Rear Seat Entertainment System

Allows the rear passengers to watch DVDs, look at their favorite pictures and even play video games on two superb 7 inches color screens. The system's separate DVD players mean that rear-seat passengers have the option of watching a different video source on each screen. The AV-IN connection, USB and SD card interfaces allow other storage media to be used too. Supplied with two sets of infrared headphones and a remote control.

Becker® MAP PILOT

Transforms your Audio 20 radio into a high-performance navigation system with 3D map views. Becker® MAP PILOT uses the standard-fit 5.8 inches color display and is conveniently operated via the vehicle controller and the Audio 20 keypad. The plug-in navigation module can be connected to your PC via USB to get the latest updates or other downloads from the Becker® MAP PILOT website (requires Code 508 – can also be ordered separately: A172 870 0090).

Available for various different model series.
A166 900 6215

Navigation-Updates

Our world is constantly changing, and with it the road network. This is why we update 20% of the information on our navigation-updates every year. Changes include new roads and junctions, altered priorities, new points of interest such as petrol stations, restaurants and additional countries including all in eastern Europe. Save time and spare yourself the annoyance of unnecessary detours by asking your Mercedes-Benz Retailer for the latest navigation-updates.

For more information on navigation map updates speak with your local dealer.

The networked car Data security and protection against external threats

Today's car transmits and receives data via a range of channels – from Bluetooth®, WLAN and mobile communication to NFC. While this may help increase convenience and safety when driving, it is understandable that drivers ask about privacy and security: is all of the personal data collected and stored in the vehicle protected against unauthorized access? And could hackers manipulate critical control elements and have an effect on the journey?

In order to protect the vehicle's electronic systems and the communication channels which are used to exchange data with the outside world, security experts at Mercedes-Benz simulate attacks on the systems on board – attacks which all vehicles to date have successfully withstood. One day, tests such as these will be as routine as crash tests.

Safety and security in all areas are vital when it comes to ensuring that drivers feel at ease in their Mercedes-Benz. As a result, it goes without saying that, for Mercedes-Benz, data security is paramount.

The Garmin® MAP PILOT. Knows the way. And much more.

You want a navigation system that's intuitive, that doesn't restrict your field of vision and that you can always rely on to guide you safely to your destination? The Garmin® MAP PILOT turns your Audio 20 into a high-performance navigation system: split screen, 3D views, display of speed limits and much more – perfectly integrated into your Mercedes-Benz and easy to operate via the Controller, the touchpad or using voice control.

AVAILABLE FOR VARIOUS DIFFERENT MODEL SERIES

Garmin® MAP PILOT

- ▶ The ingenious way to turn your Audio 20 CD into a fully-fledged navigation system with features such as 3D buildings and landmarks display, lane guidance, TMC Pro congestion avoidance and an extensive library of points of interest (POI)
- ▶ Navigation software and map data compactly delivered on the Garmin® SD card (simply plug & play)
- ▶ Easy to operate using Controller, touchpad (where available) or voice control

Turn your Audio 20 radio into a high-performance navigation system including a wide range of features that are also accessible via voice control! Whether day/night mode, alternative routes, stopping points or route guidance via geocoordinates – the Garmin® MAP PILOT offers everything you expect from your traffic assistant.

Perfect contours – sportily refined.

Intelligence and emotion are the cornerstones of the Mercedes-Benz design idiom. Add an even more individual touch to your vehicle – with Mercedes-Benz Sport Equipment. Underline your vehicle's character in elegant and sporty style. For the perfect look in any setting.

