity.

**Select a suggested rest area:** you are guided to the selected rest area.

**Traffic Sign Assist**

**Function of Traffic Sign Assist**

Traffic Sign Assist detects traffic signs with multifunction camera . It assists you by displaying detected speed limits and overtaking restri-
tions in the instrument cluster and optionally in the head-up display.
Since Traffic Sign Assist also uses the data stored in the navigation system, it can update the display in the following situations without detecting traffic signs:
- When the vehicle changes roads, e.g. freeway entry or exit road.
- When a village or city boundary is passed which is stored in the digital map.
The camera also detects traffic signs with a restriction indicated by an additional sign (e.g. in wet conditions).

Traffic Sign Assist is only an aid. The driver is responsible for keeping a safe distance to the vehicle in front, for vehicle speed and for braking in good time. The maximum permissible speed also depends on factors such as the road surface and traffic conditions.

**Warning when the maximum permissible speed is exceeded**
The system can warn you if you unintentionally exceed the maximum permissible speed. To do this, you can specify in the multimedia system by how much the maximum permissible speed can be exceeded before a warning is issued. You can specify whether the warning is to be just a visual warning or an acoustic one as well.

**Display in the Instrument Display**

Traffic Sign Assist is not available in all countries. If it is unavailable, display 1 is shown in the speedometer.

**System limitations**
The system may be impaired or may not function in the following situations:
- If there is poor visibility, e.g. due to insufficient illumination of the road, if there are highly variable shade conditions or in rain, snow, fog or heavy spray.
- If there is glare, e.g. from oncoming traffic, direct sunlight or reflections.
If the windshield in the area of the multifunction camera is dirty, or if the camera is fogged up, damaged or covered.

If the traffic signs are hard to detect, e.g. due to dirt or snow, or because they are covered or due to insufficient lighting.

If the information in the navigation system’s digital map is incorrect or out-of-date.

If the signs are ambiguous, e.g. traffic signs on construction sites or in adjacent lanes.

If you turn sharply, you may pass traffic signs that are outside the camera’s field of vision.

Setting Traffic Sign Assist

Multimedia system:

Vehicle Assistance Traffic Sign Assist

Displaying detected traffic signs in the media display

Select Display in COMAND.

Activate or deactivate the function.

When DISTRONIC, cruise control or the variable limiter are activated, the speed detected can be manually adopted as the speed limit (→ page 179).

Adjusting the type of warning

Select Visual & Audible, Visual or None.

Adjusting the warning threshold

This value determines the speed at which a warning is issued when exceeded.

Select Warning Threshold.

Set the desired speed.

Blind Spot Assist and Active Blind Spot Assist

Function of Blind Spot Assist and Active Blind Spot Assist

Blind Spot Assist uses two lateral, rear-facing radar sensors to monitor the area up to 130 ft (40 m) behind your vehicle and 10 ft (3 m) directly next to your vehicle.

If a vehicle is detected at speeds above approximately 8 mph (12 km/h) and this vehicle subsequently enters the monitoring range directly next to your vehicle, the warning lamp in the outside mirror lights up red.

If a vehicle is detected close to your vehicle in the lateral monitoring range and you switch on the turn signal indicator in the corresponding direction, a warning tone sounds once. The red warning lamp in the outside mirror flashes. If the turn signal indicator remains switched on, all other detected vehicles are indicated only by the flashing of the red warning lamp.

If you overtake a vehicle quickly, no warning is given.

WARNING Risk of accident despite Blind Spot Assist

Blind Spot Assist does not react to vehicles approaching and overtaking you at a greatly different speed.

As a result, Blind Spot Assist cannot warn drivers in this situation.

Always pay careful attention to the traffic situation and maintain a safe distance at the side of the vehicle.
Blind Spot Assist and Active Blind Spot Assist are only aids. They may fail to detect some vehicles and are no substitute for attentive driving. Always ensure that there is sufficient distance to the side for other road users and obstacles.

**System limitations**
The system may be limited in the following situations:
- The sensors are dirty or covered.
- Poor visibility, e.g. due to fog, heavy rain, snow or spray.
- Narrow vehicles, e.g. bicycles, are within the monitoring range.

Warnings may be issued in error when driving close to crash barriers or similar solid lane borders. Warnings may be interrupted when driving alongside long vehicles, for example trucks, for a prolonged time.

Blind Spot Assist is not operational when reverse gear is engaged.

---

**Function of brake application (Active Blind Spot Assist)**
The brake application function is only available for vehicles with a Driving Assistance Package. If Active Blind Spot Assist detects a risk of a side impact in the monitoring range, a course-correcting brake application is carried out. This is designed to help you avoid a collision.

The course-correcting brake application is available in the speed range between approximately 20 mph (30 km/h) and 125 mph (200 km/h).

---

**WARNING Risk of accident despite brake application of Active Blind Spot Assist**
A course-correcting brake application cannot always prevent a collision.

- Always steer, brake or accelerate yourself, especially if Active Blind Spot Assist warns you or makes a course-correcting brake application.
- Always maintain a safe distance at the sides.

---

**WARNING Risk of accident despite Active Blind Spot Assist**
Active Blind Spot Assist does not react to the following:
- If vehicles overtake too closely on the side, placing them in the blind spot area
- Vehicles approaching and overtaking you at a greatly different speed

As a result, Active Blind Spot Assist may neither give warnings nor intervene in such situations.

- Always pay careful attention to the traffic situation and maintain a safe distance at the side of the vehicle.
If a course-correcting brake application occurs, the red warning lamp flashes in the outside mirror and a warning tone sounds. In addition, display indicating the danger of a side collision appears in the multifunction display.

In rare cases, the system may make an inappropriate brake application. This brake application may be interrupted at any time if you steer slightly in the opposite direction or accelerate.

**System limitations**

Either a course-correcting brake application appropriate to the driving situation, or none at all, may occur in the following situations:

- Vehicles or obstacles, e.g. crash barriers, are located on both sides of your vehicle.
- A vehicle approaches too closely on the side.
- You have adopted a sporty driving style with high cornering speeds.
- You brake or accelerate significantly.
- A driving safety system intervenes, e.g. ESP® or Active Brake Assist.
- ESP® is deactivated
- A loss of tire pressure or a faulty tire is detected.

**Activating/deactivating Blind Spot Assist or Active Blind Spot Assist**

Multimedia system:

- Vehicle Assistance Blind Spot Assist
- Activate or deactivate the function.

**Active Lane Keeping Assist**

**Function of Active Lane Keeping Assist**

Active Lane Keeping Assist monitors the area in front of your vehicle by means of multifunction camera. It serves to protect you against unintentionally leaving your lane. You will be warned by vibration pulses in the steering wheel and guided by a course-correcting brake application back into your lane.

You are warned by vibration pulses in the steering wheel in the following circumstances:

- Active Lane Keeping Assist detects a lane marking.
A front wheel drives over this lane marking. You will also be guided back into your lane by means of a course-correcting brake application if the following conditions are met:

- Active Lane Keeping Assist detects lane markings on both edges of the lane.
- A front wheel drives over a solid lane marking.

You can activate or deactivate the Active Lane Keeping Assist warning.

Active Lane Keeping Assist can neither reduce the risk of an accident if you fail to adapt your driving style nor override the laws of physics. It cannot take into account road, weather or traffic conditions. Active Lane Keeping Assist is only an aid. You are responsible for maintaining a safe distance to the vehicle in front, for vehicle speed, for braking in good time and for staying in lane.

Active Lane Keeping Assist can bring the vehicle back into the lane with a lane-correcting brake application. In the case of a broken lane marking being detected, a brake application will only be made if a vehicle has been detected in the adjacent lane. Oncoming traffic can be detected.

**Vehicles with Driving Assistance package or Driving Assistance Plus package:** overtaking vehicles and vehicles in adjacent lanes can also be detected.

Active Lane Keeping Assist is available in the speed range between 40 mph (60 km/h) and 120 mph (200 km/h).

If a lane-correcting brake application occurs, display 🟢 appears in the multifunction display.

**System limitations**

No lane-correcting brake application occurs in the following situations:

- You clearly and actively steer, brake or accelerate.
- You have switched on the turn signal indicator (situation-dependent).
- A driving safety system intervenes, such as ESP®, Active Brake Assist or Active Blind Spot Assist.
- You have adopted a sporty driving style with high cornering speeds or high rates of acceleration.
- When ESP® is deactivated.
- If a loss of tire pressure or a faulty tire has been detected and displayed.

The system may be impaired or may not function in the following situations:

- If there is poor visibility, e.g. due to insufficient illumination of the road, if there are highly variable shade conditions or in rain, snow, fog or heavy spray.
If there is glare, e.g. from oncoming traffic, the sun or reflections.
If the windshield in the area of the multifunction camera is dirty, or if the camera is fogged up, damaged or covered.
If there are no lane markings, or several unclear lane markings are present for one lane, e.g. around roadworks.
If the lane markings are worn, dark or covered.
If the distance to the vehicle in front is too short and thus the lane markings cannot be detected.
If the lane markings change quickly, e.g. lanes branch off, cross one another or merge.
If the roadway is very narrow and winding.

**Vehicles with Driving Assistance package or Driving Assistance Plus package:**
Active Lane Keeping Assist uses radar sensors to monitor several areas around the vehicle. If the radar sensors in the rear bumper are dirty or covered with snow, the system may be impaired or may not function. If an obstacle in the lane in which you are driving has been detected, no lane-correcting brake application occurs.

### Activating Active Lane Keeping Assist

**WARNING Risk of accident despite Active Lane Keeping Assist warning**

A lane-correcting brake application cannot always bring the vehicle back into the original lane.
- Always steer, brake or accelerate yourself, especially if Active Lane Keeping Assist warns you or makes a lane-correcting brake application.

**WARNING Risk of accident despite intervention of Active Lane Keeping Assist**

Active Lane Keeping Assist does not detect traffic conditions or road users. In very rare cases, the system may make an inappropriate brake application, e.g. after intentionally driving over a solid lane marking.

The brake application can be interrupted at any time if you steer slightly in the opposite direction.
- Always make sure that there is sufficient distance to the side for other traffic or obstacles.

**WARNING Risk of accident despite Lane Keeping Assist**

Lane Keeping Assist cannot always clearly detect lane markings. In such cases, Lane Keeping Assist can:
- give an unnecessary warning
- not give a warning
- Always pay particular attention to the traffic situation and keep within the lane, especially if Active Lane Keeping Assist alerts you.

Observe the system limitations of Active Lane Keeping Assist.
Press button 2. If indicator lamp 1 lights up, Lane Keeping Assist is activated, the lane markings are shown as light in the assistance graphic. When Lane Keeping Assist is active and the lane markings are shown in green in the assistance graphic.

Depending on the country, you may have to press and hold the button to deactivate.

### Sensitivity of Active Lane Keeping Assist

1. The availability of the following function is country-dependent.

With the standard or sensitive setting, you can adjust the sensitivity of Active Lane Keeping Assist. In the sensitive setting, there are additional situations in which Active Lane Keeping Assist intervenes. The likelihood of intervention is therefore higher.

### Setting the sensitivity of Active Lane Keeping Assist

Multimedia system:

- Vehicle ➤ 📦 Assistance ➤ Act. Lane Keep. Assist

- Select a setting.

### Activating/deactivating the warning

- Switch Lane Depart. Warning on ☑ or off ☐.

You do not receive any warning when leaving a lane if the lane keeping warning system is deactivated.

### Vehicle towing instructions

The vehicle is not suitable for the use of tow-bar systems, which are used for flat towing or dinghy towing, for example. Attaching and using tow-bar systems can lead to damage on the vehicle. When towing a vehicle with tow-bar systems, safe, dynamic driving behavior of the towing vehicle and the vehicle being towed is not guaranteed. The vehicle-trailer combination can swerve from side to side. Comply with the permitted towing methods (→ page 377) and the instructions for towing with both axles on the ground (→ page 379).
**Instrument Display overview**

⚠️ **WARNING** Risk of accident due to an instrument display malfunction

If the Instrument Display has failed or malfunctioned, you may not recognize function restrictions applying to safety relevant systems. The operating safety of your vehicle may be impaired.

- Drive on carefully.
- Have the vehicle checked immediately at a qualified specialist workshop.

If the operating safety of your vehicle is impaired, park the vehicle safely as soon as possible. Contact a qualified specialist workshop.

---

**Instrument Display**

The segments on speedometer 1 indicate the system status for the following:
- Cruise control (→ page 175)
- Active Distance Assist DISTRONIC (→ page 177)

**NOTE** Engine damage due to excessively high engine speeds

The engine will be damaged if you drive with the engine in the overrevving range.

- Do not drive with the engine in the overrevving range.

The fuel supply is interrupted to protect the engine when the red mark on tachometer 3 (overrevving range) is reached.

During normal operating conditions, coolant temperature display 4 may rise to the red mark.

Further display content can be shown on display 3 for additional values (→ page 227).

---

1. Speedometer
2. Multifunction display
3. Example: area for additional values
4. Mercedes-AMG GT 43/GT 53:
   - EQ Boost display
4. Mercedes-AMG GT 63:
   - Coolant temperature gauge
5. Fuel level and fuel filler flap location indicator
**WARNING** Danger of burns when opening the hood

If you open the hood when the engine has overheated or during a fire in the engine compartment, you could come into contact with hot gases or other escaping operating fluids.

- Before opening the hood, allow the engine to cool down.
- In the event of a fire in the engine compartment, keep the hood closed and call the fire service.

EQ Boost display

- **POWER** shows the electrical drive support as a percentage.
- **CHARGE** shows the electric motor’s recuperation power performance as a percentage.

Overview of the buttons on the steering wheel

1. **Back/Home button (press and hold)**, on-board computer
2. **Touch Control, on-board computer**
3. **Control panel for cruise control or Active Distance Assist DISTRONIC**
4. **Control panel for multimedia system:**
   - **LINGUATRONIC or voice control system**
   - **Displays favorites**
   - **VOL: control knob, adjusts the volume or switches the sound off** (press)
   - **Makes/accepts a call**
   - **Rejects/ends a call**
5. **Calls up the home screen**
6. **Touch Control multimedia system**
7. **Back button (press and hold)**

Operating the on-board computer

**WARNING** Risk of distraction from information systems and communications equipment

If you operate information and communications equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.
Only operate this equipment when the traffic situation permits.

If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

Observe the legal requirements for the country in which you are currently driving when operating the on-board computer.

The on-board computer displays appear on the multifunction display (→ page 228).

The on-board computer can be operated using the left-hand Touch Control 2 and left-hand back/home button 1. When the on-board computer is being operated, different acoustic signals sound as operating feedback, e.g. when the end of a list is reached or when scrolling through a list.

The following menus are available:

- Service
- Assistance
- Performance
- Trip
- Navigation
- Radio
- Media
- Phone
- HUD

**Vehicles with an Instrument Display (standard) only:** If you select the *Performance* menu, the upshift bar will appear on the multifunction display.

The menus can be called up from the menu bar on the multifunction display.

- **To call up the menu bar:** press back button on the left 1 until the menu bar is displayed.

**Vehicles without Active Distance Assist DISTRONIC:** press the button to call up the menu bar of the on-board computer.
To scroll in the menu bar: swipe left or right on left-hand Touch Control.

To call up a menu or confirm the selection: press left-hand Touch Control.

To scroll through displays or lists on the menu: swipe upwards or downwards on left-hand Touch Control.

To call up a submenu or confirm the selection: press left-hand Touch Control.

To exit a submenu: press back button on the left.

Setting the design
On-board computer:

- **Designs**
  - This function is only available for vehicles with a Widescreen Cockpit.

The following designs can be selected:
- Classic
- Sport
- Supersport

- **To select a design:** swipe upwards or downwards on the left-hand Touch Control.
- Press the left-hand Touch Control. The Instrument Display is shown in the selected design.

Setting the additional value range
Example: G-meter

- **Additional value range**
  - Index points

- **To select display content:** swipe to the right on the left-hand Touch Control.
  - Swipe upwards or downwards on the left-hand Touch Control to select display content. When display content is selected, additional value range is briefly highlighted.
  - Index points display the selected list item.
The following content can be displayed in Mercedes-AMG vehicles:

- Tachometer/date
- G-meter
- Engine data
- AMG TRACK PACE
- Warm-up
- Trip computer
- Navigation

Further displays on the multifunction display:

- Active Parking Assist activated (→ page 211)
- Parking Assist PARKTRONIC deactivated (→ page 203)
- Cruise control (→ page 175)
- Active Distance Assist DISTRONIC (→ page 177)
- Active Steering Assist (→ page 183)
- ECO start/stop function
- Mercedes-AMG GT 43/53: operational readiness established
- Mercedes-AMG GT 63: 4-cylinder operation
- HOLD function (→ page 189)
- Adaptive Highbeam Assist (→ page 118)

**Vehicles with Traffic Sign Assist:** Detected instructions and traffic signs (→ page 216).
Adjusting the instrument lighting

Turn brightness control up or down. The lighting of the Instrument Display and in the control elements of the vehicle interior is adjusted.

Menus and submenus

Functions on the Service menu of the on-board computer

On-board computer:

- Service

  - To select the function: swipe upwards or downwards on the left-hand Touch Control.
  - Press the left-hand Touch Control.

Functions on the Service menu:

- Message memory (→ page 428)
- Tires:
  - Checking the tire pressure with the tire pressure monitoring system (→ page 392)
  - Restarting the tire pressure monitoring system (→ page 393)
- ASSYST PLUS: calls up the service due date (→ page 350)
- Vehicles with a Widescreen Cockpit: Coolant: Coolant temperature display
- Engine Oil Level: engine oil level

Calling up the assistant display

On-board computer:

- Assistance

The following displays are available on the assistant display menu:

- Assistant display
- Attention level (→ page 215)

To switch between the displays: swipe upwards or downwards on the left-hand Touch Control.

Status displays on the assistant display:

- ATTENTION ASSIST: deactivated
• Light lane markings: Active Lane Keeping Assist enabled
• Green lane markings: Active Lane Keeping Assist active
• Gray radar waves next to vehicle: Blind Spot Assist or Active Blind Spot Assist enabled
• Green radar waves next to vehicle: Blind Spot Assist or Active Blind Spot Assist active
• Active Distance Assist DISTRONIC displays (→ page 177)

Calling up displays on the Performance menu

On-board computer:

→ Performance

To select a display: swipe upwards or downwards on the left-hand Touch Control.

Displays on the Performance menu:
• Warm-up
• SETUP

• G-meter
• Engine data

Vehicles without AMG TRACK PACE: RACE-TIMER (→ page 231)

Example: warm-up
1. Digital speedometer
2. Gear display
3. Engine oil temperature
4. Transmission oil temperature
5. Boost pressure

If the engine or transmission is not at operating temperature, the multifunction display shows temperature 3 or 4 in blue. Avoid using the full engine power output during this time.

SETUP in Mercedes-AMG GT vehicles (example)
1. Drive system setting: Reduced/Moderate/Sport/Dynamic/Race
2. Suspension tuning: Comfort/Sport/Sport+
3. Exhaust system: Balanced/Powerful
To reset the G-meter: press the left-hand Touch Control.

Select Yes.

Press the left-hand Touch Control.

Example: engine data
1. Current power output
2. Current torque

When current power 1 or current torque 2 achieves the maximum value, the digital value is briefly stationary. The bar display continues.
RACETIMER is intended only for use on designated race tracks. Do not use the function on public roads.

To select a display and start:
- swipe up or down on the left-hand Touch Control.
- Press the left-hand Touch Control.
- Select Start and press the left-hand Touch Control.
- To stop: select Stop and press the left-hand Touch Control.

To start a new lap: after the first stored lap, press the left-hand Touch Control.
To select New Lap. A maximum of 32 laps may be stored.

To stop:
- select Stop and press the left-hand Touch Control.

To start a new lap: after the first stored lap, press the left-hand Touch Control.
- Select New Lap.
  A maximum of 32 laps may be stored.

To stop:
- select Stop and press the left-hand Touch Control.

To reset:
- stop RACETIMER and press the left-hand Touch Control.
- Select Reset and press the left-hand Touch Control.
  All laps will be deleted.

Calling up displays on the trip menu
On-board computer:
- Trip

Example: RACETIMER
1 Lap
2 Elapsed time
3 Average speed
4 Distance covered

To display the lap statistics: after at least two stored laps, press the left-hand Touch Control.

To reset:
- Stop RACETIMER and press the left-hand Touch Control.
- Select Reset and press the left-hand Touch Control.
  All laps will be deleted.

Calling up displays on the trip menu
On-board computer:
- Trip

You can view information about the journey in the left-hand area of the instrument display.

To select a display: swipe upwards or downwards on the left-hand Touch Control.
Displays on the Trip menu:
- Standard display
- Range and current fuel consumption
  If there is only a small amount of fuel left in the fuel tank, the display will show a vehicle being refueled instead of the range.
- ECO display (→ page 144)
- Trip computer From Start and From Reset
- Digital speedometer

Example: standard display
1 Trip distance
2 Total distance

Example: trip computer
1 Total distance
2 Driving time
3 Average speed
4 Average fuel consumption

Resetting values on the trip menu of the on-board computer

On-board computer:
- Trip

The spelling on the main menu displayed may differ. Therefore, observe the menu overview for the Instrument Display (→ page 225).

You can reset the values of the following functions:
- Trip distance
- Trip computer From Start and From Reset
- ECO display (→ page 144)

To select the function to be reset: swipe upwards or downwards on the left-hand Touch Control.
- Press the left-hand Touch Control.
- Select Yes.
- Press the left-hand Touch Control.

If you press and hold the left-hand Touch Control, the values of the function will be reset immediately.
Calling up navigation instructions on the on-board computer

On-board computer:

Navigation

Example: no change of direction announced

1. Distance to the next change of direction
2. Distance to the next destination
3. Estimated arrival time at next destination
4. Current road

Example: change of direction announced

1. Distance to the change of direction
2. Road to which the change of direction leads
3. Change-of-direction symbol
4. Recommended lane (white)
5. Possible lane
6. Lane not recommended (dark gray)

Further possible displays on the Navigation menu:

- Direction of Travel: display of direction of travel and road currently being traveled on.
- New Route... or Calculating Route...: a new route is being calculated.

- Road Not Mapped: the road is unknown, e.g. for newly built roads.
- No Route: no route could be calculated to the selected destination.
- Off Map: the map for the current location is not available.
- Area of Destination Reached: you have reached the area of destination.
- ✔: you have reached the destination or an intermediate destination.

To exit the menu: press the back button on the left.

Vehicles with the COMAND multimedia system: You can also start navigation to one of the recent destinations on the Navigation menu:

Press the left-hand Touch Control.

To select a destination: swipe upwards or downwards on the left-hand Touch Control.

Press the left-hand Touch Control. Route guidance is started.
If route guidance has already been activated, a request will appear asking whether you wish to end the current route guidance.

- Select Yes.
- Press the left-hand Touch Control. Route guidance is started.

**Selecting radio stations using the on-board computer**

On-board computer:

- Radio

Selecting the frequency range or memory preset

- Press the left-hand Touch Control.

To select a radio station: swipe upwards or downwards on the left-hand Touch Control.

- To select the frequency range/station preset: swipe upwards or downwards on the left-hand Touch Control.

- Press the left-hand Touch Control.

When you select a station from the memory presets, the preset will appear next to the station name. When you select a saved station in the frequency range, an asterisk will appear next to the station name.
Media playback using the on-board computer

On-board computer:

1. Media source
2. Track number and current track
3. Name of artist
4. Name of album

To change tracks on an active media source: swipe upwards or downwards on the left-hand Touch Control.

Changing a media source

- Press the left-hand Touch Control.
- To select a media source: swipe upwards or downwards on the left-hand Touch Control.
- Press the left-hand Touch Control.

Dialing telephone numbers using the on-board computer

- To select an entry: swipe upwards or downwards on the left-hand Touch Control.
- Only operate this equipment when the traffic situation permits.
- If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

When telephoning, you must observe the legal requirements for the country in which you are currently driving.

Requirements:
- The mobile phone is connected to the multimedia system.

On-board computer:

1. Phone

Vehicles with the COMAND multimedia system: The most recent telephone calls (dialed, received and missed calls) are displayed on the Phone menu.

- To select an entry: swipe upwards or downwards on the left-hand Touch Control.
- Press the left-hand Touch Control.
- If there is only one telephone number saved to an entry: the telephone number is selected.
- If there are multiple telephone numbers saved to an entry: swipe upwards or down-

⚠️ WARNING Risk of distraction from information systems and communications equipment

If you operate information and communication equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

1. Media playback using the on-board computer
2. Track number and current track
3. Name of artist
4. Name of album

1. Media source
2. Track number and current track
3. Name of artist
4. Name of album

To change tracks on an active media source: swipe upwards or downwards on the left-hand Touch Control.

Changing a media source

- Press the left-hand Touch Control.
- To select a media source: swipe upwards or downwards on the left-hand Touch Control.
- Press the left-hand Touch Control.

Dialing telephone numbers using the on-board computer

- To select an entry: swipe upwards or downwards on the left-hand Touch Control.
- Only operate this equipment when the traffic situation permits.
- If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

When telephoning, you must observe the legal requirements for the country in which you are currently driving.

1. Phone

Vehicles with the COMAND multimedia system: The most recent telephone calls (dialed, received and missed calls) are displayed on the Phone menu.

- To select an entry: swipe upwards or downwards on the left-hand Touch Control.
- Press the left-hand Touch Control.
- If there is only one telephone number saved to an entry: the telephone number is selected.
- If there are multiple telephone numbers saved to an entry: swipe upwards or down-
wardson the left-hand touch control to select the desired telephone number.

Press the left-hand Touch Control.
The telephone number will be dialed.

The following displays may appear instead of the telephone numbers dialed:
- **Please Wait...**: the application is starting. If a Bluetooth® connection to the mobile phone is not established, the menu for authorizing and connecting a mobile phone will be displayed on the multimedia system (→ page 301).
- **Updating data...**: the call list is being updated.
- **Importing Contacts...**: contacts are being imported from the mobile phone or a storage medium.

**Accepting/rejecting a call**

**Vehicles with Head-up Display**: when you receive a call, the *Incoming Call* message will appear on the Head-up Display.

- Swipe upwards or downwards on the left-hand Touch Control and select [ ] (Accept) or [ ] (Reject).
- Press the left-hand Touch Control.

You may accept/reject the call using button [ ] or [ ] on the steering wheel.

**Adjusting the Head-up Display settings on the on-board computer**

**On-board computer:**

- [ ] HUD

The following Head-up Display settings can be adjusted:
- **Position**
- **Brightness**
- **Display Content**

- **To select a setting**: swipe upwards or downwards on the left-hand Touch Control.
- Press the left-hand Touch Control.

- **To adjust a value**: swipe upwards or downwards on the left-hand Touch Control.

- Press the left-hand Touch Control.

**Head-up Display**

**Function of the Head-up Display**

The Head-up Display projects into the driver’s field of vision:
- Information from the navigation system
Information from the driver assistance systems
Some warning messages

Display elements

1 Current engine speed
2 Current speed
3 Currently selected gear, gearshift options with manual shifting
4 Detected instructions and traffic signs

Depending on the vehicle's equipment, you can select further AMG displays in addition to the standard displays on the Display Content menu.

If you select RACETIMER, the Head-up Display will show the lap and lap time.
In vehicles with AMG TRACK PACE, you can display further content depending on the setting, e.g.:

- Speed and gear indicator
- Lap and sector times
- Acceleration and braking
- Graphic track layouts

When you receive a call, the Incoming Call message will appear on the Head-up Display.
In audio mode, the station name or track will be shown temporarily when the audio source is being actively operated.

System limitations
The visibility is influenced by the following conditions:

- Seat position
- The positioning of the display image
- Light conditions
- Wet roads

Objects on the display cover
Polarization in sunglasses

In extreme sunlight, sections of the display may appear washed out. You can correct this by switching the Head-up Display off and on again.

Switching the Head-up Display on/off
Press button 1.
### Notes on operating safety

**WARNING** Risk of distraction from information systems and communications equipment

If you operate information and communication equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the traffic situation permits.
- If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

**WARNING** Risk of distraction from operating mobile communication equipment while the vehicle is in motion

If you operate mobile communication equipment when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the vehicle is stationary.

For your own safety, always observe the following points when operating mobile communications equipment and especially your voice control system:

- Observe the legal requirements for the country in which you are driving.
- While driving, only operate mobile communications equipment and your voice control system when the traffic conditions permit it. You may otherwise be distracted from the traffic conditions and cause an accident, injuring yourself and others.
- If you use the voice control system in an emergency your voice can change and your telephone call, e.g. an emergency call, can thereby be unnecessarily delayed.
- Familiarize yourself with the voice control system functions before starting the journey.

### Operation

**Overview of operating the multifunction steering wheel**

The Voice Control System is operational approximately thirty seconds after the ignition is switched on.
Press the rocker switch up: \( \text{start} \) starts the Voice Control System

Press the control knob: \( \text{ends} \) switches the sound off or on (ends the Voice Control System)

Turn the control knob up/down: increases/decreases the volume

Press the rocker switch up: \( \text{makes/accepts} \) a call

Press the rocker switch down: \( \text{rejects/ends} \) a call (ends the Voice Control System)

Conducting a dialog with the Voice Control System

- To start or continue a dialog: on the multifunction steering wheel, press the rocker switch up.
  You can say a voice command after an acoustic signal.

- To correct an entry: say the Correction voice command.

- To select an entry from the selection list: say the line number or the contents.

- To browse the selection list: say the Next or Back voice command.

- To interrupt the dialog: say the Pause voice command.

- To cancel the dialog: say the Cancel voice command.

Operable functions

You can use the Voice Control System to operate the following equipment depending on the features:

- Telephone
- Text messages
- Navigation
- Address book
- Radio
- Audio (memory card, Media Interface, USB and Bluetooth® audio)
- Vehicle

Overview of types of voice commands

A distinction is made between the following voice commands:

- **Global voice commands** can be said at any time and regardless of the current application, e.g. the voice commands Navigate to, Call or Text message to.
Application-specific voice commands are only available for the active application.

Information on the language setting
You can change the language of the Voice Control System via the system language settings. If the set system language is not supported by the Voice Control System, English will be selected. The Voice Control System is available in English, French, Portuguese and Spanish.

Using the Voice Control System effectively

Features of audible help functions
You receive information and help for:
- **For optimum operation:** say the brief instruction voice command.
- **Current application:** on the multifunction steering wheel, press the *ok* rocker switch up and say the Help voice command.
- **Continued dialog:** say the Help voice command during a voice dialog.
- **Specific function:** say voice commands for the desired function, e.g. Help telephone.

Notes on how to improve speech quality
If the Voice Control System does not understand you:
- only operate the Voice Control System from the driver's seat.
- say the voice commands coherently and clearly, but do not exaggerate the words.
- avoid loud noises that cause interference while making a voice command entry, e.g. the blower.

A voice tag in the address book is not recognized:
- only create sensible address book entries in the system/mobile phone, e.g. enter surname and first name in the correct field.
- do not use any abbreviations, unnecessary spaces or special characters.

If a station list entry is not recognized:
- say the Read out station list voice command.

Essential voice commands

Overview of switch voice commands
Switch voice commands can be used to open certain applications. The voice command selection can be used regardless of the application that is currently active.

Overview of navigation voice commands
Using navigation voice commands, you can enter POIs or conventional addresses as well as directly change important navigation settings.

Overview of telephone voice commands
You can use the telephone voice commands to make phone calls or search through the address book.
## Telephone voice commands

<table>
<thead>
<tr>
<th>Voice command</th>

</table>

Overview of vehicle voice commands

You can use the vehicle voice commands to directly call up the corresponding menus for the vehicle settings.
Overview and operation

Overview of the multimedia system

**WARNING** Risk of distraction from information systems and communications equipment

If you operate information and communication equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the traffic situation permits.
- If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system.

---

1. Touch Control
2. Media display
3. Main function button group (→ page 253)
4. Press the rocker switch up or down: increases or decreases the volume
5. Display button shows volume, current volume when setting the volume or mute
   Press the display button: switches the multimedia system on/off
6. Touchpad

---

Equipment with touchpad

1. Touch Control

2 Media display
3 Main function button group (→ page 253)
4 Press the rocker switch up or down: increases or decreases the volume
5 Display button shows volume, current volume when setting the volume or mute
   Press the display button: switches the multimedia system on/off
6 Controller

Notes on the media display

![NOTE] Scratches on the display

The display has a highly sensitive, high-gloss surface. There is a risk of it becoming scratched.

- Avoid touching the display.
- Observe the notes on cleaning.

Observe the notes on caring for the interior (→ page 364).

Automatic temperature-controlled switch-off feature: if the temperature is too high, the brightness is initially reduced automatically. The display may then switch off completely for a while.

ℹ️ If you are wearing polarized sunglasses, it may be difficult to read the display.

Central control elements overview

1 Touch Control
2 Main function button group
3 Touchpad
Controller equipment
1 Touch Control
2 Main function button group
3 Controller

**Touch Control**

**Operating Touch Control**

- **To call up main functions**: press button 1.
  - or
  - Press and hold button 3.
- **To call up favorites**: press button 1.
- **Swipe down on Touch Control** 2.
- **To open a list**: press Touch Control 2.
- **To close a list**: press button 3.
  - or
  - Swipe right on Touch Control 2.

- **To select a menu item**: swipe up, down, left or right on Touch Control 2.
- **Press Touch Control** 2.
- **To move the digital map**: swipe in any direction.

**Setting the sensitivity for the Touch Control**
Multimedia system:

1. System ➔ Input ➔ Touch Control Sensitivity
2. Select Fast, Medium or Slow.

**Operating the controller**

**Requirements:**
- The multimedia system is equipped with a controller.
1. **button**
   - Press briefly: returns to the previous display
   - Press and hold: calls up main functions

2. **Controller**

3. **button**
   - Calls up main functions and favorites

Controller operating options:

- Turn \(\circ\) counter-clockwise or clockwise.
- Slide \(\circ\) left or right.
- Slide \(\circ\) up or down.
- Slide \(\circ\) diagonally.
- Press \(\bullet\) briefly or press and hold.

---

**Touchpad**

### Operating the touchpad

**Requirements:**
- The multimedia system is equipped with a touchpad.

---

1. **button**
   - Press briefly: returns to the previous display
   - Press and hold: calls up main functions

2. **button**
   - Calls up the control menu of the last active audio source

3. **button**
Calls up main functions and favorites

**Touchpad**

You can navigate in menus and lists via touch-sensitive surface by using a single-finger swipe.

- **To open or close lists**: swipe left or right.
- **To select the menu item**: swipe up, down, left or right.
- **Press touchpad**.
- **To move the digital map**: swipe in any direction.

Use the following functions with a two-finger swipe:

- **To call up main functions and favorites**: swipe down with two fingers. The swipe must start in the upper area of the touchpad.
- **To zoom in and out of the map**: move two fingers together or apart.
- **To call up the control menu of the last active audio source**: swipe up with two fingers. The swipe must start in the lower area of the touchpad.

### Setting the sensitivity for the touchpad

Multimedia system:

- **System**  
  - **Select Touchpad Sensitivity**.
  - **Select Fast, Medium or Slow**.

### To set the pressure sensitivity:

- **Touchpad Tap on** or off

If the function is switched on, a tap on the touchpad is enough to select a menu item.

### Handwriting recognition: switching the read-aloud function on/off

Multimedia system:

- **System**  
  - **Audio**  
  - **System Feedback**  
  - **Switch Read Out Handwriting Recognition** on or off.

### Activating/deactivating haptic operating feedback on the touchpad

Multimedia system:

- **System**  
  - **Input**

The function supports you when making entries on the touchpad and when selecting menus.

- **Switch Haptic Operating Feedback** on or off

When the function is activated, a tactile feedback in the form of a vibration is effected when the touchpad is operated.

### Selecting a station and track using the touchpad

- **Press the button on the touchpad.**
  - **Radio**: the previous or the next station is set.
  - **Media source**: the previous or the next music track is selected.

- **Swipe up with two fingers.** The swipe must start in the lower area of the touchpad. The control menu appears for the audio source that was last selected.
  - **Use one finger to swipe up or down.**
To hide the control menu: swipe down with two fingers. The swipe must start in the upper area of the touchpad.

Main functions

Calling up the main functions

1 NAVI button
   Calls up navigation
2 RADIO button
   Calls up the radio
3 MEDIA button
   Calls up media
4 TEL button
   Calls up the telephone
5 SET button
   Sets vehicle functions

Alternatively: press the © button on the Touch Control or touchpad (if available). The main functions are displayed.

Select the main function.

Favorites

Overview of favorites
Favorites offer you quick access to frequently used applications. It is possible to create 20 favorites in total. The following functions are available:

- add pre-defined favorites from the following categories (→ page 253):
  - Navigation
  - Entertainment
  - Phone
  - Connect
- Vehicle
- System Settings
  - add your own favorites (→ page 253)
  - rename favorites (→ page 254).
  - move favorites (→ page 254).
  - delete favorites (→ page 254).
  - reset all favorites (→ page 254)

Calling up favorites

Press the © button. The main functions are displayed.

Navigating downwards once.
Navigating means:

- Swiping on the Touch Control or the touchpad

Leaving the favorites menu

Press the © button.

Adding favorites

Adding predefined favorites

Press the © button.
The main functions are displayed.
Navigate downwards twice.
The Favorites menu appears.
Select **New Favorite**.
The categories are displayed.
Select a category.
The favorites are displayed.
Select a favorite.
Store the favorite at the desired position.
If a favorite has already been added at this position, it will be overwritten.

**Example: adding your own favorites**

Select **Vehicle**.
Select **Full Screen: Consumption**.
Press and hold the button until the favorites are displayed.
Store the favorite at the desired position.

If **No function available for saving** is shown, the selected function cannot be added.

**Renaming favorites**

Press the button.
The main functions are displayed.

**Moving favorites**

Press the button.
The main functions are displayed.
Select a favorite.
Navigate downwards once.
The Favorites menu appears.
Select **Rename**.
Enter the characters.
**To confirm the entry:** select ok.

**Deleting favorites**

Press the button.
The main functions are displayed.

Navigate downwards once.
Select a favorite.
Navigate downwards once.
The Favorites menu appears.
Select **Delete**.
Select **Yes**.
**To restore all favorites:** select **Reset All**.
A prompt appears.
Select **Yes**.
The favorites are reset to the factory settings.

**Switches the sound on/off**
To mute: press volume control 1. The  symbol appears in the status line of the media display. You will also hear traffic announcements and navigation announcements even when the sound is muted.

To switch on: change the media source or turn volume control 1.

Adjusting the volume

On the multifunction steering wheel

On the multimedia system

On the multifunction steering wheel: turn volume control 1. The volume of the current radio or media source is set. The volume of other audio sources can be adjusted separately. Adjust this in the following situations:

- during a traffic announcement

On the multimedia system: press rocker switch 1 up or down. The volume is increased or reduced. When adjusting the volume, the display button to the left of the rocker switch shows the current volume.

- during a navigation announcement
  The volume of the navigation announcement changes in accordance with the volume of the current media source.
- during a telephone call
- when entering or exiting a parking space while using Active Parking Assist

Select System in the multimedia system.
Select Audio.
Select a volume setting.
Set the volume.
Entering characters

Using the character input function

**WARNING** Risk of distraction from information systems and communications equipment

If you operate information and communication equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the traffic situation permits.
- If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system.

Use the character input function in the following situations, for example:
- Renaming a favourite
- Entering a POI or address
- Making a phone call

The following functions are available:
- Selecting a character in the character bar
- Writing a character on the touchpad

Character input can be started with a control element and resumed with another.

The multimedia system is equipped with either a touchpad or controller.

**On the Touch Control and controller (if available):** select the characters in the character bar.

Depending on the target entry, the following characters are available:
- The full set of characters is shown
- Only those characters which are useful for the current input string are shown
  Other characters are grayed out.

**On the touchpad (if available):** select the characters in the character bar.

or

- Write the characters on the touch-sensitive surface of the touchpad.

Handwriting recognition supports you by means of character suggestions and a read-aloud function.

Examples of character entry:
- Renaming a favourite
- Entering a POI or an address using free or step-by-step search
- Entering a web address

**Entering characters on the touchpad**

**Requirements:**
- The entered or selected character should be read out: the handwriting recognition read-aloud function is switched on (→ page 252).
Example: renaming favorites

- Call up the "Renaming favorites" function (→ page 254).
- **To enter a character**: use your finger to write characters on the touchpad. The character is entered in the input line. If different interpretations are possible, character suggestions are displayed.
- **To select a character suggestion**: swipe up or down on the touchpad.
- Resume character input.
- **To enter a space**: swipe right when the cursor is located in the input line.

- **To delete a character**: swipe left when the cursor is located in the input line.
- **To confirm the entry**: press the touchpad.
- **To finish character entry**: swipe upwards. or
- Press the button.

**Example: entering a destination (navigation)**
- Enter the POI or address (→ page 274).

**System settings**

**Display**

**Configuring display settings**
Multimedia system:

- **System**
- **Display and Designs**

**Setting the display brightness**

- Select **Display Brightness**.
- Select a brightness value.

**Switching the display off/on**

- **Off**: select **Display Off**.
- **On**: press a button, [TEL], for example.

**Display design**

- Select **Day/Night Design**.
- Select **Automatic, Day Design or Night Design**.

**Additional display area**

Depending on the vehicle, various items of additional information can be shown. The additional display area comprises the left-hand or right-hand third of the display.

- Select **Additional Disp. Area**.

The following display content can be selected:

- Dynamic
- Navigation Map
- Consumption
- Time and Date
Time and date

Setting the time and date automatically
Multimedia system:

- Deactivate Manual Time Adjustment.
  The time and date are set automatically for the selected time zone and summertime option.

The correct time is required for the following functions:
- Route guidance with time-dependent traffic guidance.
- Calculation of expected time of arrival.

Setting the time zone
Multimedia system:

- Select a country.
  Depending on the country, time zones are displayed.

Setting summer time
The Automatic Daylight Saving Time and Daylight Saving Time options cannot be selected in all countries.

Setting the time and date format
Multimedia system:

- Set the date and time format.

Setting the time manually
Requirements:
- The Manual Time Adjustment function is switched on.

Multimedia system:

- Set the hours.
- Navigate to the right to set the minutes.
- Set the minutes.
- Confirm changes when exiting the menu.

The date is set automatically via GPS.
Connectivity

Switching transmission of the vehicle position on/off
Multimedia system:
- System ⏯ Connectivity
  - Select Transmit Vehicle Pos.
  - Activate ✔ or deactivate ❌ the function.

Bluetooth®

Information about Bluetooth®
Bluetooth® technology is a standard for short-range wireless data transfer up to approximately 32.8 ft (10 m).

You can use Bluetooth® to connect your mobile phone to the multimedia system and use the following functions, for example:
- hands-free system with access to the following options:
  - contacts (→ page 305)
  - call lists (→ page 308)
  - text messages
- Internet connection
- listening to music via Bluetooth® audio (→ page 335)
- transferring business cards (vCards) into the vehicle

Bluetooth® is a registered trademark of Bluetooth Special Interest Group (SIG) Inc.

Internet connection via Bluetooth® is not available in all countries.

Activating/deactivating Bluetooth®
Requirements
To switch off Bluetooth®:
- Apple CarPlay™ is not active.
Multimedia system:
- System ⏯ Connectivity
  - Activate ✔ or deactivate ❌ Bluetooth®.

If Android Auto is active, a prompt appears asking whether Bluetooth® should be deactivated.

Select Yes.
Android Auto is closed and Bluetooth® is deactivated.

Wi-Fi

Wi-Fi connection overview
You can use Wi-Fi to establish a connection with a Wi-Fi network and to access the Internet or other network devices.

The following connection options are available:
- Wi-Fi connection
  - The Wi-Fi connection to a Wi-Fi-capable device, e.g. the customer’s mobile phone or a tablet PC is established.
- Multimedia system as a Wi-Fi hotspot
  - Using this function, a tablet PC or notebook can be connected, for example.

To establish a connection, you can use the following methods:
- WPS PIN
  - The connection to a secure Wi-Fi network is made via a PIN.
Setting up Wi-Fi

Requirements:
- The device to be connected supports one of the three means of connection described (→ page 259).

Multimedia system:
- System  Connectivity

Activating/deactivating Wi-Fi
- Switch Wi-Fi on ✓ or off ☐.
  - If Wi-Fi is deactivated ☐, communication via Wi-Fi to all devices is interrupted. This also means that a connection to the HERMES communication module cannot be established. Then functions such as dynamic route guidance with Live Traffic Information are not available.

Connecting the multimedia system with a device via Wi-Fi
This function is available if a HERMES communication module is not installed.
The type of connection established must be selected on the multimedia system and on the device to be connected.
- The connection procedure may differ depending on the device. Follow the instructions that are shown in the display. Further information (see the manufacturer’s operating instructions).
  - Select Internet Settings.
  - Select Search for Wi-Fi Networks.

Using a security key
- Select a Wi-Fi network in the list.
  - Have the security key displayed on the device to be connected (see the manufacturer's operating instructions).
  - Enter this security key on the multimedia system.
  - Confirm the entry with OK.

Using a WPS PIN
- Highlight a Wi-Fi network in the list.
  - Select Connect via WPS PIN Input.
    - The multimedia system generates an eight-digit PIN.
    - Enter this PIN on the device to be connected.
    - Confirm the entry.

Using a button
- This function is only available in a Wi-Fi frequency of 2.4 GHz.
  - Highlight a Wi-Fi network in the list.
  - Select Connect via WPS PBC.
    - Select "Connect via WPS PBC" in the options on the device to be connected.
    - Press the WPS button on the device to be connected.
    - Select Continue in the multimedia system.

Connecting the multimedia system with a device via Wi-Fi
This function is available if a HERMES communication module is not installed.
The type of connection established must be selected on the multimedia system and on the device to be connected.
- The connection procedure may differ depending on the device. Follow the instructions that are shown in the display. Further information (see the manufacturer’s operating instructions).
  - Select Internet Settings.
  - Select Search for Wi-Fi Networks.

Using a security key
- Select a Wi-Fi network in the list.
  - Have the security key displayed on the device to be connected (see the manufacturer's operating instructions).
  - Enter this security key on the multimedia system.
  - Confirm the entry with OK.

Using a WPS PIN
- Highlight a Wi-Fi network in the list.
  - Select Connect via WPS PIN Input.
    - The multimedia system generates an eight-digit PIN.
    - Enter this PIN on the device to be connected.
    - Confirm the entry.

Using a button
- This function is only available in a Wi-Fi frequency of 2.4 GHz.
  - Highlight a Wi-Fi network in the list.
  - Select Connect via WPS PBC.
    - Select "Connect via WPS PBC" in the options on the device to be connected.
    - Press the WPS button on the device to be connected.
    - Select Continue in the multimedia system.

    - Select Continue in the multimedia system.
Device has already been connected:

- **To automatically connect:** highlight a Wi-Fi network in the list.
- **Activate** Cancel
- **To connect:** highlight a Wi-Fi network in the list.
- **Select** Cancel
- The connection is established again. These functions are possible when the device has already been connected to the Wi-Fi network.

Setting up a Wi-Fi hotspot
Multimedia system:

- ➤ System ➤ Connectivity

Configuring the multimedia system as a Wi-Fi hotspot
The type of connection established depends on the device to be connected. The function must be supported by the multimedia system and by the device to be connected. The type of connection established must be selected on the multimedia system and on the device to be connected.

- ➤ Select Set Up Hotspot.
- ➤ Highlight Connect Device to Vehicle Hotspot.

Generating a WPS PIN

- ➤ Select Connect via WPS PIN Generation.
- ➤ Enter the PIN shown in the media display on the device to be connected and confirm.

Connecting using a WPS PIN

- ➤ Select Connect via WPS PIN Input.
- ➤ Select Enter WPS PIN.
- ➤ Enter the PIN that is shown on the external device’s display on the multimedia system.
- ➤ Select Continue.

Connecting using a button
Requirements

- This function is only available in a Wi-Fi frequency of 2.4 GHz.

- ➤ Select Connect via WPS PBC.
- ➤ Press the WPS button on the device to be connected or select Connect.

Connecting using a security key

- ➤ Select Connect Device to Vehicle Hotspot.
- A security key is displayed.
- ➤ Select the vehicle from the device to be connected. The vehicle is displayed with the SSID MB Hotspot XXXXX.
- ➤ Enter the security key which is shown in the media display on the device to be connected.
- ➤ Confirm the entry.

Generating a new security key:

- ➤ Select Set Up Hotspot.
- ➤ Select Generate Security Key.
- A connection will be established with the newly created security key.

- ➤ To save a security key: select Save.
- When a new security key is saved, all existing Wi-Fi connections are then disconnected. If the Wi-Fi connections are being re-established, the new security key must be entered.
Managing COMAND Touch devices

**Requirements:**
- The COMAND Touch app is installed on the external device (e.g. tablet or smartphone).
- Wi-Fi is activated (→ page 260) and the multimedia system is configured as a Wi-Fi hotspot (→ page 261).

Multimedia system:

[▶ System ▶ COMAND Touch]

Connecting and authorizing a new device

1. Select Authorize a New Device.
2. Select Connect New Device.
3. Enter the security key in the external device. The Please start COMAND Touch on your device and follow the instructions. message appears.
4. Select Continue.
5. Enter the PIN shown on the external device.
   - Enter the device is authorized.

Authorizing a connected device

1. Select Authorize a New Device. The devices already connected are displayed.
2. Select Continue Using Connected Devices. The Please start COMAND Touch on your device and follow the instructions. message appears.
3. Select Continue.
4. Enter the PIN shown on the external device.
   - Enter the device is authorized.

De-authorizing the device

1. Select an authorized device from the list. A prompt will appear asking whether you would like to de-authorize the selected device.
2. Select Yes.
   - The device is de-authorized.

Activating/deactivating child safety lock

Multimedia system:

[▶ System ▶ Parental Control]

Locking an external device

1. Select an external device.
2. Select Lock.
   - The device connected via the COMAND Touch app is locked [✓] or unlocked [ ].

System language

Notes on the system language

This function allows you to determine the language for the menu displays and the navigation announcements. The selected language affects the characters available for entry. The navigation announcements are not available in all languages. If a language is not available, the navigation announcements will be in English.
Setting the system language
Multimedia system:

- System ➔ Language
- Set the language.

Setting the distance unit
Multimedia system:

- System ➔ Units
- Select km or mi.
- In the multifunction display of the Instrument Display, switch the Additional Speedometer display on ✔.

Data import and export
Data import/export function
The following functions are possible:

- Protecting your personal data against unwanted export with PIN protection.
- Please note that the NTFS file system is not supported. The FAT32 file system is recommended.

Importing/exporting data

- Importing
  - Select Import Data or Export Data.
- Requirements:
  - The vehicle is stationary.
  - The ignition is switched on or the vehicle has been started.
  - The SD card is inserted (→ page 326) or the USB device is connected (→ page 329).
- Multimedia system:
  - System ➔ System Backup
  - Select Import Data or Export Data.

Importing

- Select a data storage medium.
- A prompt appears asking whether you really wish to overwrite the current data. If data originates from another vehicle, this is recognized during data reading.
- The multimedia system is restarted once the data has been imported.

Exporting

- If PIN protection is activated, your PIN is requested.
- Enter the four-digit PIN.
- Select a data storage medium.
- The data is exported. The data export may take several minutes.
- Current vehicle settings can be edited after the import.
Activating/deactivating PIN protection

Multimediasystem:

Select Set PIN.

Enter a four-digit PIN.

Enter the four-digit PIN again.

If both PINs match, PIN protection is active.

Changing the PIN

Requirements
- A current PIN must be set.

Select Change Settings.

Enter the current PIN.

Select Change PIN.

Set a new PIN.

Activating PIN protection for data export

Select Change Settings.

Confirm with the PIN.

Select Protect Data Export.

Activate ✔ or deactivate ❌ the function.

Unblocking the PIN

Requirements:
- There is an Internet connection.
- A Mercedes me account exists at http://www.mercedes.me.
- The Personalization service is active (→ page 265).

If the PIN has been entered incorrectly three times, the PIN will be blocked. You can have a single-use password sent to you via the Mercedes me connect online portal to reset the PIN protection.

Select Unblock PIN.

Enter the single-use password.

PIN protection is reset, and you can set a new PIN.

Alternatively, you can have PIN protection reset at an authorized Mercedes-Benz Center.

User profile

Setting a user profile

Multimediasystem:

Select Display Profile Selection after Start.

Activate ✔ or deactivate ❌ the function.

Displaying a user profile when starting

If this function is active, a prompt appears when starting the system asking which user profile to use.

Select Display Profile Selection after Start.

Activate ✔ or deactivate ❌ the function.

Selecting a user profile

Select Guest Profile or individual profile.

Some settings from the user profile are only loaded when the vehicle is stationary or when the ignition is switched on.

Automatic synchronization

Each time the ignition is switched off or on, the individual user profiles are synchronized on the multimedia system and on the server. This ensures that the latest user profiles are always available.

Activating/deactivating PIN protection

Multimediasystem:

Select System ➔ PIN Protection

Setting the PIN

Select Set PIN.

Enter a four-digit PIN.

Enter the four-digit PIN again.

If both PINs match, PIN protection is active.

Changing the PIN

Requirements
- A current PIN must be set.

Select Change Settings.

Enter the current PIN.

Select Change PIN.

Set a new PIN.

Activating PIN protection for data export

Select Change Settings.

Confirm with the PIN.

Select Protect Data Export.

Activate ✔ or deactivate ❌ the function.

Unblocking the PIN

Requirements:
- There is an Internet connection.
- A Mercedes me account exists at http://www.mercedes.me.
- The Personalization service is active (→ page 265).

If the PIN has been entered incorrectly three times, the PIN will be blocked. You can have a single-use password sent to you via the Mercedes me connect online portal to reset the PIN protection.

Select Unblock PIN.

Enter the single-use password.

PIN protection is reset, and you can set a new PIN.

Alternatively, you can have PIN protection reset at an authorized Mercedes-Benz Center.

User profile

Setting a user profile

Multimediasystem:

Select System ➔ Personalization

Displaying a user profile when starting

If this function is active, a prompt appears when starting the system asking which user profile to use.

Select Display Profile Selection after Start.

Activate ✔ or deactivate ❌ the function.

Selecting a user profile

Select Guest Profile or individual profile.

Some settings from the user profile are only loaded when the vehicle is stationary or when the ignition is switched on.

Automatic synchronization

Each time the ignition is switched off or on, the individual user profiles are synchronized on the multimedia system and on the server. This ensures that the latest user profiles are always available.
Select Automatic Synchronization.

Activate or deactivate the function.

For more information about importing/exporting user profiles.

Creating a user profile
Multimedia system:
System → Personalization → Create Profile

Enter a name.
Select OK.

The following information is saved in the user profile, for example:
- System settings
- Settings in the TV tuner’s channel list
- Navigation and traffic information

The settings differ depending on the vehicle equipment.

Setting user profile options
Multimedia system:

- Highlight a profile.
- Select options.

The following options are available:
- Rename
- Delete
- Reset

The guest profile cannot be deleted or renamed.

Software update
Information on software updates
The multimedia system provides a message when an update is available.

Depending on the source, you can perform various updates:

<table>
<thead>
<tr>
<th>Source of the update</th>
<th>Update type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Updates via mobile phone</td>
<td>Navigation map, system updates, Digital Operator’s Manual</td>
</tr>
<tr>
<td>Updates via an external storage medium, e.g. a USB flash drive</td>
<td>Navigation maps</td>
</tr>
</tbody>
</table>

Updates via mobile phone require an active Internet connection for the vehicle. This is not available in all countries. For further information on connecting to the Internet, see (→ page 319).

Advantages of updating software
Thanks to the software update, your vehicle status is up-to-date.

In order to constantly improve the quality of our services you will receive future updates for your multimedia system, the Mercedes me connect services and your vehicle’s communication module. These will conveniently be sent to you via
the mobile phone connection in your vehicle and, as an option, installed automatically. You can monitor the status of your updates on the Mercedes me portal and find information about potential innovations.

Your advantages at a glance:

- conveniently receive software updates via the mobile phone network
- improves the quality and availability of Mercedes me connect services
- keeps your multimedia system and communication module up-to-date

Further information about software updates can be found at http://me.mercedes-benz.com

Performing a software update

Requirements:
- There is an Internet connection (→ page 319).
- For automatic updates: your vehicle has a permanently installed communication module.

**Multimedia system:**

→ System  ➤ Software Update

**Automatic update**

- Switch Automatic Online Update on ✓.
  Updates are performed.
  The current status of the updates is displayed.

**Manual update**

- Deactivate □ Automatic Online Update.
- Select an update from the list and start the update.

**Activating the software update**

- Restart the system.

**Function of important system updates**

Important system updates may be necessary for the security of your multimedia system’s data. Please install these updates, or else the security of your multimedia system cannot be ensured.

- If automatic software updates are activated, the system updates will be downloaded automatically (→ page 266).

As soon as an update is available for download, a corresponding message appears on the media display.

You have the following selection options:

- Download
  The update will be downloaded in the background.
- Details
  Information about the pending system update is displayed.
- Later
  The update can be downloaded manually at a later time (→ page 266).

If the download is completed and the update is ready for installation, you will be informed of this after the next ignition cycle, for example.

**Park the vehicle safely in a suitable location before starting the installation.**

Requirements for the installation:

- The ignition is switched on.
- The engine is not running.
• Notes and warnings have been read and accepted.
• The parking brake is applied.

If all requirements are met, the update will be installed. The multimedia system cannot be operated while the update is being installed and vehicle functions are restricted.

If errors should occur during the installation, the multimedia system automatically attempts to restore the previous version. If restoration of the previous version is not possible, a symbol appears on the center console display. Please consult a qualified specialist workshop to resolve the problem.

**Reset function**

Multimedia system:

!!! System  Reset

Personal data is deleted, for example:

• Station presets
• Connected mobile phones

▶ Select Yes.

If PIN protection is activated, a prompt appears asking if you also wish to restore this to the factory settings during a reset.

▶ Select Yes.

▶ Enter the current PIN.

The PIN is reset.

or

▶ Select No.

The current PIN stays the same after resetting.

If you have forgotten your PIN, an authorized Mercedes-Benz Center can deactivate the PIN protection for you.

A prompt appears again asking whether you really wish to reset.

▶ Select Yes.

The multimedia system is reset to the factory settings.

**AMG TRACK PACE**

**General information**

With AMG TRACK PACE, the driving characteristics on race tracks can be analyzed and optimized. You can drive previously stored race tracks (e.g., Hockenheimring) or new tracks can be recorded and stored. The driven lap times are stored for every track. These can be analyzed and compared to other lap times to achieve the best possible race results. Additionally, acceleration and braking procedures can be measured and stored.

**Setting Track Race**

Multimedia system:

Navigate to Vehicle  TRACK PACE  Track Race

**Recording a track**

▶ Select New track.

At the desired starting point, select Start.

The track recording starts at this point. During track recording, sectors can be set to determine intervals.
To finish track recording, select Stop or cross the starting line again.
Enter the weather and the track name.

Searching by track name
Select All tracks.
Select Search.
Enter the track name.
Tracks with the searched name are displayed.

Measuring the time on the track
Select Timekeeping.
An overview of nearby tracks appears.
The distance and direction to the starting line of the track is displayed.
Select the desired track.
If you have already driven on this track, you can select a driven time as a reference time.
Timekeeping begins automatically when the starting line has been crossed.

Displaying the analysis
Select Lap times.
An overview of all the driven times appears.
Select a track.
The following data is displayed:
- Lap and sector times
- Average and top speed
- Driver
- Vehicle
- Date
- Weather
Select a desired lap.
The analysis is displayed.

When Zoom is selected, the track display can be switched from 2D to 3D.

1 Parameter 1 (e.g. speed)
2 Parameter 2 (e.g. steering angle)
3 Speed trend (Parameter 1)
4 Steering angle trend (Parameter 2)
5 Time difference between lap A and B (only when two laps are selected).

The following values can be set for parameters 1 and 2, for example:
- Speed
- Longitudinal/lateral acceleration
- Steering angle
- Engine speed
• Engine oil/tire temperature
Based on the analysis you can check and optimize driving characteristics for any position on the track.

Exporting tracks or races (USB)

► Select All tracks.
An overview of all stored tracks and races appears.
► Highlight desired tracks or races.
► Select Options.
► Select Export.
The selected tracks or races can be exported to a USB storage device connected to the vehicle.

Editing tracks and recordings

► Select All tracks.
► Highlight the desired track.
► Select Options.
► Select Rename or Delete.
or
► Select a track.
► Highlight the desired recording.
► Select Options.
► Select Weather or Delete.

Setting Drag Race
Multimedia system:

► Vehicle ► TRACK PACE ► Drag Race

Measuring acceleration

► Select Acceleration.
Measurement begins when the vehicle accelerates. Measurement is incremental, in steps of 30 mph (50 km/h) up to a maximum of 180 mph (300 km/h) or up to the set top speed.
Measurement can be stopped early by selecting Stop or by stopping the vehicle.

Quarter-mile race

► Select Quarter Mile.
Timing runs until a mile has been traveled or to the set end distance.

Measurement can be stopped early by selecting Stop or by stopping the vehicle.

Manual start for acceleration and quarter-mile race

► Select Acceleration or Quarter Mile.
► Select Manual start.
Three red traffic lights appear one after the other. The reaction time measurement starts when they change to green at the same time. The reaction time is displayed as soon as you drive off. If you drive off too early, the message Jump start will appear and acceleration or quarter mile measurement will be canceled.

Measuring braking

► Select Braking.
► Select Start Record.
Measurement is incremental, in steps of 30 mph (50 km/h) to a standstill. If the braking procedure is started e.g. at a speed of 99 mph (160 km/h), measurement starts as soon as 90 mph (150 km/h) has been reached.
Storing and calling up measurement values
When a measurement has been completed or canceled, the measured time can be stored.

After a measurement, select Save measurement? .