Roof spoiler

Elongates the roof line and gives the rear of the vehicle a more dynamic and sporty look. Does not affect field of vision in rear-view mirror. High-quality primed finish allows product to be painted in required color. Highly durable thanks to precision-fit, dimensionally stable polyurethane. Straightforward fitting – no need for additional drilling. No entry in vehicle documents required.
e.g. for the C-Class
A205 793 0488

Rear Spoiler

A streamlined feel: the rear spoiler from Mercedes-Benz significantly boosts the car's aerodynamics. A streamlined look: harmoniously tailored to the contours of the vehicle, the rear spoiler rounds off the sporty design.
for the E-Class

e.g. for the C-Class
A205 760 4000

Exterior mirror housing, 2-piece

Black, high-gloss Mercedes-Benz Sport Equipment exterior mirror housings for enhanced aerodynamics and an individual, sporty and dynamic look.
e.g. for the C-Class
A205 811 0400

The star logo: radiating appeal.

You can now add an even more personal touch to that already perfect look: the illuminated Mercedes star in the radiator grille, for example, sets your vehicle in the right light. And elegant, sporty add-on parts allow you to create individual highlights.

Illuminated Mercedes star logo

Let your star shine. Thanks to fiber-optic cables and LED technology, the central star logo in your Mercedes' radiator grille lights up when you remotely unlock the vehicle or open the door or tailgate. Only functions when engine is switched off. Not in conjunction with DISTRONIC.

Available for various different model series, e.g. for the M-Class
Part numbers on request.

Stainless steel-effect pedal covers

For a sporty look. With non-slip stud inlay. Available for various different model series, for automatic models

The philosophy of sensual purity In close-up: Gorden Wagener

Born in Essen, Germany, on 3 September 1968, Gorden Wagener has been Global Head of Design at Daimler AG since the middle of 2008. After studying Industrial Design at the University of Essen, he specialized in Transportation Design at the Royal College of Art in London and has worked for VW, Mazda and General Motors.

Wagener joined Mercedes-Benz in 1997. Under his leadership, a new design strategy was developed for Mercedes-Benz – a strategy which is subject to ongoing development. The focus is on sensual purity as an expression of contemporary luxury. For Wagener, a vehicle such as the S-Class, for example, is a total work of art. Combining product design, fashion design in the interior and software design for the central control concept results in an aesthetic whole. This approach is also reflected in the contemporary contours of the vehicles. Gorden Wagener's hand can be seen in the S-Class and S-Class Coupé plus, for example, the compact car family (A-Class, B-Class, CLA and GLA), the new C-Class, and the Mercedes-AMG GT.

Intelligence and emotion – the interaction of these two poles is an essential aspect of the Mercedes-Benz brand. The new design idiom epitomizes this, showcasing the brand and its products in a perfect light.

Express your personality.

Accessory wheels are only for specified tire sizes and may require the use of wheel bolts other than those originally supplied with your vehicle. Failure to use proper equipment could result in an accident or vehicle damage. Not compatible with snow chains. Serious wheel and tire damage may occur if the vehicle is operated on rough or damaged road surfaces or upon encountering road debris or obstacles. Some models are available with staggered sizes for front/rear axle(s). Please see your authorized Mercedes-Benz dealer for details and installation.

Special anniversary of a pioneering idea
In 1995, Mercedes-Benz's ESP® introduced a new safety benchmark

Alongside the seat belt, the airbag and ABS, the Electronic Stability Program, ESP®, is by far the most important safety system to feature in contemporary cars and, in Europe, has been compulsory for new passenger cars since 2011.

At Mercedes-Benz, ESP® was launched in series-produced models in early 1995 with the Coupé S 600 and the V12 models of the S-Class and the SL Roadster. In 1997, ESP® was introduced as standard for the A-Class and subsequently rolled out for all other models.

According to estimates produced by the German insurance sector, ESP® has already saved the lives of several thousand people across Europe. If the driver is at risk of losing control of the vehicle, ESP® specifically applies the brakes to one or more wheels according to the requirements and adapts the engine torque. This helps the driver to stabilize the vehicle again – particularly when cornering or swerving suddenly to avoid a collision. In the 20 years since its introduction this life-saving innovation has been constantly enhanced.