The stored measurements can be displayed via the History menu item.

Editing measurements

Select History.

Highlight the desired measurement.

Select options.

Select Weather or Delete.

The measurements can be displayed by category, e.g. acceleration measurements, by applying a filter.

Calling up the telemetry display

Multimedia system:

Vehicle TRACK PACE Telemetry

The telemetry display shows current vehicle data as a digital value and as a diagram. Up to four parameters can be selected that are to be shown in the display. For example:

- Engine speed
- Wheel angle
- Speed
- Steering angle

Set the desired parameters.

Set the time.

The set parameters are evaluated in the diagram for the time set.

The time can range from a minimum of 30 seconds to a maximum of 20 minutes.

Configuring AMG TRACK PACE

Requirements
To use the TRACK PACE app:

- the TRACK PACE app is installed on the mobile end device.
- the mobile end device is connected to the multimedia system via Wi-Fi.

Multimedia system:

Vehicle TRACK PACE Options

Setting driver profiles

Select Driver Profile.

Create a new driver profile.

or

Select an existing driver profile.

The driver profile is activated.

Tracks, laps and times driven are assigned to the active driver profile while driving. For an exact evaluation of your driving style, you should always drive with an active driver profile.

Displaying driver profile statistics

Select Driver Profile.

Select the desired profile.

The following information is displayed for the selected driver profile:

- driving time
- track driven
Connecting a mobile device via the TRACK PACE app

The TRACK PACE app makes it possible to record videos and to synchronize them with stored tracks.

1. Select the TRACK PACE App. Already authorized devices are displayed in the list.
2. Select Authorize new device. Available devices are displayed.
3. Start the TRACK PACE app on the device to be connected and follow the instructions.
4. Confirm the authorization prompt.
5. Enter the code displayed on the device. The device is authorized.

or

1. Select a device that is already authorized. The device is de-authorized.

Setting the TRACK PACE display in the head-up display

1. Select HUD Contents.
2. Activate or deactivate the desired contents. The contents in the Head-up Display are adapted.

For further information on the Head-up Display, see (→ page 237) (→ page 238).

Setting acoustic feedback

1. Select Acoustic feedback.

The following settings are available:
- Loud
- Medium
- Quiet

Activating/deactivating additional information

1. Activate or deactivate Display help.

When additional information is activated, popups provide information on the individual menus.

Confirm popups with OK or select Do not display.

Calling up information

1. Select Info.

The following information is displayed:
- Software version
- Memory used
- Total number of tracks saved
- Total number of races driven

Fit & Healthy
ENERGIZING comfort
## ENERGIZING comfort program overview

**Program overview**

<table>
<thead>
<tr>
<th>Program</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Refresh</td>
<td>Can make targeted changes to the interior climate to refresh vehicle occupants. Cooling airflow and ionization purify the air. The vehicle interior is illuminated with cool colors and the seats are ventilated.</td>
</tr>
<tr>
<td>Warmth</td>
<td>Can increase the comfort level of the occupants. The vehicle's panel, seat and steering wheel heater produce a cozy warmth. The air is purified using ionization and a pleasant fragrance is released. The vehicle interior is illuminated with warm lighting.</td>
</tr>
<tr>
<td>Vitality</td>
<td>Can counteract fatigue in monotonous driving situations. Fast-paced music and a vitalizing massage provide invigorating stimulation for the vehicle occupants. The air is purified using ionization and a pleasant fragrance is released. The vehicle interior is illuminated in a stimulating hue and the seat is ventilated.</td>
</tr>
<tr>
<td>Pleasure</td>
<td>Can promote a positive mood in the occupants. Moderately fast music is played and a massage program is activated. The air is purified using ionization and a pleasant fragrance is released. The vehicle interior is illuminated with amicable lighting.</td>
</tr>
<tr>
<td>Well being</td>
<td>Can aid the physical and mental relaxation of occupants. A back massage combined with local warmth provide relaxation. The air is purified using ionization and a pleasant fragrance is released. The music player plays selections of calming music and the vehicle interior is illuminated with pleasant lighting.</td>
</tr>
<tr>
<td>Training</td>
<td>Can counteract the onset of muscle tension, limbs falling asleep or stress with targeted relaxation or stimulation exercises. The exercises are demonstrated in short videos. The air is purified using ionization and a pleasant fragrance is released. The vehicle interior is illuminated with lighting appropriate to the exercise.</td>
</tr>
</tbody>
</table>
Please note that the available programs and the associated functions are dependent on your vehicle equipment. Depending on your equipment, fewer functions may be available.

Starting the ENERGIZING comfort program

Requirements:
- The ignition is switched on.

ENERGIZING comfort is available approximately five minutes after starting the multimedia system.

Multimedia system:
Vehicle ➤ ENERGIZING Comfort

Selecting a seat
- Select Seat Selection.
- Select the desired seat or All Seats.

Starting a program
- Select Refresh, Warmth, Vitality, Enjoyment or Well-being.

The selected program will run for ten minutes.

Configuring a program
- Call up further options ➤ for the desired program.
- Switch the functions included in the program on or off.

Starting training
- Select Training.
- Select Muscle Relaxation, Muscle Stimulation or Balance.
  The selected training video starts and is displayed in the media display.
- Select Full Screen: Video.
  The training video is displayed in full screen.
  For more information on pausing or skipping through videos, see (→ page 329).

If, during an active program, a function requirement is no longer met, a corresponding message appears. The active program is canceled.

Navigation

Switching navigation on
Multimedia system:

Alternatively: press the NAVI button.
The map appears and shows current vehicle position.
If a climate control setting is changed, a climate bar appears briefly.

**Showing/hiding the navigation menu**

**Requirements:**
- The map displays the current vehicle position.

### Multimedia system:

- **Navigation**

To show:
- Swipe left on the touchpad or the Touch Control.
- Slide the controller to the left.

To hide:
- Swipe right on the touchpad or the Touch Control.
- Slide the controller to the right.

To show or hide lower menu levels, swipe or slide to the left or right as many times as necessary.

### Destination entry

**Entering a POI or address**

**WARNING Risk of distraction from information systems and communications equipment**

If you operate information and communication equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the traffic situation permits.
- If you cannot be sure of this, stop the vehicle whilst paying attention to road...
and traffic conditions and operate the equipment with the vehicle stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system.

Requirements:
- **For the online search:** Mercedes me connect is available.
- You have a user account for the Mercedes me portal.
- The service is available.
- The service has been activated at an authorized Mercedes-Benz Center.

Further information can be found at: http://www.mercedes.me

Multimedia system:

- **Navigation**

Multimedia system:

- **Method 1: free search**
  - Enter the POI or address in . The entries can be made in any order. During destination entry, suggestions are made by the multimedia system. A selection of destinations appears in a list.
  - Enter these address elements, for example:
    - City, street, house number
    - Street, city
    - ZIP code
    - POI name
    - POI category, e.g. Gas Station
    - City, POI name
  - **To switch to handwriting recognition:** select .
  - Write the character on the touchpad.
  - The function is available when a touchpad is installed.
  - **To switch to character selection:** press the button.
  - or
Press the touchpad.

To delete an entry: select \(\times\) 4 (if available).
Use the following options:

- Press briefly: deletes the last character entered or the last suggestion adopted.
- Press and hold: deletes the entire entry.

To set the language: select 8.
Select the language.

This function is useful for countries in which several character sets are supported. An example is Russia, which uses Cyrillic and Latin characters.

To call up the online search function: select 6 Online Search.
Once an Internet connection is established, a list appears. It shows online destinations related to the previous entry.

Online destinations are provided by the Internet service provider.

Select the online destination.

Enter the online destination or a 3 word address in the input line.

Enter a 3 word address (→ page 280). Online search is not available in all countries.

To call up the list: press the \(\rightarrow\) button.

or

If the top line of the character bar is highlighted, navigate upwards.
Select the destination in the list.

To adopt a destination: select 7 Select Destination.
If there are several listings for a destination, a list appears.
Select the destination.
The destination address is shown.

Method 2: search step-by-step

Press \(\rightarrow\) button.

or

If the top line of the character bar is highlighted, navigate upwards. The character bar is hidden. City or ZIP is highlighted. Additional entry fields, e.g. for POI, are available.
Select City or ZIP.
The character bar appears.
Enter the city or the ZIP code.
During destination entry, suggestions are made by the multimedia system. A selection of destinations appears in a list.
The address entries can be made in any order, for example:

- City or ZIP, Street, House No.
  Enter an intersecting street, if available.
- Street, City or ZIP
- POI, e.g. Gas Station, City or ZIP

During destination entry, use the following functions:

- Switching to handwriting recognition
- Switching to character selection
- Deleting an entry
An entry, e.g. POI, can be deleted with the [X] button in a step-by-step search. Navigate to the left to do so.

- Calling up the online search function (if available)
- Calling up a list

The functions are described in the free search.

To change the state/province: select the state or the province.
- Enter the state or the province. You only need to enter the first character.
- Select the state or the province in the list.

To change the country: select the country.
- Enter the country. You only need to enter the first character.
- Select the country on the list.

To adopt a destination: select Select Destination.
- If there are several listings for a destination, a distance-orientated list appears.
- Select the destination.
- The destination address is shown.

Selecting previous destinations
Multimedia system:
- Select Previous Destinations.
- Select the destination.
- The destination address is shown.

or
- If favourites have been saved already (→ page 289), select From My Favorites.
- Select the favourite.
- The destination address is shown.

Selecting a POI
Multimedia system:
- Select All Categories and the category.

If route guidance is not active: the search begins in the vicinity of the current vehicle position. The list is sorted by distance in ascending order.

The POIs show the following information:
- name of POI
- linear distance to the POI
- the direction of the linear distance to the POI (arrow) is displayed when searching for the vehicle’s current position
- Select the POI.

Route guidance is active: select the search position prior to choosing a POI.
- If intermediate destinations are set, these can also be selected as the search position after selecting Near Destination.

Filtering displays for POIs
- Enter the search term in Search.
- The results list shows relevant POIs.
- Select [OK].
- The first POI in the list is highlighted.
Select the POI.

Example: setting the search position for the parking category during active route guidance

- Select In the Vicinity, Near Destination or Along the Route.
  The list shows the located POIs or opens an overview of the route destination after selecting Near Destination.
- Select the POI.
- Select Near Destination: select the intermediate destination or the destination.

Starting an automatic gas station search

Requirements:
- The automatic gas station search is activated (→ page 283).

Driving situation
Route guidance is active. The fuel level in the fuel tank reaches the reserve fuel level.
The Reserve Fuel Do you want to start a search for surrounding gas stations? message is shown.

- Select Yes.
The automatic gas station search begins. The available gas stations along the route or in the vicinity of the vehicle’s current position are displayed.
- Select the gas station.
The address of the gas station is displayed.
- If route guidance is not active, select Start Route Guidance.
The selected gas station is set as the destination. Route guidance begins.
  or
- If route guidance is active, select Start New Route Guidance or Set as Next Way Point.
  Start New Route Guidance: the selected gas station is set as a new destination. The previous destinations and intermediate destinations are deleted. Route guidance to the gas station begins.
  Set as Next Way Point: the selected gas station is set as the next intermediate destination. Route guidance begins.

- If there are already four intermediate destinations: select Yes in the prompt.
The selected gas station is entered into position 1 of the intermediate destinations menu. Intermediate destination 4 is deleted. Route guidance begins.

Entering an intermediate destination

Requirements:
- A destination is entered.

Multimedia system:
- Navigation ➤ Way Points and Info
- Select Search for Way Point.
- Enter the intermediate destination as a POI or address (→ page 274).
- Select the intermediate destination.
- Select Set as Destination.
  or
- Select an intermediate destination using Enter Destination during route guidance.
- Select Set as Next Way Point after entering the destination.
Editing intermediate destinations

Requirements:
- A destination is entered.

Multimedia system:
- Navigation ➤ Way Points and Info

To change the order of destinations: highlight the destination or the intermediate destination.
- Select Move.
- Move the intermediate destination to the desired position.
- Press the Touch Control, the controller or the touchpad.

To call up the map: highlight the destination or the intermediate destination.
- Select Map.
- Move the map (→ page 293).
- Select destination on the map (→ page 280).

To delete a destination: highlight the destination or the intermediate destination.
- Select Delete.

Calculating a route with intermediate destinations

Requirements:
- The destination and at least one intermediate destination have been entered.

Multimedia system:
- Navigation ➤ Way Points and Info

Select Start New Route Guidance. The route is calculated with the set intermediate destinations.

Selecting a contact for destination entry

Requirements:
- A mobile phone is connected to the multimedia system (→ page 301).

Multimedia system:
- Navigation ➤ [ ] Previous and Other Destinations ➤ Contacts

Select the contact. The contact details are displayed.
- Select the address.

Filtering displays for contacts

- Enter a name or telephone number, for example, into the search field.
- Select [OK]. The first contact in the list is highlighted.
- Select the contact.
- Select the address.

Entering geo-coordinates

Multimedia system:
- Navigation ➤ [ ] Previous and Other Destinations ➤ Geo-coordinates

Enter geo-coordinates as latitude and longitude coordinates in degrees, minutes and seconds.
- The map shows the position.
- Confirm the entry.

To calculate a route: select Start Route Guidance.
- If a route has already been created, select Start New Route Guidance or Set as Way Point.
Entering the destination as a 3 word address

Requirements:
- Searching for a destination using 3 word addresses is possible in the online search (→ page 274).
- There is an Internet connection.
- Searching for a destination using 3 word addresses is not possible in all countries.

Multimedia system:

![Navigation ➪ Online Search](image)

Select Online Search.

- Enter the destination address as a 3 word address. Separate each of the words with a full stop. The search results are displayed.
- Select the destination in the list. The destination address is shown. The route can be calculated.

3 word addresses from what3words are an alternative addressing system for multilingual georeferencing of global locations with a resolution of three meters. Using this grid, locations on the Earth's surface are included which do not have a building address such as street and house number, for example. The Empire State Building in New York has the following language dependent 3 word address, for example:
- English: parade.help.bleat
- French: commun.verbe.bisquer
- Spanish: suertes.diga.pesca

3 word addresses are unique, easy to remember and suffice for most routine applications.

The bidirectional conversion of 3 word addresses can be carried out here:
- at the website http://what3words.com
- in the what3words apps

Selecting a destination on the map

Multimedia system:

![Navigation ➪ Options](image)

Select Map Menu.

- If the map is displayed in full screen mode, press the central control element. The map menu appears.
- Select "move map" in map menu (→ page 292).
- Swipe in any direction on the Touch Control or touchpad.

or

- Slide the controller in any direction. The map moves in the corresponding direction under the crosshair. The more you move your finger away from the starting position on the touchpad, the faster the map moves.
- Press the Touch Control, the controller or the touchpad.

If several destinations are located around the crosshair, a list shows the available POIs and roads.

If a destination is located exactly on the crosshair, the destination address is displayed.

Select the destination in the list. The destination address is shown.
Setting the map orientation to 2D or 3D

- Highlight Map Orientation: 2D/3D.
- Press the Touch Control, the touchpad or the controller.
  The map will be displayed in the selected map orientation.

Showing traffic messages in the vicinity of the map

- Select Traffic Messages for the Vicinity.
  The map appears.
- Swipe left or right on the touchpad.
  or
- Slide the controller to the left or right.
  The previous or next traffic incident is highlighted on the map. Information on the traffic incidence is displayed.

Showing POIs in the vicinity of the map

- Select POIs in the Vicinity.
- Swipe left or right on the touchpad.
  or
- Slide the controller to the left or right.
  The previous or next POI is highlighted on the map. Information on the traffic incident is displayed.

To filter the display by POI category:

- Swipe down on the Touch Control or the touchpad.
  or
- Slide the controller down.
  - Select the POI category.
  - User Defined allows personal POI symbols to be selected (→ page 294).

Route

Calculating a route

Requirements:
- The destination has been entered.
- The destination address is shown.
- If route guidance is not active, select Start Route Guidance.
  The route to the destination is calculated. The map shows the route. Route guidance then begins.

or
- If route guidance is active, select Start New Route Guidance or Set as Next Way Point.
  Start New Route Guidance: the selected destination address is set as a new destination. The previous destinations and intermediate destinations are deleted. Route guidance to the new destination begins.
  Set as Next Way Point: the selected destination address is set as the next intermediate destination. Route guidance begins.

Taking alternative routes into consideration

- Select an alternative route (→ page 283).

Other menu functions

- To save the destination: select \( \) Store in "Previous Destinations".
- To display on the map: select \( \) Map.
- To call a telephone number: select \( \) Call.
- To call up an Internet address: select \( \) www (if available).
Selecting a route type
Multimediasystem:
→ Navigation ➤ Route and Position
➤ Select Route Settings.
➤ Select the route type.
A route has already been created: the route is calculated on the basis of the new route type.
A route has not been created: the next route is calculated on the basis of the new route type.

You can choose from the following route types:
- **Eco Route**
  An economical route is calculated. The journey time may be somewhat longer than for quicker routes.
  The symbol for the current vehicle position is displayed in green.
- **Fast Route**
  A route with a quick journey time is calculated.
- **Short Route**
  A route with a short driving distance is calculated.

---

**Automatic Traffic Jam Avoidance** can be switched on ☑ or off ☐ for these route types. If **Automatic Traffic Jam Avoidance** is switched on, **Ask in the Event of Traffic Jam Avoidance** can be selected.

The **Automatic Traffic Jam Avoidance** and **Ask in the Event of Traffic Jam Avoidance** settings are not available in every country.

The settings enable the following:

- **Automatic Traffic Jam Avoidance**
  The route is calculated with the currently set route type.
  Traffic reports via Live Traffic Information are taken into account.
  Live Traffic Information is not available in all countries.
- **Ask in the Event of Traffic Jam Avoidance**
  A prompt appears when a new route is detected with a shorter journey time based on traffic reports. You can continue to use the current route or use the dynamic route instead.

---

Selecting route options
Multimediasystem:
→ Navigation ➤ Route and Position ➤ Avoid Options

**Avoiding areas**
➤ Select Areas (→ page 295).

**Avoiding highways, ferries, motorail trains, tunnels, unpaved roads**
➤ Select ☑ or deselect ☐ avoid option.

**Using toll roads**
➤ Select Use Toll Roads.
➤ Select Cash or Electronic Billing or Off.
  The route takes into account roads that require the payment of a usage fee (toll).
  If Off is selected, toll roads are not taken into account.

The selected route options cannot always be implemented. Therefore, a route may include a ferry, for instance, even though the avoid **Ferries** option is enabled. A message appears and you will hear a corresponding message.
Using carpool lanes

- Select **Number of Occupants in the Vehicle**.
- Select number.

When using carpool lanes, observe the applicable legal requirements as well as any conditions pertaining to when and where such lanes may be used. Carpool lanes may only be used if certain conditions are met.

These route options are not available in every country.

**Selecting notifications**

Multimedia system:

- **Navigation** ➤ **Options** ➤ **Announcements**
- **Switch** an announcement on ✓ or off □.

You can choose from the following announcements:

- **Announce Traffic Warnings**
  - This function is not available in all countries.
- **Announce Street Names**

The multimedia system announces the names of the roads that will follow the upcoming change of direction. This function is not available in all countries and languages.

**Displaying destination information**

**Requirements:**

- A destination is entered.

Multimedia system:

- **Navigation** ➤ **Select Way Points and Info**.

The following information is displayed:

- Intermediate destinations and destination
  - The route can also include up to four intermediate destinations.
- **Name**
- **Address**
- **Remaining driving distance**
- **Time of arrival**

**Selecting an alternative route**

Multimedia system:

- **Navigation** ➤ **Route and Position**
- **Select** **Alternative Route**.

The routes are displayed in accordance with the setting made in the route settings.

The currently selected route is shown with a dark blue line.

- **Select** the alternative route.

**Switching the automatic gas station search on/off**

Multimedia system:

- **Navigation** ➤ **Options**
- **Switch** **Reserve Fuel** on ✓ or off □.

Switched on ✓: when the fuel reserve level is reached, a prompt appears asking whether you want to start searching for gas stations.

**Using automatic gas station search**

**Requirements:**

The automatic gas station search is activated ✓ (→ page 283).
The prompt **Reserve Fuel Do you want to start a search for surrounding gas stations?** appears.

- Select **Yes**.
  The automatic gas station search begins. The available gas stations along the route or in the vicinity are displayed.
- Select the gas station.
- When there is no route, the gas station is set as the destination.

**Starting the automatic service station search**

**Requirements:**
- ATTENTION ASSIST and the Suggest Rest Area function are activated (→ page 216).

**Driving situation**

The ATTENTION ASSIST Do you want to search for a rest area? message is shown.

- Select **Yes**.
  The service station search starts. The available service stations along the route or in the vicinity of the vehicle's current position are displayed.
- Select the service station.
  The service station address is displayed.
- If route guidance is not active, select Start Route Guidance.
  The selected service station is set as a destination. Route guidance begins.

  or

- If route guidance is active, select Start New Route Guidance or Set as Next Way Point.
  Start New Route Guidance: the selected service station is set as a new destination. The previous destination and all intermediate destinations are deleted. Route guidance to the service station begins.
  Set as Next Way Point: the selected service station is set as the next intermediate destination. Route guidance begins.

**Route guidance**

**Notes on route guidance**

**WARNING** Risk of distraction from operating integrated communication equipment while the vehicle is in motion

If you operate communication equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the traffic situation permits.
- If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system. Route guidance begins once a route has been calculated.
The road and traffic rules and regulations always have priority over multimedia system driving instructions. The following driving instructions can be used:

- Navigation announcements
- Route guidance displays
- Lane recommendations

If you do not follow the driving instructions or if you leave the calculated route, a new route is calculated automatically.

Driving instructions may differ from the actual road and traffic conditions if:

- The route is diverted
- The direction of a one-way street has been changed

For this reason, you must always observe road and traffic rules and regulations during your journey as well as the prevailing traffic conditions.

The route may differ from the ideal route due to the following:

- Roadworks
- Incomplete digital map data

**Notes on GPS reception**
The correct function of the navigation system depends amongst other things on GPS reception. In certain situations GPS reception can be impaired, defective or even not possible, e.g. in tunnels or in parking garages.

**Changing direction overview**

There are three phases when changing direction:

- **Preparation phase**
  
  If there is enough time between the changes of direction, the multimedia system prepares you for the upcoming change of direction. A navigation announcement is issued, e.g. "Prepare to turn right". The map appears in full-screen mode.

- **Announcement phase**
  
  The multimedia system announces the upcoming change of direction, e.g. by announcing "Turn right in 300 ft (100 m)". The display is split into two parts. The map is displayed on the left; on the right, there is a detailed image of the intersection or a 3D image of the upcoming change of direction.

- **Change-of-direction phase**
  
  The multimedia system announces the imminent change of direction, e.g. by announcing "Now turn right". The display is split into two parts. The vehicle has successfully changed direction when the light-color bar on the right
drops down to 0 feet (0 m) and the current vehicle position symbol has reached the highlighted change-of-direction point.
When the change of direction is complete, the map appears in full-screen mode.

Changes of direction are also shown in the Instrument Display.

Lane recommendations overview
This display appears for multi-lane roads.
If the digital map contains the relevant data, the multimedia system can display lane recommendations for the next two changes of direction.

1. Recommended lane
2. Possible lane
3. Lanes not recommended

The following lanes are displayed:
- Recommended lane 1
  In this lane, you will be able to complete both the next change of direction and the one after that.
- Possible lane 2
  In this lane, you will only be able to complete the next change of direction.
- Lane not recommended 3
  In this lane, you will not be able to complete the next change of direction without changing lane.

During the change of direction, new lanes may be added.

Lane recommendations can also be displayed in the Instrument Display and in the Head-up Display.

Overview of destination reached
Once the destination is reached, you will see the checkered flag. Route guidance is finished.
When an intermediate destination has been reached, you will see the intermediate destination flag with the number of your intermediate destination. After this, route guidance is continued.
Switching navigation announcements on/off

Requirements:
- A route has already been created.
- Route guidance is active.

To switch off: Press the volume control on the multifunction steering wheel during a navigation announcement (→ page 254). The Voice Guidance has been deactivated. message appears.

or

Show the navigation menu (→ page 274).
- Select [ ] Voice Guidance . The symbol changes to [ ].
- To activate: select [ ] Voice Guidance . The current navigation announcement is played.

In the following situations, navigation announcements are switched on automatically:
- A new route guidance is started.
- The route is recalculated.

You can add and call up this function as a favourite under Voice Guidance On/Off.

Switching navigation announcements on/off during a phone call

- Select System.
- Select [ ] Audio .
- Select Navigation and Traffic Announcements.
- Switch Voice Guidance During Call on ✓ or off ✗.

Adjusting the volume of navigation announcements

Requirements:
- A route has already been created.
- Route guidance is active.

On the multifunction steering wheel or on the multimedia system
- Turn the volume control on the multifunction steering wheel during a navigation announcement.

or

During a navigation announcement press the volume rocker switch on the center console up or down (→ page 255).

In the following situations, the volume is raised to the minimum volume or lowered to the maximum volume:
- A new route guidance is started.
- The route is recalculated.

The minimum volume can be individually set at an authorized Mercedes-Benz Center.

Via system settings

- Select System.
- Select [ ] Audio .
- Select Navigation and Traffic Announcements.
- Select Voice Guidance Volume.
- Set the volume.

Switching audio fadeout on/off during navigation announcements

- Select System.
- Select [ ] Audio .
Select Navigation and Traffic Announcements.
Switch Audio Fadeout During Voice Guidance on ☑ or off ☐.

Repeating navigation announcements
Requirements:
- A route has already been created.
- Route guidance is active.
Multimedia system:
Navigation
Select ☑ Voice Guidance .
Select ☑ Voice Guidance . The current navigation announcement is repeated.
You can add and call up this function as a favorite under Repeat Voice Guidance.

Canceling route guidance
Requirements:
- A route has already been created.
- Route guidance is active.
Multimedia system:
Navigation
Select ☑ Cancel Route Guidance.

Overview of route guidance to an off-road destination
Off-road destination: the destination is within the digital map. However, the map contains no roads that lead to the destination.
You can enter off-road destinations on the map. Route guidance guides you for as long as possible with navigation announcements and displays on roads that are known to the multimedia system.
Shortly before you reach the last known position on the map, you will hear the "Please follow the direction arrow" announcement. The display shows a direction arrow and the linear distance to the destination.

Overview of route guidance from an off-road location to a destination
Off-road position: the current vehicle position is located within the digital map on roads that are not available.

When route guidance begins the following displays appear:
- The Road Not Mapped message is shown.
- A direction arrow showing the linear direction to the POI.

When the vehicle is back on a road known to the multimedia system, route guidance continues as normal.

Overview of off-road status during route guidance
Due to roadworks, for example, there may be differences between the data on the digital map and the actual course of the road. In such cases, the multimedia system will temporarily be unable to locate the vehicle’s current position on the digital map. The vehicle is off-road.
When the vehicle is off-road, the following displays are shown:
- the Road Not Mapped message
- a direction arrow showing the linear direction to the POI
When the vehicle is back on a road known to the multimedia system, route guidance continues as normal.

**Destination**

**Saving the current vehicle position**

Multimedia system:

- **Navigation**

  If the map is displayed in full screen mode, press the central control element.
  The map menu appears.
  Select 1 on the map menu (→ page 292). The current vehicle position is saved to the "Previous destinations" memory.

**Storing a map position**

Multimedia system:

- **Navigation**

  The map is in full-screen mode.
  Select "move map" in map menu 2 (→ page 292).

- **Select a position on the map.**
  If multiple entries are available for a map position, a list appears.
  **Highlight an entry.**
  **Select Store in "Previous Destinations".**
  The map position is saved to the "Previous destinations" memory.

**Editing the previous destinations**

Multimedia system:

- **Navigation** ➜ **Previous and Other Destinations** ➜ **Previous Destinations**

  - **Highlight one of the previous destinations.**
  - **To save as a favorite:** select Save My Favorite. The favorites are displayed.
  - **Move the favorite to the desired position.**
    If a favorite has already been added at this position, it will be overwritten.
  - **To save as "Home" address:** select Save as "Home".
  - **To save as "Work" address:** select Save as "Work".
  - **To delete a single or all destinations:** select Delete or Delete All. A prompt appears.
  - **Select Yes.**
  - **To display destination information:** select Details.

**Using external destinations and routes**

External destinations and routes can be received from the following sources:

- Mercedes-Benz Apps
- door-to-door navigation with Companion app (USA)

- Received destinations are saved in the previous destinations.
  A prompt appears on the media display.

- **A destination has been received without picture information:** select Yes.
If route guidance is not active, select Start Route Guidance. The route to the destination is calculated. The map shows the route. Route guidance then begins.

If route guidance is active, select Start New Route Guidance or Set as Next Way Point. Start New Route Guidance: the received destination address is set as a new destination. The previous destinations and intermediate destinations are deleted. Route guidance to the new destination begins.

Set as Next Way Point: the received destination address is set as the next intermediate destination. Route guidance begins.

A destination has been received with picture information: select Start Route Guidance. Route guidance starts.

A route has been received: select Start Route Guid. from Beginning of Route.

Select Start Route Guidance from Current Position. Route guidance starts from the selected position.

**Route guidance with current traffic reports**

**Traffic information overview**

Traffic reports are received using Live Traffic Information and are used for route guidance. This service is unavailable in some countries. There may be differences between the traffic reports received and the actual road and traffic conditions.

Important information on Live Traffic Information:

- Current traffic reports are received via the Internet connection.
- The traffic situation is updated at short, regular intervals.
- The subscription information shows the status (→ page 290).

Information on the vehicle’s position is regularly sent to Daimler AG. The data is immediately rendered anonymous by Daimler AG and forwarded to the traffic data provider. Using this data, traffic reports relevant to the vehicle’s position are sent to the vehicle. The vehicle acts as a sensor for the flow of traffic and helps to improve the quality of the traffic reports.

If you do not wish to transmit your vehicle position, you can have this service deactivated at an authorized Mercedes-Benz Center.

**Displaying subscription information**

**Requirements:**

- The vehicle is equipped with Live Traffic Information.

**Multimedia system:**

The subscription expiration date is automatically displayed:

- one month before the expiration date.
- one week before the expiration date.
- on the expiration date.
To display manually: select Live Traffic Subscription Info.

Depending on the status, one of the following messages appears:
- the period of validity for the subscription is displayed.
- the subscription has expired.

The subscription can be extended:
- at an authorized Mercedes-Benz Center
- via an MB Info call to the Mercedes-Benz Customer Assistance Center

Displaying the traffic map

Requirements:
- For Live Traffic Information: the vehicle is equipped with a communication module featuring an activated, integrated SIM card.
- When the vehicle is started, the communication module automatically establishes an Internet connection. Traffic information is made available shortly afterwards.

Multimedia system:

1.1. Navigation ➤ Options ➤ Map Menu
1.2. Activate ✔.

The traffic map shows the following information, for example:
- traffic incidents, for example:
  - roadworks
  - road blocks
  - warning messages
- traffic flow information:
  - traffic jam (red line)
  - slow-moving traffic (orange line)
  - heavy traffic (yellow line)
  - free-flowing traffic (green line)
- display for traffic delays on the route lasting at least one minute
- warning message symbols:
  - symbol
  - additional road safety notes when approaching a traffic incident, e.g. the end of a traffic jam

If the vehicle approaches a danger area on the route, a warning message is displayed on the map. A warning message may also be issued (→ page 292).

Displaying traffic incidents
Multimedia system:

1.1. Navigation ➤ Options ➤ Map Content
1.2. Activate ✔ Traffic Incidents.

Roadworks, road blocks, local area reports (e.g. fog) and warning messages are displayed.

Activating free flow and traffic display
Multimedia system:

The traffic delay is displayed for the current route. Traffic delays lasting one minute or longer are taken into consideration.

Displaying details

- Displays the traffic map (→ page 291).
- Moves the map (→ page 293).
- When a traffic report symbol is under the crosshair, press on the central control element. The traffic report details are displayed.

To select a traffic report symbol: select Next or Previous.

- Press on the central control element.

The traffic report details are displayed.

Issuing hazard warnings

Multimedia system:

- Activate Announce Traffic Warnings. Warning messages are issued and tailbacks which pose a risk are announced.

Map and compass overview

1. Saves the current vehicle position
2. Moves the map
3. Selects the map orientation and map view
4. Selects the function depending on the equipment:
   - Sends a hazard warning via Car-to-X.
• Filters the display of POIs in the vicinity according to POI category
8 Switches the display of personal POI symbols on the map on or off
9 Switches one of the following displays on or off depending on the equipment:
   • Weather information
   • Satellite map
   • Traffic incidents
10 Switches the traffic map display on or off

The map and satellite images are shown in globe projection. This allows for a realistic map display in all map scales. The map uses elevation modeling.
Depending on the map data, important buildings in many cities are depicted realistically on the map in small map scales (e.g. 1/32 mi (20 m), 1/16 mi (50 m)). Other buildings are shown as models.

You can set the unit of measurement of the map scale (→ page 263).

If online information is available, fuel prices and the availability of parking spaces in parking garages are displayed, for example.

Requirements:
• Mercedes me connect is available.
• You have a user account for the Mercedes me portal.
• The service has been activated at an authorized Mercedes-Benz Center.

Further information can be found at: http://www.mercedes.me

The online information is not available in all countries.

Company logos displayed on the map are trademarks of the respective companies and used solely for the purpose of indicating the locations of these companies. The use of such logos on the map does not indicate approval of, support of or advertising by these companies for the navigation system itself.

Setting the map scale
Requirements:
• The map is shown.

Multimediasystem:
  ➤ Navigation

You can set the unit of measurement of the map scale (→ page 263).

Moving the map
Multimediasystem:
  ➤ Navigation ➤ Options ➤ Map Menu

Alternatively, if the map is displayed in full screen mode, press the central control element.
The map menu appears.

Select "Move map" in map menu ➤ (→ page 292).
Selecting the map orientation

Multimedia system:

- Select Navigation ➨ Options ➨ Map Menu

Alternatively, if the map is displayed in full screen mode, press the central control element. The map menu appears.

In map menu 3, select N, 2D or 3D (→ page 292).
- N: the 2D map view is displayed so that north is always at the top.
- 2D: the 2D map view is aligned to the direction of travel.
- 3D: the 3D map view is aligned to the direction of travel.

Selecting POI symbols

Multimedia system:

- Select POI Symbols.

The • dot indicates the current setting.

Standard displays symbols of predefined categories on the map.
User Defined allows you to personally select the symbols for the available categories.
None switches the display off.

Select a setting.
User Defined: select categories. The POI symbols of the selected categories are displayed ✓ or not displayed □.

Selecting the display of text information in the map

Multimedia system:

- Select text information.

Current Street shows the street you are currently driving on at the bottom of the display.
When the map is moved, the following information appears under the crosshair:
- Street name
- POI name
- Area name

Geo-coordinates displays the following information:
- Longitude and latitude
- Elevation
  The elevation shown may deviate from the actual elevation.
- Number of satellites from which a signal can be received
  When the map is moved, this information does not appear.

Climate Control displays the current climate control settings.
None switches the display off.

Displaying the next intersecting street

Requirements:
- Route guidance is not active.

Multimedia system:

- Activate Next Intersecting Street.

The name of the next intersecting street will be displayed at the upper edge of the display.
Displaying the map version
Multimedia system:
Navigation ➔ Options
Select Map Version.
Select Details.
Information about new versions of the digital map can be obtained from an authorized Mercedes-Benz Center.

Overview of avoiding an area
You can define areas along a route that you would like to avoid.
The route can include an area that is to be avoided in the following situations:
- the destination is located in an area that is to be avoided
- if freeways are located within the area that is to be avoided
  Freeways are always taken into account for the route.
- there is no sensible alternative route

Avoiding a new area
Multimedia system:
Navigation ➔ Route and Position ➔ Avoid Options ➔ Areas
Select Avoid New Area.
To search for an area via the map: select Using Map.
Move the map or
To search for an area using an address: select Address Entry.
Enter the address.
Select Select Destination.
The map appears.

Changing an area
Multimedia system:
Navigation ➔ Route and Position ➔ Avoid Options ➔ Areas
Highlight an area in the list.
Select Edit.

Moving the area on the map
➡️ Swipe in any direction on the Touch Control or touchpad.
or
➡️ Slide the controller in any direction.

Changing the size of the area
➡️ To start: press the Touch Control, the touchpad or the controller.
➡️ To change: swipe up or down on the Touch Control or the touchpad.
or
➡️ Slide the controller up or down.
➡️ To stop: press the Touch Control, the touchpad or the controller.

Taking the area for the route into account
➡️ Avoid an area in the list.
If route guidance is active, a new route is calculated.
If there is no route yet, the setting is carried over to the next route guidance.
The route can include an area that is to be avoided in the following cases:

- the destination is located in an area that is to be avoided.
- if freeways are located within the area that is to be avoided. Freeways are always taken into account for the route.
- there is no sensible alternative route.

**Deleting one or all areas**

*Multimedia system:*

- Navigation ➤ Route and Position ➤ Avoid Options ➤ Areas
- Highlight an area in the list.
- Select ☒ Delete or ☒ Delete All.
- Confirm the prompt with Yes.

One or all areas are deleted.

**Map data update overview**

**Updating at the authorized Mercedes-Benz Center**

The digital maps generated by the map software become outdated in the same way as conventional road maps. Optimal route guidance can only be provided by the navigation system in conjunction with the most up-to-date map data. Information about new versions of the digital map can be obtained from an authorized Mercedes-Benz Center.

You can receive updates to the digital map there.

**Online map update**

The online map update service from Mercedes me connect can be used to update map data.

- The online map update service is not available in all countries.

The following options are available for the update:

- the automatic map update updates map data for one region.

For automatic map updates **Automatic Online Update** must be activated in the system settings (→ page 266).

- the manual map update updates map data for several or all regions.

Further information on the online map update is available at an authorized Mercedes-Benz Center or at http://www.mercedes.me.

**Overview of map data**

Your vehicle is supplied with map data at the factory. Depending on the country, map data for your region is either pre-installed or the map data is supplied on a data storage medium. If the map data on your vehicle has been installed at the factory and you wish to reinstall it, you do not need to enter the activation code.

For map data that you have purchased in the form of a data storage medium, you must enter the accompanying activation code.
If you save the map data on a data storage medium with the online map update service, no entry is required. The activation code is stored on the data storage medium during the downloading process.

Observe the following when entering the activation code:
- The activation code can be used for one vehicle
- The activation code is not transferable
- The activation code has six digits

In the event of the following problems, please contact an authorized Mercedes-Benz Center:
- The multimedia system does not accept the activation code
- You have lost the activation code

### Displaying the compass
Multimedia system:
- ➤ Navigation ➤  Route and Position
- Select Compass.

The compass display shows the following information:
- The current direction of travel with bearing (360° format) and compass direction
- Longitude and latitude coordinates in degrees, minutes and seconds
- Height (rounded)
- Number of GPS satellites from which a signal can be received

### Setting the map scale automatically
Multimedia system:
- ➤ Navigation ➤  Options

The map scale is set automatically depending on your driving speed.
For journeys in cities with detailed city models, a map view from the driver’s perspective is used.
- Switch Auto Zoom on ✔ or off ❌.

The automatically selected map scale can be changed manually for a short time. The setting is reset automatically after a few seconds.

### Displaying the satellite map
Multimedia system:
- ➤ Navigation ➤  Options ➤ Map Content

- Switch Satellite Map on ✔ or off ❌. or

If satellite map display ✔ is available in the map menu, switch it on ✔ or off ❌ (→ page 292).
Switched on ✔: satellite maps are displayed in map scales of 2 mi (2 km).
Switched off ❌: satellite maps are not displayed in map scales from 2 mi (2 km) to 10 mi (10 km).

Satellite maps for these map scales are not available in all countries.

Satellitemapsforthesemapscalesonotavailableinallcountries.
Displaying weather information

Requirements:
- Mercedes me connect is available.
- You have a user account for the Mercedes me portal.
- The service is available.
- The service has been activated at an authorized Mercedes-Benz Center.

Further information can be found at: http://www.mercedes.me

Multimedia system:

### Telephony operating modes overview

Depending on your equipment, the following telephony operating modes are available:

- A mobile phone is connected to the multimedia system via Bluetooth® (→ page 301).
- Two mobile phones are connected with the multimedia system via Bluetooth® (two phone mode) (→ page 301).

### Information on telephony

The following situations can lead to the call being disconnected while the vehicle is in motion:

- There is insufficient network coverage in the area
- You move from one GSM or UMTS transmitter/receiver area (cell) into another and no communication channels are free

The multimedia system supports calls in HD Voice® for improved speech quality. A requirement for this is that the mobile phone and the mobile phone network provider of the person you are calling support HD Voice®.

Depending on the quality of the connection, the voice quality may fluctuate.

### Options
- The SIM card used is not compatible with the network available
- A mobile phone with "Twincard" is logged into the network with the second SIM card at the same time

Two mobile phones connected: changes view between telephone 1 and 2 or Active Call

### Devices (→ page 301)

### Text Message

### Recent Calls (→ page 308)

### Contacts (→ page 305)

### One mobile phone connected: Active Call.
Connecting a mobile phone (Bluetooth® telephony)

Requirements:
- Bluetooth® is activated on the mobile phone (see the manufacturer’s operating instructions).
- Bluetooth® is activated on the multimedia system (→ page 259).

Multimedia system:

Searching for a mobile phone
- Select Connect New Device.
- Select Start Search on System.
The available mobile phones are displayed. If a new mobile phone is found, it is indicated by the symbol.

Connecting a mobile phone (authorization using Secure Simple Pairing)
- Select the mobile phone.
A code is displayed in the multimedia system and on the mobile phone.

If the codes match: confirm the code on the mobile phone.

Connecting a mobile phone (authorization by entering a passkey)
- Select the mobile phone.
- Choose a one to sixteen-digit number combination as a passkey.
- On the multimedia system: enter the passkey and select OK.
- On the mobile phone: enter the passkey again and confirm.

Connecting a second mobile phone (two phone mode)

Requirements:
- At least one mobile phone is already connected to the multimedia system via Bluetooth®.
- At least one mobile phone is already connected to the multimedia system via Bluetooth®.
- The currently connected mobile phone is replaced by the new mobile phone.

or
- To use the mobile phone as an audio source: select Audio Source (→ page 335).
A mobile phone can be operated both as an audio source as well as telephone in parallel. It is possible at any future point to change the type of connection for the mobile phone already connected and to set this as Phone 1, Phone 2 or Audio Source (→ page 302).

Functions of the mobile phone in two phone mode

Functions overview

</thead>
<tbody>
<tr>
<td>Full range of functions</td>
<td>Incoming calls</td>
</tr>
</tbody>
</table>

Interchanging mobile phones (two phone mode)

Requirements:
- The mobile phones are authorized (→ page 301).

Multimedia system:

1. Bluetooth® device name of the currently connected mobile phone
2. Connects a mobile phone as Phone 1
3. Connects a mobile phone as Phone 2
4. Connects a mobile phone as Audio Source
5. Disconnecting a mobile phone(→ page 303)
6. De-authorizing a mobile phone(→ page 303)
If a new mobile phone is connected and defined as Phone 1, for example, this overwrites the previously connected mobile phone in the foreground of the system.

Disconnecting a mobile phone

Multimedia system: Phone ➤ Devices

Select the symbol in the line of the mobile phone. The disconnection of the mobile phone takes place without a confirmation prompt. The mobile phone remains authorized in the system.

De-authorizing a mobile phone

Multimedia system: Phone ➤ Devices

Select the symbol in the line of the mobile phone.

Answer the confirmation prompt with Yes. The mobile phone is deauthorized and deleted from the system.

Information on Near Field Communication (NFC)

NFC enables short-range wireless data transfer or (re)connection of a mobile phone with the multimedia system.

The following functions are available without having authorized a mobile phone:

- Transferring a URL to be viewed in the multimedia system (see the manufacturer's operating instructions).
- Setting up the vehicle's Wi-Fi access data via the system settings (→ page 261).

Further information can be found at: http://www.mercedes-benz.com/connect

Using the mobile phone with Near Field Communication (NFC)

Requirements:

- NFC is activated on the mobile phone (see the manufacturer's operating instructions)
- The mobile phone's screen is switched on and unlocked (see the manufacturer's operating instructions)

To connect a mobile phone: hold the NFC area of the mobile phone (see manufacturer's operating instructions) on mat or place the mobile phone on it.

The mobile phone is connected to the multimedia system.

To change a mobile phone: hold the NFC area of the mobile phone (see manufacturer's operating instructions) on the mat or place the mobile phone on it.

If the mobile phone has already been authorized on the multimedia system, it is now connected.

If the mobile phone is authorized on the multimedia system for the first time, it is connected after confirming the mobile phone instructions (see the manufacturer's operating instructions).

Further information can be found at: http://www.mercedes-benz.com/connect
Setting the reception and transmission volume

Requirements:
- A mobile phone is authorized (→ page 301).

Multimedia system:

Phone Options Phone
This function ensures optimal language quality.
- Select Reception Volume or Transmission Volume.
- Set the volume.

Further information on the recommended reception and transmission volume: http://www.mercedes-benz.com/connect

 Adjusting the call and ringtone volume

Multimedia system:

System Audio Phone
Select Call Volume or Ringtone Volume.
- Set the volume.

Starting/stopping mobile phone voice recognition

Requirements:
- The mobile phone is connected to the multimedia system (→ page 301).

Starting mobile phone voice recognition
- Press and hold the button on the multifunction steering wheel for more than one second.
  You can use mobile phone voice recognition.

Stopping mobile phone voice recognition
- Press the or button on the multifunction steering wheel.

Calls

Using the telephone

Multimedia system:

Phone Contacts
Making a call
- Select Numerical Keypad.

- Enter the number.
- Select .
  The call is made.

Accepting a call
- Select Accept.

Rejecting a call
- Select Reject.

Ending a call
- Select .

Activating functions during a call
- To show all functions, navigate down.
  The following functions are available during a call:
- End Call
- Make Additional Call
- Keyboard (show to send DTMF tones)
- Switch Mute Mic on or off .
- Private Mode (an active call in hands-free mode is transferred over to the telephone)
Conducting calls with several participants

Requirements:
- There is an active call (→ page 304).
- Another call is being made.

Switching between calls

- Select call ●. The selected call is active. The other call is on hold.

Activating or ending a call on hold

- Select Continue Call or End Call.

Conducting a conference call

- Select Create Conference Call in the telephone menu. The new participant is included in the conference call.

Ending an active call

- Select ☎. On some mobile phones, the call on hold is activated as soon as the active call is ended.

Accepting/rejecting a waiting call

Requirements:
- There is an active call (→ page 304).

If you receive a call while already in a call, a message is displayed. An acoustic signal also sounds.

- Select Accept. The incoming call is active.
- If only one mobile phone is connected with the multimedia system, the previous call will be put on hold.
- If during a call you accept a call with the other mobile phone when in two phone mode then the existing call is ended.

- Select Reject. This function and behavior depends on your mobile phone network provider and the mobile phone (see the manufacturer’s operating instructions).

Contacts

Information about the contacts menu

The contacts menu contains all contacts from existing data sources, e.g. mobile phone or memory card. You can store up to 6,000 contacts.

Depending on the data source, you have the following number of contacts:
- Permanently saved contacts: 3,000 entries
- Contacts loaded from the mobile phone: 3,000 entries

From the contacts menu, you can perform the following actions:
- Using the telephone
  - Calling a contact (→ page 307)
  - Calling a new number (→ page 304)
- Navigation (→ page 279)
- Compose messages (→ page 309)

If a mobile phone is connected to the multimedia system (→ page 301) and automatic calling up (→ page 306) is activated, the mobile phone’s contacts are displayed in the address book.
Downloading mobile phone contacts
Multimedia system:

Automatically
- Switch Synchronize Contacts Automatically on.
Manually
- Deactivate Synchronize Contacts Automatically.
- Select Synchronize Contacts.

Calling up contacts
Multimedia system:

- Enter characters into the search field. A selection of possible contacts appears. Entering more characters into the search field narrows down the number of possible selections.
- Select the contact.

A contact can contain the following details:
- Phone numbers
- Navigation addresses
- Geo-coordinates
- Internet address

Editing the format of a contact's name
Multimedia system:

### Importing contacts into the contacts menu

**Multimedia system:**
- Phone ➤ Options ➤ Contacts
- Select Import.
- Select an option.

### Saving a mobile phone contact

**Multimedia system:**
- Phone ➤ Contacts
- Select the mobile phone contact  
- Select  
- Select Save to Vehicle. The contact saved in the multimedia system is identified by the symbol.

### Calling a contact

**Multimedia system:**
- Phone ➤ Contacts
- Enter characters into the search field.
- Select the contact.
- Select the telephone number. The number is dialed.

### Selecting further options in the contacts menu

**Multimedia system:**
- Phone ➤ Contacts
- Select a contact.
- Select an option.

### Deleting a contact

**Multimedia system:**
- Phone ➤ Contacts

You can delete contacts stored in the vehicle.
- Search for the contact.
- Select the contact.
- Select  
- Select Delete Contact. 
- Select Yes.

Depending on the stored data, the following options are available:
- Call
- Send Text Message
- Show Website (if an Internet address has been stored)
- Navigate (if an address has been stored)
- Save My Favorite
- Send DTMF Tones (for a number with DTMF tones)
- Select an option.
Call list

Call list overview
Depending on whether your mobile phone supports the PBAP Bluetooth® profile or not, this can have different effects on the presentation and functions of the call list.

If the PBAP Bluetooth® profile is supported, the effects are as follows:
- The call lists from the mobile phone are displayed in the multimedia system.
- When connecting the mobile phone, you may have to confirm the connection for the PBAP Bluetooth® profile.

If the PBAP Bluetooth® profile is not supported, the effects are as follows:
- The multimedia system generates its own call lists.
- The call list is not synchronized with the call lists in the mobile phone.

Making a call from the call list
Multimedia system:

- Select [Recent Calls]
- Select a number.
- The call is made.

Text messages

Overview of text message functions
If the connected mobile phone supports the MAP Bluetooth® profile, the text message functions can be used on the multimedia system.

You can obtain further information about settings and supported functions of Bluetooth®-capable mobile phones from an authorized Mercedes-Benz Center or at: http://www.mercedes-benz.com/connect

Some mobile phones require further settings after being connected to the multimedia system (see manufacturer’s operating instructions).

New messages are identified by the [i] symbol in the media display and an audible signal.

Depending on the mobile phone, the multimedia system only displays new incoming text messages or the 100 newest text messages.

Configuring the text messages displayed
Multimedia system:

- Select [Options].
- A menu with the following options is shown:
  - All Messages
  - New and Unread Messages
  - New Messages
  - Off (The text messages are not displayed automatically.)
- Select an option.

The setting may not be active until the mobile phone is reconnected.
Reading text messages
Multimedia system:

- Phone  ➪  Text Message

Reading a text message
- Select a text message.
  The message text is displayed.

Using the read-aloud function
- Select a text message.
- Select Read Aloud.
  The text message is read aloud.

Composing and sending a text message
Multimedia system:

- Phone  ➪  Text Message
- Select Write New Text Message.

Adding a recipient
- Select Press to Add Recipient.
- Select the contact.

Dictating text
- Select Press to Dictate.

To start the dictation function: press on the central control element.
The app for the dictation function is loaded.
If there was no prior Internet connection, a connection is now established.
- Say the message.
The dictation ends automatically after you have finished speaking.
After the voice message has been processed, it is shown as text.

To replace a message: select Replace message.
The text that has been dictated and shown on the display is reset and can be dictated again.

Sending text messages
- Select Send Text Message.

Replying to a text message
Multimedia system:

- Phone  ➪  Text Message
- Open the text message.
- Select [ ].
- Select Reply.

Editing text
- Select the word.

To call up the correction menu: press on the central control element.
The following options are available:
  - Adjusting the capitalization of words (if supported by the character set)
  - Expanding the choice of words
  - Deleting the selection
  - Recording a new dictation

To leave the menu: select Done.

Calling a text message sender
Multimedia system:

- Phone  ➪  Text Message
- Open the text message.
- Select [ ].
- Select Call Sender.
Deleting text messages

Multimedia system:

- Phone ➔ Text Message
- Select Text Message
- To delete a text message: select Delete.
- Outbox
- Select Drafts.

Mercedes-Benz link

Overview of Mercedes-Benz Link

Using Mercedes-Benz Link, various functions and selected mobile phone apps can be transferred to the media display.

The Mercedes-Benz Link control box supplementary equipment is required for this. You can obtain this at an authorized Mercedes-Benz Center.

- The Mercedes-Benz Link control box uses the Android operating system.

Connecting Mercedes-Benz Link with the multimedia system

- Connect the Mercedes-Benz Link control box with the USB port of the multimedia connection unit using a suitable connecting cable.

- A suitable connecting cable is available separately at an authorized Mercedes-Benz Center.

Using Mercedes-Benz Link

Requirements:
- The Mercedes-Benz Link control box is connected with the multimedia system using the USB port.

Multimedia system:

- Connect
- Select Mercedes-Benz Link.

Ending Mercedes-Benz Link

Multimedia system:

- Select MB Link.
- The mobile phone functions and apps are available and shown on the media display.

You can find more information in the Mercedes-Benz Link control box operating instructions.

- Select Disconnect.
- The connection is ended.
- The mobile phone continues to be supplied with electricity.

- Disconnect the connecting cable between the Mercedes-Benz Link control box and the multimedia system.

Mercedes-Benz recommends disconnecting the connecting cable only when the vehicle is stationary.
Apple CarPlay™

Overview of Apple CarPlay™

⚠️ WARNING Risk of distraction from information systems and communications equipment

If you operate information and communication equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the traffic situation permits.
- If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system.

iPhone® functions can be used via the multimedia system using Apple CarPlay™. They are operated using the central control element or the Siri® voice-operated control system. You can activate the voice-operated control system by pressing and holding the button on the multifunction steering wheel.

When using Apple CarPlay™ via the voice-operated control system, the multimedia system can still be operated via the Voice Control System (page 240).

Only one mobile phone at a time can be connected via Apple CarPlay™ to the multimedia system.

The availability of Apple CarPlay™ may vary according to the country.

The service provider is responsible for this application and the services and content connected to it.

Information on Apple CarPlay™

While using Apple CarPlay™ various functions of the multimedia system, e.g. telephony or the media sources Bluetooth® audio and iPod®, are unavailable.

Only one route guidance can be active at a time. If route guidance is active on the multimedia system, it is closed when route guidance is started on the mobile phone.

Connecting an iPhone® via Apple CarPlay™

Requirements:
- Apple® operating system version iOS 8.3 or above is installed on the iPhone®.
- There is an Internet connection for the full range of functions for Apple CarPlay™.
- The iPhone® is connected to the multimedia system via the USB port using a suitable cable (page 329).

Multimedia system:

➡️ Connect ➤ Apple CarPlay

Setting automatic or manual start

A message appears when connected for the first time.

- **Automatic start:** select Automatically. Start Automatically is activated.

Apple CarPlay™ will now start immediately after the iPhone® is connected to the multimedia system using a USB cable.
Manual start: select **Manually**.

Select the iPhone® in the device list.

**Accepting/rejecting the data protection regulations**
A message with the data protection regulations appears.

Select **Accept & Start**.

or

Select **Decline & End**.

**Exiting Apple CarPlay™**

Press the button on the multifunction steering wheel, for example.

If Apple CarPlay™ was not displayed in the foreground before disconnecting, the application starts in the background when reconnected. You can call up Apple CarPlay™ in the main menu.

**Calling up Apple CarPlay™ sound settings**

Multimedia system:

- Connect  ➤ Apple CarPlay

- Select the tone menu (→ page 342).

**Ending Apple CarPlay™**

Multimedia system:

- Connect  ➤ Apple CarPlay

- Select **Disconnect**.

  The connection is ended.

  The mobile phone continues to be supplied with electricity.

  or

- Disconnect the connecting cable between the mobile phone and multimedia system. Mercedes-Benz recommends disconnecting the connecting cable only when the vehicle is stationary.

**Android Auto**

**Android Auto overview**

**WARNING** Risk of distraction from information systems and communications equipment

If you operate information and communication equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the traffic situation permits.

- If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system.

Mobile phone functions can be used with Android Auto using the Android operating system on the multimedia system. It is operated using the central control element or the voice control. You can activate the voice-operated control system by pressing and holding the button on the multifunction steering wheel.

When using Android Auto via the voice-operated control system, the multimedia system can still be operated via the Voice Control System (→ page 240).
Only one mobile phone at a time can be connected via Android Auto to the multimedia system. The availability of Android Auto and Android Auto Apps may vary according to the country. The service provider is responsible for this application and the services and content connected to it.

Information on Android Auto
While using Android Auto, various functions of the multimedia system, for example the media source Bluetooth® audio, are not available. Only one route guidance can be active at a time. If route guidance is active on the multimedia system, it is closed when route guidance is started on the mobile phone.

Connecting a mobile phone via Android Auto

Requirements:
- The first activation of Android Auto on the multimedia system must be carried out when the vehicle is stationary for safety reasons.
- The mobile phone supports Android Auto from Android 5.0.
- The Android Auto app is installed on the mobile phone.
- In order to use the telephone functions, the mobile phone must be connected to the multimedia system via Bluetooth® (→ page 301).
- If there was no prior Internet connection, this is established with the use of the mobile phone with Android Auto.
- The mobile phone is connected to the multimedia system via the USB port using a suitable cable (→ page 329).
- There is an Internet connection for the full range of functions for Android Auto.

Multimedia system:
- Connect Android Auto
  - Select the mobile phone from the device list.

Accepting/rejecting the data protection regulations
A message with the data protection regulations appears.
  - Select Accept & Start.
  - Select Decline & End.

Activating automatic start
  - Select Start Automatically.

Starting manually
  - Select the mobile phone from the device list.

Exiting Android Auto
  - Press the button on the multifunction steering wheel, for example.

If Android Auto was not displayed in the foreground before disconnecting, the application starts in the background when reconnected. You can call up Android Auto in the main menu.

Calling up the Android Auto sound settings
Multimedia system:
- Connect Android Auto Sound
  - Select the tone menu (→ page 342).
Ending Android Auto

Multimedia system:

Connect Android Auto

Select Disconnect.
The connection is ended.
The mobile phone continues to be supplied with electricity.

or

Disconnect the connecting cable between the mobile phone and multimedia system. Mercedes-Benz recommends disconnecting the connecting cable only when the vehicle is stationary.

Transferred vehicle data with Android Auto and Apple CarPlay™

Overview of transferred vehicle data

When using Android Auto or Apple CarPlay™, certain vehicle data is transferred to the mobile phone. This enables you to get the best out of selected mobile phone services. Vehicle data is not directly accessible.

The following system information is transmitted:
- Software release of the multimedia system
- System ID (anonymised)

The transfer of this data is used to optimize communication between the vehicle and the mobile phone.

To do this, and to assign several vehicles to the mobile phone, a vehicle identifier is randomly generated.

This has no connection to the vehicle identification number (VIN) and is deleted when the multimedia system is reset (→ page 267).

The following position data is transmitted:
- Coordinates
- Speed
- Compass direction
- Acceleration direction

This data is only transferred while the navigation system is active in order to improve it (e.g. so it can continue functioning when in a tunnel).

Mercedes me connect

Notes on Mercedes me connect

Mercedes me connect provides the following services:
- Accident and breakdown management (me button)
- Concierge Service (when the service is activated), appointment requests or similar (me button)
- Mercedes-Benz emergency call system (SOS button)
The Mercedes-Benz Customer Center and the Mercedes-Benz emergency call center are available for you around the clock.

The me button and the emergency call system can be found on the vehicle's overhead control panel (→ page 315).

You can also call the Mercedes-Benz Customer Center using the multimedia system (→ page 315).

Please note that Mercedes me connect is a Mercedes-Benz service. In emergencies, always call the national emergency services first using the standard national emergency service phone numbers. In emergencies, you can also use the Mercedes-Benz emergency call system (→ page 317).

Observe the conditions of use for Mercedes me connect and other services. These can be obtained in the Mercedes me portal: https://me.secure.mercedes-benz.com

---

**Calling the Mercedes-Benz Customer Center using the multimedia system**

**Requirements:**
- You have access to a GSM network.
- The contract partner’s GSM network coverage is available in the respective region.
- The ignition is switched on so that vehicle data can be transferred automatically.

**Multimedia system:**
- Phone
- Contacts
- Call Mercedes me connect.

The call is made. Then, you can select a service and be connected to a specialist at the Mercedes-Benz Customer Center.

**Making a call via the overhead control panel**

**Requirements:**
- You have access to a GSM network.
- The contract partner’s GSM network coverage is available in the respective region.
- The ignition is switched on so that vehicle data can be transferred automatically.

**To make a service call:** press button 1.
To make an emergency call: press SOS button cover briefly to open.
Press and hold SOS button for at least one second.
If a service call is active, an emergency call can still be triggered. This has priority over all other active calls.
Service calls are only possible if a mobile phone network is available.

Information about the service call using the me button
A call to the Mercedes-Benz Customer Center has been initiated via the me button in the overhead control panel or the multimedia system.

In the event of a breakdown, you will get support:
- A qualified Mercedes-Benz technician provides breakdown assistance on site and/or the vehicle will be towed to the nearest authorized Mercedes-Benz Center.
You may be charged for these services.

You can find information on the following topics:
- Activation of Mercedes me connect
- Operating the vehicle
- Nearest authorized Mercedes-Benz Center
- Other products and services from Mercedes-Benz

Data is transferred during the connection to the Mercedes-Benz Customer Center (→ page 317).

Information on Mercedes me connect accident management
The Mercedes me connect accident management is an extension of the Mercedes-Benz emergency call system (→ page 317).

An emergency call is made to the Mercedes-Benz emergency call center after an accident:
- A voice connection is made to a contact person at the Mercedes-Benz emergency call center.
- If necessary, the contact person at the Mercedes-Benz emergency call center forwards the call to Mercedes me connect accident management.