In keeping with Mercedes-Benz's "Intelligent Drive" philosophy, ESP® now has numerous subfunctions and serves as a basis for further assistance systems such as ADAPTIVE BRAKE and Dynamic Cornering Assist.

Storms? Rain? Snow? All-season mats!

Mercedes-Benz floor mats

Durability, fade-resistant color and a neutral odor, even after three winters of use, are all specifications which must be met without compromise. The mats are precision-tailored to your Mercedes-Benz using the vehicle's original CAD data and can be clip-fastened to the floor to prevent slipping. Mercedes-Benz floor mats are available to match your interior and feature an embossed star logo or an eye-catching metal badge with Mercedes-Benz lettering.

Available for various different model series.

Velour floor mats

Made to last.

Floor mats from Mercedes-Benz offer quality you can rely on. Every floor mat has to earn its star logo before it is allowed to keep your vehicle clean and dry. The mats undergo the toughest endurance and scuffing tests and have to prove resistant to sunlight, dirt and weight loading, emerging with their outstanding quality undiminished.

Inside your vehicle you can check the quality of Mercedes-Benz floor mats for yourself. They are precision-tailored to the dimensions of the footwell, clip-fastened to the floor of the vehicle to prevent slipping and absolutely dimensionally stable, thanks to their special layered format. Your floor mats are made to cope with any demand you place on them.

All-season Floorliner

Robust, washable synthetic material, designed for heavy use. Covers the entire footwell. The raised edges and structured surface help keep the floor clean and dry. With distinctive Mercedes-Benz lettering.

New technologies, new questions How society is preparing for autonomous driving

One answer to the question as to the direction mobility will take in the future is: autonomous driving. A breakthrough came in 2013 with the S 500 INTELLIGENT DRIVE. Mercedes-Benz was the world's first car manufacturer to demonstrate that autonomous

driving in urban and rural traffic is already possible using near production-standard technology. In the S-Class, E-Class and C-Class and in the new GLE Coupé, customers already make use of semi-autonomous driving functions which are constantly being enhanced. Each generation of the driver assistance systems brings autonomous driving closer to reality. In the future it will be possible to make more meaningful use of journey times and driving will become a completely different experience.

But this isn't the only issue occupying researchers and developers. Daimler is also encouraging public debate of the legal and ethical issues surrounding autonomous driving: "How should an autonomous vehicle react when faced with the risk of an accident? What are the consequences in terms of liability and insurance?"

As the leading innovator, Mercedes-Benz is, as ever, taking a responsible and competent approach to the issues raised.

Your perfect travel companion.

Style & Travel Equipment

These head restraint elements are simple to fit and remove. The modular system centers around a base support which can be combined with the product of your choice – universal hook, coat hanger or folding table.

Outstanding innovations in vehicle manufacturing
Mercedes-Benz – the leading premium brand

At the "AutomotiveINNOVATIONS Award 2015", held in Frankfurt am Main on 29 April 2015, Daimler and Mercedes-Benz received awards in several categories.

A comprehensive study by the Center of Automotive Management and the PricewaterhouseCoopers consultancy has revealed Mercedes-Benz to be the most innovative premium automotive brand with the most world firsts. Innovations highlighted included the curve tilting technology in the S-Class Coupé, the MULTIBEAM LED headlamps in the CLS and the overall concept of the CLA Shooting Brake, which leads the way in its segment by combining the beauty of a coupé with the practical benefits of an estate car.

Stuttgart-based Mercedes-Benz easily scooped the special "Most innovative brand of the last decade" prize. With almost 600 individual innovations and close to 200 world firsts, Mercedes-Benz left the competition trailing in its wake. For the developers at Mercedes-Benz, such accolades serve both to affirm their approach and to spur them on to further achievements. With a range of pioneering ideas, their endeavors will help ensure that Mercedes-Benz continues to remain the most innovative premium brand.

All set for the slopes! Practical. Comfortable. Safe.