Forwarding the call is not possible in all countries.
- If necessary, the vehicle will be towed to an authorized Mercedes-Benz Center.

Arranging a service appointment via Mercedes me connect
If you have activated the maintenance management service, relevant vehicle data is transferred automatically to the Mercedes-Benz Customer Center. You will then receive individual recommendations regarding the maintenance of your vehicle.

Regardless of whether you have consented to the maintenance management service, the multimedia system reminds you after a certain amount of time that a service is due. A prompt appears asking if you would like to make an appointment.

To arrange a service appointment: select Call.
After your agreement the vehicle data is sent and a Mercedes-Benz Customer Center employee deals with your appointment. The
information is then sent to your desired service outlet. This service outlet will then contact you within 24 hours.

If you select Later after the service message appears, the message is hidden and reappears after a certain period of time.

Transferred data during a service call

Observe the conditions of use for Mercedes me connect and other services. These can be obtained in the Mercedes me portal: https://me.secure.mercedes-benz.com

When you make a service call via Mercedes me connect, data will be transmitted.

The following data is transmitted if a service call is made via Mercedes me connect:
- Vehicle identification number
- Reason for the initiation of the call

Mercedes-Benz emergency call system

Information on the Mercedes-Benz emergency call system

The Mercedes-Benz emergency call system only functions in areas where mobile phone coverage is available from the wireless service providers. Insufficient network coverage from the wireless service providers may result in an emergency call not being transmitted.

The Mercedes-Benz emergency call system is available for at least ten years starting from the manufacturing date.

The ignition must be switched on before an automatic emergency call can be made.

The Mercedes-Benz emergency call system is activated at the factory.

If you would like to deactivate the Mercedes-Benz emergency call system, please contact your dealership. If ownership of a vehicle changes, e.g. because the vehicle concerned is sold, the previous owner (i.e. the person selling the vehicle) must inform the new owner or contract partner (i.e. the person buying the vehicle) that the Mercedes-Benz emergency call system is deactivated.

Overview of the Mercedes-Benz emergency call system

The Mercedes-Benz emergency call system can help to decisively reduce the time between an accident and the arrival of emergency services at the site of the accident. It helps locate an accident site in places that are difficult to access.

The emergency call can be made automatically (→ page 318) or manually (→ page 318). Only make emergency calls if you or others are in need of rescue. Do not make an emergency call in the event of a breakdown or a similar situation.

Displays in the media display:

SOS READY: emergency call available

SOS NOT READY: the ignition is not on or there is a malfunction with the emergency call system.

During an active emergency call, 

Multimediasystem 317
You can find more information on the regional availability of the Mercedes-Benz emergency call system at: http://www.mercedes-benz.com/connect_ecall.

If there is a malfunction in the emergency call system (e.g., a malfunction with the speaker, microphone, airbag, SOS button), a corresponding message appears in the multifunction display of the instrument cluster.

**Triggering an automatic emergency call**

**Requirements:**
- The ignition is switched on.
- The starter battery is sufficiently charged.
- If restraint systems such as airbags or Emergency Tensioning Devices have been activated after an accident, the Mercedes-Benz emergency call system may automatically initiate an emergency call.

The emergency call has been made:
- A voice connection is made to the Mercedes-Benz emergency call center.
- A message with accident data is transmitted to the Mercedes-Benz emergency call center. The Mercedes-Benz emergency call center can transmit the vehicle position data to one of the emergency call centers.
- In certain situations, data is also transmitted in the voice channel to the Mercedes-Benz emergency call center. This allows measures for rescue, recovery or towing to an authorized Mercedes-Benz Center to be initiated quickly.

The SOS button in the overhead control panel flashes until the emergency call is finished.

It is not possible to immediately end an automatic emergency call.

If no connection can be made to the emergency services either, a corresponding message appears in the display.

- Dial the local emergency number on your mobile phone.

If an emergency call has been initiated:
- Remain in the vehicle if the road and traffic conditions permit you to do so until a voice connection is established with the emergency call center service provider.
- On the basis of the call, the service provider decides whether it is necessary to call rescue teams and/or the police to the accident site.

**Triggering a manual emergency call**

- Press and hold the SOS button in the overhead control panel for at least one second.

The emergency call has been made:
- A voice connection is made to the Mercedes-Benz emergency call center.
- Remain in the vehicle if the road and traffic conditions permit you to do so until a voice connection is established with the emergency call center service provider.
- On the basis of the call, the service provider decides whether it is necessary to call rescue teams and/or the police to the accident site.
- A message with accident data is transmitted to the Mercedes-Benz emergency call center.
The Mercedes-Benz emergency call center can transmit the vehicle position data to one of the emergency call centers.

- In certain situations data is also transmitted in the voice channel to the Mercedes-Benz emergency call center. This allows measures for rescue, recovery or towing to an authorized Mercedes-Benz Center to be initiated quickly.

If no connection can be made to the emergency services either, a corresponding message appears in the media display.

- Dial the local emergency number on your mobile phone.

Ending an unintentional emergency call

- Select \[\text{~}\] on the multifunction steering wheel.

Data transfer of the Mercedes-Benz emergency call system

The following data is transmitted to the Mercedes-Benz emergency call center:

- the vehicle’s GPS position data
- the last GPS position data on the route (a few hundred meters before the incident)
- direction of travel
- vehicle identification number
- the vehicle drive type
- the estimated number of people in the vehicle
- whether Mercedes me connect is available or not
- whether the emergency call was initiated manually or automatically
- the time of the accident
- the language setting on the multimedia system

For accident clarification purposes, the following measures can be taken up to an hour after the emergency call has been initiated:

- the current vehicle position can be called up
- a voice connection to the vehicle occupants can be established

Online and Internet functions

Internet connection

Information on connecting to the Internet

WARNING Risk of distraction from information systems and communications equipment

If you operate information and communication equipment integrated in the vehicle when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the traffic situation permits.
- If you cannot be sure of this, stop the vehicle whilst paying attention to road and traffic conditions and operate the equipment with the vehicle stationary.

You must observe the legal requirements for the country in which you are currently driving when operating the multimedia system.
WARNING Risk of distraction from operating mobile communication equipment while the vehicle is in motion

If you operate mobile communication equipment when driving, you will be distracted from the traffic situation. This could also cause you to lose control of the vehicle.

- Only operate this equipment when the vehicle is stationary.

You must observe the legal requirements for the country in which you are currently driving when operating mobile communication equipment in the vehicle.

The Internet functions can only be used to a limited degree whilst driving.

Function of the communication module

On vehicles with a built-in communication module, the Internet connection is established via an integrated SIM card.

To use Internet access via the communication module the following conditions must be met:

- The vehicle is equipped with a permanently installed communication module.
- Mercedes me connect is active and ready for operation.
- Mercedes me connect is activated for Internet access.
- Data volume via Mercedes me connect is available.

If the data volume limit is reached, the availability of Mercedes me connect services is limited. The data volume must be purchased via Mercedes me connect. Contact an authorized Mercedes-Benz Center to find out whether it is possible to purchase data volume in your country.

Establishing an Internet connection

Multimedia system:

- Connect
- For example, select Browser.

The multimedia system usually establishes the Internet connection automatically. If the multimedia system is not connected to the Internet, the Internet connection is established when an Internet application is used.

The availability of web browsers is country-dependent.

Connection status

Connection status overview

Display of existing connection
Displaying the connection status

Audio mode

Information on the audio mode

**WARNING** Risk of distraction when handling data storage media

If you handle a data storage medium while driving, your attention is diverted from the traffic conditions. This could also cause you to lose control of the vehicle.

Only handle a data storage medium when the vehicle is stationary.

Permissible file systems:
- FAT32
- exFAT
- NTFS

Permissible data storage medium:
- SD card
- USB storage device
- iPod®/iPhone®
- MTP devices
- Bluetooth® audio equipment

Observe the following notes:

- The multimedia system supports a total of up to 50,000 files.
- Data storage media up to 2 TB are supported (32-bit address space).
- Due to the large variety of available music files regarding encoders, sampling rates and data rates, playback cannot always be guaranteed.
- Due to the wide range of USB devices available on the market, playback cannot be guaranteed for all USB devices.
- Copy-protected music files or DRM encrypted files cannot be played back.
- MP3 players must support Media Transfer Protocol (MTP).

Supported formats:
- MP3
- WMA
- AAC
- WAV
- FLAC
- ALAC
Manufactured under license from Dolby Laboratories. Dolby, Dolby Audio and the double-D symbol are trademarks of Dolby Laboratories.

Gracenote, the Gracenote logo and logotype, "Powered by Gracenote", MusicID and Playlist Plus are either registered trademarks or trademarks of Gracenote, Inc. in the United States and/or other countries.

Notes on copyright
Audio files that you create or reproduce yourself for playback are generally subject to copyright protection. In many countries, reproductions, even for private use, are not permitted without the prior consent of the copyright holder. Make sure that you know about the applicable copyright regulations and that you comply with these.

Activating media mode
Multimedia system:

Media ➔ Media Sources
→ Select a media source.
-Playable music files are played back.

Inserting/removing an SD card

DANGER Risk of fatal injury from swallowing SD cards
SD cards are small parts.
They could be swallowed and lead to choking.

- Keep SD cards out of the reach of children.
- Seek medical attention immediately if an SD card has been swallowed.

NOTE Damage due to high temperatures
High temperatures may damage the SD card.
- Remove the SD card after use and take it out of the vehicle.
Multimedia system:

Media ▶ Media Sources ▶ Mem. Card

**Inserting**
The multimedia connection unit is located in the stowage compartment under the armrest.

- Insert the SD memory card into the SD card slot until it engages. The side with the contacts must face downwards. Playable music files are played back.

**Removing**
- Press the SD card.
- Remove the SD card.

  • Year

Media Interface

Information about the Media Interface

Media Interface is a universal interface for the connection of mobile audio equipment. The multimedia system has two USB ports. The USB ports are located in the stowage compartment under the armrest.

Supported devices

The Media Interface allows you to connect the following data storage media:
  • iPod®
  • iPhone®
  • Composers
  • Videos
  • Podcasts (Apple® devices)
  • Audiobooks (Apple® devices)

Select a category.

The categories are available as soon as the entire media content has been read in and analyzed.
• MP3 player
• USB devices

For details and a list of supported devices, visit our website at http://www.mercedes-benz.com/connect. Follow the instructions in the "Media Interface" section.

Satellite radio

Information on the satellite radio

SIRIUS XM® satellite radio offers more than 175 digital-quality radio channels providing 100% commercial-free music, sports, news and entertainment, for example. SIRIUS XM satellite radio employs a fleet of high-performance satellites to broadcast around the clock throughout the USA and Canada. The satellite radio program is available for a monthly fee. Information about this can be obtained from a Sirius XM® Service Center and at http://www.siriusxm.com (USA) or http://www.siriusxm.ca (Canada).

Satellite radio restrictions

Satellite radio mode may be temporarily unavailable or interrupted for a variety of reasons. These include environmental or topographical conditions beyond the control of Mercedes-Benz USA, LLC. Thus, operation at certain locations may not be possible.

Registering satellite radio

Requirements:
- Satellite radio equipment
- Registration with a satellite radio provider
- If registration is not included when purchasing the system, your credit card details will be required to activate your account

All channels with adult content are unlocked.

Music and sport alerts function
This function enables you to program an alert for your favorite artists, tracks or sporting events. Music alerts can be saved whilst a track is being played and sport alerts can be saved during a live game. You can also specify sport alerts via the menu option. The system then continuously searches through all the channels. If a match is found with a stored alert, you will be informed.

Setting music and sport alerts
Multimediasystem:

►► Radio ►► Radio Source ►► SiriusXM Radio ►► Options ►► Alert for Artist, Song & Sporting Event

Setting a music alert
► Select Add New Alert.
or
► Select Manage Artist & Song Alerts.
► Select [Options].
The following options are available:
- Mark This Entry
- Unmark This Entry
- Mark All Entries
- Unmark All Entries
- Delete This Entry
- Delete All Entries
► Select an option.
Activate Artist & Song Alerts ✔. The alert is set for the current artist or track. If a match is found, a prompt appears asking whether you wish to change to the station.

**Setting a sport alert**
- Select Add New Alert.
- Select Manage Sports Alerts.
- Select Select New Alerts.
- Select Edit Alerts.
- Select a team from a league.
- Activate Sports Alerts ✔.

**Information on Smart Favorites and Tune Start**
Stations in the station presets can be added as Smart Favorites. Smart Favorites stations are automatically saved to temporary storage in the background. If you change to a Smart Favorites station, you can replay, pause or actively skip forward or back to broadcasts which you have missed. If Tune Start is activated and you change to another Smart Favorites station, the music track currently playing on the station is automatically restarted from the beginning of the track.

Rear touchscreen

Using the basic functions

The rear touchscreen is in the center console in the rear passenger compartment.

Mercedes-Benz is constantly updating its vehicles to the state of the art. Mercedes-Benz therefore reserves the right to introduce changes in the following areas:
- Design
- Equipment
- Technical features

The equipment in your vehicle may therefore differ from that shown in the descriptions and illustrations. Please consult an authorized Mercedes-Benz Center should you have any questions.

To switch on the rear passenger compartment touchscreen: start the vehicle. The main menu appears.

The status line is at the top. The functions are displayed in the middle. The climate control bar is at the bottom.

Depending on the vehicle equipment, the following functions are available:
- AMG (three menus)
- Vehicle (two menus)
- Media (three to five menus)
- System settings (four menus)
- Air conditioning adjustment in the climate control bar

The touchscreen is operated by swiping with one finger and pressing the displayed symbol. You can switch between functions by swiping with two fingers.

To call up a function: select Vehicle, for example, in the main menu.

To call up the menu for a function: swipe left or right on the display.

or

Press << or >>.

To switch function: in any menu, swipe left or right with two fingers. The last menu set for the next or previous function appears.
Displays and functions in the status line
The date, time and current settings are displayed.

- **To call up the main menu:** in any menu, select \(\text{🏠}\) in the status line.
- **To increase/decrease volume:** select - or + in the status line.
- **To switch sound off/on:** select the speaker symbol in the status line.
- **To switch the display off:** press and hold \(\text{🏠}\) until the display is deactivated.
  
  or

  - Swipe down from the top of the touchscreen with one finger.
  - **To switch the display on:** swipe from the very bottom of the touchscreen upward with one finger.
  
  or

  - Swipe left or right on the touchscreen using one finger.

  or

- Tap the touchscreen twice in rapid succession.

- Simultaneously press left and right on the top of the touchscreen.

**AMG rear passenger compartment**

Displaying AMG engine data
Rear touchscreen:

- AMG

  - **Engine Data** should be selected.
  The current engine output, transmission oil temperature and the temperature of the coolant are shown on the touchscreen.

  The AMG menu has the three functions **Engine Data, Dynamic Data** and **Vehicle Data**.
You can change between the functions with a swipe to the left or right or by pressing on \(\text{⬅️} \) or \(\text{➡️}\).

Displaying AMG dynamic data
Rear touchscreen:

- AMG

  - Dynamic Data should be selected.
  The lateral and longitudinal acceleration as well as the currently selected drive program are shown.

Displaying AMG vehicle data
Rear touchscreen:

- AMG

  - Select Vehicle Data.
  The vehicle level, the currently selected drive program and the ratio of speed and brake force are shown.

**Vehicle rear**

Adjusting the ambient lighting
Rear touchscreen:

- Vehicle ⏪ Ambient Lighting

  - To select an area in the vehicle: press an area.
  The selected area, e.g. Front, is displayed.
If no area is selected then the settings apply for the whole vehicle.

➢ **To set the intensity:** move the control knob between 0 and 10.

➢ **To set the color:** move the control knob to the color range. The color is displayed on the right next to the color range.

64 colors are available.

➢ **To select a multi-color program:** switch on Multi-color √.

➢ Select a program from the list, e.g. Sun yellow.

➢ **To select effects and scenarios:** swipe right or press on .

➢ Switch on Multi-color Animation, Welcome or Climate √.

The selection of effects can also be made in the system settings.

---

**Setting the roller sunshade**

**Requirements:**
- The vehicle is equipped with a panoramic sliding sunroof.
- The sliding sunroof is closed using the switch in the overhead control panel (→ page 81).

Rear touchscreen:

➡ Vehicle ➤ Sunshade

➢ **To open or close the roller sunshade:** move the slide control.

  The left-hand symbol is activated (yellow).
- Random track sequence from current data storage medium
  The right-hand symbol is activated (yellow).

➢ **To select a track position:** move the control knob to the playback bar.

---

**Media player shortcut**

➢ In any menu, swipe up from the bottom of the touchscreen with one finger.

➢ Use the functions described above.
Adjusting the equalizer
Rear touchscreen:

To adjust the treble, mid and bass: move the control knob between -10 and 10.

Setting the balance and fader
Rear touchscreen:

To set the balance: move the control knob from left to right.
To set the fader: move the control knob from front to back.

Setting the sound focus (premium sound system)
Rear touchscreen:

Switch Sound Focus on or off.
To set sound focus: select Front Only, Rear Only or All Seats.

Setting seat-specific sound optimization (high-end sound system)
Rear touchscreen:

The setting optimizes the sound playback for the selected seat position.

Select a seat position.
The following seat positions are available:
- Driver
- Front Passenger
- Rear Left
- Rear Right

To deactivate sound optimization: select Off.

Selecting a sound profile (high-end sound system)
Rear touchscreen:

Select the sound profile.
The following profiles are available:
- Pure

Easy Listening
Live
Surround
3D sound

Rear system settings

Setting the language
Rear touchscreen:

Set the language.

Setting the display brightness
Rear touchscreen:

Move the control knob between -5 (dark) and 5 (light).

Setting the display lock
Rear touchscreen:

You can set the time at which the display locks if it is not being used.
Move the control knob between 1 min and 5 min.

Resetting system settings
Rear touchscreen:

- Sys. Settings ➤ System Reset

You can reset the settings to factory settings. Personal settings are deleted when doing so.

- Select Reset.
- A prompt appears.
- Select Yes.

Rear climate control

Switching the climate control function on/off
The climate control function can be switched on/off in the climate control bar. The climate control bar appears in all menus.

- Select ON or OFF in the climate control bar.

Setting the temperature
You can set the temperature in the climate control bar. The climate control bar appears in all menus.

- Select the current temperature value, e.g. LO.
- Move the control knob between LO and HI.

Setting the airflow
You can set the airflow in the climate control bar or set it to automatic mode. The climate control bar appears in all menus.

- Select the current airflow [ ].
- Move the control knob between 1 and 7.
- or
- Select AUTO.

Setting the perfume atomizer
You can set the perfume atomizer in the climate control bar. The climate control bar appears in all menus.

- Select the current setting for the perfume atomizer.
- Select the intensity High, Medium or Low.
- or
- Select Off.

Switching ionization on/off
Ionization can be switched on/off in the climate control bar. The climate control bar appears in all menus.

You can use the ionization function to purify the air in the vehicle interior and attain an improved interior climate.

Ionization can only be operated when the automatic climate control is switched on. The air vent in the rear passenger compartment must be open.

- Select the current setting for ionization.
- Select Auto or Off.
ASSYST PLUS service interval display

Function of the ASSYST PLUS service interval display

The ASSYST PLUS service interval display on the instrument display provides information on the remaining time or distance before the next service due date.

You can hide this service message using the back button on the left-hand side of the steering wheel.

Depending on how the vehicle is used, the ASSYST service interval display may shorten the service interval, e.g. in the following cases:

- Mainly short-distance driving
- When the engine is often left idling for long periods
- In the event of frequent cold start phases

Mercedes-Benz recommends avoiding such operating conditions.

You can obtain further information concerning the servicing of your vehicle from a qualified specialist workshop, e.g. an authorized Mercedes-Benz Center.

Displaying the service due date

On-board computer:

1. Service ➤ ASSYST PLUS

The next service due date is displayed.

To exit the display: press the back button on the left-hand side of the steering wheel.

Make sure to observe the following further related subject:
- Operating the on-board computer (→ page 225).

Information on regular maintenance work

NOTE Premature wear through failure to observe service due dates

Service work which is not carried out at the right time or incompletely can lead to increased wear and damage to the vehicle.

Special service requirements

The prescribed service interval is based on normal operation of the vehicle. Maintenance work will need to be performed more often if the vehicle is operated under arduous conditions or increased loads.

The ASSYST PLUS service interval display is only an aid. The driver of the vehicle bears responsibility as regards to whether maintenance work needs to be performed more often than specified based on the actual operating conditions and/or loads.

Examples of arduous operating conditions:
- regular city driving with frequent intermediate stops
- mainly short-distance driving

- Always observe the prescribed service intervals.
- Always have the prescribed service work carried out at a qualified specialist workshop.
• frequent operation in mountainous terrain or on poor road surfaces
• when the engine is often left idling for long periods
• operation in particularly dusty conditions and/or if air-recirculation mode is frequently used

In these or similar operating conditions, have the interior air filter, engine air cleaner, engine oil and oil filter etc. changed more frequently. The tires must be checked more frequently if the vehicle is operated under increased loads. Further information can be obtained at a qualified specialist workshop.

Battery disconnection periods

The ASSYST PLUS service interval display can only calculate the service due date when the battery is connected.

> Note down the service due date displayed on the instrument display before disconnecting the battery (→ page 350).

### Engine compartment

#### Opening/closing the hood

**WARNING** Risk of accident if the engine hood is unlatched while driving

An unlocked engine hood may open up when the vehicle is in motion and block your view.

- Never unlatch the engine hood while driving.
- Before every trip, ensure that the engine hood is latched.

**WARNING** Risk of accident and injury when opening and closing the engine hood

When opening or closing the engine hood, it may suddenly drop into the end position. There is a risk of injury for anyone in the engine hood's range of movement.

- Only open or close the engine hood when there are no persons in the engine hood's range of movement.

**WARNING** Danger of burns when opening the hood

If you open the hood when the engine has overheated or during a fire in the engine compartment, you could come into contact with hot gases or other escaping operating fluids.

- Before opening the hood, allow the engine to cool down.
- In the event of a fire in the engine compartment, keep the hood closed and call the fire service.

**WARNING** Risk of injury due to moving parts

Certain components in the engine compartment may continue to move or suddenly move again even after the ignition has been switched off, e.g. the cooler fan.

Make sure of the following before performing tasks in the engine compartment:

- Switch the ignition off.
Never touch the danger zone surrounding moving component parts, e.g. the rotation area of the fan.

Remove jewelry and watches.

Keep items of clothing and hair away from moving parts.

**WARNING** Risk of injury from touching component parts under voltage

The ignition system and the fuel injection system work under high voltage. If you touch component parts which are under voltage, you could receive an electric shock.

Never touch component parts of the ignition system or the fuel injection system when the ignition is switched on.

**WARNING** Risk of burns from hot component parts in the engine compartment

Certain component parts in the engine compartment can be very hot, e.g. the engine, the cooler and parts of the exhaust system.

Let the engine cool down and only touch the component parts described as follows.

**WARNING** Risk of injury from using the windshield wipers while the engine hood is open

When the engine hood is open and the windshield wipers are set in motion, you can be trapped by the wiper linkage.

Always switch off the windshield wipers and ignition before opening the engine hood.

To open: pull lever 1 to release the hood.
Push handle 1 of the hood catch upwards and lift the hood by approximately 15 in (40 cm).

To close: lower the hood and press it firmly into the lock with both hands.

If the hood can be lifted a little bit more, repeat the procedure until it engages correctly.

**Engine oil**

**Checking the engine oil level using the on-board computer**

**Requirements**
The engine oil level is determined during driving. Determining the engine oil level can take up to 30 minutes with a normal driving style and even longer with an active driving style.

In order to receive a result as quickly as possible:
- Warm up the engine
- Park the vehicle on a level surface
- Leave the engine running at idling speed

**On-board computer:**

- Service
- Engine Oil Level

You will see one of the following messages on the multifunction display:
- Measuring Engine Oil Level...: measurement of the oil level is not yet possible.
- Repeat the request after a maximum of 30 minutes driving.

**Engine Oil Level OK** and the bar display for indicating the oil level on the multifunction display is green and is between "min" and "max": the oil level is correct.

**Engine Oil Level Add 1.0 l** and the bar display for indicating the oil level on the multifunction display is orange and is below "min":

- Add 1.1 US qt (1 l) engine oil.

**Engine Oil Level System Inoperative**: sensor faulty or not inserted.

**Consult a qualified specialist workshop.**

**Engine Oil Level System Currently Unavail.**:
Close the hood.

**Adding engine oil**

![WARNING](image)

**WARNING Risk of burns from hot component parts in the engine compartment**

Certain component parts in the engine compartment can be very hot, e.g. the engine, the cooler and parts of the exhaust system.

- Let the engine cool down and only touch the component parts described as follows.

![WARNING](image)

**WARNING Risk of fire and injury from engine oil**

If engine oil comes into contact with hot component parts in the engine compartment, it may ignite.

- Make sure that no engine oil is spilled next to the filler opening.
- Allow the engine to cool off and thoroughly clean the engine oil from component parts before starting the vehicle.

---

**NOTE** Engine damage caused by an incorrect oil filter, incorrect oil or additives

- Do not use engine oils or oil filters which do not correspond to the specifications explicitly prescribed for the service intervals.
- Do not alter the engine oil or oil filter in order to achieve longer change intervals than prescribed.
- Do not use additives.
- Follow the instructions in the service interval display regarding the oil change.

**NOTE** Damage caused by topping up too much engine oil

Adding too much engine oil can cause damage to the engine or the catalytic converter.

- Have excess engine oil removed at a qualified specialist workshop.

---

*NOTE Engine damage caused by an incorrect oil filter, incorrect oil or additives*

*NOTE Damage caused by topping up too much engine oil*

---

Mercedes-AMG GT 63 4MATIC+ and Mercedes-AMG GT 63 S 4MATIC+
Mercedes-AMG GT 43, Mercedes-AMG GT 43 4MATIC+ and Mercedes-AMG GT 53 4MATIC+

- Turn cap 1 counter-clockwise and remove it.
- Add engine oil.
- Replace cap 1 and turn it clockwise as far as it will go.
- Check the oil level again (→ page 353).

### Checking coolant level

#### WARNING Risk of burns from hot component parts in the engine compartment

Certain component parts in the engine compartment can be very hot, e.g. the engine, the cooler and parts of the exhaust system.

- Let the engine cool down and only touch the component parts described as follows.

#### WARNING Risk of scalding from hot coolant

The engine cooling system is pressurized, particularly when the engine is warm. If you open the cap, you could be scalded by hot coolant spraying out.

- Let the engine cool down before opening the cap.
- When opening the cap, wear protective gloves and safety glasses.
- Open the cap slowly to release pressure.

- Park the vehicle on a level surface.
- Check the coolant temperature display in the instrument cluster.
  The coolant temperature must be below 158 °F (70 °C).
- Slowly turn cap 1 counter-clockwise to relieve overpressure.
Continuing turning cap 1 counter-clockwise and remove it.

The coolant level is correct:
- If the engine is cold, up to marker bar 2
- If the engine is warm, up to 0.6 in (1.5 cm) over marker bar 2

If necessary, add coolant that has been approved for Mercedes-Benz.

Further information on coolant (→ page 424).

Adding washer fluid to the windshield washer system

**WARNING** Risk of burns from hot component parts in the engine compartment

Certain component parts in the engine compartment can be very hot, e.g. the engine, the cooler and parts of the exhaust system.

Let the engine cool down and only touch the component parts described as follows.

**WARNING** Danger of burns when opening the hood

If you open the hood when the engine has overheated or during a fire in the engine compartment, you could come into contact with hot gases or other escaping operating fluids.

Before opening the hood, allow the engine to cool down.

In the event of a fire in the engine compartment, keep the hood closed and call the fire service.

**WARNING** - Risk of fire and injury from windshield washer concentrate

Windshield washer concentrate is highly flammable. It could ignite if it comes into contact with hot engine component parts or the exhaust system.

Make sure that no windshield washer concentrate spills out next to the filler opening.

Remove cap 1 by the tab.

Add washer fluid.

Keeping the air-water duct free

- Keep the area between the hood and the windshield free of deposits, e.g. ice, snow and leaves.
Cleaning and care

Information on washing the vehicle in a car wash

**WARNING** Risk of accident due to reduced braking effect after washing the vehicle

The braking effect is reduced after washing the vehicle.

- After the vehicle has been washed, brake carefully while paying attention to the traffic conditions until the braking effect has been fully restored.

To avoid damage to your vehicle when using a car wash, ensure the following beforehand:

- Active Distance Assist DISTRONIC and the HOLD function are deactivated.
- the 360° Camera or the rear view camera is switched off.
- the extendable rear wing is completely retracted.
- the side windows and sliding sunroof are completely closed.
- the blower for the ventilation/heating is switched off.
- the windshield wiper switch is in position 0.
- the SmartKey is at a minimum distance of 10 ft (3 m) away from the vehicle, otherwise the tailgate could open unintentionally.
- in car washes with a conveyor system: neutral N is engaged.

Information on using a power washer

**WARNING** Risk of accident when using high-pressure cleaning equipment with round-spray nozzles

The water jet from a round-spray nozzle (dirt grinder) may cause damage to tires and suspension components that is not visible. Components damaged in this way may fail unexpectedly.

- Do not use high-pressure cleaning equipment with round-spray nozzles to clean your vehicle.
- Damaged tires or suspension components must be replaced immediately.

To avoid damage to your vehicle, observe the following when using a power washer:

- Keep the SmartKey at least 10 ft (3 m) away from the vehicle. Otherwise the tailgate could open unintentionally.
- Maintain a distance of at least 11.8 in (30 cm) to the vehicle.
• Vehicles with decorative foil: parts of your vehicle are covered with a decorative foil. Maintain a distance of at least 27.6 in (70 cm) between the foil-covered parts of the vehicle and the nozzle of the power washer. Move the power washer nozzle around whilst cleaning. The water temperature of the power washer must not exceed 124 °F (60 °C).

• Observe the information on the correct distance in the equipment manufacturer’s operating instructions.

• Do not point the nozzle of the power washer directly at sensitive parts such as tires, slits, electrical components, batteries, light bulbs and ventilation slots.

Washing the vehicle by hand

Observe the legal requirements, e.g. in a number of countries, washing by hand is only permitted in specially designated wash bays.

► Use a mild cleaning agent, e.g. car shampoo.

► Wash the vehicle with lukewarm water using a soft car sponge. When doing so, do not expose the vehicle to direct sunlight.

► Carefully hose the vehicle off with water and dry using a chamois. Take care not to point the water jet directly towards the air inlet grille.
## Notes on paintwork/matte finish paintwork care

Observe the following information:

<table>
<thead>
<tr>
<th>Cleaning and care</th>
<th>Avoiding paintwork damage</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Paintwork</strong></td>
<td></td>
</tr>
<tr>
<td>• Insect remains: soak with insect remover and rinse off the treated areas afterwards.</td>
<td>• Do not attach stickers, films or similar.</td>
</tr>
<tr>
<td>• Bird droppings: soak with water and rinse off afterwards.</td>
<td>• Remove dirt immediately, where possible.</td>
</tr>
<tr>
<td>• Tree resin, oils, fuels and greases: remove by rubbing gently with a cloth soaked in petroleum ether or lighter fluid.</td>
<td></td>
</tr>
<tr>
<td>• Coolant and brake fluid: remove with a damp cloth and clean water.</td>
<td></td>
</tr>
<tr>
<td>• Tar stains: use tar remover.</td>
<td></td>
</tr>
<tr>
<td>• Wax: use silicone remover.</td>
<td></td>
</tr>
</tbody>
</table>
### Cleaning and care

<table>
<thead>
<tr>
<th>Matte finish</th>
<th>Cleaning and care</th>
<th>Avoiding paintwork damage</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>• Only use care products approved for Mercedes-Benz.</td>
<td>• Do not polish the vehicle and alloy wheels.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Only use car washes that correspond to the latest engineering standards.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Do not use car wash programs with a final hot wax treatment.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Do not use paint cleaners, buffing or polishing products, gloss preservers, e.g. wax.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Always have paintwork repairs carried out at a qualified specialist workshop.</td>
</tr>
</tbody>
</table>

**Notes on cleaning decorative foils**

Observe the notes on matte finish care in the chapter "Notes on paintwork/matte finish paint-work care" (→ page 359). They also apply to matte decorative foils.
Observe the following information:

<table>
<thead>
<tr>
<th>Cleaning</th>
<th>Avoiding damage to the decorative foil</th>
</tr>
</thead>
<tbody>
<tr>
<td>- For cleaning, use plenty of water and a mild cleaning agent without additives or abrasive substances, e.g. a car shampoo approved for Mercedes-Benz.</td>
<td>- The service life and color of decorative foils are impaired by:</td>
</tr>
<tr>
<td>- Remove dirt immediately, where possible, whilst avoiding rubbing too hard. There is otherwise a risk of damaging the decorative foil irreparably.</td>
<td>- sunlight</td>
</tr>
<tr>
<td>- If there is dirt on the finish or if the decorative foil is dull: use the Paint Cleaner recommended and approved for Mercedes-Benz.</td>
<td>- temperature, e.g. hot air blower</td>
</tr>
<tr>
<td>- Insect remains: soak with insect remover and rinse off the treated areas afterwards.</td>
<td>- weather conditions</td>
</tr>
<tr>
<td>- Bird droppings: soak with water and rinse off afterwards.</td>
<td>- stone chippings and dirt</td>
</tr>
<tr>
<td>- To prevent water stains, dry a foil-wrapped vehicle with a soft, absorbent cloth after every car wash.</td>
<td>- chemical cleaning agents</td>
</tr>
<tr>
<td></td>
<td>- oily products</td>
</tr>
</tbody>
</table>

Scratches, corrosive deposits, areas affected by corrosion and damage caused by incorrect care cannot always be completely repaired. In such cases, visit a qualified specialist workshop.

You can obtain more information on care and cleaning products from the manufacturer.

In the case of foil-wrapped surfaces, optical differences may occur between the surfaces that were not protected by a decorative foil after removing a decorative foil.

Have work or repairs to decorative foils carried out at a qualified specialist workshop, e.g. in an authorized Mercedes-Benz Center.
Notes on care of vehicle parts

**WARNING** Risk of entrapment if the windshield wipers are switched on while the windshield is being cleaned

If the windshield wipers are set in motion while you are cleaning the windshield or wiper blades, you can be trapped by the wiper arm.

**WARNING** Risk of burning from the tailpipe or tailpipe trim

The tailpipe and tailpipe trim can become very hot. If you come into contact with these car parts, you could burn yourself.

Always switch off the windshield wipers and the ignition before cleaning the windshield or wiper blades.

Always be particularly careful when in the vicinity of the tailpipe and tailpipe trims and supervise children very closely when in this area.

Before any contact, allow the car parts to cool down.

Observe the following information:

<table>
<thead>
<tr>
<th>Notes on cleaning and care</th>
<th>Avoiding vehicle damage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wheels/rims</td>
<td>- Do not use acidic wheel cleaners to remove brake dust. This could damage wheel bolts and brake components.</td>
</tr>
<tr>
<td></td>
<td>- To avoid corrosion of the brake discs and brakepads, drive the vehicle for a few minutes after cleaning before parking it. The brake discs and brakepads warm up and dry out.</td>
</tr>
<tr>
<td>Windows</td>
<td>- Do not use dry cloths or abrasive or solvent-based cleaning agents to clean the inside of windows.</td>
</tr>
<tr>
<td>Wiper blades</td>
<td>- Do not clean the wiper blades too often.</td>
</tr>
</tbody>
</table>

Use water and acid-free wheel cleaners.

Clean the windows on the inside and outside using a damp cloth and cleaning agents recommended by Mercedes-Benz.

Fold out the wiper blades and clean them using a damp cloth.
### Notes on cleaning and care

<table>
<thead>
<tr>
<th>Exterior lighting</th>
<th>Clean the lenses with a wet sponge and mild cleaning agent, e.g. car shampoo.</th>
<th>Avoiding vehicle damage</th>
<th>Only use cleaning agents or cleaning cloths that are suitable for plastic lenses.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sensors</td>
<td>Clean the sensors in the front and rear bumper and in the radiator grill with a soft cloth and car shampoo.</td>
<td>When using a power washer, maintain a minimum distance of 11.8 in (30 cm).</td>
<td></td>
</tr>
<tr>
<td>Rear view camera and 360° Camera</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Open the camera cover with the multimedia system (→ page 209).</td>

<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Retract the rear wing completely after drying (→ page 194).</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Tailpipes</td>
<td>Clean with cleaning agents recommended by Mercedes-Benz, particularly in the winter and after washing the vehicle.</td>
<td>Do not use acidic cleaning agents.</td>
<td></td>
</tr>
</tbody>
</table>
Notes on care of the interior

**WARNING Risk of injury from plastic parts breaking off after the use of solvent-based care products**

Care and cleaning products containing solvents can cause surfaces in the cockpit to become porous.

When the airbags are deployed, plastic parts may break away.

Do not use any care or cleaning products containing solvents to clean the cockpit.

**WARNING Risk of injury or death from bleached seat belts**

Bleaching or dyeing seat belts can severely weaken them.

This can, for example, cause seat belts to tear or fail in an accident.

Never bleach or dye seat belts.

Observe the following information:

<table>
<thead>
<tr>
<th>Cleaning and care</th>
<th>Avoiding vehicle damage</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Seat belts</strong></td>
<td>Clean with lukewarm and soapy water.</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Display</strong></td>
<td>Clean the surface carefully with a microfiber cloth and a suitable display care product (TFT LCD).</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Plastic trim</strong></td>
<td>Clean with a damp microfiber cloth.</td>
</tr>
<tr>

</tbody>
</table>
Emergency
Removing the safety vest

The safety vests are located in the safety vest compartments in the driver's and front passenger door stowage compartments.

To remove: pull out safety vest bag 1 by loop 2.

Open safety vest bag 1 and pull out the safety vest.

There are also safety vest compartments in the rear door stowage compartments in which safety vests can be stored.

The requirements defined by the legal standard are only fulfilled if the safety vest is the correct size and is fully closed.

The safety vest must be replaced in the following situations:
- The reflective strips are damaged or dirty
- The maximum permissible number of washes is exceeded
- The fluorescence has faded

Flat tire
Notes on flat tires

WARNING Risk of accident due to a flat tire

A flat tire severely affects the driving characteristics as well as the steering and braking of the vehicle.

Tires without run-flat characteristics:
- Do not drive on with a flat tire.
- Change the flat tire immediately with an emergency spare wheel or spare wheel.
Alternatively, consult a qualified specialist workshop.

**Tires with run-flat characteristics:**
- Observe the information and warning notes on MOExtended tires (run-flat tires).

In the event of a flat tire, the following options are available depending on your vehicle’s equipment:

- **Vehicles with MOExtended tires:** it is possible to continue the journey for a short period of time. Make sure you observe the notes on MOExtended tires (run-flat tire) (→ page 367).
- **Vehicles with a TIREFIT kit:** you can repair the tires so that it is possible to continue the journey for a short period of time. To do this, use the TIREFIT kit (→ page 368).
- **Vehicles with Mercedes me connect:** you can make a call for Roadside Assistance via the overhead control panel in the case of a breakdown (→ page 315).

- **All vehicles:** change the wheel (→ page 410).

**Notes on MOExtended tires (run-flat tire)**

**WARNING** Risk of accident when driving in limp-home mode

When driving in emergency mode the handling characteristics are impaired. e.g. when cornering, when accelerating strongly and when braking.

- Do not exceed the permissible maximum speed for MOExtended tires.
- Avoid any abrupt steering and driving maneuvers as well as driving over obstacles (curbs, pot holes, off-road). This applies, in particular, to a loaded vehicle.
- Stop driving in the emergency mode if you notice:
  - banging noise
  - vehicle vibration
  - smoke which smells like rubber
  - continuous ESP® intervention
  - cracks in tire side walls
- After driving in emergency mode have the rims checked by a qualified specialist workshop with regard to their further use.
- The defective tire must be replaced in every case.

With MOExtended tires (run-flat tire), you can continue to drive your vehicle even if there is a total loss of pressure in one or more tires. However, the tire affected must not show any clearly visible damage.

You can recognize MOExtended tires by the MOExtended marking which appears on the side wall of the tire.

**Vehicles with tire pressure monitoring system:** MOExtended tires may only be used in conjunction with an activated tire pressure monitoring system.
If a pressure loss warning message appears in the multifunction display:

- Check the tire for damage.
- If driving on, observe the following notes.

**Driving distance possible in limp-home mode after the pressure loss warning:**

<table>
<thead>
<tr>
<th>Load condition</th>
<th>Driving distance possible in limp-home mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>Partially laden</td>
<td>50 miles (80 km)</td>
</tr>
<tr>
<td>Fully laden</td>
<td>19 miles (30 km)</td>
</tr>
</tbody>
</table>

- The driving distance possible in limp-home mode may vary depending on the driving style.
- Maximum permissible speed 50 mph (80 km/h).

If a tire has gone flat and cannot be replaced with an MOExtended tire, you can use a standard tire as a temporary measure.

### TIREFIT kit storage location

The TIREFIT kit is located under the cargo compartment floor.

![TIREFIT kit storage location](image)

1. Tire inflation compressor
2. Tire sealant bottle

### Using the TIREFIT kit

**Requirements**

- Tire sealant bottle
- TIREFIT sticker

- Tire inflation compressor
- Gloves (depending on the vehicle equipment)

TIREFIT kit storage location: (→ page 368)

You can use TIREFIT tire sealant to seal perforation damage of up to 0.16 in (4 mm), particularly those in the tire contact surface. You can use TIREFIT in outside temperatures down to -4 °F (-20 °C).

**WARNING Risk of accident when using tire sealant.**

In the following situations, the tire sealant is unable to provide sufficient breakdown assistance, as it is unable to seal the tire properly:

- There are cuts or punctures in the tire larger than those previously mentioned.
- The wheel rim is damaged.
- You have driven at a very low tire pressure or on a flat tire.

- Do not continue driving.
- Consult a qualified specialist workshop.
**WARNING** Risk of injury and poisoning from tire sealant

The tire sealant is harmful and causes irritation. Do not allow it to come into contact with the skin, eyes or clothing, and do not swallow it. Do not inhale tire sealant fumes. Keep the tire sealant away from children.

If you come into contact with the tire sealant, observe the following:

- Rinse off the tire sealant from your skin immediately using water.
- If tire sealant gets into your eyes, thoroughly rinse out the eyes using clean water.
- If tire sealant has been swallowed, immediately rinse out the mouth thoroughly and drink plenty of water. Do not induce vomiting and seek medical attention immediately.
- Change out of any clothes contaminated with tire sealant immediately.
- If allergic reactions occur, seek medical attention immediately.

**NOTE** Overheating due to the tire inflation compressor running too long

- Do not run the tire inflation compressor for longer than ten minutes without interruption.

Comply with the manufacturer’s safety notes on the sticker on the tire inflation compressor.

- Have the tire sealant bottle replaced in a qualified specialist workshop every five years.
- Do not remove any foreign objects which have entered the tire.

- Affix part 1 of the TIREFIT sticker to the instrument cluster within the driver’s field of vision.
- Affix part 2 of the TIREFIT sticker near the valve on the wheel with the defective tire.

- Pull plug 4 with the cable and hose 5 out of the tire inflation compressor housing.
Push the plug of hose 3 into flange 6 of tire sealant bottle 1 until the plug engages.

Place tire sealant bottle 1 head downwards into recess 2 of the tire inflation compressor.

Remove the valve cap from valve 7 on the defective tire.
Screw filling hose 8 onto valve 7.
Insert plug 4 into a 12 V socket in your vehicle.
Switch the ignition on.

Press on and off switch 3 on the tire inflation compressor.
The tire inflation compressor is switched on.
The tire is inflated. First, tire sealant is pumped into the tire. The pressure may briefly rise to approximately 500 kPa (5 bar/73 psi).

Do not switch off the tire inflation compressor during this phase.
Let the tire inflation compressor run for a maximum of ten minutes.
The tire should then have attained a tire pressure of at least 200 kPa (2.0 bar/29 psi).

If tire sealant leaks out, make sure you clean the affected area as quickly as possible. It is preferable to use clear water.
If you get tire sealant on your clothing, have it cleaned as soon as possible with perchloroethylene.

If, after ten minutes, a tire pressure of 200 kPa (2.0 bar/29 psi) has not been achieved:
Switch off the tire inflation compressor.
Unscrew the filling hose from the valve of the defective tire.

Please note that tire sealant may leak out when unscrewing the filling hose.
Drive forwards or reverse very slowly for approximately 33 ft (10 m).
Pump up the tire again.
After a maximum of ten minutes the tire pressure must be at least 200 kPa (2.0 bar/29 psi).

⚠️ WARNING Risk of accident due to the specified tire pressure not being reached
If the specified tire pressure is not reached after the specified time, the tire is too badly damaged. The tire sealant cannot repair the tire in this instance.
Damaged tires and a tire pressure that is too low can significantly impair braking and handling characteristics.

- Do not continue driving.
- Consult a qualified specialist workshop.

If, after ten minutes, a tire pressure of 200 kPa (2.0 bar/29 psi) has been achieved:

- Switch off the tire inflation compressor.
- Unscrew the filling hose from the valve of the defective tire.

⚠️ **WARNING** Risk of accident from driving with sealed tires

A tire temporarily sealed with tire sealant impairs driving characteristics and is not suitable for higher speeds.

- Adapt your driving style accordingly and drive carefully.
- Do not exceed the maximum speed limit with a tire that has been repaired using tire sealant.

- Observe the maximum permissible speed for a tire sealed with tire sealant 50 mph (80 km/h).
- Affix the upper section of the TIREFIT sticker to the instrument cluster in a location where it will be easily seen by the driver.

⚠️ **NOTE** Staining caused by leaking tire sealant

After use, excess tire sealant may leak out from the filling hose.

Therefore, place the filling hose in the plastic bag that contained the TIREFIT kit.

⚠️ **ENVIRONMENTAL NOTE** Environmental pollution caused by environmentally irresponsible disposal

Tire sealant contains pollutants.

- Have the tire sealant bottle disposed of professionally, e.g. at an authorized Mercedes-Benz Center.

- Stow the tire sealant bottle and the tire inflation compressor.

- **Pull away immediately.**

- Stop driving after approximately ten minutes and check the tire pressure using the tire inflation compressor. The tire pressure must now be at least 130 kPa (1.3 bar/19 psi).

⚠️ **WARNING** Risk of accident due to the specified tire pressure not being reached

If the specified tire pressure is not reached after a brief drive, the tire is too badly damaged. The tire sealant cannot repair the tire in this instance.

Damaged tires and tire pressure that is too low can significantly impair the braking properties and the handling characteristics.

- Do not continue driving.
- Consult a qualified specialist workshop.

In cases such as the one mentioned above, contact an authorized Mercedes-Benz Center. Or
call 1-800-FOR-MERcedes (in the USA) or 1-800-387-0100 (in Canada).

Correct the tire pressure if it is still at least 130 kPa (1.3 bar / 19 psi). See the Tire and Loading Information placard on the driver’s side B-pillar or the tire pressure table in the fuel filler flap for values.

**To increase the tire pressure:** switch on the tire inflation compressor.

**To reduce the tire pressure:** press pressure release button 1 next to manometer 2.

- When the tire pressure is correct, unscrew the filling hose from the valve of the sealed tire.
- Screw the valve cap onto the valve of the sealed tire.
- Pull the tire sealant bottle out of the tire inflation compressor.
  The filling hose stays on the tire sealant bottle.
- Drive to the nearest qualified specialist workshop and have the tire, tire sealant bottle and filling hose replaced there.

**Battery (vehicle)**

**Notes on the 12 V battery**

**WARNING** Risk of an accident due to work carried out incorrectly on the battery

Work carried out incorrectly on the battery can, for example, lead to a short circuit. This can lead to function restrictions in safety-relevant systems, for example the lighting system, ABS (anti-lock braking system) or ESP® (Electronic Stability Program). The operating safety of your vehicle may be restricted.

You could lose control of the vehicle in the following situations:

- when braking
- in the event of abrupt steering maneuvers and/or when the vehicle’s speed is not adapted to the road conditions

In the event of a short circuit or a similar incident, contact a qualified specialist workshop immediately.

Do not continue driving.

Always have work on the battery carried out at a qualified specialist workshop.

- Further information on ABS (→ page 166)
- Further information on ESP®

For safety reasons, Mercedes-Benz recommends that you only use batteries which have been tested and approved for your vehicle by Mercedes-
Benz. These batteries provide increased impact protection to prevent vehicle occupants from suffering acid burns should the battery be damaged in the event of an accident.

All vehicles except vehicles with a lithium-ion battery

**WARNING** Risk of explosion due to electrostatic charge

Electrostatic charge can cause sparks which may ignite the highly flammable gas mixture in the battery.

- To discharge any electrostatic charge that may have built up, touch the metal vehicle body before handling the battery.

The highly flammable gas mixture is created while the battery is charging and during starting assistance.

**WARNING** Danger of chemical burns from the battery acid

Battery acid is caustic.

Avoid contact with the skin, eyes or clothing.

Do not lean over the battery.

Do not inhale battery gases.

Keep children away from the battery.

Immediately rinse battery acid off thoroughly with plenty of clean water and seek medical attention immediately.

---

**ENVIRONMENTAL NOTE** Environmental damage caused by improper disposal of batteries

Batteries contain pollutants. It is illegal to dispose of them with the household rubbish.

---

If you have to disconnect the 12 V battery, contact a qualified specialist workshop. Comply with safety notes and take protective measures when handling batteries.

- Risk of explosion.

- Fire, open flames and smoking are prohibited when handling the battery. Avoid creating sparks.

- Electrolyte or battery acid is corrosive. Avoid contact with the skin, eyes or clothing. Wear suitable protective clothing, in particular gloves, an
apron and a face mask. Immediately rinse electrolyte or acid splashes off with clean water. Consult a doctor if necessary.

Wear safety glasses.

Keep children away.

Observe this Operator's Manual.

Observe the following if you do not intend to use the vehicle over an extended period of time:

- Activate standby mode.
- Alternatively: connect the battery to a battery charger approved by Mercedes-Benz or consult a qualified specialist workshop to disconnect the battery.

**Notes on starting assistance and on charging the 12 V battery**

**Vehicles with a lithium-ion battery**
When charging the battery and during starting assistance, always use the jump-start connection point in the engine compartment.

[NOTE] Damage to the battery from overvoltage
When charging using a battery charger without a maximum charging voltage, the battery or the on-board electronics may be damaged.

- Only use battery chargers with a maximum charging voltage of 14.4 V.

**All other vehicles**
When charging the battery and during starting assistance, always use the jump-start connection point in the engine compartment.

[NOTE] Damaging the battery through overvoltage
When charging using a battery charger without a maximum charging voltage, the battery or the vehicle electronics may be damaged.

- Only use battery chargers with a maximum charging voltage of 14.8 V.

[WARNING] Risk of explosion from hydrogen gas igniting
A battery generates hydrogen gas during the charging process. If there is a short circuit or sparks start to form, there is a danger of the hydrogen gas igniting.

- Make sure that the positive terminal of the connected battery does not come into contact with vehicle parts.
- Never place metal objects or tools on a battery.
- When connecting and disconnecting the battery, you must observe the described order for the battery clamps.
When giving starting assistance, always make sure that you only connect battery terminals with identical polarity.

During starting assistance, you must observe the described order for connecting and disconnecting the jumper cables.

Do not connect or disconnect the battery clamps while the engine is running.

**WARNING** Risk of explosion during charging process and starting assistance

During the charging process and starting assistance, the battery may release an explosive gas mixture.

- Avoid fire, open flames, creating sparks and smoking.
- Make sure that there is sufficient ventilation during the charging process and during starting assistance.
- Do not lean over a battery.

**WARNING** Risk of explosion from a frozen battery

A discharged battery may freeze at temperatures slightly above or below freezing point. During starting assistance or battery charging, battery gas may be released.

- Always thaw a frozen battery out first before charging it or performing starting assistance.

If the indicator/warning lamps in the instrument cluster do not light up at low temperatures, it is very likely that the discharged battery has frozen. In this case you may neither jump-start the vehicle nor charge the battery.

The service life of a battery that has been thawed may be dramatically shortened. The starting characteristics may be impaired, especially at low temperatures.

It is recommended that you have a thawed battery checked at a qualified specialist workshop.

Observe the following points during starting assistance and when charging the battery:

- Only use undamaged jumper cables/charging cables with a sufficient cross-section and insulated terminal clamps.
- Non-insulated parts of the terminal clamps must not come into contact with other metal parts while the jumper cable/charging cable is connected to the battery/jump-start connection point.
- The jumper cable/charging cable must not come into contact with any parts which may move when the engine is running.

### All vehicles

<table>
<thead>
<tr>
<th>NOTE</th>
<th>Damage caused by numerous or extended attempts to start the engine</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Numerous or extended attempts to start the engine may damage the catalytic converter due to non-combusted fuel.</td>
</tr>
</tbody>
</table>

Avoid numerous and extended attempts to start the engine.
Always make sure that neither you nor the battery is electrostatically charged.  
Keep away from fire and open flames.  
Do not lean over the battery.

Observe the additional following points when charging the battery:
• Only use battery chargers tested and approved for Mercedes-Benz.  
• Read the battery charger's operating instructions before charging the battery.

Observe the additional following points during starting assistance:
• Starting assistance may only be provided using batteries with a nominal voltage of 12 V.  
• The vehicles must not touch.  
• Gasoline engine: Only accept starting assistance if the engine and exhaust system are cold.

**Starting assistance and charging the 12 V battery**

**Requirements:**
• The vehicle is secured with the electric parking brake.  
• **Vehicles with automatic transmission:**  
  The transmission is in position P.  
• The ignition and all electrical consumers are switched off.  
• The hood is open.

1. Slide cover 1 of positive clamp 2 on the jump-starting connection point in the direction of the arrow.  
2. Connect positive clamp 2 on your vehicle to the positive pole of the donor battery using the jumper cable/charging cable. Always begin with positive clamp 2 on your own vehicle first.
During starting assistance: start the engine of the donor vehicle and run at idle speed.

Connect the negative pole of the donor battery and ground point 3 of your own vehicle by using the jumper cable/charging cable. Begin with the donor battery first.

During starting assistance: start the engine of your own vehicle.

During the charging process: start the charging process.

During starting assistance: let the engines run for several minutes.

During starting assistance: before disconnecting the jumper cable, switch on an electrical consumer in your own vehicle, e.g. the rear window heater or lighting.

When the starting assistance/charging process is complete, perform the following steps:

First, remove the jumper cable/charging cable from ground point 3 and the negative pole of the donor battery, then from positive clamp 2 and the positive pole of the donor battery. Begin each time with the contacts on your own vehicle first.

After removing the jumper cable/charging cable, close cover 1 of positive clamp 2.

Further information can be obtained at a qualified specialist workshop.

Replacing the 12 V battery

Observe the notes on the 12 V battery (→ page 372).

Mercedes-Benz recommends that you have the 12 V battery replaced at a qualified specialist workshop, e.g. at an authorized Mercedes-Benz Center.

Observe the following notes if you want to replace the battery yourself:

- Always replace a defective battery with a battery which meets the specific vehicle requirements.

The vehicle is equipped with an AGM technology battery (Absorbent Glass Mat) or a lithium-ion battery. Full vehicle functionality is only guaranteed with an AGM battery or lithium-ion battery. For safety reasons, Mercedes-Benz recommends that you only use batteries which have been tested and approved for your vehicle by Mercedes-Benz.

- Carry over detachable parts, such as vent hoses, elbow fitting or terminal covers, from the battery being replaced.

- Make sure that the vent hose is always connected to the original opening on the side of the battery.

Install any existing or supplied cell caps. Otherwise, gases or battery acid could escape.

- Make sure that detachable parts are reconnected in the same way.

Tow starting or towing away

Permitted towing methods

Mercedes-Benz recommends transporting your vehicle in the case of a breakdown, rather than towing it away.
For towing, use a tow rope or tow bar with both axles on the ground. Do not use tow bar systems.

**NOTE** Damage to the vehicle due to towing away incorrectly

- Observe the instructions and notes on towing away.

### Permitted towing methods

<table>
<thead>
<tr>
<th>Vehicle equipment/towing method</th>
<th>Both axles on the ground</th>
<th>Front axle raised</th>
<th>Rear axle raised</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vehicles with automatic transmis-sion</td>
<td>Yes, maximum 31 miles (50 km) at 31 mph (50 km/h)</td>
<td>No</td>
<td>Yes, if the steering wheel is fixed in the center position with a steering wheel lock.</td>
</tr>
<tr>
<td>4MATIC vehicles</td>
<td>Yes, maximum 31 miles (50 km) at 31 mph (50 km/h)</td>
<td>No</td>
<td>No</td>
</tr>
</tbody>
</table>

**Towing with a raised axle:** towing should be performed by a towing company.
Towing the vehicle with both axles on the ground

- Observe the notes on the permitted towing methods (→ page 377).
- Make sure that the battery is connected and charged.

Observe the following points when the battery is discharged:
- The engine cannot be started
- The electric parking brake cannot be released or applied
- **Vehicles with automatic transmission:** The automatic transmission cannot be shifted to position N or P.

**Vehicles with automatic transmission:** If the automatic transmission cannot be shifted to position N, or the multifunction display in the instrument cluster does not show anything, have the vehicle transported away (→ page 380). A towing vehicle with lifting equipment is required for vehicle transportation.

**NOTE** Damage due to towing away at excessively high speeds or over long distances

The drivetrain could be damaged when towing at excessively high speeds or over long distances.
- A towing speed of 30 mph (50 km/h) must not be exceeded.
- A towing distance of 30 miles (50 km) must not be exceeded.

**WARNING** Risk of accident when towing a vehicle which is too heavy

If the vehicle being tow-started or towed away is heavier than the permissible gross mass of your vehicle, the following situations can occur:
- The towing eye may become detached.
- The vehicle/trailer combination may swerve or even overturn.
- If another vehicle is tow-started or towed away, its weight must not exceed the permissible gross mass of your own vehicle.

If a vehicle must be tow started or towed away, its permissible gross mass must not exceed the permissible gross mass of the towing vehicle.
- Information on the permissible gross mass of the vehicle can be found on the vehicle identification plate (→ page 418).
- **Vehicles with automatic transmission:** Do not open the driver’s door or front passenger door, otherwise the automatic transmission automatically shifts to position P.
- Installing the towing eye (→ page 381).
- Fasten the tow bar.

**NOTE** Damage due to incorrect connection

- Only connect the tow rope or tow bar to the towing eyes.
- Deactivating the automatic locking mechanism (→ page 70).
Do not activate the HOLD function.
Deactivate Active Brake Assist (→ page 174).
**Vehicles with automatic transmission:** Shift the automatic transmission to position N.
Release the electric parking brake.

**WARNING** Risk of accident due to limited safety-related functions during the towing process

Safety-related functions are limited or no longer available in the following situations:
- the ignition is switched off.
- the brake system or power steering system is malfunctioning.
- the energy supply or the on-board electrical system is malfunctioning.

When your vehicle is then towed away, significantly more effort may be required to steer and brake than is normally required.
- Use a tow bar.

Make sure that the steering wheel can move freely, before towing the vehicle away.

**NOTE** Damage due to excessive tractive power
If you pull away sharply, the tractive power may be too high and the vehicles could be damaged.
- Pull away slowly and smoothly.

**Loading the vehicle for transport**
- Observe the notes on towing away (→ page 379).
- Connect the tow bar to the towing eye in order to load the vehicle.
- **Vehicles with automatic transmission:** Shift the automatic transmission to position N.

**Vehicles with automatic transmission:** The automatic transmission may be locked in position P in the event of damage to the electrical system. To shift to N, provide the on-board electrical system with power (→ page 376).
- Load the vehicle onto the transporter.
- **Vehicles with automatic transmission:** Shift the automatic transmission to position P.
- Use the electric parking brake to secure the vehicle against rolling away.
- Only secure the vehicle by the wheels.

**Vehicles with ADS PLUS (Adaptive Damping System PLUS)**

**WARNING** Risk of an accident when transporting vehicles with Adaptive Damping System PLUS

The reduced damping forces on the vehicle being transported can cause the vehicle/trailer combination to start to swing.

As a result, when transporting vehicles with the Adaptive Damping System PLUS, the
vehicle/trailer combination may start to skid. Consequently, you could lose control of your vehicle.

- When transporting, ensure that:
  - The vehicle has been loaded onto the transporter correctly
  - The vehicle is secured at all four wheels with suitable tensioning straps
  - The maximum permissible speed of 35 mph (60 km/h) is not exceeded when transporting

**NOTE** Damage to the vehicle from securing it incorrectly

After loading, the vehicle must be secured at all four wheels. Otherwise, the vehicle could be damaged.

- A minimum distance of 8 in (20 cm) up and 4 in (10 cm) down must be kept to the transport platform.

- Secure the vehicle on all four wheels after loading.

**4MATIC vehicles/vehicles with automatic transmission**

- Make sure that the front and rear axles come to rest on the same transportation vehicle.

**NOTE** Damage to the drivetrain due to incorrect positioning

- Do not position the vehicle above the connection point of the transport vehicle.

---

**Towing eye storage location**

The towing eye is under the cargo compartment floor under cover 1.

**Installing the towing eye**

- To remove the front towing eye: pull out cover 1.
- To remove the rear towing eye: press the mark on cover 1 inwards and remove.
- Screw in the towing eye clockwise as far as it will go and tighten.
**Breakdown assistance**

- **Make sure that cover 1 engages in the bumper when you remove the towing eye.**

**NOTE** Damage due to incorrect use of the towing eye

When a towing eye is used to recover a vehicle, the vehicle may be damaged in the process.

- Only use the towing eye to tow away or tow start the vehicle.

**Tow starting the vehicle (emergency engine start)**

### Vehicles with automatic transmission

- **NOTE** Damage to the automatic transmission due to tow starting

The automatic transmission may be damaged in the process of tow starting vehicles with automatic transmission.

- Volumes with automatic transmission must not be tow started.

### Electrical fuses

#### Notes on electrical fuses

<table>
<thead>
<tr>
<th><strong>WARNING</strong> Risk of accident and injury due to overloaded lines</th>
</tr>
</thead>
<tbody>
<tr>
<td>If you manipulate or bridge a faulty fuse or if you replace it with a fuse with a higher amperage, the electric line could be overloaded. This could result in a fire.</td>
</tr>
<tr>
<td><strong>NOTE</strong> Damage due to incorrect fuses</td>
</tr>
<tr>
<td>Electrical components or systems may be damaged by incorrect fuses, or their functionality may be significantly impaired.</td>
</tr>
<tr>
<td><strong>NOTE</strong> Damage or malfunctions caused by moisture</td>
</tr>
</tbody>
</table>

Blown fuses must be replaced with fuses of the same rating, which you can recognize by the color and fuse rating. The fuse ratings and further information to be observed are listed in the fuse assignment diagram.

**Fuse assignment diagram**: on the fuse box in the cargo compartment (→ page 384).

<table>
<thead>
<tr>
<th><strong>NOTE</strong> Damage or malfunctions caused by moisture</th>
</tr>
</thead>
<tbody>
<tr>
<td>Moisture may cause damage to the electrical system or cause it to malfunction.</td>
</tr>
<tr>
<td><strong>NOTE</strong> Damage due to incorrect fuses</td>
</tr>
<tr>
<td>Electrical components or systems may be damaged by incorrect fuses, or their functionality may be significantly impaired.</td>
</tr>
<tr>
<td><strong>NOTE</strong> Damage due to incorrect use of the towing eye</td>
</tr>
</tbody>
</table>

When the fuse box is open, make sure that no moisture can enter the fuse box.

When closing the fuse box, make sure that the seal of the lid is positioned correctly on the fuse box.
If the newly inserted fuse also blows, have the cause traced and rectified at a qualified specialist workshop, e.g. an authorized Mercedes-Benz Center.

Ensure the following before replacing a fuse:
- The vehicle is secured against rolling away.
- All electrical consumers are switched off.
- The ignition is switched off.

The electrical fuses are located in various fuse boxes:
- Fuse box in the engine compartment on the driver’s side (→ page 383)
- Fuse box on the driver’s side of the cockpit (→ page 384)
- Fuse box in the front passenger footwell (→ page 384)
- Fuse box in the cargo compartment on the right-hand side of the vehicle, when viewed in the direction of travel (→ page 384)

Opening and closing the fuse box in the engine compartment

Requirements:
- You need a dry cloth and a screwdriver.

Observe the notes on electrical fuses (→ page 382).

Opening

⚠️ WARNING Risk of injury from using the windshield wipers while the engine hood is open

When the engine hood is open and the windshield wipers are set in motion, you can be trapped by the wiper linkage.

Always switch off the windshield wipers and ignition before opening the engine hood.

- Turn clip 2 on cover 1 a quarter-turn to the left.
- Pull cover 1 upwards in the direction of the arrow.
Remove any existing moisture from the fuse box using a dry cloth.
Loosen screws 4, remove fuse box lid 3 from the top.

Closing
Check whether the seal is positioned correctly in lid 2.

Insert lid 3 into the bracket at the rear of the fuse box.
Fold down lid 3 of the fuse box and tighten screws 4.
Insert cover 1 on both sides.
Turn clip 2 on cover 1 one quarter-turn to the right.
Close the hood.

Opening and closing the fuse box in the cockpit
The fuse box is on the side of the dashboard under a cover.
Contact an authorized Mercedes-Benz Center for further information.

Opening and closing the fuse box in the front passenger footwell
Observe the notes on electrical fuses (→ page 382).

Opening and closing the fuse box in the cargo compartment
Observe the notes on electrical fuses (→ page 382).
Open the cargo compartment floor.

Open cover 1 in the direction of the arrow and remove it.
Remove cover 1.

The fuse allocation chart is on the side of the fuse box.
Notes on noise or unusual handling characteristics

While driving, pay attention to vibrations, noises and unusual handling characteristics, e.g. pulling to one side. This may indicate that the wheels or tires are damaged. If you suspect that a tire is defective, reduce your speed immediately. Stop the vehicle as soon as possible to check the wheels and tires for damage. Hidden tire damage could also be causing the unusual handling characteristics. If you find no signs of damage, have the tires and wheels checked at a qualified specialist workshop.

---

Notes on regularly inspecting wheels and tires

⚠️ WARNING Risk of accident from damaged tires

Damaged tires can cause tire pressure loss. As a result, you could lose control of your vehicle.

▶ Check the tires regularly for signs of damage and replace any damaged tires immediately.

⚠️ WARNING Risk of aquaplaning due to insufficient tire tread

Insufficient tire tread will result in reduced tire grip. The tire tread is no longer able to dissipate water. This means that in heavy rain or slush the risk of hydroplaning is increased, in particular if vehicle speed is not adapted to suit the conditions.

If the tire pressure is too high or too low, tires may exhibit different levels of wear at different locations on the tire contact surface.

▶ Thus, you should regularly check the tread depth and the condition of the tire contact surface across the entire width of all tires.

Minimum tread depth for:

- Summer tires: ⅛ in (3 mm)
- M+S tires: ⅛ in (4 mm)

⚠️ For safety reasons, replace the tires before the legally prescribed limit for the minimum tread depth is reached.

Carry out the following checks on all wheels regularly, at least once a month or as required, e.g. prior to a long journey or driving off-road:

- Check the tire pressure (→ page 388).
- Visually inspect tires and wheels for damage.
- Check the valve caps.
  The valves must be protected against moisture and dirt by the valve caps approved especially for your vehicle by Mercedes-Benz.
- Visual check of the tire tread depth and the tire contact surface across the entire width.

The minimum tread depth for summer tires is ⅛ in (3 mm) and for winter tires ⅛ in (4 mm).
Six marks (arrow) show where the bar indicators are integrated into the tire tread. They are visible once a tread depth of approximately 1/16 in (1.6 mm) has been reached.

**Notes on snow chains**

**WARNING** Risk of accident due to incorrect mounting of snow chains

If you have mounted snow chains to the front wheels, the snow chains may drag against the vehicle body or chassis components.

This could cause damage to the vehicle or the tires.

- Never mount snow chains on the front wheels.
- Only mount snow chains on the rear wheels in pairs.

**NOTE** Damage to the wheel trim from mounted snow chains

If snow chains are mounted to steel wheels, the wheel trims can be damaged.

- Remove the wheel trims of steel wheels before mounting snow chains.

Observe the following notes when using snow chains:

- Snow chains are only permissible for certain wheel/tire combinations. You can obtain information about this from an authorized Mercedes-Benz Center.
- For safety reasons, only use snow chains that have been specifically approved for your vehicle by Mercedes-Benz, or snow chains with the same quality standard.
- If snow chains are installed, the maximum permissible speed is 30 mph (50 km/h).
- **Vehicles with Active Parking Assist:** Do not use Active Parking Assist when snow chains are installed.
- **Vehicles with level control:** If snow chains are installed, only drive at raised vehicle level.

ℹ️ You can deactivate ESP® to pull away. This allows the wheels to spin, achieving an increased driving force.
Tire pressure

Notes on tire pressure

**WARNING** Risk of accident due to insufficient or excessive tire pressure

Underinflated or overinflated tires pose the following risks:
- The tires may burst, especially as the load and vehicle speed increase.
- The tires may wear excessively and/or unevenly, which may greatly impair tire traction.
- The driving characteristics, as well as steering and braking, may be greatly impaired.
- Comply with the recommended tire pressure and check the tire pressure of all tires including the spare wheel regularly:
  - at least once a month
  - when the load changes

Driving with tire pressure that is too high or too low can:
- Shorten the service life of the tires.
- Cause increased tire damage.
- Adversely affect driving characteristics and thus driving safety, e.g. due to hydroplaning.

**WARNING** Risk of an accident due to insufficient tire pressure

Tires with pressure that is too low can overheat and burst as a result.
In addition, they also suffer from excessive and/or irregular wear, which can significantly impair the braking properties and the handling characteristics.
- Avoid excessively low tire pressures in all the tires, including the spare wheel.

Tire pressure which is too low can cause:
- Tire defects as a result of overheating
- Impaired handling characteristics
- Irregular wear
- Increased fuel consumption

**WARNING** Risk of accident from excessive tire pressure

Tires with excessively high pressure can burst because they are damaged more easily by highway fill, pot holes etc.
In addition, they also suffer from irregular wear, which can significantly impair the braking properties and the handling characteristics.
- Avoid excessively high tire pressures in all the tires, including the spare wheel.

Excessively high tire pressure can result in:
- Increased braking distance
- Impaired handling characteristics
- Irregular wear
• Impaired driving comfort
• Susceptibility to damage

**WARNING Risk of accident caused by repeated drop in tire pressure**

If the tire pressure drops repeatedly, the wheel, valve or tire may be damaged. Insufficient tire pressure can cause the tires to burst.

- Inspect the tire for signs of foreign objects.
- Check whether the wheel or valve has a leak.
- If you are unable to rectify the damage, contact a qualified specialist workshop.

You can find information on tire pressure for the vehicle’s factory-installed tires on the following labels:
- Tire and Loading Information placard on the B-pillar of your vehicle (→ page 393).
- Tire pressure table on the inside of the fuel filler flap (→ page 389).

Observe the maximum tire pressure (→ page 400).

Use a suitable tire pressure gauge to check the tire pressure. The outer appearance of a tire does not permit any reliable conclusion about the tire pressure.

**Vehicles with a tire pressure monitoring system:** You can also check the tire pressure using the on-board computer.

Only correct tire pressure when the tires are cold. Conditions for cold tires:

- The vehicle has been parked with the tires out of direct sunlight for at least three hours.
- The vehicle has traveled less than 1 mile (1.6 km).

A rise in the tire temperature of 18 °F (10 °C) increases the tire pressure by approx. 10 kPa (0.1 bar/1.5 psi). Take this into account when checking the tire pressure of warm tires. The tire pressure recommended for increased load/speed in the tire pressure table can affect the ride comfort.

**WARNING Risk of accident from unsuitable accessories on the tire valves**

If you mount unsuitable accessories onto tire valves, the tire valves may be overloaded and malfunction, which can cause tire pressure loss. Tire pressure monitoring systems for retrofitting will cause the tire valve to remain open. This can also result in tire pressure loss.

- Only screw standard valve caps or valve caps specifically approved by Mercedes-Benz for your vehicle onto the tire valve.

**Tire pressure table**

The tire pressure table is on the inside of the fuel filler flap.

- The data shown in the images is example data.
The tire pressure table shows the recommended tire pressure for all tires approved for this vehicle. The recommended tire pressures apply for cold tires under various operating conditions, i.e. loading and/or speed of the vehicle.

If one or more tire sizes precede a tire pressure, the tire pressure information following is only valid for those tire sizes.

The load conditions "partially laden" and "fully laden" are defined in the table for different numbers of passengers and amounts of luggage. The actual number of seats may differ from this.

Some tire pressure tables only show the rim diameter instead of the complete tire size, e.g. R18. The rim diameter is part of the tire size and can be found on the tire side wall (→ page 401).

Be sure to also observe the following further related subjects:

- Notes on tire pressure (→ page 388)
- Tire and Loading Information placard (→ page 393)
- Maximum tire pressure (→ page 400)

**Checking tire pressures manually**

- Read the tire pressure for the current operating conditions from the Tire and Loading Information placard or the tire pressure table. Observe the notes on tire pressure.
- Remove the valve cap of the tire to be checked.
- Press the tire pressure gauge securely onto the valve.
- Read the tire pressure.
- If the tire pressure is lower than the recommended value, increase the tire pressure to the recommended value.
- If the tire pressure is higher than the recommended value, release air. To do so, press down the metal pin in the valve, e.g. using the tip of a pen for example. Then check the tire pressure again using the tire pressure gauge.
- Screw the valve cap onto the valve.
Tire pressure monitoring system

Function of the tire pressure monitoring system

**DANGER** Risk of accident due to incorrect tire pressure

Every tire, including the spare (if provided), should be checked when cold at least once a month and inflated to the pressure recommended by the vehicle manufacturer (see Tire and Loading Information placard on the B-pillar on the driver’s side or the tire pressure label on the inside of the fuel filler flap of your vehicle). If your vehicle has tires of a different size than the size indicated on the Tire and Loading Information placard or the tire pressure table, you need to determine the proper tire pressure for those tires.

As an added safety feature, your vehicle has been equipped with a tire pressure monitoring system (TPMS) that illuminates a low tire pressure indicator lamp when one or more of your tires are significantly underinflated. Accordingly, if the low tire pressure indicator lamp lights up, you should stop and check your tires as soon as possible, and inflate them to the proper pressure. Driving on a significantly underinflated tire causes the tire to overheat and can lead to tire failure. Underinflation also increases fuel consumption and reduces tire tread life, and may affect the vehicle’s handling and braking ability. Please note that the TPMS is not a substitute for proper tire maintenance, and it is the driver’s responsibility to maintain correct tire pressure, even if underinflation has not reached the level to trigger illumination of the TPMS low tire pressure indicator lamp.

Your vehicle has also been equipped with a TPMS malfunction indicator to indicate when the system is not operating properly. The TPMS malfunction indicator is combined with the low tire pressure indicator lamp. When the system detects a malfunction, the indicator lamp will flash for approximately a minute and then remain continuously illuminated. This sequence will continue upon subsequent vehicle start-ups as long as the malfunction exists.

When the malfunction indicator is illuminated, the system may not be able to detect or signal low tire pressure as intended. TPMS malfunctions may occur for a variety of reasons, including the installation of incompatible replacement or alternate tires or wheels on the vehicle that prevent the TPMS from functioning properly.

Always check the TPMS malfunction warning lamp after replacing one or more tires or wheels on your vehicle to ensure that the replacement or alternate tires and wheels allow the TPMS to continue to function properly.
The system checks the tire pressure and the tire temperature of the tires installed on the vehicle by means of a tire pressure sensor. New tire pressure sensors, e.g. in winter tires, are automatically taught-in during the first journey they are used.

The tire pressure and the tire temperature appear in the multifunction display (→ page 392). If there is a substantial pressure loss or if the tire temperature is excessive, you will be warned in the following ways:
- via display messages (→ page 458)
- via the [ ] warning lamp in the instrument cluster (→ page 486)

The tire pressure monitoring system is only an aid. It is the driver’s responsibility to set the tire pressure to the recommended cold tire pressure suitable for the operating situation. Set the tire pressure for cold tires using a tire pressure gauge. Note that the correct tire pressure for the current operating situation must first be taught-in to the tire pressure monitoring system.

In most cases, the tire pressure monitoring system will automatically update the new reference values after you have changed the tire pressure. You can, however, also update the reference values by restarting the tire pressure monitoring system manually (→ page 393).

System limitations
The system may be impaired or may not function in the following situations:
- If the tire pressure is set incorrectly
- If there is a sudden pressure loss caused, for example, by a foreign object penetrating the tire
- If there is a malfunction caused by another radio signal source

Make sure to observe the following further related subject:
- Notes on tire pressure (→ page 388)

Checking the tire pressure with the tire pressure monitoring system
Requirements:
- The ignition is switched on.

On-board computer:
→ Service  ➔ Tires
One of the following displays appears:
- Current tire pressure and tire temperature of the individual wheels:

- Tire pressure will be displayed after driving a few minutes
- Tire Pressure Monitor Active: the teach-in process of the system is not yet complete. The tire pressures are already being monitored.

Compare the tire pressure with the recommended tire pressure for the current operat-
The values displayed in the multifunction display may deviate from those of the tire pressure gauge as they refer to sea level. At high altitudes, the tire pressure values indicated by a pressure gauge are higher than those shown by the on-board computer. In this case, do not reduce the tire pressure.

Make sure to observe the following further related subject:
- Notes on tire pressure (→ page 388)

**Restarting the tire pressure monitoring system**

**Requirements:**
- The recommended tire pressure is correctly set for the respective operating status on each of the four wheels (→ page 388).

Restart the tire pressure monitoring system in the following situations:
- The tire pressure has changed.
- The wheels or tires have been changed or newly installed.

On-board computer:

- Swipe downwards on the Touch Control on the left-hand side of the steering wheel. The Use Current Pressures as New Reference Values? message is shown in the multifunction display.
- To begin restart, press the Touch Control on the left-hand side of the steering wheel. The Tire Press. Monitor Restarted message is shown in the multifunction display.

Current warning messages are deleted and the yellow warning lamp goes out.

After you have been driving for a few minutes, the system checks whether the current tire pressures are within the specified range. The current tire pressures are then accepted as reference values and monitored.

Make sure to observe the following further related subject:
- Notes on tire pressure (→ page 388)

Further information on the declaration of conformity for wireless vehicle components (→ page 24).

**Loading the vehicle**

**Notes on Tire and Loading Information placard**

**WARNING** Risk of accident from overloaded tires

Overloaded tires may overheat and burst as a consequence. Overloaded tires can also...
impair the steering and handling characteristics and lead to brake failure.

- Observe the load-bearing capacity of the tires.
- The load-bearing capacity must be at least half the gross axle weight rating of the vehicle.
- Never overload the tires by exceeding the maximum load.

The Tire and Loading Information placard is on the B-pillar on the driver’s side of the vehicle.

The data shown in the illustration is example data.

The Tire and Loading Information placard shows:
- Maximum number of seats according to the maximum number of people permitted to travel in the vehicle.
- Maximum permissible load comprises the gross weight of all vehicle occupants, load and luggage.

- Recommended tire pressures for cold tires. The recommended tire pressures are valid for the maximum permissible load and up to the maximum permissible vehicle speed.

Please also note:
- Information on permissible weights and loads on the vehicle identification plate (→ page 418).
- Information on tire pressure in the tire pressure table (→ page 389).

Further related subjects:
- Determining the maximum permissible load (→ page 394)
- Notes on tire pressure (→ page 388).

Determining the maximum permissible load

The following steps have been developed as required of all manufacturers under Title 49, Code of U.S. Federal Regulations, Part 575, pursuant to the "National Traffic and Motor Vehicle Safety Act of 1966".
Step 1: locate the statement "The combined weight of occupants and load should never exceed XXX kg or XXX lbs." ("The combined weight of occupants and load should never exceed XXX kg or XXX lbs.") on your vehicle’s Tire and Loading Information placard.

Step 2: determine the combined weight of the driver and passengers that will be traveling in your vehicle.

Step 3: subtract the combined weight of the driver and passengers from XXX kg or XXX lbs.

Step 4: the resulting figure equals the permissible cargo and luggage load capacity. For example: If "XXX" equals 1400 lbs and there are five occupants in your vehicle with a weight of 150 lbs each, the maximum cargo and luggage load capacity is 650 lbs (1400 - 750 (5 x 150) = 650 lbs).

Step 5: determine the combined weight of luggage and load that the vehicle will be carrying. For safety reasons, this weight may not safely exceed the available cargo and luggage load capacity calculated in step 4.

Even if you have calculated the total load carefully, you should still make sure that the maximum permissible gross mass and the maximum permissible axle load of your vehicle are not exceeded. Details can be found on the vehicle identification plate.

Have your loaded vehicle – including driver, occupants and load – weighed on a vehicle weighbridge.

The measured values may not exceed the maximum permissible values stated on the vehicle identification plate.

Further related subjects:

- Tire pressure table (→ page 389)
- Vehicle identification plate

Calculation example for determining the maximum load

The following table shows examples of how to calculate total and load capacities with varying seating configurations and different numbers and sizes of occupants. The following examples use a maximum load of 1500 lbs (680 kg). This is for illustration purposes only. Make sure you are using the actual load limit for your vehicle stated on your vehicle’s Tire and Loading Information placard (→ page 393).

The higher the weight of all the occupants, the smaller the maximum load for luggage.

Tire labeling

Overview of tire labeling

1. Uniform Tire Quality Grading Standard (→ page 398)
2. DOT, Tire Identification Number (→ page 399)
3. Maximum tire load (→ page 400)
4. Maximum tire pressure (→ page 400)
5. Manufacturer
6. Characteristics of the tire (→ page 401)
7. Tire size designation, load-bearing capacity, speed rating and load index (→ page 401)
8. Tire name

The data shown in the image is example data.

Tire Quality Grading

In accordance with the US Department of Transportation's "Uniform Tire Quality Grading Standards", tire manufacturers are required to grade their tires on the basis of the following three performance factors:

1. Tread wear grade
2. Traction grade
3. Temperature grade

The classification is not legally stipulated for Canada, but it is generally stated.

Tread wear grade

The tread wear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified test track of the US Department of Transportation. For example, a tire graded 150 would wear one
and one-half times as well on the government test track as a tire graded 100. The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate conditions.

**Traction grade**

**DANGER Risk of accident due to inadequate traction**

The traction grade assigned to this tire is based on straight-ahead braking traction tests, and does not include either acceleration, cornering, hydroplaning or peak traction characteristics.

- Always adapt your driving style and drive at a speed to suit the prevailing traffic and weather conditions.

**NOTE Damage to the drivetrain from wheelspin**

- Avoid wheelspin.

The traction grades – from highest to lowest – are AA, A, B and C. Those grades represent the tire’s ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces made of asphalt and concrete.

**Temperature grade**

**WARNING Risk of accident from tire overheating and tire failure**

The temperature grade for this tire is established for a tire that is properly inflated and not overloaded. Excessive speed, underinflation, or excessive loading, either separately or in combination, can cause excessive heat build-up and possible tire failure.

- Observe the recommended tire pressures and regularly check the tire pressure of all tires including the spare wheel.
- Adjust the tire pressure as necessary.

The temperature grades are A (the highest), B and C. They represent the tire’s resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. Grade C corresponds to a level of performance which all passenger car tires must meet under the requirements of the US Department of Transportation.

**DOT, Tire Identification Number (TIN)**

US tire regulations stipulate that every tire manufacturer or retreader must imprint a TIN in or on the side wall of each tire produced.
The TIN is a unique identification number to identify tires and comprises the following:

- **DOT (Department of Transportation):** tire symbol marks indicating that the tire complies with the requirements of the US Department of Transportation.

- **Manufacturer identification code:** manufacturer identification code contains details of the tire manufacturer. New tires have a code with two symbols. Retreaded tires have a code with four symbols. Further information on retreaded tires (→ page 406).

- **Tire size:** identifier describes the tire size.

- **Tire type code:** tire type code can be used by the manufacturer as a code to describe specific characteristics of the tire.

- **Manufacturing date:** manufacturing date provides information about the age of a tire. The 1st and 2nd positions represent the calendar week and the 3rd and 4th positions state the year of manufacture (e.g. "3208" represents the 32nd week of 2008).

**Information on the maximum tire load**

- **Maximum tire load** is the maximum permissible weight for which the tire is approved. Do not overload the tires by exceeding the specified load limit. The maximum permissible load can be found on the vehicle’s Tire and Loading Information placard on the B-pillar on the driver’s side (→ page 393).

**Specifications for maximum tire pressure**

- The data shown in the image is example data.
Never exceed maximum tire pressure specified for the tire.

**Information on tire characteristics**

The data shown in the image is example data.

This information describes the type of tire cord and the number of layers in side wall and under tire tread.

**Tire size designation, load-bearing capacity, speed rating and load index**

Information about reading tire data can be obtained from any qualified specialist workshop.

**WARNING** Risk of injury through exceeding the specified tire load rating or the permissible speed rating

Exceeding the specified tire load rating or the permissible speed rating may lead to tire damage and to the tires bursting.

- Therefore, only use tire types and sizes approved for your vehicle model.
- Observe the tire load rating and speed rating required for your vehicle.
Preceding letter ①:
- Without: passenger vehicle tires according to European manufacturing standards.
- "P": passenger vehicle tires according to US manufacturing standards.
- "LT": light truck tires according to US manufacturing standards.
- "T": compact emergency spare wheels with high tire pressure that are only designed for temporary use in an emergency.

Aspect ratio ②:
Ratio between tire height and tire width in percent (tire height divided by tire width).

Tire code ③ (tire type):
- "R": radial tire
- "D": bias ply tire
- "B": bias belted tires
- "ZR": radial tire with a maximum speed above 149 mph (240 km/h) (optional)

Rim diameter ④:
The diameter of the bead seat (not the diameter of the rim flange). The rim diameter is specified in inches (in).

Load-bearing index ⑤:
Numerical code that specifies the maximum load-bearing capacity of a tire (e.g. "91" corresponds to 1356 lbs (615 kg)).

The load-bearing capacity of the tire must be at least half the permissible axle load of your vehicle. Do not overload the tires by exceeding the specified load limit.

See also:
- Maximum permissible load on the Tire and Loading Information placard (→ page 393)
- Maximum tire load (→ page 400)
- Load index

Speed rating ⑦:
Specifies the approved maximum speed of the tire.

An electronic speed limiter prevents your vehicle from exceeding a speed of 130 mph (210 km/h).

Make sure that your tires have the required speed rating. You can obtain information on the required speed rating from an authorized Mercedes-Benz Center.

### Summer tires

</tbody>
</table>
Index | Speed rating
--- | ---
ZR...Y | up to 186 mph (300 km/h)
ZR...(Y) | over 186 mph (300 km/h)
ZR | over 149 mph (240 km/h)

- Specifying the speed rating as the "ZR" index in tire code  is optional for tires up to 186 mph (300 km/h).
- If your tire code  includes "ZR" and there is no speed rating , find out what the maximum speed is from the tire manufacturer.
- If load-bearing index  and speed rating  are in brackets, the maximum speed rating of your tire is above 186 mph (300 km/h). To find out the maximum speed, ask the tire manufacturer.

**All-weather tires and winter tires**

Winter tires bear the ❄️ snowflake symbol and fulfill the requirements of the Rubber Manufacturers Association (RMA) and the Rubber Association of Canada (RAC) regarding the tire traction on snow.

**Load index**
- No specification given: standard load (SL) tire
- "XL" or "Extra Load": extra load tire or reinforced tire
- "Light Load": light load tire

**Definition of terms for tires and loading**

**Tire structure and characteristics:** describes the number of layers or the number of rubber-coated belts in the tire contact surface and the tire wall. These are made of steel, nylon, polyester and other materials.

**Bar:** metric unit for tire pressure.
14.5038 pounds per square inch (psi) and 100 kilopascal (kPa) is the equivalent of one bar.

**DOT (Department of Transportation):** DOT-marked tires fulfill the requirements of the US Department of Transportation.

**Average weight of the vehicle occupants:** the number of vehicle occupants for which the vehicle is designed, multiplied by 150 lb (68 kg).

---

1 "ZR" stated in the tire code.
2 Or "M+S ❄️ " for winter tires
Uniform Tire Quality Grading Standards: a uniform standard to grade the quality of tires with regard to tread quality, tire traction and temperature characteristics. The quality grading assessment is made by the manufacturer following specifications from the U.S. government. The quality grade of a tire is imprinted on the side wall of the tire.

Recommended tire pressure: the recommended tire pressure is the tire pressure specified for the tires mounted to the vehicle at the factory.

The tire and information table contains the recommended tire pressures for cold tires, the maximum permissible load and the maximum permissible vehicle speed.

The tire pressure table contains the recommended tire pressures for cold tires under various operating conditions, i.e. loading and/or speed of the vehicle.

Increased vehicle weight due to optional equipment: the combined weight of all standard and optional equipment available for the vehicle, regardless of whether it is actually installed on the vehicle or not.

Rim: the part of the wheel on which the tire is installed.

GAWR (Gross Axle Weight Rating): the GAWR is the maximum permissible axle load. The actual load on an axle must never exceed the gross axle weight rating. The gross axle weight rating can be found on the vehicle identification plate on the B-pillar on the driver’s side.

Speed rating: the speed rating is part of the tire identification. It specifies the speed range for which a tire is approved.

GVW (Gross Vehicle Weight): the gross vehicle weight comprises the weight of the vehicle including fuel, tools, the spare wheel, accessories installed, occupants, luggage and the trailer drawbar nose weight, if applicable. The gross vehicle weight must not exceed the gross vehicle weight rating GVWR as specified on the vehicle identification plate on the B-pillar on the driver’s side.

GVWR (Gross Vehicle Weight Rating): the GVWR is the maximum permitted gross weight of the fully laden vehicle (weight of the vehicle including all accessories, occupants, fuel, luggage and the trailer drawbar nose weight if applicable). The gross vehicle weight rating is specified on the vehicle identification plate on the B-pillar on the driver’s side.

Maximum weight of the laden vehicle: the maximum weight is the sum of the curb weight of the vehicle, the weight of the accessories, the maximum load and the weight of optional equipment installed at the factory.

Kilopascal (kPa): metric unit for tire pressure. 6.9 kPa corresponds to 1 psi. Another unit for tire pressure is bar. 100 kilopascal (kPa) equals 1 bar.

Load index: in addition to the load-bearing index, the load index may also be imprinted on the side wall of the tire. This specifies the load-bearing capacity of the tire more precisely.

Curb weight: the weight of a vehicle with standard equipment including the maximum capacity of fuel, oil and coolant. It also includes the air conditioning system and optional equipment if
these are installed on the vehicle, but does not include passengers or luggage.

**Maximum tire load:** the maximum tire load is the maximum permissible weight in kilograms or lbs for which a tire is approved.

**Maximum permissible tire pressure:** maximum permissible tire pressure for one tire.

**Maximum load on one tire:** maximum load on one tire. This is calculated by dividing the maximum axle load of one axle by two.

**PSI (pounds per square inch):** standard unit of measurement for tire pressure.

**Aspect ratio:** ratio between tire height and tire width in percent.

**Tire pressure:** pressure inside the tire applying an outward force to every square inch of the tire. The tire pressure is specified in pounds per square inch (psi), in kilopascals (kPa) or in bar. The tire pressure should only be corrected when the tires are cold.

**Cold tire pressure:** the tires are cold when the vehicle has been parked for at least 3 hours without direct sunlight on the tires or the vehicle has been driven for less than 1 mile (1.6 km).

**Tire contact surface:** the part of the tire that comes into contact with the road.

**Tire bead:** the purpose of the tire bead is to ensure that the tire sits securely on the wheel rim. There are several wire cores in the tire bead to prevent the tire from changing length on the wheel rim.

**Side wall:** the part of the tire between the tread and the tire bead.

**Weight of optional equipment:** the combined weight of the optional equipment weighing more than the replaced standard parts and more than 5 lbs (2.3 kg). This optional equipment, such as high-performance brakes, level control system, a roof luggage rack or high-performance batteries, is not included in the curb weight and the weight of the accessories.

**TIN (Tire Identification Number):** a unique identification number which can be used by a tire manufacturer to identify tires, for example, in a product recall, and thus identify the purchasers. The TIN is made up of the manufacturer’s identity code, tire size, tire type code and the manufacturing date.

**Load-bearing index:** the load-bearing index is a code that contains the maximum load-bearing capacity of a tire.

**Traction:** traction is the grip resulting from friction between the tires and the road surface.

**Wear indicator:** narrow bars (tread wear bars) that are distributed over the tire contact surface. If the tire tread is level with the bars, the wear limit of 1/16 in (1.6 mm) has been reached.

**Distribution of vehicle occupants:** distribution of vehicle occupants over designated seat positions in a vehicle.

**Maximum permissible payload weight:** nominal load and luggage load plus 150 lb (68 kg) multiplied by the number of seats in the vehicle.
Changing a wheel

Notes on selecting, installing and replacing tires

You can ask for information regarding permitted wheel/tire combinations at an authorized Mercedes-Benz Center.

⚠️ WARNING Risk of accident due to incorrect dimensions of wheels and tires

If wheels and tires of the wrong size are installed, the wheel brakes or wheel suspension components may be damaged.

- Always replace wheels and tires with those that fulfill the specifications of the original part.

When replacing wheels, make sure to fit the correct:
- Designation
- Model

When replacing tires, make sure to install the correct:
- Designation
- Manufacturer
- Model

⚠️ WARNING Risk of injury through exceeding the specified tire load rating or the permissible speed rating

Exceeding the specified tire load rating or the permissible speed rating may lead to tire damage and to the tires bursting.

- Therefore, only use tire types and sizes approved for your vehicle model.
- Observe the tire load rating and speed rating required for your vehicle.

⚠️ NOTE Vehicle and tire damage through tire types and sizes that have not been approved

For safety reasons, only use tires, wheels and accessories which have been specially approved by Mercedes-Benz for your vehicle. These tires are specially adapted to the control systems, such as ABS, ESP® and 4MATIC, and marked as follows:

- MO = Mercedes-Benz Original
- MOE = Mercedes-Benz Original Extended (run-flat tire only for certain wheels)
- MO1 = Mercedes-Benz Original (only certain AMG tires)

Certain characteristics, such as handling, vehicle noise emissions, fuel consumption, etc. may otherwise be adversely affected. Furthermore, other tire sizes could result in the tires rubbing against the body and axle components when loaded. This could result in damage to the tire or the vehicle.
Only use tires, wheels and accessories that have been checked and recommended by Mercedes-Benz.

**NOTE** Risk to driving safety from retreaded tires

Retreaded tires are neither tested nor recommended by Mercedes-Benz, since previous damage cannot always be detected on retreaded tires.

For this reason driving safety cannot be guaranteed.

Do not use used tires if you have no information about their previous usage.

**NOTE** Possible damage to wheels or tires when driving over obstacles

Large wheels have a lower tire section width. The lower the tire section width, the greater is the risk of damage to wheels or tires when driving over obstacles.

Avoid obstacles or drive particularly carefully.

**NOTE** Damage to electronic component parts from the use of tire-mounting tools

**Vehicles with a tire pressure monitoring system:** Electronic component parts are located in the wheel. Tire-mounting tools should not be used in the area of the valve. This could otherwise damage the electronic component parts.

Have the tires changed at a qualified specialist workshop only.

**NOTE** Damage to summer tires at low ambient temperatures

At low ambient temperatures, tears could form when driving with summer tires, causing permanent damage to the tires.

At temperatures below 45 °F (7 °C), use M+S tires.

Accessory parts that are not approved for your vehicle by Mercedes-Benz or are not being used correctly can impair the operating safety.

Before purchasing and using non-approved accessories, visit a qualified specialist workshop and inquire about:

- Suitability
- Legal stipulations
- Factory recommendations

**WARNING** Risk of accident with high performance tires

The special tire tread in combination with the optimized tire compound means that the risk of skidding or hydroplaning on wet roads is increased.

In addition, the tire grip is greatly reduced at a low outside temperature and tire running temperature.

- Switch on the ESP® and adapt your driving style accordingly.
- Use M+S tire at outside temperatures of less than 10 °C (50 °F).
Observe the following when selecting, installing and replacing tires:

- Only use tires and wheels of the same type (summer tires, winter tires, MOExtended tires) and the same make.
- Only install wheels of the same size on one axle (left and right).
  It is only permissible to install a different wheel size in the event of a flat tire in order to drive to the specialist workshop.
- Only install tires of the correct size onto the wheels.

**Vehicles with a tire pressure monitoring system:** All installed wheels must be equipped with functioning sensors for the tire pressure monitoring system.

- At temperatures below 45 °F (7 °C), use winter tires or all-season tires marked M+S for all wheels.

  Winter tires bearing the snowflake symbol in addition to the M+S marking provide the best possible grip in wintry road conditions.

  - For M+S tires, only use tires with the same tread.
  - Observe the maximum permissible speed for the M+S tires installed.
    - If this is below the vehicle's maximum speed, this must be indicated by an appropriate label in the driver’s field of vision.
  - Break in new tires at moderate speeds for the first 60 miles (100 km).
  - Replace the tires after six years at the latest, regardless of wear.

  **When replacing with tires that do not feature run-flat characteristics:** vehicles with MOExtended tires are not equipped with a TIREFIT kit at the factory. Equip the vehicle with a TIREFIT kit after replacing with tires that do not feature run-flat characteristics, e.g. winter tires.

  For more information on wheels and tires, contact a qualified specialist workshop.

  Be sure to also observe the following further related subjects:

  - Notes on tire pressure (→ page 388)
  - Tire and Loading Information placard (→ page 393)
  - Tire size designation, load-bearing capacity, speed rating and load index (→ page 401)
  - Tire pressure table (→ page 389)

**WARNING Risk of accident caused by non-approved tire types**

If you use tire types that have not been adapted to changes made to the factory speed limit, this can have the following consequences:

- The tires do not exhibit the required quality characteristics and are not suitable for high speeds or the relevant driving dynamics.
- The tires wear unevenly and could, therefore, affect the roadworthiness of the vehicle.
- ABS, ESP® and cruise control operation are restricted.

This can jeopardize road safety.
Only use tire types that have been approved for the maximum road speed set and the vehicle.

Notes on rotating wheels

WARNING Risk of injury through different wheel sizes
Interchanging the front and rear wheels if the wheels or tires have different dimensions may severely impair the driving characteristics. The wheel brakes or wheel suspension components may also be damaged.

Rotate front and rear wheels only if the wheels and tires are of the same dimensions.

The wear patterns on the front and rear wheels differ:
- Front wheels wear more on the shoulder of the tire
- Rear wheels wear more in the center of the tire

On vehicles that have the same size front and rear wheels, rotate the wheels according to the intervals in the tire manufacturer’s warranty book in your vehicle documents. If this is not available, rotate the tires every 3,000 to 6,000 miles (5,000 to 10,000 km), depending on the wear. Ensure that the direction of rotation is maintained.

It is imperative to observe the instructions and safety notes on "Wheel change" when doing so.

Notes on storing wheels

- After removing wheels, store them in a cool, dry and preferably dark place.
- Protect the tires from contact with oil, grease or fuel.

Overview of the tire-change tool kit

Apart from some country-specific variants, vehicles are not equipped with a tire-change tool kit.

For more information on which tire-change tools are required and approved for performing a wheel change on your vehicle, consult a qualified specialist workshop.

You require the following tools, for instance, to change a wheel:
- Jack
- Chock
- Lug wrench
- Alignment bolt

The tire-change tool kit is located in tool bag 1 in the cargo compartment.
Setting up the folding chock

Preparing the vehicle for a wheel change

Requirements:
- The required tire-change tool is available. If your vehicle is not equipped with the tire-change tool kit, consult a qualified specialist workshop to find out about suitable tools.
- The vehicle is not on a slope.
- The vehicle is on solid, non-slippery and level ground.
- Apply the electric parking brake manually.
- Move the front wheels to the straight-ahead position.
- **Vehicles with automatic transmission:** Shift into position [P].
- **Vehicles with level control system:** Set the normal vehicle level.
- Switch off the engine.
- Make sure that the engine cannot be started.
- Place chocks or other suitable items under the front and rear of the wheel that is diagonally opposite the wheel you wish to change.
- Remove the hub caps if necessary (→ page 411).
- Raise the vehicle (→ page 411).

1 Tool bag

Tool bag 1 contains:
- Jack
- Gloves
- Lug wrench
- Alignment bolt
- Folding chock
- Ratchet for jack
Removing and installing hub caps

Requirements:
- The vehicle is prepared for a wheel change (→ page 410).

Plastic hub cap
- **To remove:** turn the center cover of the hub cap counter-clockwise and remove the hub cap.
- **To install:** make sure that the center cover of the hub cap is turned counter-clockwise.
- Position the hub cap and turn the center cover clockwise until the hub cap engages physically and audibly.

Aluminum hub cap
- **To remove:** position socket 2 on hub cap 1. The socket can be found in the tire-change tool kit.
- Position wheel wrench 3 on socket 2.
- Using wheel wrench 3, turn hub cap 1 counter-clockwise and remove it.
- **To install:** position hub cap 1 and turn until it is completely flush with the wheel.
- Position socket 2 on hub cap 1.

- Attach wheel wrench 3 to socket 2 and tighten the hub cap clockwise. **Specified tightening torque:** 20 lb-ft (27 Nm).
- Raise the vehicle (→ page 411).

Raising the vehicle when changing a wheel

Requirements:
- There are no persons in the vehicle.
- The vehicle has been prepared for a wheel change (→ page 410).
- The hub caps have been removed (→ page 411).

Important notes on using the jack:
- Only use the vehicle-specific jack that has been tested and approved by Mercedes-Benz to raise the vehicle.
- The jack is only designed for raising and holding the vehicle for a short time while a wheel is being changed and not for maintenance work under the vehicle.
• The jack must be placed on a firm, flat and non-slip surface. If necessary, use a large, flat, load-bearing, non-slip underlay.
• The foot of the jack must be positioned vertically under the jacking point.

Rules of conduct when the vehicle is raised:
• Never place your hands or feet under the vehicle.
• Do not lie under the vehicle.
• Do not start the engine and do not release the electric parking brake.
• Do not open or close any doors or the tailgate.

- Using the lug wrench, loosen the wheel bolts on the wheel you wish to change by about one full turn. Do not unscrew the bolts completely.

Position of jack support points

- Warning: Risk of injury from incorrect positioning of the jack

If you do not position the jack correctly at the appropriate jacking point of the vehicle, the jack could tip with the vehicle raised.
- Only position the jack at the appropriate jacking point of the vehicle. The base of the jack must be positioned vertically under the jacking point of the vehicle.

- Note: Vehicle damage from the jack

If you do not position the jack correctly at the appropriate jack support point of the vehicle, the jack could tip over with the vehicle raised.
- The jack is designed exclusively for jacking up the vehicle at the jack support points.
- Take the ratchet wrench out of the tire-change tool kit and place it on the hexagon nut of the jack so that the letters ”AUF” are visible.
Position jack 2 at jack support point 1.

Turn ratchet wrench 3 clockwise until jack 2 sits completely on jack support point 1 and the base of the jack lies evenly on the ground.

Continue to turn ratchet wrench 3 until the tire is raised a maximum of 1.2 in (3 cm) off the ground.

Loosen and remove the wheel (→ page 413).

Removing a wheel

Requirements:
- The vehicle is raised (→ page 411).

Vehicles with AMG ceramic high-performance composite braking system:

**NOTE** Damage to the ceramic brake disk when changing a wheel

**Mercedes-AMG vehicles with ceramic brake disks:** during removal and repositioning of the wheel, the wheel rim may strike the ceramic brake disk and damage it.
- Take particular care.
- Ask another person for assistance or use a second centering pin.

When changing a wheel, avoid applying any force to the brake discs, since this could impair the level of comfort when braking.

**NOTE** Damage to threading from dirt on wheel bolts

- Do not place wheel bolts in sand or on a dirty surface.

- Unscrew the uppermost wheel bolt completely.

- Screw alignment bolt 1 instead of the wheel bolt into the threading.
- Unscrew the remaining wheel bolts fully.
- Remove the wheel.
- Install the new wheel (→ page 414).
Mounting a new wheel

Requirements:
- The wheel is removed (→ page 413).

**WARNING Risk of accident from losing a wheel**

Oiled, greased or damaged wheel bolt/wheel nut threads or wheel hub/wheel mounting bolt threads can cause the wheel bolts/wheel nuts to come loose.

As a result, you could lose a wheel while driving.
- Never oil or grease the threads.
- In the event of damage to the threads, contact a qualified specialist workshop immediately.
- Have the damaged wheel bolts or damaged hub threads replaced.
- Do not continue driving.

Observe the information on the choice of tires (→ page 406).

For tires with a specified direction of rotation, an arrow on the side wall of the tire indicates the correct direction of rotation. Observe the direction of rotation when installing.

**NOTE Damage to the ceramic brake disk when changing a wheel**

**Mercedes-AMG vehicles with ceramic brake disks:** during removal and repositioning of the wheel, the wheel rim may strike the ceramic brake disk and damage it.
- Take particular care.
- Ask another person for assistance or use a second centering pin.

Slide the wheel to be mounted onto the alignment bolt and push it on.

**WARNING Risk of injury from tightening wheel bolts and nuts**

If you tighten the wheel bolts or wheel nuts when the vehicle is raised, the jack could tip.

- Only tighten wheel bolts or wheel nuts when the vehicle is on the ground.
- Be sure to observe the instructions and safety notes on "Changing a wheel" (→ page 406).
- For safety reasons, only use wheel bolts which have been approved by Mercedes-Benz and for the wheel in question.

**NOTE Damage to paintwork of the wheel rim when screwing on the first wheel bolt**

- Press the wheel firmly against the wheel hub when screwing on the first wheel bolt.

- Tighten the wheel bolts evenly in a diagonal pattern in the order indicated until they are finger-tight.
- Unscrew the alignment bolt.
Tighten the last wheel bolt until it is finger-tight.

Lower the vehicle (→ page 415).

**Lowering the vehicle after a wheel change**

**Requirements:**
- The new wheel has been installed (→ page 414).

Place the ratchet wrench onto the hexagon nut of the jack so that the lettering "AB" is visible.

**To lower the vehicle:** turn the ratchet wrench of the jack counter-clockwise.

Tighten the wheel bolts evenly in a diagonal pattern in the order indicated (1 to 5).

**Specified tightening torque:** 111 lb-ft (150 Nm).

**WARNING** Risk of injury through incorrect tightening torque

The wheels could come loose if the wheel bolts or wheel nuts are not tightened to the prescribed tightening torque.

- Make sure the wheel bolts or wheel nuts are tightened to the prescribed tightening torque.
- If you are not sure, do not move the vehicle. Consult a qualified specialist workshop and have the tightening torque checked immediately.

Check the tire pressure of the newly mounted wheel and adjust accordingly.

**Vehicles with a tire pressure monitoring system:** Restart the tire pressure monitoring system (→ page 393).

Make sure to observe the following further related subject:
- Notes on tire pressure (→ page 388)
Notes on technical data
The data stated only applies to vehicles with standard equipment. You can obtain further information from an authorized Mercedes-Benz Center.

Vehicle electronics
Two-way radios
Notes on installing two-way radios

⚠️ WARNING Risk of accident due to improper work on two-way radios

The electromagnetic radiation from two-way radios can interfere with the on-board electronics if RF transmitters are manipulated or retrofitted incorrectly.
This could jeopardize the operating safety of the vehicle.

- You should have all work on electrical and electronic components carried out at a qualified specialist workshop.

⚠️ WARNING Risk of accident from incorrect operation of two-way radios

If you operate two-way radios incorrectly in the vehicle, the electromagnetic radiation could interfere with the on-board electronics, e.g.:
- if the two-way radio is not connected to an exterior antenna
- if the exterior antenna is not correctly mounted or is not of low reflection

This could jeopardize the operating safety of the vehicle.

- Have the low-reflection exterior antenna installed at a qualified specialist workshop.
- When operating two-way radios in the vehicle, always connect them to the low-reflection exterior antenna.

⚠️ NOTE Invalidation of the operating permit due to failure to comply with the instructions for installation and use

The operating permit may be invalidated if the instructions for installation and use of two-way radios are not observed.

- Only use approved frequency bands.
- Observe the maximum permissible output power in these frequency bands.
- Only use approved antenna positions.
On the rear fenders, it is recommended that you install the antenna on the side of the vehicle closest to the center of the road.

Use Technical Specification ISO/TS 21609 (Road Vehicles – "EMCs for installation of aftermarket radio frequency transmitting equipment") when retrofitting two-way radios. Comply with the legal requirements for detachable parts.

If your vehicle has installations for two-way radio equipment, use the power supply and antenna connectors provided in the pre-installation. Be sure to observe the manufacturer's supplements when installing.

**Two-way radio transmission output**
The maximum transmission output (PEAK) at the base of the antenna must not exceed the values in the following table.

**Frequency band and maximum transmission output**

<table>
<thead>
<tr>
<th>Frequency band</th>
<th>Maximum transmission output</th>
</tr>
</thead>
<tbody>
<tr>
<td>Short wave 3 - 54 MHz</td>
<td>(100 W)</td>
</tr>
<tr>
<td>4 m waveband 74 - 88 MHz</td>
<td>(30 W)</td>
</tr>
</tbody>
</table>

The following devices can be used in the vehicle without restrictions:
- two-way radios with a maximum transmission output of up to 100 mW
- two-way radios with transmitter frequencies in the 380 - 410 MHz frequency band and a maximum transmission output of up to 2 W (trunked radio system/Tetra)
- mobile phones (2G/3G/4G)
There are no restrictions when positioning the antenna on the outside of the vehicle for the following wavebands:

- trunked radio system/Tetra
- 70 cm waveband
- 2G/3G/4G
Vehicle identification plate (Canada only)
1 Permissible gross weight
2 Permissible front axle load
3 Permissible rear axle load
4 Paint code
5 VIN (vehicle identification number)

The permissible gross vehicle weight is made up of the vehicle weight, all vehicle occupants, the fuel and the load. The maximum gross axle weight rating is the maximum weight that can be carried on one axle (front or rear axle).

Never exceed the permissible gross vehicle weight or the maximum gross axle weight rating for the front or rear axle.

VIN in front of the right-hand front seat

Imprinted VIN (vehicle identification number)
Floor covering

Additional plates
1 Plate with information about emissions testing, including confirmation of emissions guidelines at the U.S. federal level as well as for California
2 Imprinted engine number stamped into the crankcase
VIN (vehicle identification number) as a label at the lower edge of the windshield

Operating fluids

Notes on operating fluids

**WARNING** Risk of injury from operating fluids harmful to your health

Operating fluids may be poisonous and harmful to your health.

- Observe the text on the original containers when using, storing or disposing of operating fluids.
- Always store operating fluids sealed in their original containers.
- Always keep children away from operating fluids.

**ENVIRONMENTAL NOTE** Environmental pollution caused by environmentally irresponsible disposal

Dispose of operating fluids in an environmentally responsible manner.

Operating fluids include the following:

- Fuels
- Lubricants
- Coolant
- Brake fluid
- Windshield washer fluid
- Climate control system refrigerant

Only use products approved by Mercedes-Benz. Damage caused by the use of products that have not been approved is not covered by the Mercedes-Benz warranty or goodwill gestures.

You can identify operating fluids approved by Mercedes-Benz by the following inscriptions on the container:

- MB-Freigabe (e.g. MB-Freigabe 229.51)
- MB-Approval (e.g. MB-Approval 229.51)

Further information on approved operating fluids is available at the following locations:

- In the Mercedes-Benz Specifications for Operating Fluids by entering the designation
  - At http://bevo.mercedes-benz.com
  - In the Mercedes-Benz BeVo App
- At a qualified specialist workshop

**WARNING** Risk of fire or explosion from fuel

Fuels are highly flammable.

- Fire, open flames, smoking and creating sparks must be avoided.
- Switch off the ignition and, if it has been in use, switch off the stationary heater before you refuel your vehicle.

**WARNING** Risk of injury from fuels

Fuels are poisonous and hazardous to your health.
Do not swallow fuel or let it come into contact with skin, eyes or clothing.
Do not inhale fuel vapor.
Keep children away from fuel.
Keep doors and windows closed during the refueling process.
If you or other people come into contact with fuel, observe the following:
Immediately rinse fuel off your skin with soap and water.
If fuel comes into contact with your eyes, immediately rinse them thoroughly with clean water. Seek medical attention immediately.
If you swallow fuel, seek medical attention immediately. Do not induce vomiting.
Change immediately out of clothing that has come into contact with fuel.

Fuel

Notes on fuel grade
Observe the notes on operating fluids (→ page 420).

¡ NOTE Damage caused by the wrong fuel

Even small amounts of the wrong fuel could result in damage to the fuel system, the engine and the emission control system.
Only refuel with low-sulfur unleaded fuel.

This fuel may contain up to 10% ethanol by volume. Your vehicle is suitable for use with E10 fuel.
Never refuel with one of the following fuels:
- Diesel
- Gasoline with more than 10% ethanol by volume, e.g. E15, E85, E100
- Gasoline with more than 3% methanol by volume, e.g. M15, M30, M85, M100
- Gasoline with additives containing metal

If you have accidentally refueled with the wrong fuel:
- Do not switch on the ignition.
- Consult a qualified specialist workshop.

If the available fuel is not sufficiently low in sulfur, this can produce unpleasant odors.
Only refuel using unleaded premium grade gasoline with at least 91 AKI/95 RON.

As a temporary measure, if the recommended fuel is not available, you may also use unleaded regular gasoline which has at least the octane number specified in the instruction label in the fuel filler flap (→ page 154). This may reduce engine performance and increase fuel consumption.
Never refuel using gasoline with an even lower RON.
NOTE Premature wear caused by unleaded regular gasoline

Unleaded regular gasoline can cause the engine to wear more quickly and impair longevity and performance.

If unleaded premium grade gasoline is unavailable and you have to refuel using unleaded regular gasoline:

- Only fill the fuel tank to half full with unleaded regular gasoline and refill as soon as possible with unleaded premium grade gasoline.
- Do not drive at the maximum speed.
- Avoid sudden acceleration and engine speeds over 3,000 rpm.

Further information on fuel is available at the following locations:
- at a gas station
- at a qualified specialist workshop
- USA only: at http://www.mbusa.com

Information on additives in gasoline

Observe the notes on operating fluids (→ page 420).

NOTE Damage from use of unsuitable additives

Even small amounts of the wrong additive may lead to malfunctions occurring.

- Only add cleaning additives recommended by Mercedes-Benz to the fuel.

Mercedes-Benz recommends that you use fuel brands that have additives.

In some countries, the fuel available may not have sufficient additives. Residue could build up in the fuel injection system as a result. In this case, in consultation with an authorized Mercedes-Benz Center, the fuel may be mixed with the cleaning additive recommended by Mercedes-Benz. Be sure to observe the notes and mixing ratios specified on the container.

Engine oil

Notes on engine oil

Observe the notes on operating fluids (→ page 420).
NOTE Engine damage caused by an incorrect oil filter, incorrect oil or additives

- Do not use engine oils or oil filters other than those which meet the specifications necessary for the prescribed service intervals.
- Do not alter the engine oil or oil filter in order to achieve longer change intervals than prescribed.
- Do not use additives.
- Have the engine oil changed after the prescribed intervals.

Mercedes-Benz recommends that you have the oil change carried out at a qualified specialist workshop.

Further information on engine oil and oil filters is available at the following locations:

- In the Mercedes-Benz Specifications for Operating Fluids by entering the designation:
  - At http://bevo.mercedes-benz.com
  - In the Mercedes-Benz BeVo app

- at a qualified specialist workshop

</table>

Notes on brake fluid

Observe the notes on operating fluids (→ page 420).

WARNING Risk of an accident due to vapor pockets forming in the brake system

The brake fluid constantly absorbs moisture from the air. This lowers the boiling point of the brake fluid. If the boiling point is too low, vapor pockets may form in the brake system when the brakes are applied hard.

This causes the braking effect to be impaired.

- Have the brake fluid renewed at the specified intervals.

Have the brake fluid regularly replaced at a qualified specialist workshop.

Only use brake fluid approved by Mercedes-Benz according to MB-Freigabe or MB-Approval 331.0.
You can obtain further information on brake fluid in the following places:
- in the Mercedes-Benz Specifications for Operating Fluids
- at http://bevo.mercedes-benz.com
- in the Mercedes-Benz BeVo App
- at a qualified specialist workshop

**Coolant**

**Notes on coolant**
Observe the notes on operating fluids (→ page 420).

⚠️ **WARNING** - Risk of fire and injury from antifreeze
If antifreeze comes into contact with hot component parts in the engine compartment, it may ignite.
- Allow the engine to cool down before adding antifreeze.
- Make sure that no antifreeze spills out next to the filler opening.

⚠️ **NOTE** Damage caused by incorrect coolant from component parts before starting the vehicle.

⚠️ **NOTE** Overheating at high outside temperatures
If an inappropriate coolant is used, the engine cooling system is not sufficiently protected against overheating and corrosion at high outside temperatures.
- Always use coolant approved by Mercedes-Benz.
- Observe the instructions in the Mercedes-Benz Specifications for Operating Fluids 310.1.

Have the coolant regularly replaced at a qualified specialist workshop.

The proportion of corrosion inhibitor/antifreeze concentrate in the engine cooling system should be:
- A minimum of 50% (antifreeze protection down to approximately -35 °F (-37 °C))
- A maximum of 55% (antifreeze protection down to -49 °F (-45 °C))

Information on coolant is available at the following locations:
- In the Mercedes-Benz Specification for Operating Fluids 310.1
- At http://bevo.mercedes-benz.com
- In the Mercedes-Benz BeVo app
- At a qualified specialist workshop

- Only add coolant that has been pre-mixed with the required antifreeze protection.
- Allow the engine to cool down before adding antifreeze.
- Make sure that no antifreeze spills out next to the filler opening.

</tr>
</tbody>
</table>

Notes on windshield washer fluid

Observe the notes on operating fluids (→ page 420).

⚠️ **WARNING** - Risk of fire and injury from windshield washer concentrate

Windshield washer concentrate is highly flammable. It could ignite if it comes into contact with hot engine component parts or the exhaust system.

- Make sure that no windshield washer concentrate spills out next to the filler opening.

⚠️ **NOTE** Damage to the exterior lighting due to unsuitable windshield washer fluid

Unsuitable windshield washer fluid may damage the plastic surface of the exterior lighting.

- Only use windshield washer fluid which is also suitable for use on plastic surfaces, e.g. MB SummerFit or MB WinterFit.

⚠️ **NOTE** Blocked spray nozzles caused by mixing windshield washer fluids

Do not use distilled or de-ionized water as the fill level sensor may be triggered erroneously.

Recommended windshield washer fluid:
- Above freezing point: e.g. MB SummerFit
- Below freezing point: e.g. MB WinterFit

For the correct mixing ratio, refer to the information on the antifreeze container. Mix the washer fluid with the windshield washer fluid all year round.

**Refrigerant**

Notes on refrigerants

Observe the notes on operating fluids (→ page 420).

⚠️ **NOTE** Damage due to incorrect refrigerant

If a non-approved refrigerant is used, the climate control system may be damaged.

- Only use the refrigerant R-134a

⚠️ **NOTE** Damage to the climate control system due to incorrect refrigerant compressor oil

- Only use refrigerant compressor oil that has been approved by Mercedes-Benz.
Do not mix the approved refrigerant compressor oil with a different refrigerant compressor oil.

Work on the climate control system may only be carried out by a qualified specialist workshop. All applicable regulations, as well as SAE standard J639, must be adhered to.

The instruction label on the climate control system for the refrigerant type and the refrigerant compressor oil is located on the inside of the hood.

Display messages

Introduction

Notes on display messages
Display messages appear on the multifunction display.

Display messages with graphic symbols are simplified in the Operator's Manual and may differ from the symbols on the multifunction display. The multifunction display shows high-priority display messages in red. Certain display messages are accompanied by a warning tone.

Please respond in accordance with the display messages and follow the additional notes in this Operator's Manual.

For some display messages, a symbol is also shown:
• ictionaries

-  Hide display message
You can select the desired symbol by swiping left or right on the left-hand Touch Control. Press the symbol to show further information on the multifunction display. Press the symbol to hide the display message.
You can hide low-priority display messages by pressing the button and the left-hand Touch Control. The display messages are then stored in the message memory.

Rectify the cause of a display message as quickly as possible.

High-priority display messages cannot be hidden. The multifunction display shows these display messages continuously until the cause of the message has been rectified.

Calling up stored display messages
On-board computer:

- Service 1 Message

If there are no display messages, No Messages appears on the multifunction display.

- Scroll through the display messages by swiping upwards or downwards on the left-hand Touch Control.
- To exit the message memory: press the button.
**Safety systems**

Warning and indicator lamps

Overview of warning and indicator lamps

Some systems will perform a self-test when the ignition is switched on. Some warning and indicator lamps may briefly light up or flash. This behavior is non-critical. These warning and indicator lamps indicate a malfunction only if they light up or flash after the engine has been started or during a journey.

Instrument Display

Supersport setting

If you select the Supersport display setting, the positions of the indicator lamps on the Instrument Display will change.

Warning and indicator lamps:

- Low beam (→ page 115)
- Parking lights (→ page 115)
- High beam (→ page 116)
- Turn signal light (→ page 116)

</tbody>
</table>
| **WARNING** Danger of burns when opening the hood | If you open the hood when the engine has overheated or during a fire in the engine compartment, you could come into contact with hot gases or other escaping operating fluids.  
- Before opening the hood, allow the engine to cool down.  
- In the event of a fire in the engine compartment, keep the hood closed and call the fire service.  
- Pull over and stop the vehicle safely and switch off the engine, paying attention to road and traffic conditions. Do not continue driving under any circumstances.  
- Observe the messages on the multifunction display.  
If the coolant temperature display is at the lower end of the temperature scale:  
- Consult a qualified specialist workshop.  
or  
- Exit the vehicle and keep a safe distance from it until the engine has cooled down.  
- Check the coolant level (→ page 355).  
- Make sure that the air supply to the radiator is not obstructed.  
- Avoiding high loads on the engine, drive to the nearest qualified specialist workshop. In doing so, ensure that the coolant temperature display remains below the red area. |
### Tires

<table>
<thead>
<tr>
<th>Warning/indicator lamp</th>
<th>Possible causes/consequences and  Solutions</th>
</tr>
</thead>
</table>
| ![Warning](attachment:warning_icon.png) Tire pressure monitoring system warning lamp lights up | The yellow tire pressure monitoring system warning lamp (pressure loss/malfunction) is lit. The tire pressure monitoring system has detected tire pressure loss in at least one of the tires.  

⚠️ **WARNING** Risk of an accident due to insufficient tire pressure  

- Tire pressures that are too low pose the following hazards:  
  - The tires may burst, especially as the load and vehicle speed increase.  
  - The tires may wear excessively and/or unevenly, which may greatly impair tire traction.  
  - The driving characteristics, as well as steering and braking, may be greatly impaired.  

You could then lose control of the vehicle.  

- Observe the recommended tire pressure.  
- Adjust the tire pressure if necessary.  

- Stop the vehicle, paying attention to road and traffic conditions.  
- Check the tire pressure and the tires.  

| ![Warning](attachment:warning_icon.png) | The yellow tire pressure monitoring system warning lamp (pressure loss/malfunction) flashes for approximately one minute and then remains lit. The tire pressure monitoring system is defective. |
